CVEN 4545 Steel Design or CVEN 4555 Reinforced Concrete Design 3

Credit Hours 15

Year Four

Fall Semester
AREN 4080 Architectural Studio 2 2
AREN 4318 Architectural Engineering Design 1 3
AREN 4570 Building Electrical Systems Design 1 3
Humanities & Social Sciences elective 1 3
Technical elective 3
Technical elective 3

Credit Hours 17

Spring Semester
AREN 4319 Architectural Engineering Design 2 2
Free elective 3
Humanities & Social Sciences elective 1 3
Technical elective 3
Technical elective 3

Credit Hours 14

Total Credit Hours 128

1 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).
2 Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).
3 Students who choose PHYS 1140 will take it in Year Two or later (with or after PHYS 1120)

**AREN Electives and Opportunities for Specialization**

Upon consultation with their advisors, students select technical elective courses applicable to their areas of interest and specialization. The areas of specialization are construction engineering and management, mechanical systems, structural systems, and lighting and electrical systems.

Courses may be chosen from any emphasis area. At least two technical electives must be selected from this list. Some technical electives are offered intermittently, and are not guaranteed to be offered every year.

**Learning Outcomes**

**Program Educational Objectives**

The educational objectives of the architectural engineering bachelor of science degree program are to produce graduates capable of reaching the following career goals within five years:

- Our alumni will build on the educational foundation gained through our program by establishing themselves in engineering, science or other professional careers.
- Our alumni will begin advancing the state-of-the-art of their profession including one of five core disciplines of the building industry: electrical systems; lighting systems; heating, ventilating and air conditioning (HVAC) systems; materials and structural systems; construction engineering and management.
- Our alumni will exercise leadership in their field.
- Our alumni will enhance the sustainability of the built environment.

**Student Outcomes**

The outcomes that students are expected to have attained upon graduation with the Bachelor of Science degree in Architectural Engineering are:

- An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- An ability to communicate effectively with a range of audiences.
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
• An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
• An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Areas of Knowledge
The areas of knowledge that define these objectives include both technical and non-technical areas.

Technical areas are:
• Elementary: The fundamentals for architectural engineering, including basic science and mathematics, building design and construction processes; overview of building systems; elementary principles and processes of architecture; and laboratory measurement and data analysis.
• Intermediate: Introduction to building systems and their components, with corresponding analysis of electrical, HVAC and lighting systems, as well as structural elements and components.
• Proficiency: Design, integration and advanced analysis of electrical, HVAC, lighting and structural systems; as well as the standards, codes and recommended practices that govern these building systems.
• Specialization: Advanced design, coupled with industry experience via internships, for building lighting and electrical system design, building HVAC systems design, building structural system design and construction engineering and management.

Non-technical areas include:
• Profesional life, including methods of time and resource management and professional ethics.
• Processes and requirements of written and oral communication.
• Broad areas in the humanities and social sciences, including architectural history and language.

Bachelor's–Accelerated Master's Degree Program(s)
The Bachelor's–Accelerated Master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Architectural Engineering, MS in Architectural Engineering or Civil Engineering
Admissions Requirements
In order to gain admission to the BAM programs named above, a student must meet the following criteria:
• Have a cumulative GPA of 3.000 or higher
• Completion of all MAPS requirements and no deficiencies remaining
• Have at least Junior status within the bachelor's degree program

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program/) web page for more information.

Civil Engineering - Bachelor of Science (BSCV)
The curriculum in civil engineering within the Department of Civil, Environmental and Architectural Engineering has been designed to prepare students for entry-level positions in professional practice or for graduate study in the following subdisciplines of civil engineering:
• construction engineering and management
• environmental engineering
• geotechnical engineering and geomechanics
• structural engineering and structural mechanics
• water resource engineering and management

For undergraduates who want additional preparation for graduate study and careers in research and development within civil engineering, a theoretically-based engineering science track is also available.

Colorado Mesa University/University of Colorado Boulder Partnership Program (Civil Engineering)
Colorado Mesa University (CMU) (http://www.coloradomesa.edu/engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs in their entirety in Grand Junction, Colorado. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering, civil engineering, and electrical & computer engineering, with additional details on the partnership website (https://www.coloradomesa.edu/engineering/partnership-program/).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University civil engineering partnership website (https://www.coloradomesa.edu/
Program Requirements

To earn a bachelor’s degree in civil engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Civil Engineering (https://www.colorado.edu/ceae/) webpage. Note: Some variations may be possible; see a civil engineering academic advisor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/) and all graduation requirements specified on the CEAE Department website (https://www.colorado.edu/ceae/current-students/undergraduate-studies/degree-requirements/#civil_engineering-379).

Civil engineering is also offered in partnership with Colorado Mesa University (https://www.coloradomesa.edu/engineering/partnership-program/) in Grand Junction, Colorado. Specific coursework requirements and plans of study can be found on the partnership website (https://www.coloradomesa.edu/engineering/degrees/civil-engineering-partnership.html).

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

It is the student’s responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet a prerequisite requirement.

The Civil Engineering Bachelor of Science (BSCV) program is structured around a series of core courses designed to provide a comprehensive education in the field. Below is a typical four-year plan of study that outlines the sequence of courses and credit hours required to complete the degree.

### Sample Four-Year Plan of Study

#### Year One

**Fall Semester**
- **APPM 1350** Calculus 1 for Engineers 4
- **CVEN 1317** Introduction to Civil and Environmental Engineering 1
- **CHEN 1201** General Chemistry for Engineers 1 4
- **CHEM 1114** Laboratory in General Chemistry 1 1
- First-Year Engineering Projects course 3
- Humanities & Social Sciences Elective 1 3

**Credit Hours** 16

**Spring Semester**
- **APPM 1360** Calculus 2 for Engineers 4
- **CVEN 1027** Civil Engineering Drawing or **AREN 1027** Engineering Drawing 3
- **CSCI 1200** Introduction to Computational Thinking 3
- **PHYS 1110** General Physics 1 4

**Credit Hours** 14

#### Year Two

**Fall Semester**
- **APPM 2350** Introduction to Differential Equations with Linear Algebra 4
- **CVEN 3246** Introduction to Construction 3
- **CVEN 3323** Hydraulic Engineering 3
- **CVEN 3414** Fundamentals of Environmental Engineering 3
- **CVEN 3525** Probabilistic Structural Analysis 3

**Credit Hours** 15

**Spring Semester**
- **APPM 2360** Introduction to Differential Equations with Linear Algebra 4
- **CVEN 3111** Analytical Mechanics 2 3
- **CVEN 3227** Probability, Statistics and Decision 3
- **CVEN Proficiency I** 3
- Humanities & Social Sciences elective 1 3

**Credit Hours** 15

#### Year Three

**Fall Semester**
- **CVEN 3256** Construction Equipment and Methods 4
- **CVEN 4333** Steel Design 3
- **CVEN 4545** Reinforced Concrete Design 3
- **CVEN 4555** Steel Design or **CVEN 4555** Reinforced Concrete Design 3

**Credit Hours** 15

**Technical Electives**
- **CVEN 3256** Construction Equipment and Methods 4
- **CVEN 4333** Steel Design 3
- **CVEN 4545** Reinforced Concrete Design 3

**Credit Hours** 15

#### Year Four

**Fall Semester**
- **CVEN 4897** Professional Issues in Civil Engineering 2
- **CVEN 4899** Civil Engineering Senior Project Design 4
- **CVEN Proficiency III** 3
- Humanities & Social Sciences elective 1 3

**Credit Hours** 17

**Spring Semester**
- **CVEN 4899** Civil Engineering Senior Project Design 4
- **CVEN Proficiency III** 3
- Humanities & Social Sciences elective 1 3

**Credit Hours** 16

**Total Credit Hours** 128

---

1. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).

---

1. Students who do not take a first-year projects course may substitute a basic engineering elective: any 3-credit technical course offered in ASEN, AREN, APPM, CHEN, COEN, CVEN, CSCI, ECEN, EMEN, EVEN, GEEN, MCEN, or other course approved by the CEAE Curriculum Committee. Remedial courses (such as precalculus) or courses approved as Humanities & Social Sciences electives may not be used.

2. The approved Technical Elective List can be found on the CEAE Department website (https://www.colorado.edu/ceae/current-students/undergraduate-studies/civil-advising-curriculum/).

3. For more information, see the Humanities, Social Sciences and Writing Requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) webpage.
Learning Outcomes

Program Educational Objectives
The program objectives for the bachelor of science degree in civil engineering are that within five years:

• Graduates will be successfully employed in engineering, science, or technology careers.
• Graduates will be assuming management or leadership roles.
• Graduates will engage in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies.
• Graduates will pursue professional registration or other appropriate certifications.
• Graduates will be engaged in activities that provide benefit to communities.

Student Outcomes
Upon graduation, students are expected to be able to:

• Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
• Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
• Communicate effectively with a range of audiences.
• Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
• Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
• Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• Acquire and apply new knowledge as needed, using appropriate learning strategies.

Before their graduation, students in civil and environmental engineering will take a capstone design course in addition to training in structural and foundation design, civil engineering systems, construction, engineering geology, engineering materials, geotechnical engineering, soil mechanics, water quality, environmental engineering, fluid mechanics, computer-aided and manual engineering drawing, mechanics and dynamics, computer modeling, professional practice and ethics seminars, structural analysis and design, surveying and transportation systems via required and elective courses.

Dual Degree Program
BS in Applied Mathematics and Civil Engineering
As an exceptional opportunity for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science, the CEAE and Applied Mathematics departments offer a streamlined track by which a student can earn a baccalaureate degree from both programs with a minimum of 15 extra credit hours. Consult the faculty program advisors in civil engineering and applied mathematics for information and admission.

Bachelor’s–Accelerated Master’s Degree Program(s)
The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

BS in Civil Engineering, MS in Civil Engineering or Architectural Engineering

Admissions Requirements
In order to gain admission to the BAM programs named above, a student must meet the following criteria:

• Have a cumulative GPA of 3.000 or higher
• Completion of all MAPS requirements and no deficiencies remaining
• Have at least junior status within the bachelor’s degree program

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only six credits may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program/) web page for more information.

Environmental Engineering - Bachelor of Science (BSEV)

Environmental engineers play a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of engineering solutions to environmental problems impacting the biosphere, land, water, and air quality. Environmental issues affect almost all municipal, commercial, and industrial sectors, and are a central concern for the public, for all levels of government, and in international relations. These issues include safe drinking water, wastewater processing, solid and hazardous waste disposal, outdoor and indoor air pollution, human health and ecological risk management, prevention of pollution through alternative product or process design, and renewable and sustainable energy sources.
To address these challenges, environmental engineers often encounter challenging problems that must be solved in data-poor situations as members of multidisciplinary teams. Environmental problems require creative solutions blended with contributions from scientists, lawyers, business people, and the public. Good communication skills, as well as technical proficiency, are essential for success in this arena. In addition, technology designed to address environmental problems is marketed globally, opening up increasing opportunities for international work in the environmental engineering field.

**Mission**

The mission of the Environmental Engineering Program (http://www.colorado.edu/even/) is to provide a multidisciplinary undergraduate environmental engineering education that emphasizes mastery of principles and practices, inspires service for the global public good, endows a desire for lifelong learning, and prepares students for broad and dynamic career paths in environmental engineering.

**Faculty**

The faculty of the Environmental Engineering (EVEN) Program (http://www.colorado.edu/even/people/) are drawn from the Departments of Civil, Environmental, and Architectural Engineering; Mechanical Engineering; Chemical and Biological Engineering; and Aerospace Engineering Sciences. The EVEN faculty, its Professional Advisory Board (representing prospective employers of its graduates), and EVEN alumni and current students have contributed to the creation of the program's mission and the educational objectives of the BS in environmental engineering degree.

To earn a bachelor’s degree in environmental engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit Bachelor of Science in Environmental Engineering (https://www.colorado.edu/even/current-students/undergraduate-studies/) webpage. In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/).

Some variations may be possible; see undergraduate advisor to work on approval.

Senior Thesis  5

Total Credit Hours  128

1 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://
www.colorado.edu/engineering/academics/policies/hss/).

2 A total of 9 credit hours of technical electives is required. Three
technical elective credit hours may be lower-division (1000–2000-
level). Three technical elective credit hours must be in the earth
sciences, either lower or upper division. Remaining technical elective
credit hours must be upper division in engineering, mathematics
or sciences. Independent study (EVEN 4840) or senior thesis
(EVEN 4980 and EVEN 4990) may be completed as technical
electives for up to 6 credits hours.

3 Students may choose a course from the list of college-approved
writing courses (http://www.colorado.edu/engineering/academics/
policies/hss/).

4 A nine-credit-hour (three-course) sequence in environmental
engineering – one environmental engineering design course and two
environmental engineering technical electives.

5 A senior thesis can be completed on a single research topic, with
faculty approval and direction, and can apply toward technical
elective requirements.

Learning Outcomes

Program Educational Objectives

The educational objective of the Environmental Engineering Bachelor of
Science degree is to produce graduates who are capable of reaching the
following career goals three to five years after graduation:

• Graduates will be employed in engineering, science or other
professional careers.
• Graduates will pursue professional registration or other appropriate
certifications.
• Graduates will be engaged in continual learning by pursuing
advanced degrees or additional educational opportunities through
coursework, professional conferences and training, and/or
participation in professional societies.
• Graduates will be engaged in activities that provide benefits to
communities, the environment and/or public health.

Student Outcomes

Upon graduation, students are expected to be able to:

• Identify, formulate and solve complex engineering problems by
applying principles of engineering, science and mathematics.
• Apply engineering design to produce solutions that meet specified
needs with consideration of public health, safety and welfare, as well
as global, cultural, social, environmental and economic factors.
• Communicate effectively with a range of audiences.
• Recognize ethical and professional responsibilities in engineering
situations and make informed judgments, which must consider the
impact of engineering solutions in global, economic, environmental
and societal contexts.
• Function effectively on a team whose members together provide
leadership, create a collaborative and inclusive environment,
establish goals, plan tasks and meet objectives.
• Develop and conduct appropriate experimentation, analyze and
interpret data, and use engineering judgment to draw conclusions.
• Acquire and apply new knowledge as needed, using appropriate
learning strategies.

Bachelor’s–Accelerated Master’s Degree
Program(s)

The Bachelor’s–Accelerated Master’s (BAM) degree program options
offer currently enrolled CU Boulder undergraduate students the
opportunity to receive a bachelor’s and master’s degree in a shorter
period of time. Students receive the bachelor’s degree first, but begin
taking graduate coursework as undergraduates (typically in their senior
year). Because some courses are allowed to double count for both the
bachelor’s and the master’s degrees, students receive a master’s degree
in less time and at a lower cost than if they were to enroll in a stand-alone
master’s degree program after completion of their baccalaureate degree.
In addition, staying at CU Boulder to pursue a bachelor’s–accelerated
master’s program enables students to continue working with their
established faculty mentors.
BS in Environmental Engineering, MS in Environmental Engineering, Civil Engineering or Mechanical Engineering

Admissions Requirements
In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher
- Completion of all MAPS requirements and no deficiencies remaining
- Have at least junior status within the bachelor's degree program

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six credits may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the BAM degree program (https://www.colorado.edu/even/current-students/undergraduate-studies/5-year-bsms/) web page for more information.

Architectural Engineering - Minor
The undergraduate minor in architectural engineering serves CU Boulder students who are interested in building science, engineering and system designs. The minor is intended to expose students to basic building science knowledge, engineering and system concepts, and calculation and design skills.

Requirements
Admission
A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in architectural engineering or the Bachelor of Science in Engineering Plus with an architectural engineering disciplinary emphasis. In addition, the structural systems and construction engineering and management tracks (shown below) are not open to students pursuing the Bachelor of Science in civil engineering or the Bachelor of Science in engineering plus with a civil engineering disciplinary emphasis.

Prerequisites
The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350, MATH 1300 or APPM 1345 )
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360 , or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121 , ASEN 2001 , GEEN 2851 or MCEN 2023 )

Grade Requirements
A cumulative GPA of 2.250 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

Residency
The minor requires 18 credit hours, at least nine of which must be AREN/CVEN courses completed on the CU Boulder campus. The minor is composed of three required courses, two courses in a single track, plus one elective course.

Civil Engineering - Minor

The undergraduate minor in civil engineering serves CU Boulder students interested in an introductory exposure to the broad discipline of civil engineering. The minor is intended to expose students to five sub-disciplines of civil engineering.

Requirements

Admission

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in Civil Engineering or the Bachelor of Science in Engineering Plus with a civil engineering disciplinary emphasis.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300 or APPM 1345)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360, or MATH 2130 and MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 or PHYS 1115, and PHYS 1120 or PHYS 1125)
- Statics (CVEN 2121, ASEN 2001, GEEN 2851 or MCEN 2023)
- Fluid Mechanics (CVEN 3313, AREN 2120, MCEN 3021, GEEN 3853)
- Mechanics of Materials (CVEN 3161, MCEN 2063)

Grade Requirements

A cumulative GPA of 2.250 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

Residency

The minor requires 18 credit hours, at least nine of which must be CVEN courses completed on the CU Boulder campus. The minor is composed of five required courses plus one additional proficiency or advanced course.

Computer Science

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of
future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

Computer science offers study in the fields of computer systems, cybersecurity, robotics, algorithm design, artificial intelligence, software and web engineering. Computer science majors earn human—computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem-solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users, and understanding how that software interacts with the hardware on which it is run and goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the Department of Computer Science (http://www.colorado.edu/cs/) website.

Course code for this program is CSCI.

Career Possibilities

Computer science graduates from CU Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields as diverse as scientific exploration, communication, finance, medicine, manufacturing, entertainment and research. Many are software developers, but others become teachers, writers, doctors, lawyers, scientists, military leaders and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, nonprofits and at the smallest start-ups of every type imaginable.

Facilities, Programs and Opportunities

The Department of Computer Science uses a modern computing infrastructure that supports its research and educational missions. This includes general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software. The university research computing service maintains a supercomputer, high-speed networking and advanced computing infrastructure for the campus. The computer science educational culture emphasizes the use of individual laptop computers, including their use in courses and group work.

There are many networking opportunities available with companies offering paid internships. Boulder’s tech start-up community, tech companies and research labs provide students with many employment opportunities while earning their degrees. There are also extensive opportunities for undergraduate students to participate in research projects across the campus.

Bachelor’s Degree

- Computer Science - Bachelor of Science (BSCS) (p. 760)
- Computer Science - Bachelor of Arts (BA) (p. 757)
- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 763)

Minors

- Computational Biology - Minor (p. 765)
- Computer Science - Minor (p. 767)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

CSCI 1000 (1) Computer Science as a Field of Work and Study
Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 1000
Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BSCS or CSEN-BA) majors only
Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) Introduction to Computational Thinking
Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that computational skills are beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.
Equivalent - Duplicate Degree Credit Not Granted: INFO 1201
Additional Information: Departmental Category: General Computer Science
CSCI 1300 (4) Computer Science 1: Starting Computing
Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 1310 or CSCI 1320 or ECEN 1310 CSPB 1300
Requisites: Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2270 (4) Computer Science 2: Data Structures
Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2275 CSPB 2270
Requisites: Requires prerequisite course of ((CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 minimum grade C-) or (ASEN 1320 minimum grade B-)) and prerequisite or corequisite course of (MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2275 (4) Programming and Data Structures
Combines the content in CSCI 1300 and CSCI 2270 and is intended for students with experience with at least one object oriented programming language. Assumes knowledge of programming constructs- data types, conditionals, loops and classes. Students must pass a programming competency exam administered by the computer science department to take this class. The course includes an expedited instruction in the C++ programming language and then primarily focuses on the content in CSCI 2270: data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2270 or CSPB 2270
Requisites: Requires prerequisite or co-requisite of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

CSCI 2400 (4) Computer Systems
Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2400
Requisites: Requires prerequisite of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2750 (3) Computing, Ethics and Society
Satisfies the ethics requirement for computer science BA and BS majors. This course is intended to provide students with perspectives which help them deal with ethical and societal implications in their careers as computing professionals. Examines ethical ramifications of current and future computing systems and technologies and reflects upon the broad implications of computing upon our society. Student work consists of reading, participation in class discussions and presentations, essays, and a final project. Students from outside computer science also are welcome. Necessary background is basic familiarity with computing. Does not count as Computer Science elective credit for the Computer Science BA, BS, or minor.
Recommended: Sophomore standing or beyond, and a basic familiarity with computing.

CSCI 2820 (3) Linear Algebra with Computer Science Applications
Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2820
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures
Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 2824
Requisites: Requires prerequisite courses of (ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 1310 or CSCI 1320 or CSCI 2275 or ECEN 1030 or ECEN 1310) and (APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310) (all minimum grade C-).
Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-4) Special Topics in Computer Science
Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Computer Science

CSCI 2834 (1) Discrete Structures Workgroup
Provides additional problem-solving practice and guidance for students enrolled in CSCI 2824. Students work in a collaborative environment to further develop their problem-solving skills with the assistance of facilitators. Does not count as Computer Science credit for the Computer Science BA, BS, or minor.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires corequisite course of CSCI 2824.
Grading Basis: Pass/Fail
CSCI 2897 (3) Calculating Biological Quantities
Master practical mathematical techniques for representing and analyzing biological quantities of different kinds. Develop mathematical intuition about biological calculations. Learn to model and solve simple feedback processes. Learn to model and solve simple accumulation processes. Learn to model and decompose simple vector spaces. Learn standard approximation and optimization strategies. Adapt and combine methods to solve real-world problems. Background in biology not required. This course is intended for students who are interested in Computational Biology, but will not take Differential Equations (APPM 2360/MATH 3430) as part of their degree plan. Does not count as Computer Science credit for Computer Science majors or minor.
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-)

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study
Offers selected topics at the elementary level for students with little or no previous computing experience. Does not count as Computer Science credit for the Computer Science BA, BS or minor.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Computer Science

CSCI 3002 (4) Fundamentals of Human Computer Interaction
Introduces the practice and research of human-computer interaction, including its history, theories, the techniques of user-centered design, and the development of interactive technologies. Covers computing in society at large with respect to domains such as health, education, assistive technology, ethics, environment, and more.
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Intensive Programming Workshop
Explores concepts and techniques for design and construction of larger, reliable, and maintainable software systems in the context of object-oriented programming. Covers various topics including: object-oriented programming paradigms, scope, inheritance, program structure and design, practical use of version control, working with established code bases, and building graphical user interfaces. Emphasizes coding individually and in pairs and includes in class lab work, smaller coding assignments, and multiple weeks-long projects. Not intended for students in their final year of the Computer Science BA or BS degree. Formerly offered as a special topics course.
Requisites: Requires a prerequisite course of CSCI 2270 or CSCI 2275 and a prerequisite or co-requisite course of CSCI 3308 (all minimum grade C-).

CSCI 3022 (3) Introduction to Data Science with Probability and Statistics
Introduces students to the tools methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3022
Requisites: Requires prerequisite course of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3090 (3) Introduction to Quantum Computing
Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 3090
Requisites: Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135 (minimum grade C-).

CSCI 3100 (1) Software and Society
Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society. Required for, and restricted to, students completing a Senior Thesis for the Computer Science BS. Department consent required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348
Requisites: Restricted to Computer Science (CSEN-BSCS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms
Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP, and approximation algorithms.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3104
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 1360 or MATH 2300) and (one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1-3) Human-Centered Computing Professional Development
Supports students in developing professional skills and practices in computing, including: preparing for technical and behavioral interviews, professional networking, mastering new technologies not addressed in the curriculum, presenting work, the role of graduate study, and exploring career and research directions.
Repeatable: Repeatable for up to 3.00 total credit hours.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3155 (4) Principles of Programming Languages
Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3155
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).
Additional Information: Departmental Category: Programming Languages
CSCI 3202 (3) Introduction to Artificial Intelligence
Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3202
Requisites: Requires prereqs (CSCI 2270 or CSCI 2275) (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) (APPM 3570 or APPM 4570 or CHEN 3010 or CSCI 3022 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or STAT 3100 or STAT 4000) (all min grade C).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Database Systems
Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3287
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C).
Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics
Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2824 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) (all minimum grade C).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools
Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 3308
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (both minimum grade C).
Additional Information: Departmental Category: Software Engineering

CSCI 3352 (3) Biological Networks
This course examines the computational representation and analysis of biological phenomena through the structure and dynamics of networks, from molecules to species. Attention focuses on algorithms for clustering network structures, predicting missing information, modeling flows, regulation, and spreading-process dynamics, examining the evolution of network structure, and developing intuition for how network structure and dynamics relate to biological phenomena.
Requisites: Prereqs (1 of ASTR2600/CSCI 2270/2275/INFO2201/PHYS2600) (1 of APPM1345/1350/MATH1300/1310) (1 of APPM3570/4570/CHEN3010/CSCI3022/ECEN3227/EBIO4410/ECEN3810/ECON3818/IPHY2800/MATH3510/4510/4520/MCDB3450/MCEN3047/STAT2600/3100/4000/4520)(minimum C)
CSCI 4118 (3) Software Engineering for Scientists
Learn the core principles of software engineering to develop scientific software that is robust and reproducible. This class targets quantitative scientists in any discipline who have programming skills (any language) and want to use software to further their research. We cover version control, testing, benchmarking, data structures, algorithms, and pipelines. Instructor approval is required for CS majors and CS minors. Previously offered as a special topics course. Knowledge of a programming language, preferably Python.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6118
Requisites: Restricted to non-Computer Science majors and non-Computer Science minors only.
Recommended: Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201.

CSCI 4122 (3) Information Visualization
Studies interactive visualization techniques that help people analyze data. This course introduces design, development, and validation approaches for interactive visualizations with applications in various domains, including the analysis of text collections, software visualization, network analytics, and the biomedical sciences. It covers underlying principles, provides an overview of existing techniques, and teaches the background necessary to design innovative visualizations.
Equivalent - Duplicate Degree Credit Not Granted: CSPB 4122
Requisites: Requires prerequisite courses (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170) (all minimum grade C-).

CSCI 4113 (3) Linux System Administration
Introduces Linux Unix system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory-focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up using provided computing resources and must maintain and secure these servers themselves.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5113 and CYBR 5113
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4229 (3) Computer Graphics
Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics
Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239
Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).
Additional Information: Departmental Category: Graphics
CSCI 4240 (3) Introduction to Blockchain
Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5240 and CSCI 5240
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001) (all minimum grade C-).

CSCI 4250 (3) Computer Science: The Canon
Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count as CS credit for the Computer Science BA, BS or minor.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5250
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques
Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Recommended: Prerequisite CSCI 4273.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4273 (3) Network Systems
Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix or Linux is required.
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics
An intensive exploration of major challenges in robotics, providing a hands-on review of current research topics in the context of a "robotics grand challenge" problem. Topics include online planning and control, state estimation, simultaneous localization and mapping, and operating under partial observability.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302
Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4303 (1) Cybersecurity Club Companion Course
Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5303 and CSCI 5303
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of CSCI 3403 (minimum grade D).

CSCI 4308 (4) Software Engineering Project 1
Senior capstone course in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department consent required. Department-enforced prerequisites differ for BS and BA degree. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor early in their major.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Additional Information: Departmental Category: Software Engineering

CSCI 4314 (3) Dynamic Models in Biology
Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314
Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C).
Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.
Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2
Second semester of a senior capstone course in computer science. Students must take this course and CSCI 4308 or 4328 concurrently as the project spans the entire academic year.
Requisites: Requires prerequisite course of CSCI 4308 or CSCI 4328 (minimum grade C-).
Additional Information: Departmental Category: Software Engineering
CSCI 4328 (4) Software Project Management and Mentoring
Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Experience mentoring Senior Software Project Team. Intended for professional software developers. Department consent required, see Senior Project Director for permission.
Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.
Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management
Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Intended for double majors doing interdisciplinary projects in other departments. Department consent required, see Senior Project Director for permission.
Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.
Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing
Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department consent required. Department-enforced prerequisites differ for BS and BA degree. Contact academic advisor for details. Senior Capstone courses are optional for BA students. BA students interested in taking this course should contact their advisor(s) early in their major.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors only.
Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II
Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350
Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4413 (3) Computer Security and Ethical Hacking
Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413
Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4446 (3) Chaotic Dynamics
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423
Requisites: Requires prerequisite course of (CSCI 1300 or CSCI 1310 or CSCI 1320 or CSCI 2275 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-).
Recommended: Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).
Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design
An applied analysis and design class that addresses the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448
Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-).
Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502 and CSPB 4502
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4555 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and ECEN 5553 and CSCI 5525
Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 2400 or ECEN 3350 (all minimum grade C-).
Additional Information: Departmental Category: Programming Languages
CSCI 4576 (4) High-Performance Scientific Computing
Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576
Recommended: Prerequisite APPM 4650 or CSCI 3656 or MATH 4650 or MCEN 3030.
Additional Information: Departmental Category: Numerical Computation

CSCI 4593 (3) Computer Organization
Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3593
Requisites: Requires prerequisite course of ECEN 3950 or CSCI 2400 (minimum grade C-).
Additional Information: Departmental Category: Numerical Computation

CSCI 4616 (3) Introduction to Virtual Reality
Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4616
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-).

CSCI 4622 (3) Machine Learning
Introduces students to tools, methods, and theory to construct predictive and inferential models that learn from data. Focuses on supervised machine learning technique including practical and theoretical understanding of the most widely used algorithms (decision trees, support vector machines, ensemble methods, and neural networks). Emphasizes both efficient implementation of algorithms and understanding of mathematical foundations.
Requisites: Prereqs: (APPM 3310 or CSCI 2820 or MATH 2130 or 2135 or 3130 or 3135) (APPM 3570 or 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or 4510 or MCEN 3047 or STAT 3100 or 4000 or 4520) CSCI 3104 (all minimum grade C-).

CSCI 4753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753
Requisites: Requires prerequisites of (APPM 1360 or MATH 2300) and CSCI 3753 (all minimum grade C-).
Recommended: Prerequisite a course in statistics.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1) Data Science Team Companion Course
Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires a prerequisite course of APPM 3310 or APPM 3570 or STAT 4520 or APPM 4570 or CSCI 2820 or CSCI 3022 or CVEN 3227 or ECEN 3810 or MATH 2130 or MATH 2135 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3100 or STAT 4000 (minimum grade C-).
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and ATLS 4809 and CSCI 5809

CSCI 4830 (1-4) Special Topics in Computer Science
Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 (minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-4) Special Topics in Algorithms
Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester. Only 9 credit hours from CSCI 4830 and/or CSCI 4831 can count toward Computer Science BS or BA.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of CSCI 3104 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135) (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4849 (3) Input, Interaction, and Accessibility
Explores input and interaction techniques with an emphasis on universal design and alternative interfaces. Students explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students conduct performance evaluations of existing techniques, and prototype new interaction methods. Students design technologies to support people with varying abilities and disabilities.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5849
Requisites: Requires prerequisite of CSCI 3002 (minimum grade C-).
CSCI 4889 (3) Interactive Machine Learning for Customizable and Expressive Interfaces
Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students learn to process a wide variety of input data (e.g., video and accelerometer streams) using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. Students complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5880, ATLS 4889 and ATLS 5880
Requisites: Requires prereqs of (APPM 3570 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3010 or STAT 4000 or STAT 4520) and (CSCI 3002 or CSCI 3202 or CSCI 4448) (all minimum grade C-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Artificial Intelligence

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem. Department consent required.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 or CSCI 2275 (all minimum grade C-).
Additional Information: Departmental Category: General Computer Science

CSCI 4950 (2-4) Senior Thesis
Provides an opportunity for senior computer science majors to conduct exploratory research in computer science as an option for the capstone requirement. Department enforced prerequisites: minimum 36 credit hours of Computer Science coursework including Foundation courses, approved writing, GPA 3.0. Department consent required, contact academic advisor for details.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Additional Information: Departmental Category: General Computer Science

CSCI 4960 (2-4) Computer Science Honors Thesis
Provides an opportunity for senior Computer Science BA majors to conduct exploratory research in computer science and complete an Honors Thesis as part of the Arts and Sciences Honors Program. Department enforced prerequisites: successful completion of a minimum of 36 credit hours of Computer Science foundation and Computer Science electives and a writing requirement.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Additional Information: Departmental Category: General Computer Science

CPSB 1000 (1) Computer Science as a Field of Work and Study
Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience. Does not count as Computer Science credit for the Computer Science BA.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 1000
Requisites: Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CPSB 1300 (4) Computer Science 1: Starting Computing
Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Appropriate for students with little to no experience in computing or programming.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 1310 or CSCI 1320 or ECEN 1310 CSCI 1300
Requisites: Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CPSB 2270 (4) Computer Science 2: Data Structures
Studies data abstractions (e.g., stacks, queues, lists, trees, graphs, heaps, hash tables, priority queues) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2275 CSCI 2270
Requisites: Requires prerequisite course of ASEN 1320 (minimum grade B-) or CSCI 1300 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CPSB 2400 (4) Computer Systems
Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2400
Requisites: Requires corequisite course of CPSB 2270 or CSCI 2270. Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CPSB 2820 (3) Linear Algebra with Computer Science Applications
Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2820
Requisites: Requires prerequisite courses of CPSB 2824 or CSCI 2824 or APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CPSB 2824 (3) Discrete Structures
Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 2824
Requisites: Requires prerequisite or corequisite course of ASEN 1320 or CSCI 1300 or CPSB 1300 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.
CSPB 3022 (3) Introduction to Data Science with Probability and Statistics
Introduces students to the tools methods and theory behind extracting insights from data. Covers algorithms of cleaning and munging data, probability theory and common distributions, statistical simulation, drawing inferences from data, and basic statistical modeling.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3022
Requisites: Requires prerequisite or corequisite course of ASEN 1320 or CSCI 1300 or CSPB 1300 (minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3104 (4) Algorithms
Covers the fundamentals of algorithms and various algorithmic strategies, including time and space complexity, sorting algorithms, recurrence relations, divide and conquer algorithms, greedy algorithms, dynamic programming, linear programming, graph algorithms, problems in P and NP and approximation algorithms.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3104
Requisites: Requires prerequisite course CSPB 2824 or CSCI 2824 and prerequisite or corequisite course of CSCI 2270 or CSPB 2270 (all minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3155 (4) Principles of Programming Languages
Studies principles governing the design and analysis of programming languages and their underlying execution models. Explores values, scoping, recursion, higher-order functions, type systems, control structures, and objects. Introduces formal semantics as a framework for understanding programming features. Introduces advanced programming concepts such as functional programming, higher-order functions, immutable values and structures, inductive types, functors, continuation-passing; and object-oriented programming using inheritance, generics and covariance/contravariance in a functional programming language such as Scala.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3155
Requisites: Requires prerequisite courses of CSCI 2270 or CSPB 2270 and CSPB 2824 or CSPB 2824 (all minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3202 (3) Introduction to Artificial Intelligence
Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3202
Requisites: Req. prereq of (CSPB/CSCI2270 or CSCI2275) (APPM3170 or CSPB/CSCI2824 or ECEN2703 or MATH2001) one of: (APPM3570/4570/CHEN3010/CSCI3022/CSPB3022/CVEN3227/ECEN3810/ECON3818/MATH3510/4510/STAT4520) (all min C-). Rstr to AppCompSci post-bac(CSAP).

CSPB 3287 (3) Design and Analysis of Database Systems
Introduces the fundamental concepts of database requirements analysis, database design, and database implementation with emphasis on the relational model and the SQL programming language. Introduces the concepts of Big Data and NoSQL systems.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3287
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 or CSPB 2270 (minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3308 (3) Software Development Methods and Tools
Covers tools and techniques for successful software development with a strong focus on best practices used in industry. Students work in small teams to complete a semester-long application development project. Students learn front-end design and construction using HTML & CSS, back-end database design and construction, and full-stack integration. Students gain exposure to agile methodologies, web services, distributed version control, requirements definition, automated integration testing, and cloud-based application deployment.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3308
Requisites: Requires prerequisite or corequisite course of CSCI 2270 or CSPB 2270 (minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3403 (4) Introduction to CyberSecurity for a Converged World
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course students should have a solid foundation in cybersecurity and hands-on experience.
Requisites: Requires prerequisite courses of CSPB 2400 or CSCI 2400 or ECEN 3350 (minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 3702 (3) Cognitive Science
Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.
Equivalent - Duplicate Degree Credit Not Granted: LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003 and CSCI 3702
Requisites: Requires prerequisite of CSCI 1300 (minimum grade C-) or corequisite of CSCI 1300. Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.
Recommended: Prerequisites two of the following CSCI 1300 or CSPB 2275 or PHIL 2440 or PSYC 2145.

CSPB 3753 (4) Design and Analysis of Operating Systems
Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3753
Requisites: Requires prerequisite courses of CSCI 2270 or CSPB 2270 and CSPB 2824 or CSPB 2824 (all minimum grade C). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.
CSPB 4122 (3) Information Visualization
Studies interactive visualization techniques that help people analyze data. This course introduces design, development, and validation approaches for interactive visualizations with applications in various domains, including the analysis of text collections, software visualization, network analytics, and the biomedical sciences. It covers underlying principles, provides an overview of existing techniques, and teaches the background necessary to design innovative visualizations.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4122
Requisites: Requires prerequisite or corequisite courses CSCI 1300 or CSPB 1300 and CSCI 2824 or CSPB 2824 (all minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 4502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502 and CSCI 4502
Requisites: Requires prerequisite course of CSCI 2270 or CSPB 2270 (minimum grade C-). Restricted to students in the Applied Computer Science Post-baccalaureate program (CSAP) only.

CSPB 4830 (1-4) Special Topics in Applied Computer Science
Covers topics of interest in applied computer science at the undergraduate level. Content varies from semester to semester.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

CSPB 4900 (1-3) Upper Division, Undergraduate Level Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students. Department consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of CSPB 1300 or CSCI 1300 (minimum grade C-).

Computer Science - Bachelor of Arts (BA)

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. They create the software that social scientists use to identify and analyze patterns in the behavior of social groups and human behavior in social networks and the applications that humanists and linguists use to research language development. Many new applications of computing technology remain to be discovered. Indeed, computing will be at the heart of future revolutions in business, science and society. Students who study computer science now will be at the forefront of those important advances.

Computer science offers study in the fields of computer systems, cyber security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design, human-computer interaction, machine learning, data science, numerical and parallel computing, speech and language processing and theoretical computer science.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users. It is about understanding how that software interacts with the hardware on which it is run. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the department’s BA Degree (https://www.colorado.edu/cs/current-students/undergraduate-students/ba-degree/) webpage.

A student may not earn both the BS and BA in computer science. A student may not earn both a bachelor's degree in computer science and the minor in computer science from CU Boulder.

Requirements

The degree provides considerable freedom in the selection of specific courses to fulfill major requirements, allowing students to tailor the degree to their individual needs and interests.

For more information, visit the department’s BA Degree (https://www.colorado.edu/cs/current-students/undergraduate-students/ba-degree/) webpage.

Students earning a BA in Computer Science from the College of Engineering and Applied Science must earn a CU cumulative GPA of at least 2.250, and Major GPA of at least 2.250, to be eligible to graduate. The degree is nominally 120 credit hours but may require more credits depending on the Additional Field of Study chosen by and approved for the student.

Note: Prior to the 2020–2021 academic year, this program was offered by the College of Arts & Sciences. Students who enrolled in this program prior to the 2020–2021 academic year should refer to the requirements as defined during their year of entry (see the University Catalog archive (p. 2486)).

Required Courses and Credits

Students must complete the General Education requirements, which includes approximately 46 credit hours, and the required courses listed below. Through the required coursework for the major, students will fulfill the QRMS component of the General Education Skills Requirement.

Students are required to pursue an Additional Area of Study as part of earning the BA in computer science. The additional area can be any available minor or certificate from any of CU Boulder’s colleges and schools (Arts & Sciences, Business, EAS, CMCI, Education, Music). Students completing a dual degree (by pursuing another major) fulfill the requirement with those plans.

Any Additional Area of Study that is not part of a dual degree must be at least 15 credit hours. Programs that do not meet this requirement will be considered by petition and students will be required to add additional coursework.

**Graduating in Four Years**

Consult the four-year guarantee requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in computer science, students should meet the following requirements:

- Declare the computer science BA major and have taken Calculus 1 and CSCI 1300 by the end of their second semester.
- Consult with a major advisor to determine adequate progress toward completion of the major and general education requirements.

**Recommended Four-Year Plan of Study**

This four-year plan of study is based on students starting at the Calculus 1 level. This plan is flexible and CSCI course substitutions in year two based on starting MATH or other requirements should be discussed with an academic advisor.

General Education Distribution and Diversity requirements (https://www.colorado.edu/artsandsciences/undergraduate/degree-requirements/general-education-requirements/) can be met with courses
for the Additional Area of Study. Some additional areas of study may exceed 120 total credit hours.

For more information on required courses including all options for Calculus, additional MATH, PHIL and CSCI-BA Core and Upper Division electives, see the Requirements tab. Detailed information is also available on the BA Degree Requirements (https://www.colorado.edu/cs/current-students/undergraduate-students/ba-degree/ba-degree-requirements/) webpage.

**Learning Outcomes**

Upon graduation, students are expected to be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

**Program Educational Objectives**

Within 3–5 years after graduating with a Bachelor of Arts degree in computer science, our graduates will be:

- **Broadly educated and versatile.** Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges.
- **Inspiring and collaborative.** Is a leader and a responsible citizen whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
• Innovative. Drives scientific and societal advancement through technological innovation and entrepreneurship.

• Engaged. Is and remains engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

**Computer Science - Bachelor of Science (BSCS)**

The goal of the Department of Computer Science is to prepare students for an intriguing and satisfying career in computer science in industry, research, or academia. The huge number of technical jobs and the continuing shortage of people to fill them mean that opportunities are great for today’s computer science graduates when seeking career options or to continue on to graduate school.

The BS degree program in computer science emphasizes knowledge and awareness of computing at all levels, from circuits and computer architecture through operating systems and programming languages to large application systems; the theoretical and mathematical aspects of computing; the interdependence of hardware and software; and the challenge of large-scale software production and the engineering principles used to meet that challenge. Students may choose to take classes that touch on a wide variety of computing topics, or may select classes that focus on a particular specialization.

For more information, visit the department’s BS Degree (http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree/) webpage.

**Accreditation**

The Bachelor of Science degree in computer science is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

**Western Colorado University/University of Colorado Boulder Partnership Program (Computer Science)**

Western Colorado University (Western) (https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs in their entirety in Gunnison, Colorado. The first two years of coursework are taught by Western faculty and the second two years of coursework are taught by CU Boulder faculty located in Gunnison. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering and computer science, with additional details on the Computer Science (https://western.edu/program/computer-science-university-colorado-partnership/) and Mechanical Engineering (https://western.edu/program/mechanical-engineering-university-colorado-partnership/) partnership websites.

Coursework requirements and plans of study specific to this partnership can be found on the Western Colorado University computer science partnership website (https://western.edu/program/computer-science-university-colorado-partnership/). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/western-cu-boulder-bs-computer-science/).

**Requirements**

Requirements for the BS degree in computer science include coursework in computer science, mathematics, natural science, and the humanities and social sciences, as well as free elective coursework.

The degree provides considerable freedom in the selection of specific courses to fulfill these requirements, allowing students to tailor the degree to their individual needs and interests.

A student may not earn both a BS degree in computer science and a BA degree in computer science (p. 757) from CU Boulder. A student may not earn a bachelor’s degree in computer science and a minor in computer science from CU Boulder.

For more information, visit the department’s BS Degree (http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree/) webpage.

**Natural Science Electives 8-9**

Additional natural science electives to reach 17 credits, number of credits needed may vary based on natural science sequence completed. See department website for list of approved courses.

**Free Electives 8-16**

Additional coursework to bring cumulative total credit hours to at least 128, number of credits needed may vary based on options selected to complete other requirements.

**Total Credit Hours 128**

1 Complete the College’s Humanities, Social Sciences and Writing (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) requirements (18 credits total) as specified.

2. Students may choose a course from the list of college-approved writing courses (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).

## Learning Outcomes

Upon graduation, students are expected to be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

## Program Educational Objectives

Within 3–5 years after graduating with a Bachelor of Science degree in computer science, our graduates will be:

- **Broadly educated and versatile.** Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges.
- **Inspiring and collaborative.** Is a leader and a responsible citizen whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
**Innovative.** Drives scientific and societal advancement through technological innovation and entrepreneurship.

**Engaged.** Is and remains engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

## Bachelor’s–Accelerated Master’s Degree Program(s)

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

The following BAM programs are available with the BS in Computer Science:

- BS and MS in Computer Science
- BS in Computer Science, MS in Technology, Cybersecurity and Policy

### Admissions Requirements

#### BS and MS in Computer Science

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.50 or higher.
- Have completed all prerequisite courses with grades of B or better.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 1300</td>
<td>Computer Science 1: Starting Computing</td>

<td>Principles of Programming Languages</td>
<td>4</td>
</tr>
<tr>
<td>or CSCI 3753</td>
<td>Design and Analysis of Operating Systems</td>
<td></td>
</tr>
</tbody>
</table>

- Students who do not meet the first two criteria, must have one letter of reference from a faculty member or your undergraduate academic advisor outlining why you should be considered. Your letter-writer should send their letter directly to gradadms@cs.colorado.edu.
- Have at least junior status within the bachelor’s degree program.
- Completion of all MAPS requirements and no deficiencies remaining.
- Students may submit their intent to apply during the term they are completing their final class from the list above.

#### BS in Computer Science, MS in Technology, Cybersecurity and Policy

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.300 or higher
- Have completed the following prerequisite courses with a B or better.
  (If a student has transfer credit for one of the following courses, or has taken a commonly accepted course substitution for one of the above courses, their grade in that alternate course can be used to determine their eligibility for this BAM program.)

<table>

</tbody>
</table>

- Have at least junior status within the bachelor’s degree program.
- Completion of all MAPS requirements and no deficiencies remaining.
- Students may submit their intent to apply during the term they are completing their final class from the list above.

### Program Requirements (for both programs above)

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only 6 credits may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Computer Science/Computer Science BAM degree program ([https://www.colorado.edu/cs/current-students/undergraduate-students/bachelors-accelerated-masters-degree/](https://www.colorado.edu/cs/current-students/undergraduate-students/bachelors-accelerated-masters-degree/)) or Computer Science/Technology, Cybersecurity and Policy BAM degree program ([https://www.colorado.edu/program/tcp/current-students/bachelors-accelerated-masters/](https://www.colorado.edu/program/tcp/current-students/bachelors-accelerated-masters/)) for more information.

## Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS)

The post-baccalaureate degree in applied computer science is an online-only degree for professionals with a prior bachelor's degree who would benefit from computing but who do not have the prerequisite courses needed to pursue graduate studies. The goal of the program is to prepare students with diverse academic backgrounds to enter the computer science field.

Students who do not have a previous bachelor’s degree from an accredited university or college should apply to one of the on-campus programs: the Computer Science - Bachelor of Arts (BA) (p. 757) or the Computer Science - Bachelor of Science (BS) (p. 760). Only the latter degree program is accredited by the Computing Accreditation Commission of ABET ([http://www.abet.org](http://www.abet.org)).

The post-baccalaureate degree in applied computer science consists of 45 credit hours of computer science courses. Students can start any term
an internet connection at any time of day. For more information, visit the department's CS Online website (https://www.colorado.edu/cs/cs-online/).

Course code for this program is CSPB.

Requirements

Admission Requirements
Propective students must meet all of the following requirements:

- Have a four-year bachelor's degree from an accredited university.
- Have a minimum accumulated GPA of 2.75 in their existing bachelor's degree (applicants with significant life experience but a lower GPA will still be considered).
- Meet the math requirements.
- International students: Meet a minimum standard of English proficiency.

As part of the admissions process, students must:

- Complete an admissions application and pay the $50 application fee ($70 for international students).
- Provide a personal statement of 200-1000 words explaining why they are interested in the applied computer science degree, reflecting on the personal strengths (e.g., intellectual passion, academic abilities, disposition to work with professional colleagues) and life experiences that will enable them to succeed in the program.
- Provide two (2) letters of recommendation. References should be able to provide information regarding the applicant's ability to succeed in the program. References from relatives and/or friends will not be accepted.
- Submit all official transcripts directly to CU Boulder from the issuing institution. Transcripts can be sent to transcripts@colorado.edu or mailed to the Office of Admissions (http://www.colorado.edu/admissions/connect/).

Note: Meeting the minimum admissions requirements does not guarantee admission.

Math Requirements
Students are required to have one of the following:

- Completion of AP Calculus or Calculus 1* with a minimum final grade of C-
- Successful completion of CLEP (https://clep.collegeboard.org/science-and-mathematics/calculus/) exam for Calculus (CLEP exam credit is granted for a score at or above the 65th percentile)
- Successful completion of the ALEKS Prep for Calculus with Limits course with a grade of 80% or more. For more information on how to enroll in the ALEKS course, prospective students should visit the Post-Baccalaureate Admissions webpage (https://www.colorado.edu/cs/apply/post-baccalaureate-admissions/).

*Note: "Calculus for Business" courses do not meet the prerequisite. If you took a variation of this course, you will still need to take the ALEKS online course.

International Applicants
In addition to our general admission requirements, all international applicants are also required to meet a minimum standard of English proficiency. The TOEFL and IELTS are two different English language proficiency tests accepted by CU Boulder as proof of English proficiency. CU Boulder does not accept any other tests as proof of English proficiency. International applicants are required to demonstrate English proficiency with a passing TOEFL or IELTS score as set by the College of Engineering and Applied Science (http://www.colorado.edu/engineering/).

TOEFL/IELTS Recommended Minimum English Proficiency Scores
- TOEFL: 83
- IELTS: 6.5

Total scores must include a TOEFL writing sub score of 19 or higher or an IELTS writing sub score of 5.5 or higher. Scores may not be combined.

Minimum English Proficiency
- Applicants are evaluated based on their overall application.
- Applicants who have taken the TOEFL or IELTS exams but do not meet the recommended minimum scores will still be considered for the program.

Proof of English proficiency is required for all international student applicants unless:

- The student has completed at least two years of full-time academic study at a U.S. high school or at a high school in a country where English is the native language (i.e., Australia, U.K.) at the time you begin studies at CU Boulder
- The student has completed at least one year of full-time academic study at a U.S. college or university or at an institution in a country where English is the native language (i.e., Australia, U.K.) at the time you begin studies at CU Boulder
- English is the student's native language

Sending TOEFL and IELTS Scores
Request that the testing agency submit your scores directly to the Office of Admissions. Scores must be received by the Office of Admissions no later than November 15 for spring applicants, March 27 for summer applicants, and June 15 for fall applicants. For more information on each exam, go to the TOEFL website (http://www.ets.org/toefl/) or the IELTS website (https://www.ielts.org/).

The CU Boulder school code for the TOEFL is 4841. IELTS does not have school codes. When requesting that your IELTS results to be sent to CU Boulder, have it sent to the following address:

Office of Admissions/International University of Colorado Boulder 3100 Marine St Suite A122 65 UCB Boulder, CO 80309-0065 USA

Returning to CU Boulder
Students who are rostered in the program but do not enroll in courses for three consecutive terms will have to reapply to the program.

Program Requirements
Current curricular requirements may be found on the department's Applied Computer Science BS Degree Requirements (https://www.colorado.edu/cs/cs-online/cs-online-future-students/cs-online-curriculum/) website.
Students must complete 26 credits of required computer science courses, as well as a minimum of 19 credits of elective computer science courses. Currently, the courses below are offered online, with additional courses to be added in the future.

Note: The course prefix used for post-baccalaureate courses is CSPB. However, please be aware these courses are equivalent to the corresponding CSCI courses.

### Program Residency and Transfer Credits

Students are required to complete a minimum of 45 credit hours of computer science courses in order to graduate. The residency requirement for the program is that at least 30 credit hours must be taken from CU Boulder courses in the program (online courses) after the student has matriculated in the program as an Applied Computer Science student.

Students who have taken on-campus computer science courses at CU Boulder can receive credit for a maximum of 15 credit hours before matriculating into the program. Due to the degree residency requirement transfer credit cannot be accepted after a student has begun the program.

Students who have taken computer science courses from other universities can transfer a maximum of 9 credit hours to the program assuming that the courses are equivalent to the courses in the program.

Courses that have been taken over 10 years ago may not be transferred to the program. These courses are evaluated on a case by case basis.

### Plans of Study

Students may begin this program in the spring, summer or fall term and have the freedom to customize their pathway to completion.

The program recommends working students follow a 2–3 year plan. Post-baccalaureate students may petition to pursue an accelerated pathways. However, they require significant time commitments, and program approval. Once accepted into the program, students are encouraged to speak with their advisor to discuss options and whether an accelerated pathway is right for them.

Visit the Post-Baccalaureate website (https://www.colorado.edu/cs/cs-online/cs-online-future-students/pathways-completion/) to learn more about pathways to completion.

### Learning Outcomes

#### Program Educational Objectives

The post-baccalaureate BS program aims to produce alumni that, within three to five years after graduation:

- Are prepared, where appropriate, to specialize in a broad spectrum of computer science sub-disciplines, ranging across formal computer science (e.g., computational science, bioinformatics and theory), cognitive science (e.g., human/machine learning, human-computer interaction, collaborative work and human language technologies) and core computing (e.g., systems, networks and software engineering).

#### Student Outcomes

To achieve this outcome, the post-baccalaureate BS degree program aims to produce students who, upon graduation, are expected to be able to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

### Computational Biology - Minor

Computational biology is an interdisciplinary field that develops and applies computational methods to understand biological systems and address societal challenges.
The Computational Biology Minor is a cross-college minor that welcomes students from a diversity of majors. Students come together from disciplines in biology, math, computer science and engineering in interdisciplinary learning settings. The minor curriculum is intentionally designed to provide students overlap with their respective computational and biological expertise while challenging students to integrate core concepts and skills.

The minor teaches students to combine computational thinking and algorithms to tackle complex biological systems and topics like epidemiology, biotechnology, precision medicine & human health, genetics & genomics, environmental systems, and scientific research. Students learn:

- Computational biology core concepts and experimental techniques.
- Representing and understanding biological data and patterns.
- Biologically relevant skills in applied math, data science & statistics, and computing.
- Modeling and predicting biological processes and dynamics.
- Biological phenomena under uncertainty with probabilistic and statistical analyses.

Visit the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor) for the most recent information.

**Requirements**
A prerequisite is Calculus I or equivalent with a C- or better such as provided by MATH 1300/MATH 1310/APPM 1345/APPM 1350. Students must have a minimum cumulative GPA of 2.500 to declare this minor, which can be done from the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/). A cumulative GPA of 2.250 or better is required in the courses that are used to satisfy the minor.

**Required Courses and Credits**
The minor is divided into three course areas: Skills, BioElectives, and Data & Structure + Bioprocesses. The main pathways through the minor are: a biology background, which fulfills BioElective coursework, or a computing or math background, which fulfills most Skills coursework. Data & Structure + Bioprocesses course offerings emphasize the integration of Skills and BioElective core concepts. Completion of 8 courses from the three courses areas is required for the minor. Relevant coursework can be petitioned. Course lists are maintained on the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/).

### BioElectives

Choose one (from any biological area):

**Biochemistry**

- BCHM 4611: Principles of Biochemistry
- BCHM 4720: Metabolic Pathways and Human Disease
- BCHM 4740: Biochemistry of Gene Transmission, Expression and Regulation

**Ecology & Evolutionary Biology**

- EBI0 2040: Principles of Ecology
- EBI0 2070: Genetics: Molecules to Populations
- EBI0 3040: Conservation Biology
- EBI0 3080: Evolutionary Biology
- EBI0 3190: Tropical Marine Ecology
- EBI0 4440: Animal Developmental Diversity

**Environmental Studies**

- ENVS 3040: Conservation Biology
- ENVS 4185: Geomicrobiology

**Integrative Physiology**

- IPHY 3410: Human Anatomy
- IPHY 3430: Human Physiology

**Molecular & Cellular Biology**

- MCDB 3135: Molecular Biology
- MCDB 3145: Cell Biology
- MCDB 3150: Biology of the Cancer Cell
- MCDB 3160: Infectious Disease
- MCDB 3501: Structural Methods for Biological Macromolecules
Choose three (with at least one course from each list below) to explore biological data and modeling:

**Data & Structure**
- CSCI 3352 Biological Networks
- MCDB 4520 Bioinformatics and Genomics

**Bioprocesses**
- CSCI 2830 Software Engineering for Scientists
- CSCI 4314 Dynamic Models in Biology
- APPM 4370 Computational Neuroscience
- APPM 4390 Modeling in Mathematical Biology
- BCHM 4631 Statistical and Computational Analysis of the Human Genome
- EBIO 4290 Phylogenetics and Comparative Biology
- EBIO 4420 Computational Biology
- MCDB 4312 Quantitative Optical Imaging
- PHYS 4560 Introduction to Biophysics

Total Credit Hours: 24-30

1 BioElectives have prerequisite lectures or labs prior to enrollment, and we list the approximate number of them for students on the Computational Biology Minor webpage (https://www.colorado.edu/biofrontiers/cbiominor/). If a biological area of interest is not (fully) represented above, please contact CBIOminor@colorado.edu to petition BioElectives.

**Learning Outcomes**

- Effectively identify and communicate Computational Biology topics and applications to specialists and non-specialists.
- Reframe and evaluate biological research questions in the context of computational theory and techniques.
- Contextualize data and modeling problems based on biological principles and the scientific discovery process.
- Collect and access biological data sources to study Computational Biology challenges.
- Evaluate methods of biological data collection, validation, extension, and reproducibility.
- Use and/or build computer-based systems, programs, and algorithms based in software design principles.
- Model structured biological data and systems using computational techniques.
- Predict and interpret biological phenomena under uncertainty with probabilistic and statistical analyses.

**Computer Science - Minor**

The department offers a minor in computer science that is available to CU Boulder undergraduates. The minor offers a basic introduction to the field of computer science.

A student may not earn both a bachelor's degree in computer science (or applied computer science) and the minor in computer science from CU Boulder.

For more information, visit the department's Minor in Computer Science (http://www.colorado.edu/cs/current-students/undergraduate-students/minor/) webpage.

**Requirements**

A minimum of 21 credit hours in computer science coursework is required for the minor. A minor in computer science can be earned in conjunction with any CU Boulder major degree, except for computer science (and applied computer science) BA and BS majors. For more information, visit the department’s Minor in Computer Science (http://www.colorado.edu/cs/current-students/undergraduate-students/minor/) webpage.

**Prerequisites/Corequisites**

Calculus courses do not count toward the 21 credit hours required for the computer science minor. Specific courses may have additional prerequisites that are not otherwise required or counted toward the computer science minor.

Students should complete the following before declaring the minor:

- Calculus 1 (MATH 1300, MATH 1310, APPM 1350 or APPM 1345)
- Calculus 2 (MATH 2300 or APPM 1360)
- CSCI 1300 Starting Computing or approved substitute, see options below (counts toward the 21 credit hours for the minor)
- CSCI 2270 Data Structures (counts toward the 21 credit hours for the minor)

**Required Courses and Credits**

At least one of the following is required.

| CSCI 3104 | Algorithms                                       | 4            |
| CSCI 3155 | Principles of Programming Languages             |              |
| CSCI 3753 | Design and Analysis of Operating Systems        |              |

Additional approved upper-division Computer Science electives to reach minimum 21 credit hours, see CS Minor website for list of approved classes. 5

Total Credit Hours: 21

1 CSCI 1300 and CSCI 2270 must be completed before declaring the minor.
2 ASEN 1320 requires grade of B- or better

**Time to Complete**

Students should allow at least six semesters to complete the computer science minor, and are advised to start the minor no later than the first semester of their sophomore year. Otherwise, students should plan to complete summer courses or delay graduation.
Residency Requirements
At least three computer science classes must be taken on the CU Boulder campus. At least two of these three must be at the upper-division level.

Grade Requirements
A grade point average (GPA) of 2.250 or better is required in the courses used to complete this minor.
A grade of C- or better is required for all prerequisites (except for ASEN 1320, which requires a B- or better) and required courses for the minor.
A grade of D- or better is acceptable for additional computer science electives.

Creative Technology and Design
Courses in creative technology and design are offered through the ATLAS Institute (http://atlas.colorado.edu/), a center of interdisciplinary research, learning and collaboration in engineering. With strong ties to the technology sector in Colorado and beyond, ATLAS is a vibrant and growing community of researchers, instructors and students from the arts, sciences, social sciences and engineering, whose interest in the creative application of diverse technologies creates a culture of innovation and interdisciplinary collaboration.

Created to equip students with new and adaptable skill sets for the ever-expanding digital landscape, the program offers a bachelor of science, as well as a minor. Through its core curriculum and an engaging portfolio of electives, creative technology and design offers students a wide range of learning opportunities in subjects such as programming, physical computing, virtual reality, mobile application design/development, web design/development, user-interface/user-experience, history of technology, big data, robotics, wearable technology and game design/development.

Course code for this program is ATLS.

Centers and Labs
ATLAS Institute degrees are offered through the College of Engineering and Applied Science and the Graduate School. With a strong emphasis on design, research, project-based learning and creative production, the institute includes a wide range of research labs, creative studios and learning facilities:

Interactive Robotics and Novel Technologies (IRON) Lab (https://www.colorado.edu/atlas/iron-lab/)
A research lab that explores human-centered principles for developing novel sensing, interactive and robotic technologies, blending methods and techniques from computer science, design, engineering and the social sciences.

Unstable Design Lab (https://www.colorado.edu/atlas/unstable-design-lab/)
A research lab that studies technology and culture through the design and development of technologies that embrace chance and uncertainty.

Laboratory for Emergent Nanomaterials (https://www.colorado.edu/atlas/laboratory-emergent-nanomaterials/)
A research lab that manipulates matter on the smallest of scales to create materials with emergent properties, characterized by novel and sometimes surprising features arising from the interactions of multiple bodies.

A (https://www.colorado.edu/atlas/laboratory-emergent-nanomaterials/) CME Lab (https://www.colorado.edu/atlas/acme-lab/)
The ACME Creativity Machine Environment (ACME) research lab explores computational tools for design, creativity, cognition, tangible and embedded interaction, and computing for health and wellness.

THING Lab (https://www.colorado.edu/atlas/thing-lab/)
The Transformative Human Interfaces for the Next Generation (THING) research lab employs shape-changing materials, novel sensors and unique design methods to make digital information tangible, paving the way for a new generation of interactivity that goes beyond sight and sound.

Living Matter Lab (https://www.colorado.edu/atlas/living-matter-lab/)
The Living Matter Lab pioneers new technologies that empower individuals by making information about their own biology and biome more accessible.

BTU Lab (https://www.colorado.edu/atlas/blow-things-btu-lab-0/)
A dynamic teaching facility, creative studio and hackerspace that provides a range of physical computing, electronics and fabrication technologies, including a laser cutter, 3D printers and computers.

Whaaat!? Lab (https://www.colorado.edu/atlas/whaaat-lab/)
A game-focused learning lab that provides a range of emerging technologies for the exploration, project development and creative application of games and experimental interactions.

Heliolab (https://www.colorado.edu/atlas/heliolab/)
A facility that provides a range of technologies and materials for investigating digital imaging and photography through the production of creative works and projects.

Centered around the ATLAS Black Box Experimental Studio, where creativity and engineering blend with the performing arts, B2 is an incubator for the novel and experimental use of technology in music, dance, visual art, theater, film and new media.

Bachelor’s Degree
• Creative Technology and Design - Bachelor of Science (BSTM) (p. 773)

Minor
• Creative Technology and Design - Minor (p. 775)
Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Bethancourt, Matthew R. (https://experts.colorado.edu/display/fsid_156489/)
Senior Instructor; MFA, Parsons School of Design

Szafir, Daniel J. (https://experts.colorado.edu/display/fsid_156420/)
Assistant Professor; PhD, University of Wisconsin–Madison

Courses

ATLS 1100 (3) Design Foundations
Introduces foundational principles, practices and methods of design. Emphasizes design as an expressive and creative problem solving tool. This course engages with design from a broad perspective including visual, computational, physical and auditory design practices. Through lectures, discussions and creative projects, students will gain a familiarity with the diverse applications of creative technology through design.
Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors only.

ATLS 1300 (4) Computational Foundations 1
Instructs non-computer science students in analyzing problems and synthesizing programs for the solution, emphasizing good engineering practices for program construction, documentation, testing, and debugging. Uses Java for programming projects. Formerly ATLS 2010.
Requisites: Restricted to TMEN, AMEN or MTAM students only.

ATLS 1710 (3) Tools and Methods for Engineering Computing
Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills.

ATLS 2000 (3) The Meaning of Information Technology
Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society.
Equivalent - Duplicate Degree Credit Not Granted: ENES 2020
Requisites: Restricted to Technology, Arts and Media (TMEN) majors, GEEN, AMEN, or (MTAM-MIN) minors or ATLAS (PATL) student group.

ATLS 2001 (3) Design Technologies: Toolkit
Introduces students to the fundamentals of creative design through digital media production. Throughout the semester, students explore a number of disciplines related to digital media including imaging, web development, animation, video production, and more. Class sessions are in lecture format and are aimed at helping students attain a strong conceptual and technical understanding of creative design.
Requisites: Requires prerequisite or corequisite course of ATLS 2000 (minimum grade C-). Restricted to PATL students.

ATLS 2002 (3) Design Technologies: Process
Introduces foundational principles, practices and methods relating to the process of creative design. Emphasis on the pre-production process as a creative problem-solving tool in order to produce innovative and interesting creative work. Through lectures, discussion and creative projects, students will gain a familiarity with diverse applications and practices related to creative technology and design.
Requisites: Requires prerequisite or corequisite courses of ATLS 2000 and ATLS 2001. Restricted to PATL students.

ATLS 2036 (3) Introduction to Media Studies in the Humanities
Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant ready and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.
Equivalent - Duplicate Degree Credit Not Granted: ENGL 2036
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
ATLS 2100 (3) Image
Introduces techniques, technologies and concepts of digital image making and manipulation through lectures, projects and critiques. Focuses on digital photography, digital animation and digital video as a means to formal and expressive ends. This course also contextualizes practices and methodologies of digital imaging with historical and critical perspectives.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prerequisite or corequisite course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor
Grading Basis: Letter Grade

ATLS 2200 (3) Web
Introduces techniques, technologies and concepts of web design and development through lectures, projects and critiques. Focuses technically on HTML, CSS and JavaScript as the primary web technologies. Contextualizes the technical and societal implications of the Internet through historical and critical perspectives.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prerequisite or corequisite course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 2300 (3) Text
Introduces technologies, terminology and histories related to the design of text within digital and analogue media. Students will learn the fundamentals of design, typography and layout through lectures, projects and critiques. The curriculum surveys significant theoretical perspectives, historical periods and significant practitioners that influence the practice of typographic design.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prerequisite or corequisite course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 2519 (1-4) Special Topics in Creative Technology and Design
Analyses special interest areas of multidisciplinary technology, arts and media research and practice.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.
Grading Basis: Letter Grade

ATLS 3100 (3) Form
Teaches the fundamentals of 3D modeling, 3D animation and 3D printing / rapid prototyping from a conceptual and sculptural perspective. Through topical lectures, technical demonstrations and creative projects the course will introduce students to the potentials of thinking and working within 3-dimensional spaces.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prerequisite or corequisite course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 3110 (3) Motion
An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media.
Requisites: Requires prerequisite course of ATLS 2100 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 3173 (3) Creative Climate Communication
We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and THTR 4173
Recommended: Prerequisite ENVS 1000.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ATLS 3200 (3) Sound
Introduces techniques, technologies and concepts of digital sound through lectures, projects and critiques. Focuses technically on digital sound creation, production, synthesis and interactivity. Explores various approaches to digital sound production through historical and conceptual perspectives.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prerequisite or corequisite course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 3300 (3) Object
Introduces the fundamentals of physical computing. This class is an exploration of computing that starts from the perspective that humans are fundamentally physical beings. Students will design projects that interact with humans and the physical world and will learn to integrate sensors, motors, and simple electronics into creative projects. Projects will include interactive installations, art projects, games, and audio controllers.
Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 2000 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C). Restricted to TMEN students only.
Grading Basis: Letter Grade

ATLS 3500 (1-3) Client Projects in Creative Technology and Design
Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. Focuses on teamwork, conceptual planning, technical design and development and working within real-world client environments. Critical skills include project research, planning, design, development, troubleshooting and presentation.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C).
ATLS 3519 (1-3) Special Topics in Creative Technology and Design
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change
Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).
Equivalent - Duplicate Degree Credit Not Granted: APRD 3523 and EBIO 3523
Grading Basis: Letter Grade

ATLS 3529 (1-3) Special Topics in Critical Perspectives in Technology
Analyzes critical perspectives in creative technology and design. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 4000 (3) Research Methods and Professional Practice
Research Methods and Professional Practice lays the foundation for students to produce culminating work in their major. In this course, students will engage in domain exploration, learn to define a research problem, utilize tools and methods for professional design research, refine presentation skills, and engage in iterative and collaborative work. This course is focused on domain research, idea validation, and prototyping in order to prepare students for a culminating semester-long Capstone project based on this research. Formerly offered as a special topics course.
Requisites: Restricted to Technology, Arts and Media (TMEN) majors only.

ATLS 4010 (4) Capstone Projects
The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Requires prerequisite course of ATLS 4000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors only.

ATLS 4040 (3) Game Design
Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5040
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 4112 (3) Neurohacking
Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.
Requisites: Requires prerequisite ATLS 2000 (minimum grade C). Restricted to TMEN or MTAM students.

ATLS 4120 (3) Mobile Application Development
Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers’ kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5120
Requisites: Requires prerequisite course of ATLS 3000 or ATLS 1300 or CSCI 1300 or CSCI 1320 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors, MTAM minors or the ATLAS (PATL) student group only.

ATLS 4130 (3) Typography
This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5130
Requisites: Requires prerequisites ATLS 2200 and ATLS 2300 (both minimum grade C). Restricted to TMEN and MTAM students.

ATLS 4140 (3) Game Development
Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5140
Requisites: Requires prerequisite ATLS 4040 (minimum grade C). Restricted to MTAM or TMEN students.

ATLS 4141 (3) Color
Examines the generation and perception of colors in the context of physics, chemistry, biology, and psychology as a foundation for making. Explores the synthesis and applications of color dyes and pigments in art and design through lectures, readings, experiments, and projects.
Requisites: Requires Prerequisite ATLS 2000 (minimum grade C).

ATLS 4151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200, MCEN 4151, MCEN 5151, CINE 4200 and ATLS 5151
Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
ATLS 4214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214
Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade D-). Restricted to TMEN, MTAM, CSEN, CSCI, and ATLAS (PATL) student group only.

ATLS 4230 (3) Case Studies in Information and Communication Technology for Development
Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5230

ATLS 4244 (3) Empathy and Technology
Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5244
Recommended: Prerequisite ATLS 2000.
Grading Basis: Letter Grade

ATLS 4320 (3) Mobile Application Development: Advanced Topics
Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5320
Requisites: Requires a prerequisite course of ATLS 4120 (minimum grade D-). Restricted to College of Engineering (ENGRU) undergraduates only.

ATLS 4519 (1-4) Advanced Special Topics in Creative Technology & Design
Analyzes special interest areas of multidisciplinary creative technology and design research and practice.
Repeatable: Repeatable for up to 32.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 4529 (1-3) Advanced Special Topics: Critical Perspectives in Technology
Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5529
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 4606 (3) Critical Technical Practice
Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5606, INFO 4606, and ATLS 5606

ATLS 4616 (3) Introduction to Virtual Reality
Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616

ATLS 4630 (3) Web Front-End Development
Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5630
Requisites: Requires prerequisite courses of ATLS 2200 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C).

ATLS 4809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and CSCI 4809 and CSCI 5809
Requisites: Restricted to Technology, Arts and Media (TMEN) majors, MTAM minors, or the ATLAS (PATL) student group only.
ATLS 4889 (3) Interactive Machine Learning for Customizable and Expressive Interfaces
Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students learn to process a wide variety of input data (e.g., video and accelerometer streams) using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. Students complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5880, CSCI 4889 and ATLS 5880
Requisites: Requires prereqs of (APPM 3570 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3100 or STAT 4000 or STAT 4520) and (CSCI 3002 or CSCI 3202 or CSCI 4448) (all minimum grade C-).
Grading Basis: Letter Grade
ATLS 4900 (1-3) Undergraduate Independent Study
Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of ATLS 3010 and 3020 (all minimum grade D-).

Creative Technology and Design - Bachelor of Science (BSTM)

The Bachelor of Science in Creative Technology and Design (http://tam.colorado.edu) is an engineering degree unlike any other. Encompassing a broad, transdisciplinary course of study, the degree blends creativity and design with a rigorous engineering curriculum that emphasizes critical thinking, problem-solving, and creative production. Attracting designers, technologists, makers and inventors seeking diverse and adaptable skills, the degree opens doors to a wide range of 21st-century challenges and opportunities.

Industry and Career Paths
Students graduating with a major in Creative Technology and Design and prepared to enter professional positions in the following disciplines:

- Human-computer interaction.
- Information design and data visualization.
- Web design and development.
- Motion graphics, 3D modeling and animation.
- Video and narrative media.
- Robotics and physical computing.
- Internet of Things design.
- Graphic design and visual communication.
- Game design and development.
- User-interface and user-experience design (UI/UX)
- Experience design.
- Digital sound, audio production and electronic music.
- Mobile application design and development.

Students who complete the BS degree program are also poised to pursue graduate or advanced degrees in engineering, other technological fields and design.

Hallmarks of the Program

- Most classes are small, studio-based courses that encourage group work and collaboration.
- Most classes are greater than 50 percent female, a percentage well above most engineering and computing programs.
- The interdisciplinary coursework stresses knowledge, skills and expertise in technology development through both design and engineering.
- Projects use an iterative creative process from problem finding and ideation through user-testing, implementation and deployment.
- Students learn to think critically about the ethical and cultural impacts of emerging technology.
- Faculty are engineers, designers and artists from diverse fields who are experts in working with students of varied backgrounds, abilities and interests.

Unique
With a solid engineering foundation, the BS in Creative Technology and Design program caters to an emerging generation of hybrid students. Students build skills that extend beyond traditional engineering disciplines, eagerly producing technical and creative projects that integrate both engineering and design.

Transdisciplinary
The BS is discipline agnostic, encouraging students to pursue their interests and passions in ways that conform to, as well as transcend, traditional disciplinary fields. By helping students discover, explore and expand these interests, faculty members prepare students for rapid shifts and innovations in tomorrow’s technology landscape.

Creative Production and Critical Perspectives
Students are prolific creators who learn to critically and conceptually assess the works they create. Courses are designed on the studio model that integrates faculty and peer critique at every level. Graduates of the program are savvy and resourceful engineers, equal parts creator and critic, artist and theorist.

Requirements
Course Requirements
Students must complete a total of 128 credits in order to graduate with a BS in creative technology and design. The last 45 credit hours of the 128 for the BS degree must be earned via CU Boulder coursework only and while rostered in the College of Engineering & Applied Science.

A grade of C or better is necessary in all Foundation, Core, and Capstone courses. A grade of C- or higher is necessary in all Focus and CPT Electives.

The minimum passing grade for a course that is considered a prerequisite for another course is C- (unless it is a foundation, core or capstone course, then a C grade is considered passing).

Pass/fail credit will be permitted for up to 6 credits of free electives and/ or H&SS electives, or for courses above and beyond degree requirements.
The Bachelor of Science (BSTM) program in Creative Technology and Design includes 73-75 credit hours of General Coursework, 18-20 credit hours of H&SS Electives, 15 credit hours of Mathematics Courses, 12 credit hours of Natural Science Electives, 12 credit hours of Engineering and Computation Coursework, 12 credit hours of Free Electives, and 55 credit hours of BS Program Coursework.

### General Coursework (73-75 credit hours)
- **Writing, Humanities and Social Sciences (H&SS)**
  - College-Approved Writing Course: 3 credit hours
- **Mathematics Courses and Natural Science Electives**
  - APPM 1350 Calculus 1 for Engineers: 4 credit hours
  - or MATH 1300 Calculus 1: 3 credit hours
  - or APPM 1345 Calculus 1 with Algebra, Part B: 4 credit hours
  - APPM 1360 Calculus 2 for Engineers: 4 credit hours
  - or MATH 2300 Calculus 2: 3 credit hours
- **Mathematics Electives**: 3-6 credit hours
- **Natural Science Electives**: 4-12 credit hours

### Engineering and Computation Coursework
- **ATLS 1300** Computational Foundations 1: 4 credit hours
- or **CSCI 1300** Computer Science 1: Starting Computing: 4 credit hours
- **ATLS 2519** Special Topics in Creative Technology and Design (Computational Foundations 2): 4 credit hours
- or **CSCI 2270** Computer Science 2: Data Structures: 4 credit hours
- **GEEN 1400** Engineering Projects: 3 credit hours
- or **ASEN 1400** Gateway to Space: 3 credit hours
- or **ASEN 1403** Introduction to Rocket Engineering: 3 credit hours
- or **ECEN 1400** Introduction to Digital and Analog Electronics: 3 credit hours

### Free Electives
- 15 credit hours

### BS Program Coursework (55 hours)
- **ATLS Foundation and Core Coursework**
  - **ATLS 1100** Design Foundations: 3 credit hours
  - **ATLS 2000** The Meaning of Information Technology: 3 credit hours
  - or **ENES 2020** The Meaning of Information Technology: 3 credit hours
- **ATLS 2100** Image: 3 credit hours
- **ATLS 2200** Web: 3 credit hours
- **ATLS 2300** Text: 3 credit hours
- **ATLS 3100** Form: 3 credit hours
- **ATLS 3200** Sound: 3 credit hours
- **ATLS 3300** Object: 3 credit hours

### Capstone Coursework
- **ATLS 4000** Research Methods and Professional Practice: 3 credit hours
- **ATLS 4010** Capstone Projects: 4 credit hours

### Critical Perspectives in Technology (CPT) Electives
- **CPT Electives**: 6 credit hours
- **Focus Electives (project-based courses)**: 18 credit hours

### Total Credit Hours
128 credit hours

---

1. Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).
2. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).
3. Students may choose two courses from the list of Mathematics Electives (https://www.colorado.edu/atlas/academics/undergraduate/bs-ctd-curriculum/bs-ctd-mathematics-electives/).
4. Natural Science Courses (use Class Search (https://classes.colorado.edu/) and under Advanced Search, choose "A&S GenEd: Distribution-Natural Sciences").
5. Students may choose two courses from the list of CPT Electives (https://www.colorado.edu/atlas/academics/undergraduate/cpt/).
6. Students may choose six courses from the list of Focus Electives (https://www.colorado.edu/atlas/bs-ctd-focus-electives/); at least 12 credits of which must be upper-division coursework.

Learning Outcomes

Upon graduation, CTD students are expected to be able to:

- Recognize ethical and professional responsibilities and make informed judgments in applying creative technology solutions.
- Communicate effectively with a range of audiences and partners in a variety of professional contexts.
- Acquire and apply new knowledge as needed.

Creative Technology and Design - Minor

The minor in creative technology and design provides a broad multidisciplinary perspective that integrates practical design skills with a critical, theoretical and historical understanding of technology in media and the arts.

Goals

- Prepare the next generation of artists, designers, and media producers.
- Give students the necessary technical, theoretical, and historical background to contribute to the development of new functionalities and aesthetics for computer media.
- Facilitate exploration at the intersection of technology and other fields and disciplines.
- Produce active and critically aware producers of creative technology.
- Enable students to think critically and conceptually about creative technology.

For more information, visit the Minor (http://tam.colorado.edu/minor.html) webpage.

Requirements

Program Requirements

Students must have a 2.500 cumulative GPA to be admitted to the minor in creative technology and design. Students may not earn both this minor and the BS in creative technology and design.

Students must complete a minimum of 21 credit hours with 7 courses, as detailed below. Coursework used to satisfy the minor requirements cannot be taken pass/fail. A minimum of 15 credit hours must be taken on the Boulder campus.

A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Students must earn a minimum grade of C in all courses counted for the minor. Failing to meet the minimum grade for any individual ATLS required course twice will result in automatic removal from the creative technology and design minor.

Courses may be taken concurrently, although some courses may have recommended and/or required prerequisites.

Electrical, Computer & Energy Engineering

Electrical engineering offers study of the basic science and technology of information and energy. Its areas of knowledge include information theory and communications systems, computers and digital systems, signal processing and instrumentation, feedback systems and automatic control, electrical and electronic devices and systems, power electronics and renewable energy, electromagnetics and microwave devices, optics and photonics systems, and embedded systems engineering. Students learn how this basic knowledge is applied to such modern technologies as computers, telecommunications, biomedical systems, and remote sensing. The curriculum accommodates a variety of student interests including design, production, testing, consulting services, research, teaching, and management. Graduates pursue careers in a large variety of fields in the computer, telecommunications, instrumentation, biomedical, aerospace, energy, materials, and semiconductors industries, as well as academia. Some go on to careers in other professions such as law or medicine.

Electrical and computer engineering offers the same curriculum as electrical engineering, except that required courses in computer hardware and software replace some upper-division electives. As with electrical engineering, it accommodates broad student interests from design to service, and from research to management. Its graduates take positions in fields as diverse as those listed above for electrical engineering.

Course code for this program is ECEN.

Bachelor's Degree

- Electrical and Computer Engineering - Bachelor of Science (BSEC) (p. 785)
- Electrical Engineering - Bachelor of Science (BSEE) (p. 789)

Minor

- Computer Engineering - Minor (p. 792)
- Electrical Engineering - Minor (p. 793)
- Quantum Engineering - Minor (p. 793)
- Signals and Systems - Minor (p. 794)

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Senior Instructor; Associate Chair; BS, Pennsylvania State University

Hauser, John (https://experts.colorado.edu/display/fisid_102555/)
Associate Professor; PhD, University of California, Berkeley

Herzfeld, Ute C. (https://experts.colorado.edu/display/fisid_106575/)
Research Professor; PhD, Johannes Gutenberg-Universität Mainz (Germany)

Hodge, Bri-Mathias (https://experts.colorado.edu/display/fisid_158358/)
Associate Professor; PhD, Purdue University

Huang, Shu-Wei (https://experts.colorado.edu/display/fisid_159847/)
Assistant Professor; PhD, MIT, Cambridge

Izraelevitz, Joe (https://experts.colorado.edu/display/fisid_166042/)
Assistant Professor; PhD, University of Rochester

Keller, Eric Robert (https://experts.colorado.edu/display/fisid_151647/)
Associate Professor; PhD, Princeton University

Kuester, Edward F.
Professor Emeritus

Lasser, Gregor (https://experts.colorado.edu/display/fisid_156178/)
Assistant Research Professor; PhD, Technische Universität Wien (Austria)
Le, Hanh-Phuc (https://experts.colorado.edu/display/fisid_156223/)
Assistant Professor; PhD, University of California, Berkeley

Lehman, Tamara (https://experts.colorado.edu/display/fisid_165649/)
Assistant Professor; PhD, Duke University

Lightner, Michael R. (https://experts.colorado.edu/display/fisid_101723/)
Professor; PhD, Carnegie Mellon University

Liu, Youjian (https://experts.colorado.edu/display/fisid_126283/)
Associate Professor; PhD, Ohio State University

Majerfeld, Arnoldo
Professor Emeritus

Maksimovic, Dragan (https://experts.colorado.edu/display/fisid_105609/)
Professor, PhD, California Institute of Technology

Mathys, Peter (https://experts.colorado.edu/display/fisid_100084/)
Associate Professor, PhD, ETH Zürich (Switzerland)

McAuliffe, Rik
Lecturer

McClure, Linden
Professor Adjunct

McLeod, Robert R. (https://experts.colorado.edu/display/fisid_107547/)
Professor, PhD, University of Colorado Boulder

Mendelson, Jay
Lecturer

Mickelson, Alan R. (https://experts.colorado.edu/display/fisid_100286/)
Associate Professor, PhD, California Institute of Technology

Mihran, Richard
Professor Adjunct

Moddel, Garret (https://experts.colorado.edu/display/fisid_105440/)
Professor, PhD, Harvard University

Nicotra, Marco M. (https://experts.colorado.edu/display/fisid_164182/)
Assistant Professor

Pao, Lucy Y. (https://experts.colorado.edu/display/fisid_107151/)
Professor, PhD, Stanford University

Park, Won (https://experts.colorado.edu/display/fisid_122676/)
Professor, Associate Chair; PhD, Georgia Institute of Technology

Perkins, Mike
Lecturer; PhD, Stanford University

Piestun, Rafael (https://experts.colorado.edu/display/fisid_118538/)
Professor, PhD, Israel Instit of Tech (Israel)

Piket-May, Melinda J. (https://experts.colorado.edu/display/fisid_102097/)
Associate Professor; PhD, Northwestern University

Pleszkun, Andrew R.
Professor Emeritus

Popovic, Zoya (https://experts.colorado.edu/display/fisid_101494/)
Distinguished Professor; PhD, California Institute of Technology

Poveda, Jorge (https://experts.colorado.edu/display/fisid_164183/)
Assistant Professor

Psychogiou, Dimitra (https://experts.colorado.edu/display/fisid_158311/)
Assistant Professor; PhD, ETH Zürich (Switzerland)

Rodriguez, Juan
Professor Adjunct

Scherr, Timothy (https://experts.colorado.edu/display/fisid_156259/)
Senior Instructor; MS, University of Utah

Shaheen, Sean Eric (https://experts.colorado.edu/display/fisid_153664/)
Professor; PhD, University of Arizona

Sheafor, Steve (https://experts.colorado.edu/display/fisid_163388/)
Lecturer, PhD, University of Illinois

Siewert, Sam
Associate Professor Adjunct

Sluiter, David
Professor Adjunct; BS, Michigan Technological University

Somenzi, Fabio (https://experts.colorado.edu/display/fisid_103969/)
Professor; PhD, Politecnico Di Torino (Italy)

Spriggs, Benjamin
Lecturer, Scholar in Residence

Van Zeghbroeck, Bart J. (https://experts.colorado.edu/display/fisid_104113/)
Professor; PhD, University of Colorado Boulder

Varanasi, Mahesh K. (https://experts.colorado.edu/display/fisid_103090/)
Professor; PhD, Rice University

Wagner, Kelvin (https://experts.colorado.edu/display/fisid_105344/)
Professor; PhD, California Institute of Technology

Walkes, Dan
Lecturer

Williamson, James A.
Lecturer

Wustrow, Eric A. (https://experts.colorado.edu/display/fisid_156419/)
Assistant Professor; BE, University of Michigan Ann Arbor

Zabotin, Nikolay (https://experts.colorado.edu/display/fisid_127038/)
Research Professor

**Courses**

**ECEN 1030 (1-4) Special Topics**
Special topics class.
ECEN 1100 (1) Exploring ECE
Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for first year students to meet their classmates.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Additional Information: Departmental Category: General

ECEN 1310 (4) C Programming for ECE
Introduces fundamental programming concepts using the C language. Teaches the use of pointers, control flow, aggregate types, input/output, heap-allocated memory, and abstract data types. Includes a weekly computer lab session.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSPB 1300 or CSCI 1310 or CSCI 1320
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Recommended: Prerequisite APPM 1350.
Additional Information: Departmental Category: General

ECEN 1400 (3) Introduction to Digital and Analog Electronics
This course introduces students to electrical and computer engineering centered around creative projects in a team based setting. Through the design and implementation of functional engineering systems, students gain an understanding of the engineering design process, using real-world design tools such as prototyping, computer-aided design (CAD), 3D printing, laser cutting, printed circuit board (PCB) manufacturing and testing. The projects-based curriculum provides students with a basis in the fundamentals of analog and digital electronics with an emphasis of developing student’s understanding of how the electronics and software operate within an interdisciplinary context. Students gain hands-on experience with the creation of systems using sensors, actuators, programming microcontrollers, prototyping circuits using breadboards, and designing systems. No prior experience or knowledge of electronics or software is required.
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 1500 (3) Sustainable Energy
Explores how energy is generated and used in today’s society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required.
Requisites: College of Engineering majors are excluded from this course.

ECEN 1840 (1-6) Independent Study
Provides an opportunity for freshmen to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.

ECEN 2010 (1-5) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 2020 (1-5) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 2050 (1-5) Special Topics
Additional Information: Departmental Category: General

ECEN 2060 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering. Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisite or corequisite PHYS 1140.
Additional Information: Departmental Category: General

ECEN 2250 (3) Introduction to Circuits and Electronics
Introduces linear circuit analysis and design, including OP-Amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors.
Requisites: Requires prerequisite course of (APPM 1360 or MATH 2300) and PHYS 1120 (all minimum grade C-) and pre OR corequisite courses of APPM 2360 and (ECEN 2310 or CSCI 1320 or ASEN 1320 or CHEN 1310). Restricted to College of Engineering majors only.
Recommended: Prerequisites ECEN 1310 or CSCI 1300.
Additional Information: Departmental Category: General

ECEN 2260 (3) Circuits as Systems
Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.
Requisites: Requires prerequisite course of ECEN 2250 and APPM 2360 (minimum grade C). Restricted to College of Engineering students only.
Recommended: Corequisite ECEN 2270.
Additional Information: Departmental Category: General

ECEN 2270 (3) Electronics Design Lab
Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.
Requisites: Requires prerequisite course of ECEN 2260 or corequisite course of ECEN 2260. Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 2310 (1) Programming with Mathematical Software
Applies mathematical software to the solution of engineering applications, using numerical and symbolic techniques. Typical applications include the manipulation of acoustic signals and the study of the dynamics of simple continuous and discrete systems.
Requisites: Requires prerequisites ECEN 1310 or CSCI 1300 or CSCI 1320 (all minimum grade C). Restricted to College of Engineering students.

ECEN 2350 (3) Digital Logic
Covers the design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs).
Requisites: Requires prerequisite or corequisite course of ECEN 1310 or CSCI 1300 or CSCI 1320 or ASEN 1320 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General
ECEN 2360 (3) Programming Digital Systems
Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3350
Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C). Restricted to College of Engineering majors only.

ECEN 2370 (3) Embedded Software Engineering
Introduces digital system design, including system software and hardware building blocks, and system software-hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, including FPGAs, embedded and mobile computing platforms, and Assembly/C/Java/Verilog programming languages.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3360
Requisites: Requires prerequisite or corequisite course of ECEN 2350 (minimum grade C). Restricted to College of Engineering majors only.

ECEN 2410 (3) Renewable Sources and Efficient Electrical Energy Systems
Introduces electrical power generation and renewable energy, including solar, wind, micro, hydro, coal, nuclear and natural gas and some of the issues in integrating renewable energy sources in the grid.
Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C). Requires corequisite course of ECEN 2250. Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 2420 (3) Electronics for Wireless Systems
Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. Covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn lab exercises the operation principles behind components of a complete practical radio system.
Requisites: Requires prerequisite course of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C). Requires corequisite course of ECEN 2250. Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) majors only.
Additional Information: Departmental Category: General

ECEN 2440 (3) Application of Embedded Systems
Introduces embedded systems and key computer architecture concepts through a variety of projects involving programming a microcontroller in C. Provides students hands-on projects that combine the knowledge gained in their digital and analog coursework in order to engineer hardware, firmware and application software design solutions. Includes a weekly lecture and two weekly laboratory sessions.
Requisites: Requires a prerequisite course of ECEN 1310, CSCI 1300 or CSCI 1320 (minimum grade C). Requires corequisite course of ECEN 2250.
Additional Information: Departmental Category: General

ECEN 2703 (3) Discrete Mathematics for Computer Engineers
Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory.
Requisites: Requires prerequisite courses of ECEN 1310 or CSCI 1300 or CSCI 1320 and APPM 1360 or MATH 2300 (all minimum grade C). Restricted to College of Engineering students only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 2830 (1-5) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

ECEN 2840 (1-6) Independent Study
Offers an opportunity for sophomores to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 3002 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 3003 (3-5) Special Topics
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3004 (3-5) Special Topics
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3010 (3) Circuits and Electronics for Mechanical Engineers
Covers analysis of electrical circuits by use of Ohm’s law, network reduction, node and loop analysis, Thévenin’s and Norton’s theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3017
Requisites: Requires prereq course PHYS 1120. Requires a prereq or coreq course APPM 2360 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135 or APPM 3310 (all minimum grade C). Restricted to Mechanical (MCEN) or Environmental (EVEN) or Engr Plus (GEEN-BS) students
Additional Information: Departmental Category: General

ECEN 3070 (3) Edges of Science
Examines the evidence for paranormal phenomena, reasons for skepticism and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors.
Additional Information: Departmental Category: General
ECEN 3170 (3) Electromagnetic Energy Conversion 1
Real and reactive power in single phase circuits, power triangle, balanced three-phase circuits, wye and delta connections, introduction to electromagnetic machines, transformers (single and three-phase) and their equivalent circuits, AC-machinery fundamentals, synchronous generator from a magnetic field point of view, synchronous motors and condensers, three-phase induction motors, DC machinery fundamentals, DC motors, single phase motors. Matlab/Simulink will be used.
Requisites: Requires prerequisite courses of ECEN 2260 and PHYS 1120 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 3210 (3) Hype and Reality in Energy Technologies
Course covers exotic, conventional and emerging energy technologies, and provides an understanding of how to apply basic energy principles to evaluate them. The approach is analytical and makes use of only basic algebra. Source materials are current articles, blogs, videos and provided notes. Topics include perpetual motion systems, renewable and traditional energy generation and storage, vehicle power, greenhouse effect, an accurate understanding of entropy and its implications, Maxwell's demon $\mathcal{Q}$ and exotic technologies that might work.
Grading Basis: Letter Grade

ECEN 3250 (3) Microelectronics
Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog applications.
Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3300 (3) Linear Systems
Characterization of linear time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems are analyzed using difference equations, Z-transforms and discrete time Fourier transforms. Sampling and reconstruction of signals using the sampling theorem. Applications of linear systems include communications, signal processing, and control systems.
Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3303 (3) Introduction to Robotics
Introduces students to fundamental concepts in autonomous robotics: mechanisms, locomotion, kinematics, control, perception and planning. Consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3302
Requisites: Requires prerequisite courses of (CSCI 2270 or CSCI 2275) and (APPM 3170 or CSCI 2B24 or ECEN 2703 or MATH 2001) and (APPM 2360 or APPM 3310 or CSCI 2B20 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) (all minimum grade C-).
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3320 (3) Semiconductor Devices
Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices.
Requisites: Requires prerequisite course of ECEN 23250 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3350 (3) Programming Digital Systems
Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 2360
Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3360 (3) Digital Design Laboratory
Introduces digital system design, including system software and hardware building blocks, and system software/hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, including FPGAs, embedded and mobile computing platforms, and Assembly/C/Java/Verilog programming languages.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 2370
Requisites: Requires prerequisite course ECEN 3350 (minimum grade C-) or corequisite of ECEN 3350. Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3400 (3) Electromagnetic Fields and Waves
Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied.
Requisites: Requires prerequisites (APPM 2350 or MATH 2400) and APPM 2360 and PHYS 1120 and ECEN 2250 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3410 (3) Electromagnetic Waves and Transmission
Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, waveguides, and elements of antenna theory.
Requisites: Requires prerequisite course ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3593 (3) Computer Organization
Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these. Formerly ECEN 4593.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4593
Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems
ECEN 3753 (3) Real-Time Operating Systems
Today's electronic systems require real-time management and scheduling of hardware resources alongside complex multi-threaded software applications. This course covers what is an Operating Systems, the development of multi-threaded applications, and satisfying real-time system obligations. Real-Time profiling tools will be used to learn and visualize how the operating system is scheduling the software tasks and hardware resources to meet resource constraint embedded system applications. Formerly offered as a special topics course.
Requisites: Requires prerequisite course ECEN 3360, or ECEN 2370, and CSCI 2270 (all minimum grade C). Restricted to College of Engineering majors only.

ECEN 3810 (3) Introduction to Probability Theory
Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, and optics.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4510 or APPM 3570
Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: General

ECEN 3840 (1-6) Independent Study
Offers an opportunity for juniors to do independent, creative work. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 3841 (1-6) Independent Study
Offers an opportunity for juniors to do independent, creative work.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 4000 (1-3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

ECEN 4001 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Bioengineering

ECEN 4002 (1-4) Special Topics
Credit and subject matter to be arranged. Department enforced prerequisite: varies
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4003 (1-4) Special Topics
Credit and subject matter to be arranged. Department enforced prerequisite: varies
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

ECEN 4004 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4005 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.0 total credit hours. Allows multiple enrollment in term.

ECEN 4006 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Optics

ECEN 4007 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4009 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4011 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5011
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Bioengineering

ECEN 4012 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4013 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4016 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Optics

ECEN 4017 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Power

ECEN 4018 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4021 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Bioengineering

ECEN 4024 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5024
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing
ECEN 4028 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4031 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4033 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4043 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4053 (1-4) Special Topics
Special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5053
Repeatable: Repeatable for up to 4.00 total credit hours.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4133 (3) Fundamentals of Computer Security
Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).
Requisites: Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 (all minimum grade C-).
Recommended: Corequisite ECEN 3593 (Computer Organization).

ECEN 4138 (3) Control Systems Analysis
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5138
Requisites: Requires prerequisite course of ECEN 3300 or MCEN 4043 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4167 (3) Electromagnetic Energy Conversion II
Introduction to electric machine drives, basic electric machine mechanics, structure and modeling of electric machines (DC, Synchronous, Linear, Induction), reference frame theory using d-q modeling based on the complex space vector and on matrix transformation, transient and steady state analysis of three-phase machine, design of speed regulators, vector control. Matlab/Simulink will be used.
Requisites: Requires prerequisite course of ECEN 3170 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 4224 (3) High Speed Digital Design
Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5224
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4242 (3) Communication Theory
Covers modern digital and analog communication systems. Analysis and design of communication signals, transmitters, channels, and receivers. Amplitude and angle modulation and demodulation are treated as well as theory and application of digital data transmission. Emphasis is also placed on the analysis and mitigation of the effects of noise through signal design at the transmitter and signal processing at the receiver.
Requisites: Requires prerequisite course of ECEN 3300 and ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4313 (3) Concurrent Programming
Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Requisites: Requires a prerequisite course of ECEN 1310 or CSCI 1300 or CSCI 1320 (all minimum grade C-).

ECEN 4322 (3) Data and Network Science
The course covers the theory and design of algorithms that are used to model, analyze, and extract information from large scale datasets and networks. The course includes a project.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5322
Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 or MATH 3430 and CSCI 1200 or CSCI 1300 or CSCI 1320 or ECEN 1310 or INFO 1201 or ATLS 1300 or CHEN 1310 and ECEN 2703 or CSCI 2824 or APPM 3170 or MATH 2001 (all minimum grade C-).

ECEN 4341 (3) Bioelectromagnetics
Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5341
Requisites: Requires prerequisite courses of ECEN 3400 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Bioengineering
ECEN 4423 (3) Chaotic Dynamics
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and CSCI 4446 and ECEN 5423
Requisites: Requires prerequisite courses of APPM 1360 or MATH 2300 and ECEN 1310 or CSCI 1300 and PHYS 1110 (all minimum grade C-). Restricted to College of Engineering majors only.
Recommended: Prerequisites PHYS 1120 and CSCI 3656 and (APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135).
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory
Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5517
Requisites: Requires prerequisite course of ECEN 4797 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power Systems

ECEN 4532 (3) Digital Signal Processing Laboratory
Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5532
Requisites: Requires prerequisite course of ECEN 4632 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4553 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and CSCI 4555 and CSCI 5525
Requisites: Requires prerequisite courses of ECEN 2703 and ECEN 3350 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4555 (3) Principles of Energy Systems and Devices
Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5555
Requisites: Requires prerequisite courses of ECEN 3810 or APPM 3570 or MATH 4510 or STAT 3100 and PHYS 2130 or PHYS 2170 (all minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4583 (3) Software System Development
Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required.
Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4606 (3) Undergraduate Optics Laboratory
Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and LEDs, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Optics

ECEN 4610 (3) Capstone Laboratory Part 1
Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. Results will be the prototype of a stand-alone analog/digital system. Must have completed all required Advanced Analog Core courses for major, except one course may be taken concurrently by petition. Must take ECEN 4620 to complete the sequence. Minimum required grade for this course and ECEN 4620 is C-.
Requisites: Requires prerequisite courses of ECEN 2270 ECEN 3360 (ECEN 3250 3300) or (ECEN 3250 3400) or (ECEN 3300 3400) (all min grade C).
Restricted to ECEN or EENG or C-EEEN or C-EEENP or C-ECENEEP or GEEN-BSEPL majors only.
Additional Information: Departmental Category: General

ECEN 4616 (3) Optoelectronic System Design
Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5616
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-).
Additional Information: Departmental Category: Optics
ECEN 4620 (3) Capstone Lab, Part 2
Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test and documentation of an electronic/computer based system. Results will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Department enforced prerequisite: advanced analog core courses.
Requisites: Requires prerequisite course of ECEN 4610 (minimum grade C-). Restricted to ECEN or EEEN or C-ECENEEEN or C-EEENP or C-ECENEEEP or GEEN-BSEPL majors only.
Additional Information: Departmental Category: General

ECEN 4632 (3) Introduction to Digital Filtering
Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications.
Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4634 (3) Microwave and RF Laboratory
This course is a hands-on introduction to RF and microwave topics, from fundamentals including vector network analyzer (VNA) calibration and operation, power measurements, and antenna characterization, to system-level topics such as RADAR systems and superheterodyne links. Students work in small groups on weekly experiments based on both coaxial and waveguide setups. An understanding of electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed. The graduate version of the course (ECEN 5634) includes additional homework and exam problems and extended laboratory exercises compared to ECEN 4634.
Requisites: Requires prerequisite course of ECEN 3410 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4638 (3) Control Systems Laboratory
Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5638
Requisites: Requires prerequisite course of ECEN 4138 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4652 (3) Communication Laboratory
Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks.
Requisites: Requires prerequisite course of ECEN 4242 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4720 (1) Practical Printed Circuit Board Design Accelerator
This course introduces students to the most important skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will learn the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with a custom board design project. A commercial EDA tool widely used in the electronics industry will be used for the project. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5720 ECEN 4730 or ECEN 5730
Requisites: Requires prerequisite courses of ECEN 2250 and ECEN 2260 and ECEN 2270 (all minimum grade D-).

ECEN 4730 (3) Practical Printed Circuit Board Design and Manufacture
This course prepares students with all skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will master the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with three different board design projects with increasing challenge. A commercial EDA tool widely used in the electronics industry will be used for all projects. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4720 or ECEN 5720 ECEN 5730
Requisites: Requires prerequisite courses of ECEN 2250 and ECEN 2260 and ECEN 2270 (all minimum grade D-).

ECEN 4753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Covers topics including system measurement, workload characterization and analysis of data; design of experiments; queuing theory and queuing network models; and simulation.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and CSCI 4753 and ECEN 5753
Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C). Restricted to College of Engineering majors only.
Recommended: Prerequisite a course in statistics.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4763 (3) Embedded Software Algorithms
Embedded Systems are defined by resource restrictions that could include computational performance, energy, memory space, and cost. These algorithms need to be evaluated against the targeted end-system constraints. Applications in many areas of real-time decision-making are discussed, from hybrid vehicle battery usage to queue management systems in real-time-priced tollways, aircraft holding patterns, and hard disk drive performance optimization. This is a programming course.
Requisites: Requires prerequisite course of ECEN 2370 or ECEN 3360 and CSCI 2270 (all minimum grade C-). Restricted to College of Engineering majors only.

ECEN 4797 (3) Introduction to Power Electronics
An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5797
Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power
ECEN 4827 (3) Analog IC Design
Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5827
Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.
Additional Information: Departmental Category: Power

ECEN 4840 (1-6) Independent Study
Offers an opportunity for seniors to do independent, creative work. Department consent required.
Repeattable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

ECEN 4841 (1-6) Independent Study
Offers an opportunity for seniors to do independent, creative work.
Repeattable: Repeatable for up to 6.00 total credit hours.

Electrical and Computer Engineering - Bachelor of Science (BSEC)

A degree in electrical and computer engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching, or management professional in a wide variety of careers in the computer industry, embedded systems, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

Colorado Mesa University/University of Colorado Boulder Partnership Program (Electrical & Computer Engineering)

Colorado Mesa University (CMU) (http://www.coloradomesa.edu/engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs in their entirety in Grand Junction, Colorado. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CMU Boulder.

Degrees are offered in mechanical engineering, civil engineering, and electrical & computer engineering, with additional details on the partnership website (https://www.coloradomesa.edu/engineering/partnership-program/).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University electrical and computer engineering partnership website (https://www.coloradomesa.edu/engineering/degrees/electrical_computer-engineering/). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/engineering/degrees/electrical_computer-engineering-partnership.html).

Prerequisites and Passing Grades
The Electrical, Computer and Energy Engineering Department reserves the right to drop students enrolled in ECEN courses who have not met the minimum prerequisite requirements. It is the student’s responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

All courses must be taken for a letter grade. The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved. ECEN 4610 Capstone Laboratory Part 1 and ECEN 4620 Capstone Lab, Part 2 both require a grade of C- or better for graduation.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

**Additional Electives**

Advanced concentration electives, two courses required. 2 6
Technical electives 2 12
Free electives 3 6

1. Complete the College's Humanities, Social Sciences and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) (18 credits total).
2. See the ECEE Advising website for additional information on course options.
3. Six credit hours of free electives can be used towards graduation requirements.
**Recommended Four-Year Plan of Study**

The following information represents a sample eight-semester sequence of study only. Up-to-date curricular information and policies can be found on the ECEE Advising website. ([https://www.colorado.edu/ecee/undergraduate-program/advising/](https://www.colorado.edu/ecee/undergraduate-program/advising/))

1. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives ([https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/](https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)).
2. Students may choose a course from the list of college-approved writing courses ([https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/](https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/)).
3. Students may choose from ECEN 2410, ECEN 2420, or ECEN 2440. Additional Special Topics courses may also be approved at the department’s discretion.
4. Students may choose from the following: PHYS 2130, EBIO 1210, MCDB 1150, IPHY 3410, CHEN 1201 or CHEN 1211.
5. The three options for Advanced Analog Core courses are ECEN 3250, ECEN 3300 and ECEN 3400.
6. See the ECEE Advising website ([https://www.colorado.edu/ecee/undergraduate-program/advising/](https://www.colorado.edu/ecee/undergraduate-program/advising/)) for additional information on course options.

**Program Educational Objectives**

The following set of program objectives for the Electrical and Computer Engineering program was developed by our faculty and our other stakeholders.

During the first several years after completion of their baccalaureate studies,

- ECE-1: Graduates will be situated in growing careers involving the design, development or support of electrical, electronic, and computer hardware and software systems, software engineering, devices, instruments, or products, or will be successfully pursuing an advanced degree.
The EE curriculum is designed to prepare our graduates to meet these objectives as follows:

- **ECE-1**: Graduates will be situated in growing careers involving the design, development, or support of electrical, electronic, and computer hardware and software systems, software engineering, devices, instruments, or products, or will be successfully pursuing an advanced degree.

Graduates attaining the ECE degree will have comprehensive knowledge and experience in the concepts and design of electrical, electronic, and computer devices, circuits, and systems. Besides emphasizing computer hardware and software, the ECE curriculum also emphasizes design, integration, and application of computer systems, as well as experience in software development. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints. The curriculum also provides opportunities for specialization in areas such as compiler design, embedded systems, software engineering, and VLSI design, as well as in the electrical engineering specialties.

ECE graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication and the ability to function on multi-disciplinary teams.

The ECE curriculum is rich in laboratory work. ECE graduates will have achieved extensive practical experience in the laboratory techniques, tools, and skills that provide a bridge between theory and practice.

- **ECE-2**: Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.

ECE graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the fields of electrical and computer engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology and computer systems and are able to analyze and solve electrical and computer engineering problems using this knowledge. In addition to basic classes in mathematics, science, and computing, the ECE curriculum includes a sequence of courses in analog and digital electronic circuits and systems, and electromagnetic fields, probability, computer software, and computer design and architecture.

- **ECE-3**: Graduates will have demonstrated professional and personal leadership and growth.

To lay the foundation for a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the ECE curriculum through a sequence of required classes in mathematics, physics, chemistry, and the ECE core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study.

The curriculum includes a significant component of electives in the humanities and social sciences. ECE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communications skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

**Student Outcomes**

The ECE curriculum is designed to prepare our graduates to meet these objectives as follows:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

**Bachelor’s–Accelerated Master’s Degree Program(s)**

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

**Admissions Requirements**

**BS in Electrical and Computer Engineering, MS in Electrical Engineering**

In order to gain admission to the BAM program named above, a student must meet the following criteria:
• Have a cumulative GPA of 3.00 or higher
• Complete all prerequisite courses with a minimum grade of solid B for 500-level coursework taken as an undergraduate student; minimum of solid C for undergraduate coursework
• Have completed 9-10 core ECEN courses (see BAM degree (https://www.colorado.edu/ecee/undergraduate-program/degrees/bs-ms-degrees/) website for more information)
• Have at least junior class standing
• Completion of all MAPS requirements and no deficiencies remaining
• Transfer students must have completed a minimum of 24 credit hours at CU Boulder

BS in Electrical and Computer Engineering, MS in Technology, Cybersecurity and Policy
In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.00 or higher
- Minimum grade of B in pre-requisite courses
- Have at least junior class standing
- Completion of all MAPS requirements and no deficiencies remaining

Program Requirements
For both programs above, students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only 6 credits of coursework may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Electrical & Computer Engineering/Electrical Engineering BAM degree program (https://www.colorado.edu/ecee/undergraduate-program/degrees/bs-ms-degrees/) or Electrical & Computer Engineering/TCP BAM degree program (https://www.colorado.edu/itp/current-students/undergraduate/bsms-degree/) web pages for more information.

Electrical Engineering - Bachelor of Science (BSEE)
A degree in electrical engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching or management professional in a wide variety of careers in the computer industry, embedded systems, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

Requirements
Required courses in engineering, physical science, and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the electrical engineering profession. The core courses are complemented by technical electives, humanities and social sciences electives (http://www.colorado.edu/engineering/academics/policies/hss/), free electives, and a writing course (http://www.colorado.edu/engineering/academics/policies/hss/), for a total of 128 credits required for the degree.

Prerequisites and Passing Grades
The Electrical, Computer and Energy Engineering Department reserves the right to drop students enrolled in ECEN courses who have not met the minimum prerequisite requirements. It is the student’s responsibility to communicate with the department if summer coursework and/or transfer credit was used to meet the prerequisite requirement.

All courses must be taken for a letter grade. The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C-. If a grade of D+ or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C- or higher. If a grade of D+ or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C- or higher is achieved. ECEN 4610 Capstone Laboratory Part 1 and ECEN 4620 Capstone Lab, Part 2 both require a grade of C- or better for graduation.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

Additional Electives

Advanced Concentration Electives

Four courses required. See the ECEE Advising website for additional information on course options.

Technical Electives

See the ECEE Advising website for additional information on course options.

Free Electives

Seven credit hours of free electives can be used towards graduation requirements.

Total Credit Hours 128

1 Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
2 Students may choose a course from the list of college-approved writing courses (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/).
3 Students may choose from ECEN 2410, ECEN 2420, or ECEN 2440. Additional Special Topics courses may also be approved at the department's discretion.
4 Students may choose from the following: PHYS 2130, EBIO 1210, MCDB 1150, IPHY 3410, or CHEN 1211 with or without CHEM 1221.
5 The three options for Advanced Analog Core courses are ECEN 3250, ECEN 3300 and ECEN 3400.
6 See the ECEE Advising website (https://www.colorado.edu/ecee/undergraduate-program/advising/) for additional information on course options.
Student Outcomes

Upon graduation, students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Bachelor’s–Accelerated Master’s Degree Program(s)

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

Admissions Requirements

BS and MS in Electrical Engineering

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher
- Complete all prerequisite courses with a minimum grade of solid B for 500-level coursework taken as an undergraduate student; minimum of solid C for undergraduate coursework
- Have completed 9–10 core ECEN courses (for more information, see the BAM degree [https://www.colorado.edu/ecee/undergraduate-program/degrees/bs-ms-degrees/] website)
- Have at least junior class standing
- Completion of all MAPS requirements and no deficiencies remaining
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder

BS in Electrical Engineering, MS in Technology, Cybersecurity and Policy

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.000 or higher
- Minimum grade of B in pre-requisite courses
- Have at least junior class standing
- Completion of all MAPS requirements and no deficiencies remaining

Program Requirements (for both programs above)

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only six credits of coursework may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Electrical Engineering/Electrical Engineering BAM degree program ([https://www.colorado.edu/ecee/undergraduate-program/degrees/bs-ms-degrees/]) or Electrical Engineering/TCP BAM degree program ([https://www.colorado.edu/itp/current-students/undergraduate/bsms-degree]) webpages for more information.

Computer Engineering - Minor

A student graduating with a bachelor’s degree from CU Boulder may also receive a minor in computer engineering, though the minor is not available to students earning the Bachelor of Science in Electrical Engineering or Electrical & Computer Engineering.

The minor in computer engineering provides training in computer engineering beyond the training usually received by science and mathematics majors. It can also broaden the training of students majoring in other engineering and applied science fields to provide more depth in computer engineering. The goal is to introduce students to the fundamentals of computer engineering and introduce them to a more advanced field. Such skills are important to students who expect to participate in real world situations that increasingly involve computer engineering solutions.

Requirements

Prerequisites

Students admitted to the computer engineering minor must have a cumulative GPA of 2.700 or better. The prerequisite for these courses is computing experience provided by ECEN 1310, CSCI 1300 or CSCI 1320.

Required Courses and Credits

This minor requires a minimum of 19 credit hours. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor
must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

## Electrical Engineering - Minor

A student graduating with a bachelor’s degree from CU Boulder may also receive a minor in electrical engineering, though the minor is not available to students earning a Bachelor of Science in Electrical Engineering or Electrical & Computer Engineering.

The minor in electrical engineering provides training in electrical engineering beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide more depth in electrical engineering. The goal is to teach students the fundamentals of electrical engineering and introduce them to at least one of its many advanced application areas. Such skills are important to students who expect to participate in real world situations that increasingly involve electrical engineering applications.

**Requirements**

**Prerequisites**

Prerequisites for the electrical engineering minor are two semesters of calculus and differential equations with linear algebra. A grade of C- or better is required in all prerequisite courses.

Students admitted to the electrical engineering minor must have a cumulative GPA of 2.700 or better. Students must still meet all prerequisites for the courses they choose.

**Course Requirements**

This minor requires a minimum of 18 credit hours.

A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

---

## Quantum Engineering - Minor

A student graduating with a bachelor’s degree from CU Boulder may also receive a minor in quantum engineering, though the minor is not available to students earning a Bachelor of Science in Electrical Engineering or Electrical & Computer Engineering.

The minor in quantum engineering provides training and a solid foundation in quantum technologies. Quantum technologies have applications in quantum-enhanced sensors, quantum communications, and quantum computing. The goal is to introduce students to the fundamentals of quantum theory and explore all of the major hardware platforms. This will allow graduates to easily adapt to the variety of technologies seen in industry. The skills obtained in this minor are
important to students who expect to participate in real-world situations that increasingly involve quantum technologies.

**Requirements**

**Prerequisites**

Students admitted to the Quantum Engineering Minor must have a cumulative GPA of 2.700 or better.

There are three **prerequisites** for the quantum engineering minor.

1. **Programming.** ASEN 1320, ECEN 1310, ECEN 2310, CSCI 1300, APPM 3050, PHYS 2600 or similar.
2. **Calculus 2** (minimum). APPM 1360, APPM 1350, MATH 2300, APPM 2360 or similar.
3. **Linear Algebra.** MATH 3135, MATH 2130, MATH 2135, APPM 3310, CSCI 2820, APPM 2360 or similar.

Additionally, it is **recommended** that students have taken Calculus 3 and probability: APPM 3570, STAT 3100, MATH 3510, ECEN 3810 or similar. A grade of C- or better is required in all prerequisite courses.

**Required Courses and Credit Hours**

This minor requires a minimum of 18 credit hours.

A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

**Required courses (9 credit hours)**

Within the Quantum Engineering minor there is a theory and experiment track. It will consist of a set of required core courses and a selection of electives, as follows.

All students will take:

- ECEN 3XXX Foundations of Quantum Engineering (Fall) 3 credit hours, and
- ECEN 3XXX Foundations of Quantum Hardware (Spring) 3 credit hours.

A possible substitution for “ECEN 3XXX Foundations of Quantum Engineering” is PHYS 3220 Quantum Mechanics 1 and PHYS 4410 Quantum Mechanics 2.

The theory track will take

- CSCI 3090/PHYS 3090 Introduction to Quantum Computing (Spring) 3 credit hours.

The experimental track will take (first offered in 2023 or 2024)

- ECEN 4XXX Quantum Engineering Lab (Spring) 3 credit hours.

The experimental track may take CSCI 3090/PHYS 3090 as an elective and the theory track may take ECEN 4XXX Quantum Engineering Lab as an elective

**Electives (9 credit hours)**

The electives below are not required to relax their prerequisites to enable students to take the course, however if the students fulfill the requirements then they may take the course. Students make seek permission from the program director of the Quantum Engineering minor to take a particular subject not listed below. The decision will be at the discretion of the program director.

Total Credit Hours 18

1 Students may petition to replace one of these courses with a 3-credit hour, 5000-level ECEN course in digital signal processing, communications or controls.

Engineering and Applied Science
Interdisciplinary programs managed by the College (http://www.colorado.edu/engineering/) are included here. The listing of courses includes College-sponsored courses as well as those offered by the Engineering Honors Program (http://www.cuhonorsengineering.com/), Engineering Leadership Program (https://www.colorado.edu/engineeringleadershipprogram/), and the Energy Engineering Minor (https://www.colorado.edu/engineering/academics/guide-degrees-certificates/minors/energy-engineering-minor/).

Minors
- Energy Engineering - Minor (p. 798)
- Global Engineering - Minor (p. 799)

Certificates
- Engineering Leadership - Certificate (p. 806)
- Lighting Design - Certificate (p. 807)

COEN 1400 (3) Project Design
Teams of first-year students solve real engineering design problems. Curriculum focuses on an iterative design process, teamwork, analysis, and technical writing.

Requisites: Restricted to students with 0-75 units completed and restricted to Pre-Engineering (PREE or PREN-COS) students only.

COEN 1500 (1) CEAS Design Lab: Engineering Your Life
Using the Design Your Life framework students work with their instructor and a Peer Mentor to intentionally understand the nuances of their social identities, discover opportunities that are available to them within the college, plan their future as an engineer, and develop successful study strategies and time management skills early in their educational careers. Allowable only in student’s first semester at CU, should not be repeated.

Requisites: Restricted to students with 0-56 (Freshmen) College of Engineering majors only.

COEN 1510 (1) Self Management and Leadership Principles 1
Prepares first-year students for personal and academic success in their transition to college. Focuses on academic success strategies, time and stress management, study skills, S.M.A.R.T. goal setting and developing self-awareness. Students identify their strengths and participate in peer-to-peer interaction to foster collaboration and community. Students will also explore leadership capabilities, professional development, and insights into career interests. Speakers provide students with unique insights into academic and engineering experiences.

Requisites: Restricted to Engineering Goldshirt (PENG) students only.

COEN 1520 (1) Self Management and Leadership Principles 2
Continuation of COEN 1510. Self-management and student development is reiterated. Includes time and stress management, study skills and S.M.A.R.T. goal setting. Leadership skills are explored through group projects. Students complete professional development activities and assignments geared toward preparing students for engineering internships and research opportunities.

Requisites: Requires prerequisite course of COEN 1510 (minimum grade C). Restricted to Engineering Goldshirt (PENG) students only.

COEN 1550 (1) YOU'RE@CU: Undergraduate Career Seminar
Explores topics of interest in transitioning to the College of Engineering and succeeding in STEM majors.

Requisites: Restricted to freshmen College of Engineering and Pre-Engineering majors only.

COEN 2830 (1-3) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
**COEN 2850 (1-3) Independent Study**
Provides opportunities for independent study at the lower-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
**Repeatability:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 2880 (1) Fresh Start for Success**
Fresh Start is a class for students in the College of Engineering who wish to have just that - a Fresh Start! This class focuses on learning the skills necessary to achieve academic and personal change goals. Topics include the science of learning (metacognition) and strategies to use metacognition in everyday life; including mastery of material in engineering, successful test taking, maintaining balance throughout the semester, and the science of change and how to create sustainable change. This class is focused on the actions necessary to create change, where each student must engage in the class and commit to applying the knowledge and skills acquired during lessons and reflection to their other classes and elsewhere in their life. This course is best suited for students looking to have greater success in achieving academic goals.
**Repeatability:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to Engineering Fresh Start (PEEA) students only.

**COEN 3051 (2) Leadership Seminar 1: Launching the Leadership Experience**
Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.
**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3052 (2) Leadership Seminar 2: Leadership Experience**
Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research.
**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio**
Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.
**Requisites:** Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio**
Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.
**Requisites:** Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3051 (2) Leadership Seminar 1: Launching the Leadership Experience**
Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.
**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3052 (2) Leadership Seminar 2: Leadership Experience**
Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research.
**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio**
Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.
**Requisites:** Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3051 (2) Leadership Seminar 1: Launching the Leadership Experience**
Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.
**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3052 (2) Leadership Seminar 2: Leadership Experience**
Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research.
**Requisites:** Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3053 (2) Leadership Seminar 3: ELP Synthesis and Final ePortfolio**
Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.
**Requisites:** Restricted to Engineering Leadership Program (PENL) students only.

**COEN 3101 (3) Climate Change and Engineering**
Explores the fundamentals of climate change science, but from an engineering perspective. After learning the fundamentals, the relationship between climate change and different engineering disciplines will be discussed. Topics covered include geoengineering, renewable energy, sustainable engineering, coastal engineering, building design, etc. Career options and entrepreneurial opportunities will also be discussed.
**Requisites:** Requires prerequisite courses of PHYS 1110 and APPM 1350 (minimum grade D-).

**COEN 3930 (3-6) Engineering Internship/Co-op**
Students enrolled in this course participate in a pre-approved internship or cooperative education program with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Pass/Fail only. Up to 3 credits may apply towards BS degree program's Free Electives (even if student has multiple enrollments in this course and/or COEN 4950). Students should contact the CEAS Extracurricular Programs Manager for more information.
**Minimum 2.75 cumulative GPA is required.**
**Repeatability:** Repeatable for up to 24.00 total credit hours.
**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.
**Grading Basis:** Pass/Fail

**COEN 4000 (1-3) Global Intensive Studies**
Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.
**Equivalent - Duplicate Degree Credit Not Granted:** COEN 5000
**Repeatability:** Repeatable for up to 6.00 total credit hours.

**COEN 4830 (1-3) Special Topics**
Explores topics of interest in engineering. Content varies by instructor and semester.
**Repeatability:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**COEN 4850 (1-3) Independent Study**
Provides opportunities for independent study at the upper-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.
**Repeatability:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.
COEN 4950 (1-6) Global Engineering Internship
Students enrolled in this course participate in a pre-approved global internship with an employer that allows them to explore the relationship between theory and practice and demonstrate evidence of significant learning (e.g., academic assignments and employer/sponsor evaluations). Pass/Fail only. Up to 3 credits may apply towards BS degree program’s Free Electives (even if student has multiple enrollments in this course and/or COEN 3930). Students may also earn COEN 4950 credit for international internship facilitated through CU-approved providers that contract with CU’s Education Abroad Office. These placements must be pre-approved by the student’s department/program to be eligible for credit. Students should contact the CEAS International Programs Director for more information. Minimum 2.75 cumulative GPA required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Pass/Fail

COEN 5000 (1-3) Global Intensive Studies
Provides a hands-on exploration of a particular engineering/applied science subject area in an overseas setting. Serves as a complement to an existing engineering or applied science course taught at CU. Topic areas will vary.
Equivalent - Duplicate Degree Credit Not Granted: COEN 4000
Repeatable: Repeatable for up to 6.00 total credit hours.

COEN 5550 (3) Designing for Defense
Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams chosen by competitive selection/work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5550 and CSCI 5550

EDEN 5001 (1-3) Special Topics in Global Engineering
At the graduate level, covers topics of interest in global engineering. Content varies by section and from semester to semester.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

EDEN 5147 (3) A Systems Approach to Global Engineering
Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.
Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 4157 and CVEN 5157

EHON 1151 (3) Critical Encounters
Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Department restriction, honors standing or instructor consent required.
Requisites: Restricted to Engineering Honors Program (PEHN) students only.

EHON 1500 (1) Honors Reading Group
Faculty led reading seminars, focusing on specific test or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning.
Requisites: Restricted to Engineering Honors Program (PEHN) students only.
Additional Information: Engineering Honors Course

EHON 3843 (3) Special Topics
Explores different important themes relative to the Engineering Honors Program. Check with department for specific semester topics.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Engineering Honors Program (PEHN) students only.
Additional Information: Engineering Honors Course

EHON 4051 (1) Dimensions of Leadership
Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Department restriction, honors standing or instructor consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENEN 2820 (1-6) Special Topics
Explores topics related to energy engineering. Content will vary by semester and instructor.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
ENEN 4321 (3) Oil and Gas Processing
Provides a foundation in the fundamentals of oil and gas processing, including discovery, extraction and refining. Due to the importance of oil and gas in the current energy infrastructure, this course provides a broad understanding of the industry to students interested in energy engineering.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).

ENEN 4600 (3) Interdisciplinary Energy Engineering Projects
Prepares students to analyze energy systems from technical, economic, and policy perspectives with project topics varying by semester. Provides historical and contemporary context of the energy landscape. Emphasizes application of engineering fundamentals for the design and evaluation of real world energy systems. Projects will be completed by working in interdisciplinary teams.
**Requisites:** Requires prerequisite course of CHEN 3660 (minimum grade C). Restricted to Energy Engineering Minor (ENMR-MIN) students with 87-180 credits (Seniors).

ENEN 4840 (1-6) Special Topics
Explores topics related to energy engineering. Content will vary by semester and instructor.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

ENEN 5840 (1-6) Special Topics
Explores topics related to energy engineering. Content will vary by semester and instructor.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to College of Engineering graduate students only.

ENLP 3000 (3) Intelligent Leadership
Examines science and technology’s rise to the status of political, cultural and economic leader of the modern world. Also considers the ambitions and limits of the modern scientific enterprise, and investigates whether scientists are adequately equipped to lead humanity’s political, spiritual and evolutionary future. Readings are drawn from primary sources in history, economics, politics, philosophy and literature. Recommended restriction: this course is recommended for Sophomores, Juniors, and Seniors.
**Requisites:** Requires prerequisite course of CHEN 3660 (minimum grade C). Restricted to Energy Engineering Minor (ENMR-MIN) students with 87-180 credits (Seniors).

ENLP 4000 (3) The Empire of Modern Science
Examines science and technology’s rise to the status of political, cultural and economic leader of the modern world. Also considers the ambitions and limits of the modern scientific enterprise, and investigates whether scientists are adequately equipped to lead humanity’s political, spiritual and evolutionary future. Readings are drawn from primary sources in history, economics, politics, philosophy and literature. Recommended restriction: this course is recommended for Sophomores, Juniors, and Seniors.
**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.
**Recommended:** Prerequisite ENLP 2000 or ENLP 3000.

**Energy Engineering - Minor**

The energy engineering minor provides energy-minded students with a foundational understanding of energy technologies and the energy industry, including technological, policy, and economic considerations related to conventional and renewable energy systems.

Required courses include a fundamentals-based energy course, an energy policy/society focused course, and 12 credits of energy-focused technical elective courses. Elective courses, selected from across the CU campus, allow students to specialize according to their specific interest in the energy field.

The energy engineering minor has strong connections with industry through an industry advisory panel and guest speakers.

For more information, visit the college’s Energy Engineering Minor (http://www.colorado.edu/engineering/energy-engineering-minor/) webpage.

**Requirements**

Students must complete 18 credit hours for the minor: one fundamentals-based course, one policy/society course, and four electives chosen from a list of approved courses. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. For an up-to-date listing of elective courses, visit the Energy Engineering Minor Technical Electives (https://www.colorado.edu/engineering/academics/guide-degrees-certificates/minors/energy-engineering-minor/energy-engineering-minor-0/) webpage.

Global Engineering - Minor

Engineers of the 21st century will be working in a globalized industry in which a growing number of engineering firms are transnational. Moreover, advances in engineering and applied science offer immense promise to solving some of the most challenging global issues of our time, making exposure to other cultures and contexts crucial for a well-rounded engineering education. The global engineering minor will prepare students for international practice in multiple ways:

- It will reveal the profession's global impact on economies, society, and the environment.
- It will make students more sensitive to and aware of other cultures.

Graduates with this minor will be capable of negotiating complex, uncertain and ambiguous circumstances, whether at home or abroad. Coursework includes a choice between two cornerstone courses, foreign language study through the intermediate level, and students' choice of coursework that expands their understanding of:

- A particular country, region, or language (e.g. CHIN 3341: Literature and Popular Culture in Modern China; FREN 3600: Business French; PSCI 3082: Political Systems of Sub-Saharan Africa, etc.)
- Global topics (e.g. GEOG 3682: Geography of International Development; IAFS 3850: International Conflict Resolution and Peacebuilding; EMEN 4200: Engineering and Entrepreneurship for the Developing World, etc.)
- Global Engineering (e.g. CVEN 4157: A Systems Approach to Global Engineering; MCEN 4228: Household Energy Systems in the Global South; EMEN 4200: Engineering Entrepreneurship for the Developing World; other Mortenson Center courses, etc.)

Most of these courses fit seamlessly into existing humanities and social science (H&SS) and technical elective credit requirements so that students do not have to add significant additional coursework to their major. Finally, students pursuing the minor must study, intern, or volunteer abroad through an approved program— or complete an approved project through the Mortenson Center in Global Engineering.

For more information, visit the Global Engineering Minor webpage (https://www.colorado.edu/engineering-international/global-engineering-minor/).

Requirements

To enroll in the global engineering minor, a student must be admitted to the College of Engineering & Applied Science and have a minimum 2.50 cumulative GPA. The minor requires a minimum completion of 18 credit hours, along with an approved global experience. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. A maximum of six (6) credit hours can be double-counted with another minor.

Required Courses and Credits

**Foundation Course**

Choose one course (3 credits) from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENES 2360</td>
<td>Gaining a Global State of Mind for Effective Engineering Practice (may take as upper- or lower-division)</td>
<td>3</td>
</tr>
<tr>
<td>ENES 3360</td>
<td>Gaining a Global State of Mind for Effective Engineering Practice (may take as upper- or lower-division)</td>
<td>3</td>
</tr>
<tr>
<td>CVEN 2837</td>
<td>Special Topics (&quot;Introduction to Global Engineering&quot; is the only special topics course that satisfies this requirement)</td>
<td>3</td>
</tr>
</tbody>
</table>

CVEN 2837 Special Topics (Intro to Global Engineering) is a required prerequisite for students who wish to access upper-division Mortenson Center coursework.
Students may take both foundation courses and count the second course toward the regional, global, or technical perspective requirements. Both courses are also approved for H&SS credit.

**Foreign Language**

Students must demonstrate intermediate foreign language ability through any of the following avenues:

- Completing the second semester, intermediate level of their chosen foreign language
- Testing into the 3000-level of a foreign language through CU’s foreign language placement test.
- Completing “intermediate II” level of a foreign language through the ALTEC language lab. Must earn certificate of completion, which requires 80% attendance.
- Undergoing a language proficiency evaluation through ALTEC.

There is no specific credit allocation for this requirement. International students from non-English-speaking countries are exempt from this requirement but must take a total of 18 approved credits to earn the minor.

Students who do not receive academic credit for a foreign language (e.g., because they tested out of the intermediate level) must take a minimum of 18 approved credits to earn for the minor. Course options include: taking an upper-division foreign language course, taking both foundation courses, or selecting additional credits from the regional, global, or technical perspective category.

</tbody>
</table>

**Regional, Global, and Technical Perspective Courses**

Students may choose 12 credits of their choice (9 must be upper-division) that expand their understanding of:

- A particular country, region, or language
- Global topics
- Global Engineering

Many global and regional context courses also count toward Humanities & Social Sciences requirements, allowing students to double dip. Global engineering courses may also be eligible to double dip as technical, professional, or focus-area electives in the major. Students should confirm classes they are considering with their academic advisor.

International students may choose U.S. context courses to fulfill these requirements.

Global Experience

Global Engineering Minor students should seek global experience as part of their undergraduate studies. This can include CU-approved education abroad programs of any duration, overseas internships/practicas, travel with EWB-USA or EIA, or other relevant international experience by petition.

There is no specific credit allocation for this requirement.

Students may substitute this requirement on a case-by-case basis by completing an approved project through the Mortenson Center in Global Engineering.

Engineering Leadership - Certificate

The Engineering Leadership Program (ENLP) confronts leadership challenges in applied science using liberal arts pedagogy. The program aims to cultivate engineering leaders of curiosity and character who combine technical expertise with moral principles and political literacy to address society’s most pressing scientific and technological problems.

ENLP offers a wide variety of courses on the thought and practice of leadership, many of which utilize primary source texts in history, the philosophy of science, moral philosophy, political science, and anthropology. The program’s courses count for humanities and social sciences credit in the College of Engineering and Applied Science, and most courses are discussion-based seminars. Students with a deep interest in ENLP’s curriculum are encouraged to pursue the Engineering Leadership Certificate and develop long-term relationships with faculty. Such students may also wish to take courses in the Herbst Program for Engineering, Ethics & Society, many of which count for credit toward the certificate.

In addition to introducing students to the intellectual complexities of leadership, the program also addresses contemporary concerns in engineering practice. CU Boulder’s engineering alumni and established leaders from engineering industry, business and politics frequently visit ENLP classes to give guest lectures, hold interview sessions and converse with students over informal lunches. The Engineering Leadership Program has also partnered with the Engineering Management Program to offer coursework for ENLP students interested in engineering project management, engineering entrepreneurship and engineering economics.

Requirements

Courses offered by the Engineering Leadership Program are open to all students in the College of Engineering and Applied Science. All ENLP courses count for humanities and social sciences credit. Students interested in ENLP are advised (but not required) to begin their course of study with ENLP 2000, the program’s introductory course.

The certificate requires 12 credit hours of coursework to be completed prior to graduation. Graduating students who have completed their certificate requirements must fill out the Certificate Completion Form on the ENLP website (https://www.colorado.edu/engineeringleadershipprogram/course-offerings-and-certificate-requirements/) to receive certificate status on their transcripts.

Students may take any ENLP course to sample the program’s offerings, or they may choose to take multiple courses and pursue the Engineering Leadership Certificate. The certificate is designed for students who are deeply curious about leadership and its manifold relationship with science, technology, humanity, and political society.

Most ENLP courses are discussion-based seminars focused on primary source readings spanning a wide variety of scientific, humanistic, and social scientific disciplines. ENLP courses also offer opportunities to attend guest lectures, travel abroad, network with CU alumni, and meet leaders from the public and private sectors.

Required Courses and Credits

Students are required to take any four courses from the list of core requirements or any three courses from the list of core requirements and one approved elective.

A list of approved electives is also available on the ENLP website (https://www.colorado.edu/engineeringleadershipprogram/). Students may petition the Engineering Leadership Program Director to consider other electives not listed below.

Lighting Design - Certificate

Our sense of sight is responsible for much of our perception of the world around us. Through the proper application of light, we can shape a viewer’s understanding of architecture and influence the outcome of our architectural designs.

The undergraduate certificate in Lighting Design (http://www.colorado.edu/lightingprogram/lighting-design-certificate/) is offered to students majoring in environmental design and theater, as well as other non-College of Engineering & Applied Science students, to expose them to the basics of architectural lighting and daylighting design. Topics include:

- Metrics of light
- Proper use of light sources, luminaires and controls
- Lighting effects on perception of architecture and how it fits into the architectural design process
- Daylight as a source and how it interacts with architecture
- Integration of daylight in interior spaces interacts with electric lighting

The certificate prepares students for entry-level jobs in lighting design firms. A combination of lighting design with architecture, landscape architecture, or design studies could also open doors in architecture and interior design firms.

Requirements

Admission

A cumulative GPA of 2.500 or higher is required to enroll. This certificate is not open to students rostered in the College of Engineering & Applied Science. First-year students are not eligible to take certificate courses - students may sign up for the certificate in the spring of their freshman year, and start taking classes in their sophomore year.

To enroll, students should complete the Lighting Certificate Declaration Form (http://bit.ly/LightingCertificate/).

Grade Requirements

A cumulative GPA of 2.500 for all certificate courses is required, with no individual grade lower than C. A course not passed with the minimum grade may be repeated one time.

Course Requirements

The certificate is achieved through completion of four lighting courses: two required courses, one technical elective, and a capstone course. Courses listed below represent current offerings and are subject to change.

Engineering, Ethics & Society

Since 1989, the Herbst Program for Engineering, Ethics and Society has engaged engineering students in the weighty questions of human existence and in linking these to the ethical practice of engineering. As our students discuss great works, they hone their skills at critical thinking and clear communication—essential skills for future engineers. Courses use foundational works from different eras and cultures to address the complexities where these three fields overlap:

- Engineering, as an educational process and a profession
- Ethics, or personal responsibility
- Society, as the rich socio-cultural world in which we live

All Herbst courses count toward Humanities and Social Sciences requirements in the College of Engineering and Applied Science.

Course code for this program is ENES.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Ambler, Wayne
Associate Professor Emeritus

Axel, Donna
Lecturer; JD, City University of New York School of Law

Brooks, Shilo (https://experts.colorado.edu/display/fisid_158053/)
Instructor; PhD, Boston College
Courses

**ENES 1010 (3) Engineering, Ethics and Society**
Explores a wide variety of challenging and interesting humanistic themes (love, responsibility, ambition, etc.) in many forms (fiction, philosophy, plays, poetry, art, music, etc.). In small discussion-based classes, emphasizes the writing, public speaking and critical thinking skills needed to excel as a professional engineer. Fulfills College of Engineering writing requirement for first-year freshmen only. Formerly HUEN 1010.

**Requisites:** Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

**ENES 1843 (3) Special Topics**
Explores different important themes in the humanities; check with the department for specific semester topics. Formerly HUEN 1843.

**Repeatability:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

**ENES 1850 (3) Engineering in History: The Social Impact of Technology**
Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history. Formerly HUEN 1850.

**Requisites:** Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

**ENES 2010 (3) Tradition and Identity**
Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging. Formerly HUEN 2010.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2020 (3) The Meaning of Information Technology**
Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 2000

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2100 (3) History of Science and Technology to Newton**
Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals, Galileo, etc., on the way. Formerly HUEN 2100.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2120 (3) History of Modern Science from Newton to Einstein**
Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science. Formerly HUEN 2120.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.

**ENES 2130 (3) History of Modern Technology from 1750 to the Atomic Bomb**
Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film. Formerly HUEN 2130.

**Requisites:** Restricted to College of Engineering (ENGRU) undergraduates only.
ENES 2210 (3) Modern Science and Technological Society
Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films. Formerly HUEN 2210.
Requisites: Restricted to College of Engineering majors only.

ENES 2346 (3) Women and Engineering
Explores the role of women as shaping and shaped by engineering, from the past into the future. Texts from history, women's studies, philosophy, film, and literature shed light on how gender has contributed to the forging of our identities, both personal and professional. Engineering professors guest-lecture, sharing their life stories and their research.
Equivalent - Duplicate Degree Credit Not Granted: ENES 3346
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 2360 (3) Gaining a Global State of Mind for Effective Engineering Practice
Ranges across cultures and centuries to reveal many dimensions of globalization; shows how cultural awareness enhances effectiveness in the increasingly global profession of engineering. This highly interactive course uses history, philosophy, geography, religion, economics, the arts, etc., to illustrate the complexity of global engineering's cultural context. Concurrently, it encourages new insights into culture and identity, both at home and abroad. Formerly HUEN 2360.
Recommended: restricted to students in the College of Engineering and Applied Science.

ENES 2840 (3) Lower Division: Independent Study
Offers opportunity for lower-division Engineering students to do independent study work in humanities, appropriate to their academic level. Subject determined, with a Herbst instructor, to fit the needs of the student. Department and faculty consent required. Formerly HUEN 2840.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 2843 (1-3) Special Topics
Explores different important themes in the humanities; check with the department for specific semester topics. Formerly HUEN 2843.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENES 3100 (3) Seminar in Engineering, Ethics & Society
Introduces students to foundational texts in personal ethics (from philosophy, literature, history, and the arts). Class discussion puts these texts into context for students preparing to enter careers in engineering and applied science. Includes extensive writing. Fulfills the College of Engineering & Applied Science writing requirement. Department prerequisite: a minimum GPA of 3.0. Formerly HUEN 3100.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 3200 (3) Humanities for Engineers 2
Continues HUEN 3100's discussion of the human condition by exploring culturally and historically significant works of multiple genres in small-group seminars. Alert class participation is required, and writing skills will be honed through regular assignments. Formerly HUEN 3200.
Requisites: Requires prerequisite course of HUEN 3100 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 3280 (3) Science and Religion
Explores relationship between science and religion from multiple contrasting stances, including Western and non-Western culture; ancient and modern viewpoints; pro and counter Enlightenment arguments. The course uses history, philosophy, psychology, cognitive science, biology, poetry, theology, sociology, political theory, literature, film, and social media to show the pervasiveness and complexity of the relation between science and religion. The course also promotes sympathetic treatment of perspectives, cutting widely across the political, cultural, and belief spectrums. Previously offered as a special topics course.
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 3346 (3) Women and Engineering
Explores the role of women as shaping and shaped by engineering, from the past into the future. Texts from history, women's studies, philosophy, film, and literature shed light on how gender has contributed to the forging of our identities, both personal and professional. Engineering professors guest-lecture, sharing their life stories and their research.
Equivalent - Duplicate Degree Credit Not Granted: ENES 2346
Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.
Grading Basis: Letter Grade

ENES 3350 (3) Gods, Heroes and Engineers: The Western Quest for Excellence
Investigates the intensely competitive quest of the ancient Greeks for excellence in everything from art and literature to science and war and also the odyssey of the mind generated by this quest, culminating in our modern world. Formerly HUEN 3350.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 3360 (3) Gaining a Global State of Mind for Effective Engineering Practice
Ranges across cultures and centuries to reveal many dimensions of globalization; shows how cultural awareness enhances effectiveness in the increasingly global profession of engineering. This highly interactive course uses history, philosophy, geography, religion, economics, the arts, etc., to illustrate the complexity of global engineering's cultural context. Concurrently, it encourages new insights into culture and identity, both at home and abroad. Formerly HUEN 3360.
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.
ENES 3430 (3) Ethics of Genetic Engineering: A Multidisciplinary Approach
Investigates the metaphorical, ideological and scientific constructs that inform debates over the genetic modification of humans, animals and plants. Begins with a close reading of Shelley’s Frankenstein, proceeds to a consideration of philosophical arguments for and against human modification and concludes with a consideration of the scientific and political contexts that inform the regulation of genetically modified foods. Formerly HUEN 3430.
Requisites: Restricted to College of Engineering (ENG) undergraduates only.

ENES 3430 (3) Ethics of Genetic Engineering: A Multidisciplinary Approach
Investigates the metaphorical, ideological and scientific constructs that inform debates over the genetic modification of humans, animals and plants. Begins with a close reading of Shelley’s Frankenstein, proceeds to a consideration of philosophical arguments for and against human modification and concludes with a consideration of the scientific and political contexts that inform the regulation of genetically modified foods. Formerly HUEN 3430.

ENES 3543 (3) History of Western Medicine
Introduces the intriguing and appalling history of western medicine, from prehistory to the present. Includes grave-robbers, leeches and the Black Death. This course links past to present, in discussion of evidence, innovation, ethics and standards of medical education and practice. Based on original sources, textbook accounts and modern scholarship, and featuring student presentations on the Disease of the Week. Formerly HUEN 3543.
Requisites: Restricted to College of Engineering (ENG) undergraduates only.

Grading Basis: Letter Grade

ENES 3700 (3) Culture Wars in Rome
Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome. Draws on evidence from Roman literature, politics, art and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder. Formerly HUEN 3700.

ENES 3720 (3) Voices of Vienna: Freud, Wittgenstein, Mozart
Study and visit Vienna, a city famous for Mozart’s music, Freud’s psychology and Wittgenstein’s philosophy. As the seat of the Habsburg Empire, Vienna was a rich cultural and political center; it was a crossroads for international trade and exciting new ideas. As the lively capital of present-day Austria, it remains in the forefront of social change. Formerly HUEN 3720.

ENES 3750 (3) Xi'an, China: Self-Awareness and Images of the Other
Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political, and economical circumstances. Chinese and American concepts of self and society, and of individual, collective, and national identities will be analyzed. Held on the campus of Xi’an Jiaotong University, China. Formerly HUEN 3750.
Recommended: Prerequisite completion of lower-division Humanities course.
Additional Information: Departmental Category: Asia Content
ENES 3760 (3) Don Quixote’s Spain
Examines the first modern novel in the context of modern society’s preoccupation with fake news and the difficulty of separating fictions from truth. As a global intensive, focuses on the origins of modern Spain, the rise of Madrid at its center, and the continuing presence of Don Quixote and Sancho Panza in the popular imagination. Interrogates the virtuality of our own perceptions and the role that imagination plays in our construction of self and other.
Requisites: Restricted to students in College of Engineering and Applied Science (ENG) only.
Recommended: Spanish language experience; fluency not required.

ENES 3840 (1-3) Independent Study
Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. Department consent required. Formerly HUEN 3840.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

ENES 3843 (1-3) Special Topics
Explores different important themes in the humanities, check with department for specific semester topics. Formerly HUEN 3843.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

ENES 4200 (3) Humanities for Engineers 4
Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program. Formerly HUEN 4200.

ENES 4800 (1) Leadership & Ethics in the Real World
Formerly HUEN 4800.

ENES 4830 (3) Special Topics
Explores different important themes in the humanities; check with department for specific semester topics. Formerly HUEN 4830.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of HUEN 1010 or HUEN 2210 or HUEN 3100 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Certificate Program
• Engineering, Ethics and Society - Certificate (p. 810)

Engineering, Ethics and Society - Certificate
The certificate in engineering, ethics and society (EES) leads students to courses that will engage them with contemporary issues regarding the promotion, use and possible risks of engineering and applied science. For example, what are the likely benefits and risks of genetic engineering? How can engineering help offset worldwide environmental degradation? What role should engineers play in formulating policies that will govern the relationship between science and contemporary American society?

The EES certificate includes a cornerstone course that explores these philosophical questions (and others related to them). The certificate also steers students toward other courses that address these difficult questions and will help them find a path toward workable answers. The list of possible courses includes:
• courses that view engineering in social, economic and legal contexts;
• courses that study science and technology in the past, thereby illuminating their influence in the present; and
• courses that explore the environmental consequences of STEM innovation.

Requirements
Eligibility
To begin the certificate, students must be in good academic standing (https://www.colorado.edu/engineering-advising/academic-standing/) in the College of Engineering and Applied Science and must complete
a certificate of enrollment with Paul Diduch of the Herbst Program for Engineering, Ethics & Society.

To complete the certificate, students must submit a certificate completion form to the director.

**Program Requirements**

Students must complete 12 credits, including four courses (at least one upper-division) with a minimum grade in each course of C+.

2. Students must confer with the EES Certificate Director to determine the suitability of a particular course.

**Engineering Management**

The Lockheed Martin Engineering Management Program (EMP) (http://www.colorado.edu/emp/) is a technically based management and leadership program for the engineering and technical fields that prepares students for early to mid-career positions in a variety of industries. It is designed for students who are looking to advance in management, successfully contribute to the overall business or venture, and develop their leadership skills.

The program offers an engineering entrepreneurship minor, engineering management minor, an engineering management certificate and courses for undergraduate students in the College of Engineering and Applied Science. The minors and certificate are designed for junior- and senior-level engineering students who seek to develop business and industry acumen to complement their engineering majors. Courses are offered on campus with many virtual distance sections.

**Course code for this program is EMEN.**

**Minors**

- Engineering Entrepreneurship - Minor (p. 813)
- Engineering Management - Minor (p. 814)

**Certificate**

- Engineering Management - Certificate (p. 814)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

- Angel, George
  Instructor

- Bozic, Christy L. (https://experts.colorado.edu/display/fisid_155482/)
  Scholar in Residence, Endowed/Named Professor, Faculty Director; PhD, Purdue University

- Buzzard, Frank
  Instructor; MS, University of Houston

Instructor; MBA, Stanford University

Torrey, Kathryn
Scholar in Residence; ME, University of Colorado Boulder

Van Atten, Bill
Instructor; MS, Johns Hopkins University

Wrobetz, Anne
Instructor; MS, University of Colorado Boulder

Courses

EMEN 3100 (3) Introduction to Engineering Management
Examines topics important to the management of engineering activities within organizations. Topics include the relationship of engineering to business and management disciplines, the functions of an engineering manager, principles and techniques for managing financial resource and business ownership. Explores best practices in global engineering management, process management, legal issues, ethics, organizational behavior and communications.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

EMEN 4030 (3) Project Management Systems
Gain skills in project management best practices that fit any industry, sector or geography. This interactive class provides students with the tools necessary to effectively initiate, plan, execute, control and close any type of project. Students apply knowledge as they plan an actual project, build and execute it, and ensure it meets stakeholder expectations and other project goals.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4050 (3) Leadership and Professional Skills
Accelerate your personal and professional growth with the essential skills required to become an effective leader/manager. Conduct personal development through exercises in communication and leadership effectiveness. Explore leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics and business ethics.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4100 (3) Engineering Economics
Introduces engineering cost concepts, financial statements and the corporate economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flow, replacement analysis, risk management and financial case statements.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4110 (3) Supply Chain Management
Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chair cost subject to service requirements imposed by a variety of industries.
Equivalent - Duplicate Degree Credit Not Granted: MGMT 4110
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4120 (3) Managing Business Processes
Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.
Equivalent - Duplicate Degree Credit Not Granted: MGMT 4120 & MGMT 5120
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4200 (3) Engineering and Entrepreneurship for the Developing World
Use your engineering and problem solving skills, combined with market/industry research, customer interviews, design for manufacturability, stakeholder management and financial modeling to promote entrepreneurship and sustainable change in the developing world. Explore alternative energy, medical devices, phones, internet, recycling, cook stoves, clean water, sanitation and infrastructure.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4400 (3) Quality Management
Introduces the concepts, tools and techniques used in the management and measurement of quality and productivity in a business environment. Associated topics include: statistics methods, design quality, measurement, control and process improvement. Discover the basics of performance excellence management including Baldridge Award criteria, strategic planning, leadership and daily quality management.
Equivalent - Duplicate Degree Credit Not Granted: MGMT 4400
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.
EMEN 4405 (3) Systems Engineering
Introduces students to system engineering in terms of defining objectives, applications and the major steps in the systems engineering process. Learn to work effectively with diverse project teams. Industry standards are covered that lay out the steps of the classic Systems Engineering lifecycle. Real world engineering examples from concept exploration to hardware retirement are used.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4800 (3) Technology Ventures and Marketing
Learn marketing concepts, skills and tools to launch new products and ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills and tools to be successful colleagues, managers and leaders in industry. Gain valuable business acumen using a hands-on learning environment.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4820 (3) Entrepreneurial Product Development
A practical, hands-on course that introduces engineers and business students to the exciting world of product development. Each student will create a concept for an innovative product, assess its commercial potential, construct simple digital and physical prototypes, and evaluate its impact on the environment. The course culminates in a trade-show like event where everyone showcases their world-changing product to their peers.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4825 (3) New Venture Creation
Relevant to students seeking to acquire an entrepreneurial toolkit of knowledge and skills for working in the startup world or launching a new venture. Covers the techniques for evaluating the probability of success for a new venture and develops a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.
Equivalent - Duplicate Degree Credit Not Granted: ESBM 4830
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4830 (3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4840 (1-3) Independent Study Project
Available only through approval of Engineering Management Program. Subjects arranged to fit the needs of the particular student.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Engineering Entrepreneurship - Minor
The undergraduate engineering entrepreneurship minor prepares students with the knowledge, understanding and skills essential to entrepreneurship in a start-up venture or within a larger corporation. This minor develops entrepreneurial and leadership skills, while introducing students to the multiple facets of entrepreneurship, innovation, creative development and the overall entrepreneurial process. After completion of the requirements, the undergraduate minor in engineering entrepreneurship will be listed on the student’s transcript at the time of graduation along with the student’s bachelor’s degree.

For more information, visit the program’s Undergraduate Engineering Entrepreneurship Minor (https://www.colorado.edu/emp/current-students/undergraduate-programs/undergraduate-minors/engineering-entrepreneurship/) webpage.

Requirements
Eligibility
The engineering entrepreneurship minor is open to all undergraduate students in the College of Engineering and Applied Science who are in good academic standing (https://www.colorado.edu/engineering-advising/academic-standing/) within the College.

Program Requirements
The minor requires 15 credit hours consisting of two required courses and three elective courses.

To be awarded the minor, the students must successfully complete the 15 credit hour program requirements. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor.

Each individual course that is counted towards these degree requirements must be passed with a D- or better (note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course). Prior coursework may be transferred from other institutions with approval.

To meet the minor’s residency requirement, at least three courses need to be taken at CU Boulder (in person or online).

### Engineering Management - Minor

The engineering management minor complements the technical knowledge of a baccalaureate engineering degree by introducing business skills engineers need to succeed in today's job market. After completion of the requirements, the undergraduate minor in engineering management will be listed on the student’s transcript at the time of graduation along with the student’s bachelor’s degree.

For more information, visit the program’s Undergraduate Engineering Management Minor webpage.

#### Requirements

#### Eligibility

The engineering management minor is open to undergraduate students rostered in the College of Engineering and Applied Science.

#### Program Requirements

Students must complete 18 credit hours: 2 required courses totaling 6 credit hours, plus an additional 12 credit hours of electives.

A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each course requires a minimum grade of D- or better (note, however, that a C- or better is required in all prerequisite courses to qualify to take a subsequent course).

To meet the minor’s residency requirement, at least three courses need to be taken at CU Boulder (in person or online).

**Electives**

Choose four of the following:

- EMEN 3100 Introduction to Engineering Management

Total Credit Hours 18

1. Designing for Defense is a cross-listed course. Students can only count it once towards the minor.
2. A student may only count 3 credit hours from an Entrepreneurship Capstone offered within their major.
3. This graduate-level course is open to undergraduate enrollment.

### Engineering Management - Certificate

The engineering management undergraduate certificate program prepares junior and senior engineering students for success in entry-level positions by providing business knowledge and skills in an engineering context.

This certificate gives students the tools to understand the business framework in an engineering and technology environment, increases their potential job opportunities and accelerates career development.

For more information, visit the program’s Undergraduate Engineering Management Certificate webpage.

#### Requirements

The undergraduate engineering management certificate requires 12 credit hours: 3 required core credits and 9 elective credits.

**Electives**

Choose three of the following:

- EMEN 3100 Introduction to Engineering Management
- EMEN 4050 Leadership and Professional Skills
- EMEN 4100 Engineering Economics
- EMEN 4110 Supply Chain Management
- EMEN 4120 Managing Business Processes
- EMEN 4200 Engineering and Entrepreneurship for the Developing World
- EMEN 4400 Quality Management

Total Credit Hours 12
**Engineering Physics**

Engineering physics provides students with a broad exposure to the basic physical theories and mathematical techniques underlying engineering. The program may be specialized to meet the student's interests through engineering electives. Most students become involved in laboratory research, and graduates find opportunities in optics, electronics, magnetics, and other hardware-based job markets. The program also provides excellent preparation for graduate study in physics, applied physics, and other areas of the natural sciences and engineering.

The engineering physics program focuses on the foundations of modern technology. The program prepares students for research, development, and entrepreneurial careers in many frontier areas of engineering, including quantum devices, ultra fast lasers, adaptive optics, cryogenic electronics, computer simulation of physical systems, solar cells, magnetic storage technology, micro-mechanical systems, and molecular electronics. All students study the core theoretical subjects of mechanics, electricity and magnetism, thermal physics, and quantum mechanics, supplemented by courses in mathematics, computation, and laboratory technique. The program can be tailored to a student's interests through electives in engineering, physics, or other sciences.

**Bachelor's Degree**

- Engineering Physics - Bachelor of Science (BSEP) (p. 819)

**Courses**

**PHYS 1000 (3) Preparatory Physics**

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110 and PHYS 1120, the engineering majors sequence. Does not satisfy any MAPS deficiency in either the sciences or math. Department enforced prerequisite: 1 year high school algebra.

**Additional Information:** Arts Sci Core Curr: MAPS Course

**PHYS 1010 (3) Physics of Everyday Life 1**

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Department enforced prereq., high school algebra or equivalent. This course should not be taken if the student has a MAPS deficiency in math.

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci: Lec Crse w/o Req Lab

**PHYS 1020 (4) Physics of Everyday Life 2**

Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Department enforced prereq., high school algebra.

**Requisites:** Requires prerequisite course of PHYS 1010 (minimum grade C).

**Additional Information:** GT Pathways: GT-SC1 - Natural Physical Sci: Lec Crse w/o Req Lab

**PHYS 1110 (4) General Physics 1**

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1115

**Requisites:** Requires prerequisite course of GEEN 3830 (minimum grade C) or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C).

**Additional Information:** GT Pathways: GT-SC2 - Natural Physical Sci: Lec Crse w/o Req Lab

**PHYS 1115 (4) General Physics 1 for Majors**

First semester of three semester sequence for physics, engineering physics and astronomy majors. Covers kinematics, dynamics momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1110

**Requisites:** Requires prerequisite course of GEEN 3830 or prerequisite or corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C). Restricted to Physics (PHYS-BA) or Engineering Physics (EPEN-BS) or Astronomy (ASTR-BA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Arts Sci Core Curr: Natural Science Sequence Arts Sci Gen Ed: Distribution-Natural Sciences

**PHYS 1120 (4) General Physics 2**

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 1125

**Requisites:** Requires prerequisite courses of PHYS 1110 or PHYS 1115 and a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade of C).
PHYS 1125 (4) General Physics 2 for Majors
Three lect., one rec per week, plus three evening exams in the fall and spring semesters. Second semester of three semester introductory sequence for physics, engineering and astronomy majors. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 1120
Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 1115.
Requirements: Requires a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade C). Restricted to Physics (BA), Engineering Physics (BS) and Astronomy (BA) students only.
Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1140 (1) Experimental Physics 1
Introduces experimental physics through laboratory observation of a wide range of phenomena. Covers experiments on physical measurements, including mechanics, electricity & magnetism, and optics, with the mathematical analysis of physical errors associated with the experimental process.
Requisites: Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C).
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1140 (1) Experimental Physics 2
Introduces experimental physics through laboratory observation of a wide range of phenomena. Covers experiments on physical measurements, including mechanics, electricity & magnetism, and optics, with the mathematical analysis of physical errors associated with the experimental process.
Requisites: Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C).
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 1230 (3) Light and Color for Nonscientists
Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science
MAPS Course: Chemistry
MAPS Course: Physics

PHYS 1240 (3) Sound and Music
Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.
Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec
Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Physics
MAPS Course: Natural Science

PHYS 1400 (1) Fundamentals of Scientific Inquiry
Engages students in discussions and experimentation centered around what it means to be a scientist and a member of the greater scientific community. Topics include model-building, metacognition, and the process of science. The second half of the course consists of student-led group research projects culminating in a poster presentation session. Does not count toward the PHYS-BA major requirements. To apply online or for more information, please visit: http://www.cuprime.org/class

PHYS 1580 (3) Energy and Interactions
Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physical content focuses on interactions and energy.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 1580
Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Chemistry
MAPS Course: Physics
MAPS Course: Natural Science

PHYS 2010 (5) General Physics 1
Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers mechanics, heat and sound. Thorough presentation of fundamental facts and principles of physics using algebra and trigonometry. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Department enforced prerequisites: ability to use high school algebra and trigonometry.
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2020 (5) General Physics 2
Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers electricity and magnetism, light and modern physics. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 2010 (minimum grade C).
Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

EDUC 1580
PHYS 2130 (3) General Physics 3
Covers special relativity, quantum theory, atomic physics, solid state and nuclear physics. Third semester of introductory sequence for science and engineering students. Physics majors should take PHYS 2170 instead of this course. Normally taken with PHYS 2150.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 2170
Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2150 (1) Experimental Physics 2
One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170, this course may be taken after PHYS 2130 or PHYS 2170.
Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of PHYS 2130 or PHYS 2170 (all minimum grade C-).

PHYS 2170 (3) Foundations of Modern Physics
Covers special relativity, quantum mechanics and atomic structure. Completes the three-semester sequence of general physics for physics and engineering physics majors. Normally taken with the laboratory PHYS 2150.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 2130
Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2210 (3) Classical Mechanics and Mathematical Methods 1
Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics.
Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 and a prerequisite or corequisite course of APPM 2350 or MATH 2400 and a prerequisite or corequisite course of APPM 2360 or MATH 3430 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 2600 (3) Introduction to Programming and Scientific Computing
Covers basic concepts in programming and scientific computing, including numerical integration and simulation of physical systems. Students will learn the programming language Python and associated graphics libraries. Programming examples will be drawn from classical physical systems that can only be solved numerically, such as projectile motion with drag and N-body problems.
Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires prerequisite or corequisite course of PHYS 2170 or PHYS 2130 (minimum grade C-).

PHYS 2840 (1-3) Independent Study
Selected topics for undergraduate independent study. Subject matter to be arranged.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 3000 (3) Science and Public Policy
For nonscience majors. Reading, discussions, debates and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Department enforced prerequisite: completion of core science requirement.

PHYS 3050 (3) Writing in Physics: Problem-Solving and Rhetoric
Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Department enforced prerequisite: lower-division core writing requirement. Does not count toward the PHYS-BA major requirements or major GPA.
Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

PHYS 3070 (3) Energy and the Environment
Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 3070

PHYS 3090 (3) Introduction to Quantum Computing
Covers the basics of quantum computation, including the basics of quantum information; axioms of quantum mechanics; quantum circuits and universality; the relationship between quantum and classical complexity classes; simple quantum algorithms such as the quantum Fourier transform; Shor factoring algorithm; Grover search algorithm; physical implementation of quantum computation; error correction and fault tolerance.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 3090
Requisites: Requires prerequisite course of APPM 2360 or APPM 3310 or CSCI 2820 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135 (minimum grade C-).

PHYS 3210 (3) Classical Mechanics and Mathematical Methods 2
Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics.
Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite course of APPM 2350 or MATH 2400 and a prerequisite course of MATH 3430 or APPM 2360 (all minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3220 (3) Quantum Mechanics 1
Introduces quantum mechanics with wave, operator and matrix computational techniques. investigates solutions for harmonic oscillator, potential well and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order.
Requisites: Requires a prerequisite course of PHYS 3210 (minimum grade C-).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
PHYS 3221 (1) Tutorial Practicum for Quantum Mechanics 1
Uses interactive group work to aid student learning in corequisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.
Requisites: Requires a corequisite course of PHYS 3220.
Grading Basis: Pass/Fail

PHYS 3310 (3) Principles of Electricity and Magnetism 1
Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity.
Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite course of APFM 2350 or MATH 2400 and a prerequisite course of MATH 3430 or APFM 2360 (all minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3311 (1) Tutorial Practicum for Electricity & Magnetism 1
Uses interactive group work to aid student learning in corequisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.
Requisites: Requires a corequisite course of PHYS 3310.
Grading Basis: Pass/Fail

PHYS 3320 (3) Principles of Electricity and Magnetism 2
Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; Ac circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge.
Requisites: Requires a prerequisite course of PHYS 3310 (minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 3330 (2) Electronics for the Physical Sciences
Introduces laboratory electronics for physical science students. Includes basic electronic instruments, dc bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic and microcontrollers. Students gain hands-on experience in designing, building and debugging circuits. Two lectures and one three hour laboratory per week. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results.
Requisites: Requires prerequisite courses of PHYS 2150 and PHYS 2130 or PHYS 2170 (all minimum grade C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4130 (3) Biological Electron Microscopy: Principles and Recent Advances
Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5130
Requisites: Requires a prerequisite course of EBIO 1220 or MCB 1150 or MCB 4550 or MCB 5550 or PHYS 1120 or PHYS 2020 (minimum grade D).

PHYS 4150 (3) Plasma Physics
Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators.
Requisites: Requires a prerequisite course of PHYS 3310 and a prerequisite or corequisite course of PHYS 3320 (all minimum grade of C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4230 (3) Thermodynamics and Statistical Mechanics
Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view.
Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite or corequisite course of PHYS 3220 (all minimum grade of C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4420 (3) Nuclear and Particle Physics
Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons.
Requisites: Requires prerequisite courses of PHYS 3320 and PHYS 4410 (all minimum grade of C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4440 (3) Advanced Laboratory
Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5430
Requisites: Requires a prerequisite course of PHYS 3330 (minimum grade of C).
Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

PHYS 4450 (3) History and Philosophy of Physics
Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5450 and PHIL 4450 and PHIL 5450
Requisites: Requires a prerequisite course of PHYS 1020 or PHYS 1120 or PHYS 1125 or PHYS 2020 (minimum grade of C).
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

PHYS 5450 and
PHYS 4460 (3) Teaching and Learning Physics
Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching and education research.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5460 and EDUC 4460 and EDUC 5460
Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade of C-).
Additional Information: Arts Sci Gen Ed; Distribution-Natural Sciences

PHYS 4510 (3) Optics
Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters.
Requisites: Requires a prerequisite course of PHYS 3320 (minimum grade of C-).
Additional Information: Arts Sci Gen Ed; Distribution-Natural Sciences

PHYS 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach
Focuses on the biophysics governing the structure/function of enzymes, cells, extra-cellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5550 and MCDB 4550 and MCDB 5550
Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 or MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.
Additional Information: Arts Sci Gen Ed; Distribution-Natural Sciences

PHYS 4560 (3) Introduction to Biophysics
Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5560 and MCDB 4560 and MCDB 5560
Requisites: Requires a prerequisite course of PHYS 2210 (minimum grade C-).
Recommended: Prerequisite PHYS 4230.
Grading Basis: Letter Grade
Additional Information: Arts Sci Gen Ed; Distribution-Natural Sciences

PHYS 4610 (2) Physics Honors
Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.
Additional Information: Arts Sciences Honors Course

PHYS 4620 (2) Physics Honors
Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.
Additional Information: Arts Sciences Honors Course

PHYS 4630 (2) Physics Honors
Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.
Additional Information: Arts Sciences Honors Course

PHYS 4810 (1-3) Special Topics in Physics
Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Arts Sci Gen Ed; Distribution-Natural Sciences

PHYS 4840 (1-3) Independent Study
Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4850 (1-3) Independent Study
Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4970 (3) Seminar on Physical Methods in Biology
Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, CAT), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5970
Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 2020 and MCDB 1150 or EBIO 1220 (all minimum grade D-).

Engineering Physics - Bachelor of Science (BSEP)
During the freshman and sophomore years, students receive a broad introduction to physics, chemistry, applied mathematics, and mathematical methods in physics. Starting in the sophomore year, students take electrodynamics, quantum mechanics, classical mechanics, mathematical methods, thermodynamics and statistical mechanics, and advanced mathematics. In addition, there is a core of four laboratory courses that students take. Laboratory courses emphasize student-developed and student-designed independent projects in which students use the knowledge acquired to build apparatus of their own choosing. The capstone lab course, PHYS 4430, provides students with hands-on experience with optical spectroscopy, nuclear
magnetic resonance, scanning tunneling microscopy, and laser cooling and trapping of atoms, among other experiments.

The program encourages the formation of student research collaborations with faculty in the pursuit of senior thesis projects. Recent projects include research in pulsed laser deposition of high-temperature superconductors, electron diffraction studies of protein structure, and lattice distortion theory of colossal magnetoresistance materials.

Students who plan to become registered professional engineers should check the requirements for registration in their state before choosing their engineering major.

## Requirements

### Program Requirements

In order to earn a bachelor’s degree in engineering physics, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Engineering Physics (https://www.colorado.edu/physics/academics/undergraduate-students/bachelor-science-engineering-physics/) webpage.

Note: Some variations may be possible; see an Engineering Physics Faculty Mentor.

In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science (https://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements/).

<td>Computer-Aided Design and Fabrication</td>
<td></td>
</tr>
</tbody>
</table>

Second CSCI course at the 2000 level or above.

Choose 17 to 19 credits in courses other than those listed as required above. Must be offered by CEAS departments. 1

### Humanities, Social Sciences and Writing

Complete the College's Humanities, Social Sciences and Writing requirements. 2 18

### Free Electives

Choose at least 11 credit hours of free electives to meet the minimum 128 credit hours required for the BS degree. 11

Total Credit Hours 128

1. Choose from the following subject codes: APPM, AREN, ASEN, ATLS, BMEN, CHEN, COEN, CSCI, CVEN, ECEN, EMEN, ENEN, EVEN, GEEN, MCEN or STAT. Excluded: ASEN 3036, ASEN 3046, CHEN 1211 and any other courses otherwise approved for Humanities and Social Sciences credit.

2. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).

### Upper-Division Physics Electives

The selection of course offerings changes each semester. See the Engineering Advising Guide (https://www.colorado.edu/physics/node/336/attachment/) for an up-to-date selection.

PHYS 4840  Independent Study

Other Upper-Division Physics Electives 3-6
PHYS 3070  Energy and the Environment
PHYS 3090  Introduction to Quantum Computing
PHYS 4150  Plasma Physics
PHYS 4340  Introduction to Solid State Physics
PHYS 4420  Nuclear and Particle Physics
PHYS 4450  History and Philosophy of Physics
PHYS 4460  Teaching and Learning Physics
PHYS 4510  Optics
PHYS 4550  Cells, Molecules and Tissues: A Biophysical Approach
PHYS 4560  Introduction to Biophysics
PHYS 4810  Special Topics in Physics
Any PHYS graduate-level courses (5000 level or above), with permission of instructor.

Total Credit Hours 9

1  Students may satisfy the research/lab electives with documentation of accomplishments as an intern with a research group in the Physics Department or suitable cognate department. Approval by an Engineering Physics faculty advisor is required and should be obtained in advance. Students pursuing this option must take 9 credit hours of upper-division physics electives.

2  Students may count a maximum of 6 credit hours from a combination of PHYS 4610/PHYS 4620/PHYS 4630 and PHYS 4840 as physics electives.

Sample Four-Year Plan of Study
Below is a suggested schedule only. For a complete description of the engineering physics course requirements, visit the Department of Physics (http://www.colorado.edu/physics/) website.

In order to gain admission to the BAM program named above, a student must meet the following criteria:

1. Engineering physics computer science/drafting requirement (7–8 credit hours) is as follows: CSCI 1300 or PHYS 2600, along with CSCI 2270 or AREN 1027 or MCEN 1025 or a 2000-level or above Computer Science course.

2. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).

3. Engineering electives: 17–18 engineering elective credit hours above and beyond the required courses for engineering physics. Total credit hours required in engineering electives plus the required computer science/drafting credit hours: 25.

4. Nine credit hours of physics electives are required. For details, visit the Department of Physics (http://www.colorado.edu/physics/) website.

5. Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).

Bachlor's–Accelerated Master's Degree Program(s)

The Bachelor's–Accelerated Master's (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor's and master's degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master's degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor's–accelerated master's program enables students to continue working with their established faculty mentors.

BS in Engineering Physics, MS in Physics

The BAM program in engineering physics aims to provide new opportunities for undergraduate engineering physics majors. The program is specifically addressed to engineering physics majors in the Department of Physics. The engineering physics major gives students a thorough grounding in theoretical physics, applied mathematics, and broad exposure to engineering topics, so that they are well prepared either to proceed with graduate work or with professional employment in either basic science or in applied fields.

For students interested in graduate studies, the BAM program in engineering physics allows for participation in graduate coursework and research in a broad range of areas. For students interested in immediate professional employment, this program would serve as a terminal degree program that qualifies students for a higher level of employment.

Admissions Requirements

In order to gain admission to the BAM program named above, a student must meet the following criteria:

- Have a cumulative GPA of 3.30 or higher and a physics major GPA of 3.30 or higher
- Have completed a minimum of 80 credit hours of coursework
- Completion of all MAPS requirements and no deficiencies remaining
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder
- Have a letter of support from a faculty advisor to complete master's level research

Program Requirements

Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master's degree. However, only six hours may be double counted toward the bachelor's degree and the master's degree. Students must apply to graduate with the bachelor's degree, and apply to continue with the master's degree, early in the semester in which the undergraduate requirements will be completed.

If you are interested in the BAM degree program, please contact the Engineering Physics Faculty Director for more information.

Engineering Plus

Engineering Plus (http://www.colorado.edu/eplus) prepares graduates for exciting, diverse and innovative professional careers and for graduate study in a wide variety of disciplines. The degree program provides a pathway through engineering for students interested in interdisciplinary, hands-on engineering design by coupling a traditional engineering emphasis with a concentration of the students' choice within, or external to, engineering.

Students complete core engineering and design coursework, followed by coursework in their chosen engineering emphasis (i.e., aerospace, architectural, civil, electrical, environmental or mechanical engineering). Students also choose a concentration area, such as entrepreneurship, CU Teach Engineering (i.e., secondary math or science teaching), business, pre-medical and many others. Graduates from the Engineering Plus program will find opportunities in many engineering enterprises, as well as unique positions enabled by their combination of engineering emphasis and concentration.

Course code for this program is GEEN.

Bachelor's Degree

- Engineering Plus - Bachelor of Science (BSEPL) (p. 824)

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

GEEN 1010 (4) Engineering Explorations Through Physics
Explore the world of engineering through understanding physics concepts, engaging in active learning assignments, and conducting hands-on labs and experiments. Students will analyze product designs and engineering decisions based on the physics surrounding the situation. Formerly COEN 1010.
Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

GEEN 1017 (3) Engineering Drawing
Introduces CAD software; relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing; and rapid manufacturing methods. Final design project involves rapid prototyping. Not recommended for AREN majors.

GEEN 1400 (3) Engineering Projects
First-year students solve real engineering design problems in interdisciplinary teams. Design projects vary by section. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis, and technical writing. Completed projects are exhibited at an end-of-semester design expo. Students responsible for contributing towards their design project budget and poster costs, and purchasing safety glasses (approximately $75).
Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

GEEN 2400 (3) Engineering Projects for the Community
Design engineering products for local community clients, with emphasis on humanitarian engineering and integrated systems with electrical, mechanical, and software components. Students are challenged to take design projects to a higher level by requiring an additional iteration through the design cycle and more engaged user-testing, in order to infuse student projects with the robustness necessary for public-use products.
Requisites: Restricted to students with 30-180 credits (Sophomores, Juniors or Seniors) or requires prerequisite course of GEEN 1400 or COEN 1400 or ASEN 1400 or ECEN 1400 (minimum grade C). Restricted to College of Engineering majors only.

GEEN 2851 (3) Statics for Engineers
Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 and MCEN 2023
Requisites: Requires prerequisite course of PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C). Restricted to College of Engineering majors only.

GEEN 3010 (3) Circuits for Engineers
Examines basic concepts of electricity, digital systems, circuit analysis, and circuit design. Specific topics covered include analysis of electric circuits by use of Ohm’s law, network reduction, node and loop analysis, Thevenin and Norton theorems, DC and AC signals, transient response of simple circuits, basic diode and transistor circuits, operational amplifiers, and microcontrollers. Students are challenged to integrate their knowledge in a final design project.
Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of APPM 2360 (all minimum grade C). Restricted to College of Engineering undergraduate majors only.

GEEN 3024 (3) Materials Science for Engineers
Examines structure, properties, processing and uses of metallic, polymeric, ceramic and composite materials. Specific topics covered include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical and electrical behavior and failure modes. Approach incorporates both materials science and materials engineering applications. Formerly GEEN 2024.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 2024
Requisites: Requires a prerequisite course of PHYS 1110 (minimum grade C). Restricted to College of Engineering students only.

Grading Basis: Letter Grade

GEEN 3400 (3) Invention and Innovation
Introduction to business development and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore the initial stages of entrepreneurship (patenting, intellectual property, marketing research, and raising capital). Student teams design, create, and test a commercial product, and exhibit at an end-of-semester design expo.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

GEEN 3830 (1-4) Special Topics
Explores topics of interest in engineering. Content varies by instructor and semester.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to College of Engineering undergraduate students only.

GEEN 3852 (3) Thermodynamics for Engineers
Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles. Links theory and application with labs and a design project involving a functioning thermodynamic process.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3012
Requisites: Requires prerequisite course of PHYS 1110 (minimum grade C). Restricted to College of Engineering majors only.

GEEN 3853 (4) Data Analysis for Engineers
Learn to design and execute experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, elementary statistics and uncertainty analysis. Topics include probability, error propagation, confidence intervals, hypothesis testing, linear regression, one- and two-factor ANOVA and time series analysis.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 3047
Requisites: Requires prerequisite courses of PHYS 1140 and APPM 2360 and (CHEN 1310 or CSCI 1300 or 1310 or 1320). Requires prerequisite or coreqs of (ECEN 3010 or GEEN 3010 or MCEN 3017) (GEEN 3024 or MCEN 2024) (WRTG 3030 or 3035 or HUEN 1010 or 3100) (all min grade C).
GEEN 4400 (3) Teaching Design
Examines teaching engineering design to a variety of audiences including secondary schools, project teams, and other communities. Students examine the process of teaching hands-on design including scoping, stages of team evolution, and iteration. Students also explore different design methods, the development of engineering identity, and the interface between engineering and society. Students practice integrating design thinking into local schools and companies, develop ready-to-use tools and resources, and explore the design education literature.
Requisites: Requires prerequisite courses of GEEN 1400 and GEEN 2400 and prerequisite or corequisite course of GEEN 3400 (all minimum grade B).

GEEN 4848 (1-6) Independent Study
Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Engineering Plus (GEEN) students only.

Engineering Plus - Bachelor of Science (BSEPL)
The Bachelor of Science in Engineering Plus prepares graduates for exciting, diverse and innovative professional careers and for graduate study in a wide variety of disciplines. The degree program provides a pathway through engineering for students interested in interdisciplinary, hands-on engineering design by coupling a disciplinary engineering emphasis with a concentration of the students' choice within, or external to, engineering.

Students complete core engineering and design coursework, followed by coursework in their chosen engineering emphasis (i.e., aerospace, architectural, civil, electrical, environmental or mechanical engineering). Students also choose a concentration area, such as entrepreneurship, CU Teach Engineering (i.e. secondary math or science teaching), business, pre-medical, or many others. Graduates from the Engineering Plus program will find opportunities in many engineering enterprises, as well as unique positions enabled by their engineering emphasis and concentration choices.

For more information, visit the Engineering Plus (http://www.colorado.edu/eplus/) website.

Requirements
The Bachelor of Science in Engineering Plus requires the satisfactory completion of foundational coursework, the engineering core, a disciplinary emphasis, and a concentration. This entails a minimum of 128 credit hours, as follows.

Foundational Coursework
Foundational coursework (46–48 credits) is common to all engineering plus majors. All foundational courses require a minimum grade of C.

Engineering Core
Engineering core coursework (28–34 credits) is common to all engineering plus majors. All core courses require a minimum grade of C.

Disciplinary Emphases
Disciplinary emphasis coursework (22–34 credits) depends on the engineering emphasis (i.e., aerospace, architectural, civil, electrical, environmental or mechanical). Emphasis courses require a minimum grade of C in each course for every disciplinary emphasis. To meet graduation requirements, the combination of engineering core and disciplinary coursework must sum to 52 credits or more. All engineering plus students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam prior to graduation.

Concentration

The Engineering Plus concentration (minimum 12 credits) allows students to select additional coursework in a chosen field of study, either within or outside of engineering. The concentration course sequence must be a series of courses with increasing specificity or depth within a field, typically culminating in senior-level courses. Most concentrations will be at least four 3-credit courses. Every concentration must be pre-approved by the Engineering Plus academic advisor prior to the commencement of the coursework. All concentration courses require a minimum grade of C. Current concentration requirements (https://www.colorado.edu/eplus/current-students/e-concentrations/)

The Engineering Plus degree is built around student choice and flexibility. The combinations of engineering emphases and available concentrations allow for over 100 possible pathways. The sample curriculum represents only a general idea of what is possible with engineering plus. Please visit the Engineering Plus (http://www.colorado.edu/eplus/) website or advisor (https://www.colorado.edu/eplus/otha-barrow/) for more specifics in planning your own unique pathway, and to ensure that all degree requirements are met.

Free Elective Course or additional Concentration Course 3

Free Elective Course or additional Concentration Course 3

Credit Hours 15

Total Credit Hours 128

1. Students may choose a course from the list of college-approved writing courses (http://www.colorado.edu/engineering/academics/policies/hss/).
2. Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (http://www.colorado.edu/engineering/academics/policies/hss/).
3. All Engineering Plus students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam (https://www.colorado.edu/engineering-advising/get-your-degree/fe-exam/) prior to graduation.
All Engineering Plus students, regardless of emphasis, are required to take the Senior Survey prior to graduation.

Additional Information
Students who select the CU Teach Engineering Math or Science Concentration will have a 9th semester student teaching experience. There is financial assistance available for these students.

Learning Outcomes
Program Educational Objectives
Engineering Plus prepares graduates to make significant contributions in many diverse areas. Specifically, within five years of graduation our graduates will have achieved one or more of the following attributes:

- Established themselves in professional careers, received a graduate or professional degree, or be enrolled in a graduate or professional degree program.
- Established themselves as excellent secondary science or math teachers, utilizing hands-on engineering design content in their curriculum.
- Played significant roles in an engineering or technical enterprise, including research and development of engineering systems and products, technical sales, technical training and organizational education.
- Advanced in professional standing based on their technical accomplishments and accumulated additional technical expertise to remain globally competitive.
- Demonstrated professional and personal leadership and growth.

Student Outcomes
Upon graduation, students are expected to be able to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

Mechanical Engineering
Mechanical engineering prepares students for careers in a variety of industrial sectors including transportation, energy, manufacturing, aerospace, biomedical and environmental. Career opportunities include work in basic and applied research and development, design, manufacturing, project management, consulting and teaching. Mechanical engineers are employed by a wide variety of industrial, governmental and educational organizations. A mechanical engineering background also provides a firm foundation for other professional careers such as engineering management, law and medicine.

A mechanical engineering education from CU Boulder will prepare students for a future in a broad range of fields in science and technology. Students receive a hands-on education that breaks out of the classroom to give them real experience in industry. They learn from and work with a diverse faculty conducting groundbreaking research that is shaping the future of our world.

Course code for this program is MCEN.

Bachelor's Degree
- Mechanical Engineering - Bachelor of Science (BSME) (p. 842)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Affrunti, Andrew J. (https://experts.colorado.edu/display/fisid_149937/)
Instructor; MSEE, University of Illinois at Urbana–Champaign

Ahmed, Alaa A. (https://experts.colorado.edu/display/fisid_144736/)
Associate Professor; PhD, University of Michigan

Borden, Mark A. (https://experts.colorado.edu/display/fisid_148514/)
Associate Professor; PhD, University of California, Davis

Branch, Melvyn C.
Professor Emeritus

Brower, Timothy L. (https://experts.colorado.edu/display/fisid_147553/)
Senior Instructor; PhD, Colorado State University

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/)
Assistant Professor; PhD, Northwestern University

Carlson, Lawrence E.
Professor Emeritus

Castro, Francisco (https://experts.colorado.edu/display/fisid_147992/)
Instructor; PhD, University of Colorado Boulder

Daily, John W. (https://experts.colorado.edu/display/fisid_100131/)
Professor; PhD, Stanford University

Datta, Subhendu K.
Professor Emeritus

Ding, Xiaoyun (https://experts.colorado.edu/display/fisid_158563/)
Assistant Professor; PhD, Pennsylvania State University

Ding, Yifu (https://experts.colorado.edu/display/fisid_146088/)
Associate Professor; PhD, University of Akron

Ferguson, Virginia L. (https://experts.colorado.edu/display/fisid_110131/)
Associate Professor; PhD, University of Colorado Boulder

Geers, Thomas L.
Professor Emeritus

Greenberg, Alan R.
Professor Emeritus
Hamlington, Peter Edward (https://experts.colorado.edu/display/fisid_149800/)  
Assistant Professor, Associate Chair; PhD, University of Michigan Ann Arbor

Hannigan, Michael P. (https://experts.colorado.edu/display/fisid_122665/)  
Professor, Chair; PhD, California Institute of Technology

Henze, Daven K. (https://experts.colorado.edu/display/fisid_144858/)  
Professor, Associate Chair; PhD, California Institute of Technology

Hertzberg, Jean R. (https://experts.colorado.edu/display/fisid_105315/)  
Associate Professor; PhD, University of California, Berkeley

Humbert, J. Sean (https://experts.colorado.edu/display/fisid_144858/)  
Professor, Associate Chair; PhD, California Institute of Technology

Hertzberg, Jean R. (https://experts.colorado.edu/display/fisid_105315/)  
Associate Professor; PhD, University of California, Berkeley

Humbert, J. Sean (https://experts.colorado.edu/display/fisid_144858/)  
Professor, Associate Chair; PhD, California Institute of Technology

Kassoy, David R.  
Professor Emeritus

Knappe, Svenja A. (https://experts.colorado.edu/display/fisid_139588/)  
Associate Research Professor; PhD, Rheinische Friedrich-Wilhelms-Universität (Germany)

Knutsen, Jeffrey S. (https://experts.colorado.edu/display/fisid_145534/)  
Senior Instructor; PhD, University of Colorado Boulder

Kotys-Schwartz, Daria (https://experts.colorado.edu/display/fisid_144738/)  
Senior Instructor; PhD, University of Colorado Boulder

Labbe, Nicole J. (https://experts.colorado.edu/display/fisid_157742/)  
Assistant Professor; PhD, University of Massachusetts, Amherst

Lee, Sehee (https://experts.colorado.edu/display/fisid_144739/)  
Professor; PhD, Seoul National University (South Korea)

Lee, Yung-Cheng (https://experts.colorado.edu/display/fisid_103170/)  
Professor; PhD, University of Minnesota Twin Cities

Li, Baowen (https://experts.colorado.edu/display/fisid_156203/)  
Professor; PhD, Carl von Ossietzky Universität Oldenburg (Germany)

Long, Rong (https://experts.colorado.edu/display/fisid_151301/)  
Assistant Professor; PhD, Cornell University

Lynch, Maureen Ellen (https://experts.colorado.edu/display/fisid_163404/)  
Assistant Professor; PhD, Cornell University

MacCurdy, Robert B. (https://experts.colorado.edu/display/fisid_163307/)  
Assistant Professor; PhD, Cornell University

McNeill, Nathan John (https://experts.colorado.edu/display/fisid_151518/)  
Senior Instructor; PhD, Purdue University

Milford, Jana B. (https://experts.colorado.edu/display/fisid_103268/)  
Professor; PhD, Carnegie Mellon University

Miller, Shelly L. (https://experts.colorado.edu/display/fisid_110394/)  
Professor; PhD, University of California, Berkeley

Mitrano, Peter P. (https://experts.colorado.edu/display/fisid_155075/)  
Instructor; PhD, University of Colorado, Boulder

Murray, Todd W. (https://experts.colorado.edu/display/fisid_146549/)  
Professor; PhD, Johns Hopkins University

Neu, Corey P. (https://experts.colorado.edu/display/fisid_156210/)  
Professor; PhD, University of California, Davis

Pellegrino, John (https://experts.colorado.edu/display/fisid_130902/)  
Research Professor; PhD, University of Colorado Boulder

Raj, Rishi (https://experts.colorado.edu/display/fisid_108413/)  
Professor; PhD, Harvard University

Reamon, Derek T. (https://experts.colorado.edu/display/fisid_120538/)  
Senior Instructor; PhD, Stanford University

Regner, Keith T. (https://experts.colorado.edu/display/fisid_158065/)  
Instructor; PhD, Carnegie Mellon University

Rentschler, Mark E. (https://experts.colorado.edu/display/fisid_146091/)  
Professor; PhD, University of Nebraska-Lincoln

Rieker, Gregory Brian (https://experts.colorado.edu/display/fisid_151727/)  
Associate Professor; PhD, Stanford University

Riffell, Daniel J. (https://experts.colorado.edu/display/fisid_154141/)  
Scholar in Residence; MS, University of Colorado Boulder

Ruben, Shalom D. (https://experts.colorado.edu/display/fisid_149492/)  
Senior Instructor; PhD, University of California, Los Angeles

Steinbrenner, Julie E. (https://experts.colorado.edu/display/fisid_152041/)  
Senior Instructor; PhD, Stanford University

Stoldt, Conrad R. (https://experts.colorado.edu/display/fisid_126290/)  
Professor, Associate Chair; PhD, Iowa State University

Tan, Wei (https://experts.colorado.edu/display/fisid_141464/)  
Associate Professor; PhD, University of Illinois at Chicago

Tsai, Janet Yi-Jen (https://experts.colorado.edu/display/fisid_156447/)  
Instructor; PhD, University of Colorado Boulder

Vance, Marina E. (https://experts.colorado.edu/display/fisid_158217/)  
Assistant Professor; PhD, Virginia Polytechnic Institute and State University

Vernerey, Franck J. (https://experts.colorado.edu/display/fisid_144760/)  
Professor; PhD, Northwestern University

Weidman, Patrick D.  
Professor Emeritus

Whiting, Gregory L. (https://experts.colorado.edu/display/fisid_159727/)  
Associate Professor; PhD, University of Cambridge (England)

Xiao, Jianliang (https://experts.colorado.edu/display/fisid_153484/)  
Associate Professor; PhD, Stanford University

Yin, Xiaobo (https://experts.colorado.edu/display/fisid_153484/)  
Associate Professor; PhD, Stanford University
Zable, Jack L.
Professor Emeritus

Courses

MCEN 1024 (3) Chemistry for Energy and Materials Science
Covers the basic physical and chemical fundamentals underlying the disciplines of energy and materials, with a focus on topics relevant to your mechanical engineering education. These fundamentals include atomic structure, stoichiometry, the periodic table, chemical bonding, states of matter, thermochemistry and chemical reactions.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 1201, CHEN 1211, or CHEM 1113
Requisites: Restricted to Mechanical Engineering (MCEN) or Engineering Plus (GEEN-BS) students with a sub-plan of Mechanical (MEC).
Recommended: Prerequisite one year of high school chemistry.
Additional Information: Departmental Category: Materials

MCEN 1025 (4) Computer-Aided Design and Fabrication
Introduces CAD software and relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Final design project involves rapid prototyping.
Requisites: Restricted to Mechanical Engineering (MCEN) or Engineering Physics (EPEN) majors only.
Additional Information: Departmental Category: Design

MCEN 1208 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest. Credit to be arranged.
Requisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Special Topics

MCEN 2000 (1) Mechanical Engineering as a Profession
Provides an introduction to the profession of mechanical engineering. Specific topics addressed include career opportunities in mechanical engineering, internship search skills, expectations for professional behavior in the classroom and in industry, and current events/ethics topics relevant to the field. Course format may include additional evening/weekend activities.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Miscellaneous

MCEN 2023 (3) Statics and Structures
Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, distributed force systems and friction.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 or GEEN 2851
Requisites: Requires prerequisite courses of (APPM 1360 or MATH 2300) and PHYS 1110 (all minimum grade C). Restricted to Mechanical (MCEN) or Environmental (EVEN) or Engineering Plus (GEEN-BS) students with a sub-plan of Mechanical (MEC).
Additional Information: Departmental Category: Solids

MCEN 2024 (3) Materials Science
Provides an overview of the structure, properties and processing of metallic, polymeric and ceramic materials. Specific topics include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical behavior and material degradation. Approach incorporates both materials science and materials engineering components.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 3024
Requisites: Requires prerequisite courses of (MCEN 1024 or CHEN 1211 or CHEM 1113 or CHEN 1201) and PHYS 1110 (all minimum grade C). Restricted to Mechanical (MCEN) or Engineering Plus (GEEN-BS) students with a sub-plan of Mechanical (MEC).
Additional Information: Departmental Category: Materials

MCEN 2043 (3) Dynamics
Covers dynamic behavior of particle systems and rigid bodies; 2-D and 3-D kinematics and kinetics; impulse, momentum, potential, and kinetic energy; and work, collision, and vibration.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3111
Requisites: Requires prerequisite courses of (MCEN 2023 or CVEN 2121 or GEEN 2851) and (APPM 1360 or MATH 2300) (all minimum grade C). Restricted to Mechanical (MCEN) or Engineering Plus (GEEN-BS) students with a sub-plan of Mechanical (MEC).
Additional Information: Departmental Category: Solids

MCEN 2063 (3) Mechanics of Solids
Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations and columns.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 3161
Requisites: Requires prerequisite courses of (MCEN 2023 or CVEN 2121 or GEEN 2851 or ASEN 2001) and (APPM 1360 or MATH 2300) (all minimum grade C). Restricted to Mechanical (MCEN) or Engineering Plus (GEEN-BS) students with a sub-plan of Mechanical (MEC).
Additional Information: Departmental Category: Solids

MCEN 3012 (3) Thermodynamics
Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 3852
Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C). Restricted to Mechanical (MCEN) or Environmental (EVEN) or General Engr Plus (GEEN-BS) students, with a sub-plan of Mechanical (MEC).
Additional Information: Departmental Category: Thermal

MCEN 3017 (3) Circuits and Electronics
Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits and operational amplifiers.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3010
Requisites: Requires prerequisite courses of APPM 2360 and PHYS 1140 (all minimum grade C). Restricted to students in the MSC/CU-Boulder Mechanical Engineering Partnership Program only.
Additional Information: Departmental Category: Miscellaneous
MCEN 3021 (3) Fluid Mechanics
Examines fundamentals of fluid flow with application to engineering problems. Topics covered include fluid statics and kinematics, Bernoulli equations, laminar and turbulent viscous boundary layers, laminar and turbulent pipe flow, and conservation equations for mass, momentum and energy.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and CVEN 3313
Requisites: Requires prereqs (MCEN 2023 or CVEN 2121 or GEEN 2851 or ASEN 2001 or CHEN 2120) (APPM 2350 or MATH 2400) (all min grade C). Restricted to Mechanical (MCEN) or Environmental (EVEN) or Engineering Plus (GEEN-BS) students w/ sub-plan of Mechanical (MEC)
Additional Information: Departmental Category: Fluids

MCEN 3022 (3) Heat Transfer
Studies fundamentals of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques. Provides applications to modern engineering systems, which may include energy, biological, environmental, and materials engineering problems.
Requisites: Requires prerequisite courses of MCEN 3021 or CVEN 3313) (MCN 3012 or AREN 2110 or GEEN 3852) (APPM 2360 or MATH 2130 or 2135 or 3130 or 3135 or APPM 3310) all min grade C. Restricted to Mech (MCEN) or Environ (EVEN) or Engr Plus (GEEN-BS) students w/ sub-plan of Mechanical (MEC)
Additional Information: Departmental Category: Thermal

MCEN 3025 (3) Component Design
Application of mechanics and materials science to the detailed design of various machine elements including shafts, bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems.
Requisites: Requires prerequisite courses of MCEN 1025 and (MCN 2024 or GEEN 3024 or ASEN 1022), and (MCN 2063 or CVEN 3161) (all min grade C). Restricted to Mechanical (MCEN) or Engineering Plus (GEEN-BS) students with a sub-plan of Mechanical (MEC)
Additional Information: Departmental Category: Design

MCEN 3030 (3) Computational Methods
Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations.
Requisites: Requires prerequisite courses of APPM 2360 or (MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135 or APPM 3310) and (CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 or ASEN 1320) (all min grade C). Restricted to Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Math

MCEN 3032 (3) Thermodynamics 2
Offers advanced topics and applications for thermal system design and analysis. Topics include thermodynamics of state, entropy, thermodynamic cycles and reacting and nonreacting mixtures. Provides application to power generation, refrigeration and HVAC with conventional and advanced technologies. Most assignments are design oriented.
Requisites: Requires prerequisite courses of (MCN 2032 or CHEN 3200 or CVEN 3313), (MCN 3012 or GEEN 3852 or AREN 2110) (APPM 2360 or MATH 2130 or 2135 or 3130 or 3135 or APPM 3310) all min grade C. Restricted to Mechanical Eng (MCEN) or Environmental Eng (EVEN) majors only.
Additional Information: Departmental Category: Thermal

MCEN 3047 (4) Data Analysis and Experimental Methods
Learn to plan and carry out experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, elementary statistics and uncertainty analysis. Topics in statistics include probability, error propagation, confidence intervals, hypothesis testing, linear regression, one- and two-factor ANOVA and time series analysis. Formerly MCEN 3037.
Equivalent - Duplicate Degree Credit Not Granted: GEEN 3853
Requisites: Requires prerequisite course of APPM 2360 PHYS 1140 and prerequisite or corequisite courses of MCEN 3010 and WRTG 3030 or WRTG 3035 or HUEN 1010 or 3100 (all min grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Special Topics

MCEN 3930 (6) Mechanical Engineering Cooperative Education
Students enrolled in this course participate in a previously arranged, department-sponsored education program with a university, government agency, or industry. This course is offered only through Continuing Education.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: At least a 2.75 cumulative GPA is required. Restricted to Mechanical Engineering or students with a plan of Mechanical Engineering Concurrent Degree or General Engineering Plus students with a MCEN subplan.
Recommended: Prerequisite 3.00 GPA or higher.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Math

MCEN 4010 (3) Microsystems Integration
A microsystem consists of microelectronic, optoelectronic, microwave, microelectromechanical and energy components interconnected. Thermal, electrical, fabrication and assembly issues for microsystems represented by iPhone series will be studied. The packaging and interconnection technologies used to establish the design and manufacturing infrastructure of microsystems will be reviewed. Other optoelectronic, MEMS and battery components for Microsystems will also be studied.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5010
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors only.

MCEN 4026 (3) Manufacturing Processes and Systems
Examines manufacturing processes for metals, polymers, and composites as well as manufacturing systems that integrate these processes. Lecture topics include forming, machining, joining, assembling, process integration, computer-aided manufacturing, and manufacturing system engineering.
Requisites: Requires prerequisite course of MCEN 2024 or GEEN 3024 or ASEN 1022 (minimum grade C). Restricted to Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Manufacturing and Systems
MCEN 4032 (3) Sustainable Energy
Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5032
Requisites: Requires prerequisite course of MCEN 3012 and MCEN 3022 (minimum grade C).
Additional Information: Departmental Category: Thermal

MCEN 4043 (3) System Dynamics
Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems.
Requisites: Requires prereqs (MCEN 2043 or CVEN 3111), (ECEN 3010 or 2270 or GEEN 3010 or MCEN 3017), coreq (MCEN 3030 or APPM 4650 or CVEN 3158) all min grade C. Restricted to Mechanical (MCEN) or Engineering Plus (GEEN-BS) stdnts w/ sub-plan of Mechanical (ME).
Additional Information: Departmental Category: Solids

MCEN 4045 (3) Mechanical Engineering Design Project 1
First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report. GEEN-BS and GEEN-BSGE students are not required to complete MCEN 2000, MCEN 3022, MCEN 3030 or MCEN 4026 but have additional prerequisites of GEEN 1400, 2400 and 3400.
Requisites: Prereqs ECEN3010/CSCI1320/GEEN1400/APPMM1350/1360/2350/2360/PHYS1110/1120/1140/ECEN2000/2024/2043/2063/3012/3021/3025/3030 min grd C. Pre or coreqs MCEN3022/4074/4026/4043/WRTG3030. Restricted to stdnts w/ 87-180 units, MCEN or GEEN stdnts w/ sub-plan of Mechanical (ME).
Additional Information: Departmental Category: Design

MCEN 4057 (3) Environmental Modeling
Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5057
Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 or MCEN 1024 and CSCI 1300 or CSCI 1320 (all minimum grade C).
Additional Information: Departmental Category: Miscellaneous

MCEN 4064 (3) Soft Machines
Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5046 and MSEN 5046
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) majors only.

MCEN 4085 (3) Mechanical Engineering Design Project 2
Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. GEEN-BS and GEEN-BSEPL students are not required to complete MCEN 4026.
Requisites: Requires prerequisite course of MCEN 4045 (minimum grade C).
Additional Information: Departmental Category: Design

MCEN 4086 (1) Writing for Design Projects
Communicate professionally in writing to the technical and nontechnical audience. Develop skills to analyze rhetorical situations and compose documents, such as reports, technical manuals and user guides, that achieve a specific purpose and meet the needs of a particular audience. Writing with clarity, conciseness and correctness will be emphasized.
Requisites: Requires enrollment in corequisite course of MCEN 4085.
Additional Information: Departmental Category: Manufacturing and Systems

MCEN 4115 (3-4) Mechatronics and Robotics I
Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred ($50 maximum).
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5115
Requisites: Requires prerequisite courses of ECEN 3010 or 2250 and ECEN 1310 (formerly GEEN 1300/COEN 1300) or CSCI 1300 or 1310 or 1320 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Design

MCEN 4117 (3) Anatomy and Physiology for Engineers
Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5117
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Miscellaneous
MCEN 4123 (3) Vibration Analysis
Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4123
Requisites: Requires prerequisite course of MCEN 3030 or ASEN 3112 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Solids

MCEN 4124 (3) Mechanical Behavior of Materials
Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties.
Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Materials

MCEN 4125 (3) Optimal Design
Focuses on linear optimization and will introduce non-linear optimization. Formulating Engineering applications as optimization problems that can be solved using industry known solvers will be learned. Some of these applications will include minimum cost mechanical design, wind farm power maximization, minimum energy control, production control. and more. Previous programming experience required.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5125
Requisites: Requires prerequisite courses of MCEN 3030 (all minimum grade C). Restricted to students with 57-180 credits (Junior, Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Design

MCEN 4127 (3) Biomedical Ultrasound
Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, acoustic lenses, pulse-echo imaging and cavitation dynamics, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; and a design project.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5127
Requisites: Requires prerequisite course of MCEN 3021 (minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).
Additional Information: Departmental Category: Miscellaneous

MCEN 4131 (3) Air Pollution Control Engineering
Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5131
Requisites: Requires prerequisite courses of (MCEN 3021 or CHEN 3200 or CVEN 3313) and (MCEN 3012 or EEEN 3852 or AREN 2110) (all minimum grade C). Restricted to Mechanical Engineering (MCEN) or Environmental Engineering (EVEN) majors only.
Additional Information: Departmental Category: Fluids

MCEN 4133 (3) Intro to Tissue Biomechanics
Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5133
Requisites: Requires prerequisite courses of MCEN 2024, MCEN 2063 and MCEN 3021 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Materials

MCEN 4135 (3) Wind Energy and Wind Turbine Design
Focuses on understanding and applying principles related to current wind energy technology. Students will apply technical coursework from throughout the ME curriculum (fluids, dynamics, circuits, economics) to the process of designing a wind turning and determining whether their proposal is feasible from an economic standpoint.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5135
Requisites: Requires prerequisite courses of MCEN 3021 and ECEN 3010 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical or Environmental Engineering majors only.
Additional Information: Departmental Category: Design

MCEN 4137 (3) Anatomy and Physiology 2
Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5137
Requisites: Requires prerequisite course of MCEN 4117 (minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

MCEN 4141 (3) Indoor Air Pollution
Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5141
Requisites: Requires prerequisite courses of MCEN 3021 and MCEN 3022 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Fluids
MCEN 4151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200, CINE 4200, MCEN 5151, ATLS 4151 and ATLS 5151
Requisites: Requires prerequisite course of MCEN 3021 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities Departmental Category: Fluids

MCEN 4152 (3) Introduction to Combustion
Focuses on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5152
Requisites: Requires prerequisite course of MCEN 3012 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Recommended: Prerequisites MCEN 3021 and MCEN 3022.
Additional Information: Departmental Category: Thermal

MCEN 4154 (3) Biocolloids and Biomembranes
Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polypelexes and polyelectrolyte multilayer capsules.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5154
Requisites: Requires prerequisite courses of APPM 2360 and PHYS 1120 (all minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).
Additional Information: Departmental Category: Materials

MCEN 4162 (3) Energy Conversion
Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems.
Requisites: Requires prerequisite course of MCEN 3012 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Thermal

MCEN 4173 (3) Finite Element Analysis
Introduces the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua and heat conduction.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5173
Requisites: Requires prerequisite courses of MCEN 2023 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Solids

MCEN 4174 (3) Failure of Engineering Materials
Examines the fundamental concepts regarding the failure of engineering materials. Case studies are used to integrate a basic understanding of material failure mechanisms with analysis techniques and tools. Topics include the elastic properties (isotropic and anisotropic materials) and the origin of elastic behavior, viscoelasticity, plasticity (dislocation mechanisms, yielding criteria, strengthening mechanisms), creep, fracture and fatigue.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5174
Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Materials

MCEN 4183 (3) Mechanics of Composite Materials
Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5183
Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Solids

MCEN 4194 (3) Electrochemical Energy Conversion and Storage
Presents the fundamentals, principles and experimental techniques of electrochemistry, the background of ionic or electronic conduction of metal, semiconductor, inorganic and polymer materials and applications in the areas of batteries, fuel cells, electrochemical double layer capacitors, electrochemical photonics, sensors and semiconductor electrochemistry.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5194
Requisites: Requires prerequisite courses of MCEN 2024 and 3032 (all minimum grade C). Restricted to graduate students or to students with 87-180 credits (Seniors) in the College of Engineering and Applied Science or to Mech Engr Concurrent Degree students only.
Additional Information: Departmental Category: Materials

MCEN 4228 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest. Equivalent - Duplicate Degree Credit Not Granted: MCEN 5228
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Miscellaneous

MCEN 4848 (1-6) Independent Study
Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.
Additional Information: Departmental Category: Miscellaneous

Mechanical Engineering - Bachelor of Science (BSME)
Mechanical engineering is a broad engineering discipline that incorporates skills and expertise in the areas of design, manufacturing, mechanics and thermal sciences that are essential to most sectors of industry.
Program Educational Objectives
Within the first three years after graduation, our alumni will have built on the educational foundation gained through our program by establishing themselves in professional careers and/or pursuing a graduate degree. In addition, within these three years, our alumni should have begun to generate new knowledge and/or exercise leadership in their positions.

Colorado Mesa University/University of Colorado Boulder Partnership Program (Mechanical Engineering)
Colorado Mesa University (CMU) (http://www.coloradomesa.edu/engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs in their entirety in Grand Junction, Colorado. The first two years of coursework are taught by CMU faculty and the second two years of coursework are taught by CU Boulder faculty located in Grand Junction. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering, civil engineering, and electrical & computer engineering, with additional details on the partnership website (https://www.coloradomesa.edu/engineering/partnership-program/).

Coursework requirements and plans of study specific to this partnership can be found on the Colorado Mesa University mechanical engineering partnership website (https://www.coloradomesa.edu/engineering/degrees/mechanical-engineering-partnership.html). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/cmu-cu-boulder-bs-mechanical-engineering/).

Western Colorado University/University of Colorado Boulder Partnership Program (Mechanical Engineering)
Western Colorado University (Western) (https://western.edu/school/paul-m-rady-school-of-computer-science-engineering/) and CU Boulder have created a partnership to deliver specific engineering baccalaureate programs in their entirety in Gunnison, Colorado. The first two years of coursework are taught by Western faculty and the second two years of coursework are taught by CU Boulder faculty located in Gunnison. Students completing the programs will be awarded a Bachelor of Science from CU Boulder.

Degrees are offered in mechanical engineering and computer science, with additional details on the Computer Science (https://western.edu/program/computer-science-university-colorado-partnership/) and Mechanical Engineering (https://western.edu/program/mechanical-engineering-university-colorado-partnership/) partnership websites.

Coursework requirements and plans of study specific to this partnership can be found on the Western Colorado University mechanical engineering partnership website (https://western.edu/program/mechanical-engineering-university-colorado-partnership/). Learn more about this program on the CU Boulder partnership website (https://www.colorado.edu/academics/western-cu-boulder-bs-mechanical-engineering/).

Requirements
Program Requirements
In order to earn a bachelor’s degree in mechanical engineering, students must complete the curriculum in the undergraduate major program, as outlined below. For up-to-date program requirements, visit the Bachelor of Science in Mechanical Engineering (https://www.colorado.edu/mechanical/academics/undergraduate-program/) (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/webpage).

Required courses in engineering, physical science, and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the mechanical engineering profession. The core courses are complemented by technical electives (http://www.colorado.edu/mechanical/current-students/undergraduate/electives/), (http://www.colorado.edu/engineering/academics/policies/hss/humanities-and-social-sciences-electives.html), (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/), free electives, and a writing course (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/), for a total of 128 credits required for the degree.

Options in environmental and biomedical engineering are available for students interested in these interdisciplinary areas.

15

Free Electives
Choose at least 6 credit hours of free electives to meet the minimum 128 credit hours required for the BS degree. 6

Total Credit Hours 128-137

1 Refer to the course options listed on the ME Technical Electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/courses/technical-electives/) webpage.
2 Refer to the course options listed on the General Technical Electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/courses/technical-electives/) webpage.
3 Refer to the course options listed on the Math/Science Foundations (https://www.colorado.edu/mechanical/academics/undergraduate-program/courses/math-science-foundations/) webpage.
4 Refer to the College’s Humanities, Social Sciences, and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) webpage.

Prerequisites and Passing Grades
The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C. If a grade of C- or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C or higher. If a grade of C- or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C or higher is achieved.

The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Mechanical Engineering Department reserves the right to drop students enrolled in MCEN courses who have not met the minimum prerequisite requirements. It is the student’s responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Design Your Career
Prior to graduation, students are required to complete a co-curricular professional development requirement, called Design Your Career (DYC) (https://www.colorado.edu/mechanical/academics/professional-development/design-your-career/), which includes activities tailored to each year of the curriculum. The requirement may be prorated for students who transfer into the department after their first year of study.
Senior Survey
Graduating students are required to complete the Senior Survey, administered by the College of Engineering & Applied Science, in their final semester.

1 Refer to the course options listed on the Math/Science Foundations (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/) webpage.
2 Refer to the College’s Humanities, Social Sciences, and Writing requirements (https://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements/) webpage.
3 Refer to the course options listed on the General Technical Electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/general-technical-electives/) webpage.
4 Refer to the course options listed on the ME Technical Electives (https://www.colorado.edu/mechanical/academics/undergraduate-program/curriculum/me-technical-electives/) webpage.

Learning Outcomes
Upon graduation, each graduate of the mechanical engineering program is expected to possess the ability to:

- Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
- Communicate effectively with a range of audiences.
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
- Develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions.
• Acquire and apply new knowledge as needed, using appropriate
learning strategies.

Bachelor’s–Accelerated Master’s Degree Program(s)
The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor’s degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor’s and the master’s degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master’s degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master’s program enables students to continue working with their established faculty mentors.

BS and MS in Mechanical Engineering
Admissions Requirements
In order to gain admission to the BAM program named above, a student must meet the following criteria:

• Have a cumulative GPA of 3.250 or higher
• Completion of all MAPS requirements and no deficiencies remaining
• Have completed a minimum of 75 credit hours of coursework
• Transfer students must have completed a minimum of 24 credit hours at CU Boulder
• Have completed four of the following six courses: Component Design, Computational Methods, Fluid Mechanics, Heat Transfer, Thermodynamics 1, Thermodynamics 2

Program Requirements
Students may take up to and including 12 hours while in the undergraduate program which can later be used toward the master’s degree. However, only six credits may be double counted toward the bachelor’s degree and the master’s degree. Students must apply to graduate with the bachelor’s degree, and apply to continue with the master’s degree, early in the semester in which the undergraduate requirements will be completed.

Please see the Mechanical Engineering BAM degree program (https://www.colorado.edu/mechanical/academics/ms-programs/bachelors-accelerated-masters/) webpage for more information.

Environmental Design
Built on strong traditions within the design fields, the Program in Environmental Design (ENVD) offers an integrative approach to education and research. The program offers the Bachelor of Environmental Design (BEnvD)—a four-year, preprofessional degree that prepares students for the practice of and advanced study in four majors: architecture, landscape architecture, product design and sustainable planning. From analyzing the design of individual buildings to the planning of entire regions, the majors within ENVD offer coursework and projects addressing the diverse scales of environmental design.

Course material ranges from building materials and prefabricated building systems to open space issues, political systems and institutional arrangements.

Building on an underlying philosophy of environmental awareness, students in ENVD work within their majors to:

• Design solution-based approaches that blend technical, ecological, economic, social, cultural, aesthetic and ethical concerns
• Employ evidence-based knowledge to help inform design and planning decisions
• Participate in interdisciplinary dialogues that integrate core design disciplines with the sciences, humanities, arts and other professions
• Obtain a disciplinary foundation that prepares them for careers in both traditional and emerging design fields

Graduates from the Program in Environmental Design are uniquely qualified to confront the significant environmental challenges that lie ahead. Students build on their majors to become adept at complex problem solving, analytical thinking, and leadership through coursework in theory, history, ecological impact, materials and methods and systems thinking. Students enroll in studios, lectures and seminars taught by faculty with both academic and professional expertise. Students employ state-of-the-art educational technology, including computing tools, fabrication equipment and advanced media.

The program’s cross-disciplinary collaborations with colleagues in closely-affiliated CU programs enhances the curriculum and research within ENVD. Sharing in the diverse resources of Boulder campus—from natural sciences, social sciences, humanities, arts and technology fields—the ENVD program offers an educational opportunity like no other.

Preparing for a Professional Career
The program prepares preprofessional undergraduate students for entry directly into the design profession or to enter professional graduate study in the design professions. As with other four-year preprofessional degrees, such as the bachelor of science or bachelor of arts in architecture, the BEnvD prepares students for study in a master of architecture (MArch), master of landscape architecture (MLA), master of urban design (MUD) or master of urban and regional planning (MURP) degree program, or Master of Fine Arts (MFA) in design or industrial design.

It is common for bachelor’s of environmental design graduates to receive advanced standing for the work they have done in our program, which allows them to complete a graduate degree at other design schools in a shorter time.

Preparation for a Preprofessional Career in Architecture
The program prepares preprofessional undergraduate students for professional graduate study in architecture. The four year BEnvD degree is a preprofessional degree and is not accredited by the National Architectural Accrediting Board (NAAB) as a professional degree. NAAB does not accredit BA Arch, BS Arch or BEnvD degrees. The NAAB only accredits master of architecture (MArch), five-year bachelor of architecture (BArch), and doctorate of architecture (DArch) programs. The BEnvD degree prepares students for acceptance to NAAB-accredited programs. Students who have completed the BEnvD will normally be asked to complete a minimum of four semesters of additional coursework (60 hours of credit) after admission into one of 95 NAAB-accredited graduate programs nationally.

In addition to earning a MArch degree, prospective architects must complete three years of internship and must pass a state professional licensing exam. This process is overseen by the National Council of Architectural Registration Boards (NCARB). Some intern requirements
may be completed concurrently with studies. In the State of Colorado, individuals with seven years of experience in professional architecture may sit for licensing exams towards professional licensure.

**Preparation for a Preprofessional Career in Planning**
The program prepares preprofessional undergraduate students for professional graduate study in planning. The practice of planning is currently not licensed in most states. Professional membership and certification is overseen by the American Planning Association (APA) and the American Institute of Certified Planners (AICP). Degrees in the field are accredited by the Planning Accreditation Board (PAB) of the Association of Collegiate Schools of Planning.

Although students interested in entry-level positions in planning may find the BEnvD degree adequate, an advanced degree (MURP, PhD or other graduate planning focus) is highly desirable. Students primarily interested in professional practice should obtain a graduate degree in urban planning, in urban and regional planning, in urban planning and community development or in urban design. Students interested in teaching or research in planning should complete a PhD.

**Preparation for a Preprofessional Career in Landscape Architecture**
The program prepares preprofessional undergraduate students for professional graduate study in landscape architecture. To obtain a license, landscape architects should have an advanced degree and work experience, and pass the national examination. In the United States, licensing is overseen both at the state level and nationally by the Council of Landscape Architectural Registration Boards (CLARB). Accreditation of educational programs is voluntary. The Landscape Architectural Accreditation Board (LAAB) evaluates programs and provides an assessment. Advanced standing for graduate study is evaluated on a case-by-case basis, according to the standards of each graduate program as demonstrated by and in accordance with a student’s prior academic accomplishments in the application, portfolio, and the transcript.

**Preparation for Preprofessional Opportunities in Design**
Professional and career opportunities are broad and varied. There is an increasing demand in the design, construction and development industries for people who combine an understanding of design with a specialized understanding of related fields like computing, management, finance or marketing. Some students may use the design studies major as general preparation for graduate study in any number of academic fields that are also concerned with the design and planning of the built environment such as art history, environment behavior studies, and information graphics. Other students may use this emphasis to prepare for further graduate study in a professional field related to architecture, landscape architecture and planning, including business, law, journalism, public administration, product design and digital design. Design thinking is increasingly recognized in the business world as a valuable expertise in the analysis of the design of corporate structures and business plans, industrial processes, manufacturing, marketing and other related pursuits. Excellent design constitutes a fundamental aspect of sustainability in any field.

**Facilities**
Facilities for the program are provided in the Environmental Design Building and at the Center for Innovation and Creativity (CINC) facility.

**Environmental Design Building**
Located in the heart of campus, the ENVD building (http://www.colorado.edu/campusmap/map.html?bldg=ENVD) houses administrative and faculty offices, studio spaces, conference rooms, lecture rooms and exhibit spaces located on the first floor, basement, and third floors of the building.

Studio spaces provide large open areas with individualized work tables available to students 24 hours a day. Studios are located in the basement and on the third floor of the ENVD building.

The Digital Media Center (http://www.colorado.edu/envd/resources/dmc/) (DMC) an ENVD Academic Support Center housed in the ENVD Building, offers students digital imaging computer workstations, a printing and production lab with state-of-the-art large format printers for professional style presentation boards, a photographic studio for portfolio creation and in-house 3D printing, electronics and basic maker tools. The DMC has expanded and offers a 24-person workshop area where students can learn imaging based software and other programs as well as a student lounge area where ENVD students can walk in and ask questions or simply get work done.

The Creative Lab Center (http://www.colorado.edu/envd/resources/cinc/) (CLC) provides students access to studio space along with specialized fabrication facilities where ENVD students learn technological design skills and make and fabricate components for their projects. Most of our tech courses such as 3D modeling, building information modeling, digital design and fabrication, are being taught here. In addition to teaching and learning spaces and assembly areas, students access different digital design and fabrication resources at the CLC supported by a state-of-the-art wood lab, metal lab, laser cutting machines, two 3-Axis CNC routers and a high end CPU lab.

A mandatory basic safety orientation is required for all students before access to the shops are granted. This course is an introduction to the program’s safety policies as well as the proper use of personal safety equipment and safe practices on the fabrication equipment. Specific technological trainings are also provided and require viewing prior to lab use.

The CLC also offers a virtual reality lab were students can test their designs and ideas in the digital world before building them. These labs enhance the ENVD curriculum by providing students with the technological resources for design visualization, scale modeling and full scale prototyping, turning ideas into tangible objects.

The CLC is located in the university’s Center for Innovation and Creativity, which is located on the CU Boulder East Campus. The CLC is an approximately 15,000 square-foot space that houses makers spaces, classrooms, computer labs, studio spaces and our shops.

**Lecture Series**
The Program in Environmental Design offers a number of lecture series that bring professionals and researchers into the classroom as well as in highlighted lectures.
Policies & Requirements

Scholarships and Awards

A wide range of scholarships (https://www.colorado.edu/envd/current-students/environmental-design-scholarships/) and awards are available to Environmental Design (ENVD) students. The awards are sponsored by the Program, the campus, the professions and other foundations and donors.

In addition to these scholarships, interested students may participate in faculty-student research projects funded by the Undergraduate Research Opportunities Program (UROP (http://www.colorado.edu/suep/about-urop/)) programs, or in other research opportunities provided by the campus or in cooperation with the program’s faculty.

Recognition of Academic Achievement

As a pre-professional program, Environmental Design provides an atmosphere for study and creative investigation. ENVD holds academic rigor and quality in the highest esteem. In recognition of high academic achievement and professional attainment, the Program grants scholarly honors at graduation.

Honors Distinction

Students achieving a grade point average of 3.50 to 3.749 (distinction) and 3.75 to 4.00 (high distinction) are recognized at commencement. Honors are based on coursework completed at the University of Colorado. A minimum of 70 credit hours of coursework must be completed at CU to be eligible for honors.

Dean’s List

Students in Environmental Design who have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.75 or better are included on the dean’s list and receive a notation on their transcript.

Thesis Honors in Environmental Design

Environmental Design students may graduate with Latin Honors (summa cum laude, magna cum laude or cum laude). Students with a high GPA propose a project to work on under the guidance of a primary faculty advisor. Students defend their thesis to a committee of faculty in their senior year.

Latin Honors candidates present work that is student initiated and student-directed well beyond the requirements for required class work. Program in Environmental Design Latin Honors (https://www.colorado.edu/envd/current-students/honors-program/) projects fall into two major categories: research and design.

- **Research** projects present a heretofore-unanswered question then seek to answer it, relying on a variety of data or types of evidence. The product is a paper, which is determined by the topic in conversation with the faculty advisor.
- **Design** projects present a problem and propose a solution to that problem. The product is a design or object, presented with a critical introduction. Design theses go beyond designing a product, building, landscape, urban district, or planning problem that responds to conventional programmatic assumptions, to propose a new response to a problem identified by the student. The scope of the project and the design presentation are determined in conversation with the faculty advisor.

Academic Standards

Student Rights and Responsibilities

Environmental Design is part of an academic community whose mission requires an open learning and working environment for students, faculty, staff and administrators. An open learning and working environment values and protects individual dignity and the integrity of human relationships and is based upon mutual trust, freedom of inquiry, freedom of expression and the absence of intimidation and exploitation. Any infringement upon these freedoms and rights may be cause for review by the Program and/or by other university offices for retention in the Program. Students in the Program are subject to the policies and procedures governing student rights and responsibilities. See the campus-wide Student Conduct & Colorado Creed (p. 58) section.

Ethics and Academic Dishonesty

Students in Environmental Design are subject to the Boulder campus Honor Code and are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Any act of academic dishonesty may result in sanctions from individual faculty and also be reported to the Honor Code Office (https://www.colorado.edu/scrr/honor-code/) for their review and action.

For a full description of Honor Code expectations and policies, see the campus-wide Academic Integrity (p. 22) section.

GPA Requirements and Academic Standing

Students above a 2.00 GPA are considered in good standing. Students who fail to meet the minimum cumulative grade point requirement of 2.00 are still permitted to continue their studies on a provisional basis but will fall under one of the following academic standing categories.

Alert

First-year students who do not achieve a 2.0 in their first semester will be placed on academic alert for the following semester and will be assigned to the ENVD Academic Coach (https://www.colorado.edu/envd/current-students/academic-advising/academic-coaching/) for additional support. Students are required to work on a semester-long academic recovery plan to get back into good standing. Scholastic records of students are evaluated at the end of the second semester, if the student has not achieved an overall 2.0 the student will be placed on probation or suspended depending on an evaluation of meeting the academic recovery plan.

Probation

Continuing students who fail to meet the minimum cumulative grade point requirement of 2.00 in a given semester are permitted to continue their studies on the main campus the following semester on a probationary basis. Students who fall below the 2.00 cumulative GPA will be assigned to the ENVD Academic Coach (https://www.colorado.edu/envd/current-students/academic-advising/academic-coaching/) for additional support. Students are required to work on a semester-long academic recovery plan to get back into good standing. Scholastic records of students are evaluated at the end of the probationary semester, if the student has not achieved an overall 2.0 the student will be placed on suspension.

Scholastic Suspension

Students on suspension are not allowed to register on any campus within the University of Colorado system while on suspension, with the exception of Continuing Education (https://ce.colorado.edu/) courses or main campus summer sessions. A suspended student may take
Classes through Continuing Education or on any University of Colorado campus during the summer in order to raise their cumulative CU grade point to a 2.00 or higher to be eligible for re-admittance into the program. Suspended students may petition for early re-admittance, which are reviewed on a case-by-case basis by the program administration.

Students are notified of their academic status (e.g., alert, probation, suspension) in writing, with a copy of the letter placed in the student’s file, directing the student to contact their academic coach to prepare an academic recovery plan and continue to frequently connect with their academic advisor.

Students in Environmental Design who withdraw from all their registered courses two semesters in a row will have a hold placed on their account prohibiting them from further registration with the exception of registration in Summer Session classes, which are not counted in the regular academic year. Students will not be reenrolled for return to CU Boulder before one full academic year has elapsed (not including the semester of withdrawal).

Students suspended a second time are reinstated only under special circumstances. Students who believe their situation warrant a departure from these normal stipulations may petition for reinstatement by contacting their academic advisor. Environmental Design looks with favor on such petitions only if the student has shown marked improvement in academic work or if there are remarkable circumstances that have contributed to the student’s academic difficulties.

**Attendance**

Students are expected to subscribe to attendance and participation guidelines specified by instructors for individual courses in a manner that complies with university protocol. Given that a considerable portion of the ENVD curriculum is offered via studio courses, students are fully expected to comply with guidelines that may be different and more onerous than traditional lecture or seminar courses (e.g., attending skill sessions, lectures, juries and presentations).

All students in the Program in Environmental Design are required to complete a minimum of 120 credits and uphold a cumulative GPA of 2.00 or higher at the time of graduation. Environmental Design currently offers majors in **architecture, landscape architecture, sustainable planning and design, and environmental products of design**. Questions may be directed to 303-492-8010 or ENVDoOffice@colorado.edu.

**Requirements for Admission**

**High School Students**

Candidates interested in admission into Environmental Design should see CU (https://catalog.colorado.edu/undergraduate/admissions/)Admissions (p. 25) for specific requirements. Applicants to the program should possess a strong high school or equivalent background, including four years of English and math, and at least three years of natural science (including physics and/or biology) and social science. Additional coursework in foreign language, math, social studies, design courses and the arts and humanities is recommended.

**Transfer Students**

Transfer students entering the program are admitted through CU Boulder’s admission process directly into the Program in Environmental Design. A college-level GPA of 3.0 or higher is required. Preference is given to students who have taken college-level courses in the areas of architecture, planning or environmental studies. Completion of courses in related fields of social science, natural science, fine arts or humanities is also considered in admission review. All coursework except the last term, if in progress, must be completed and must be listed on the official transcript sent for admission consideration.

Students are encouraged to transfer as early as possible in their undergraduate career due to the required sequence of design courses in the first two years of the curriculum. Students may declare their major in architecture, landscape architecture, sustainable planning and design, and environmental products of design when they transfer or after they complete the core program. While transfer students are admitted for the fall and spring terms each year, it is important to note that the core curriculum sequence begins in the fall semester with only limited opportunities to begin study out of sequence. Students who start the sequence in the spring semester will be required to complete summer classes in order to stay on track in the curriculum. All transfer students are required to take a minimum of 30 credit hours in the Program in Environmental Design.

A maximum of 60 credit hours taken at a two-year college may be applied toward the baccalaureate degree. In general, credit hours in vocational-technical courses are not accepted for transfer. Transfer agreements between the University of Colorado and all Colorado community colleges outline approximately one year of prescribed general education courses that may be completed as preparation for transfer into the Program in Environmental Design. As noted above, students should plan to transfer to the University of Colorado as soon as possible to start the sequential curriculum. See Transfer of College-Level Credit (p. 43) for admission standards for transfer.

**Transfer Students from Other University Design Programs**

Transfer students from other universities offering pre-professional or accredited professional degree programs in one of the program’s majors who enter CU Boulder may apply for equivalency and advanced standing. A portfolio review will be required for these students, including work from each design course completed. In order for transfer credit to meet core degree requirements, a grade of B or better is required in the transferring class. For more information, visit the ENVD T (https://www.colorado.edu/envd/current-students/academic-advising/transfer (https://www.colorado.edu/envd/future-students/transferring-cu/) webpage.

**Intra-University Transfer (IUT)**

University of Colorado students in good standing who are interested in pursuing a degree in environmental design may apply for transfer into the program. Students should contact the program office for meeting dates and application deadlines for specific semesters. We highly encourage prospective students to attend one of our Environmental Design Program tours, which are offered Monday–Friday at 12:30 p.m. in the lobby of the Environmental Design building on the main campus when main campus is open.

For more information, visit the Intra-University Transfer Students section of the program’s Transferring to CU (https://www.colorado.edu/envd/future-students/transferring-cu/) webpage.

**Credit Policies**

**Advanced Placement**

Advanced Placement (AP) and college-level credit may be granted on the basis of the College Board’s Advanced Placement tests. For students who have completed AP coursework in high school and received scores
in the AP examination that meet university standards, then AP as well as college credit is granted. Granted college credit is treated as transfer credit without a grade but counts toward graduation requirements and could meet other specific degree requirements when applicable.

**Incomplete Grades**

The Program accepts incomplete agreements between faculty and students who have satisfactorily completed a substantial amount of coursework but are unable to complete the course requirements due to extenuating circumstances. In all cases, students must present evidence of circumstances beyond their control that prevent them from completing the class. The student and faculty member must complete an Incomplete Agreement outlining the terms of course completion and submit this agreement to their advisor in the ENVD Center for Advising and Student Achievement (https://www.colorado.edu/envd/current-students/academic-advising/).

**Independent Study**

Ordinarily, only students at 3000 or 4000 studio level and who hold at least a 3.00 GPA are permitted to register for Independent Study (ENVD 3909) or Independent Study (ENVD 4909). Independent study credit is supervised by a faculty member and may not be used to substitute for any required core or design studio courses.

Additional requirements may be established depending on the proposed topic. No more than 3 credit hours of independent study credit during one semester and no more than a total of 6 are given for the entire time the student is enrolled in the program, unless an exception is granted by the program.

A complete description of the scope of the independent work, a summary of how it will be carried out, and a definition of the intended outcomes must be submitted to the supervising faculty member no later than five days after the official beginning of a semester. Approval of the description must be by the faculty member and by program administration before permission is granted for enrollment in the independent study course. Students should make arrangements for the independent study course details during registration or well before the semester begins.

**Other Credits**

Credits for Teaching Assistant (ENVD 3919), Research Assistant (ENVD 4929), Professional Design Internship (ENVD 4939), Exploratory Internship (ENVD 3939) and for Independent Study (ENVD 3909) or Independent Study (ENVD 4909) are all guided by the same standards. Credits earned are subject to a 3 credit-hour limitation per course, Independent Study is graded while teaching assistantships, research assistantships, and internships are offered on a pass/fail basis.

**Pass/Fail Credits**

A student may elect to take up to 6 credit hours toward the BEnvD degree on a pass/fail basis but these credit hours must fall in the category of general electives and may not include coursework taught within the Program in Environmental Design. Courses within the Program in Environmental Design that are only offered as pass/fail are not subject to this policy.

**ROTC Credit**

Students interested in such programs should contact the professor in charge of the ROTC program of their choice (Army, Navy, Air Force) and also their ENVD academic advisor for information on residence and curriculum requirements for graduation. No more than 8 credit hours of ROTC courses may be applied to the BEnvD degree.

**Transfer Credit**

Credits transferred from other institutions are limited to the number of credit hours given for similar work in regular offerings at the University of Colorado and must meet the quality level expected at the University of Colorado Boulder. The program faculty, in conjunction with the ENVD Center for Advising and Student Achievement (https://www.colorado.edu/envd/current-students/academic-advising/), may make exceptions to this policy.

ENVD does not accept vocational/technical coursework in design, graphics or construction as meeting specific course requirements of the program; nor does it consider such coursework as acceptable in fulfilling the program’s elective requirements. Only in exceptional circumstances may a student petition the program to request a transfer of such credits.

A grade of C- or better is required in any course for which credit is granted in transfer from another institution to the university. However, in order for transfer credit to meet specific core degree requirements, a grade of B or better is required in the transferring class. Grades earned in other institutions (excluding other campuses of the University of Colorado system) are not factored in the CU grade point average.

For more information on transfer credit policies, see the Transfer of College-Level Credit (p. 43) section.

**Residency Requirement**

In order to graduate from the University of Colorado with a Bachelor of Environmental Design a student must complete a minimum of 30 credit hours within the Program in Environmental Design as well as complete their last semester in residence as a full-time student.

**Academic Advising and Academic Coaching**

Academic Advising and Academic Coaching for students presently enrolled or anticipating enrollment in the program is provided in a variety of forms. High school students or prospective transfer students from other universities are encouraged to participate in "Be Boulder for a Day," "ENVD Student for a Day" or other visitation programs co-sponsored by ENVD and the CU Boulder Office of Admissions. For more information, see the Admission Visit Programs (http://www.colorado.edu/admissions/) or ENVD Visit programs (https://www.colorado.edu/envd/future-students/visit-us/).

Students already enrolled in Boulder campus programs who are interested in an intra-university transfer (IUT) into the Program in Environmental Design should refer to the ENVD IUT (http://www.colorado.edu/envd/intra-university-transfer/) process.

Students enrolled in ENVD receive academic advising and coaching from professional staff in the ENVD Center for Advising and Student Achievement (https://www.colorado.edu/envd/current-students/academic-advising/) through both appointments and open drop-in office hours.
New Student Welcome

Incoming first-year and transfer students are invited to attend New Student Welcome programming during the summer prior to the start of the fall semester. Visit the New Student & Family Programs (http://www.colorado.edu/orientation/) website to learn more.

All students are required to attend an ENVD information session during New Student Welcome Week in August to receive an overview of educational opportunities and the philosophy of the Program, and to meet other new students and the faculty of the Program. If you are starting your educational career in the spring semester, all students are required to attend an ENVD information session during New Student Welcome Week in January to receive an overview of educational opportunities and the philosophy of the Program, and to meet other new students and the faculty of the program.

Retention of Student Work

As a condition of admission, the Program in Environmental Design may retain student work submitted in fulfillment of class requirements. This retained work may be used to provide outside agencies with tangible evidence of performance, to serve as additional visual aid material in presentations to other students, and to contribute to possible educational exhibits and publications requested by the university community and the general public. The Program does not claim any copyright and intellectual ownership of the material, but does retain rights to display student work for marketing and promotion, or for academic purposes.

Students are responsible for recording their work for future use in their portfolios. When the Program retains students’ materials for displays or presentations, the Program will ensure that students have the opportunity to reclaim and record their work for portfolio use.

Computing

Environmental Design requires that all incoming undergraduate students have and use their own computers and software applications in their studies. Suggested computer specifications and standards are posted on the Office of Information Technology (OIT)'s Recommended Software and Hardware List (https://oit.colorado.edu/node/266/) webpage.

Neither the Boulder campus nor the Program in Environmental Design endorse nor require students to buy a computer from a particular manufacturer. The configurations suggested by OIT establish high performance requirements that can be found in many different computers. Specialized software requirements for different classes in the Program in Environmental Design appear on the syllabi for those classes, and that software is generally available at discounted student rates.

Programs of Study

The Program in Environmental Design at CU Boulder offers four majors that prepare students for graduate study and careers in architecture, landscape architecture, sustainable planning and product design. With a diverse faculty committed to excellence in teaching, research, scholarship and creative and professional work, the program provides students with a varied range of learning opportunities.

The Program in Environmental Design encourages students to expand their education opportunities and explore certificates available on campus. Students interested in the certificate options below or minors offered at CU should contact their academic advisor to have a plan set in place prior to their junior year.

To filter through all the minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z (p. 858) section.

Bachelor’s Degree

- Environmental Design - Bachelor of Environmental Design (BEnvd) (p. 858)

Minor

- Environmental Planning - Minor (p. 862)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Brandon
Instructor

Arias, Ernesto G.
Professor Emeritus

Beach, Alexandra (https://experts.colorado.edu/display/fisid_159830/)
Instructor; MArch, University of Utah

Bellucci, Justin T. (https://experts.colorado.edu/display/fisid_147703/)
Senior Instructor; MS Civil Engineering, University of Colorado Boulder

Bilot, Danielle (https://experts.colorado.edu/display/fisid_163323/)
Instructor; MLA, University of Oregon

Brooks, Siobhan (https://experts.colorado.edu/display/fisid_158243/)
Instructor; MLA, Harvard Graduate School of Design

Chawla, Louise
Professor Emerita

Chinowsky, Paul (https://experts.colorado.edu/display/fisid_125496/)
Faculty Director; PhD, Stanford University

deLange, Marcel (https://experts.colorado.edu/display/fisid_140404/)
Clinical Assistant Professor, Faculty Director; MS, Delft University of Technology (Netherlands)

Drake, Susannah (https://experts.colorado.edu/display/fisid_165937/)
Associate Professor; MArch, Harvard University

Drennan, Kimberly Alaine (https://experts.colorado.edu/display/fisid_152242/)
Assistant Professor; MArch, Rhode Island School of Design

Ehly, Jeremy G. (https://experts.colorado.edu/display/fisid_149190/)
Instructor; MArch, Illinois Institute of Technology

Evers, Neal (https://experts.colorado.edu/display/fisid_157360/)
Instructor; MBA, University of Colorado Boulder

Fantalis, Maryanne (https://experts.colorado.edu/display/fisid_156467/)
Instructor; JD, Rutgers University
Courses
ARCH 2100 (6) Studio 1: Foundations of Architecture
The beginning of the architectural specialization sequence, this course introduces students to the basic strategies and techniques of architectural design. This studio focuses on concepts of medium-scale building design, siting, and climate. Through multiple design exercises, students learn how these factors assist in shaping buildings.

Requisites: Requires prerequisite course of ENVD 1120 (minimum grade C). Restricted to Program in Environmental Design (ARPLU) students.
Recommended: Corequisite ARCH 2115.

ARCH 2115 (3) Architecture Materials and Methods
An introduction to both standard and innovative building materials this course exposes students to the elements and processes used to in constructing buildings. Through lecture, technical drawing, material research and exposure to practicing professionals, students build a foundation of knowledge necessary to approach the specification and design of materials as well as to foster a curiosity in the innovative frontiers of assembly, aesthetics and sustainable life-cycle considerations.

Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Recommended: Corequisite ARCH 2100.

ARCH 3100 (6) Studio 2: Intermediate Architecture
Dealing with problems at an intermediate level of complexity this architecture studio emphasizes the interaction of form, programmatic use, human behavior and context in creating structure. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Students work across analog and digital platforms to produce high quality and portfolio-worthy work.

Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of ARCH 2100 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.
Recommended: Corequisite ARCH 3114.

ARCH 3114 (3) History and Theory of Architecture 1
Focusing on buildings, this lecture is a survey of the built environment starting with some of the first structures built by humans and moving through time to the Industrial Revolution. The course focuses on the development of major styles, influential people, and the drivers of building form.

Requisites: Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to Program in Environmental Design (ARPLU) students or restricted to Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).
Recommended: Corequisite ARCH 3100.

ARCH 3214 (3) History and Theory of Architecture 2
Picking up after the Industrial Revolution and continuing through to today’s Contemporary Architecture this course is the sequel to History and Theory I. History be taught thematically and cover important structures, key figures, and movements that have shaped our modern world.

Requisites: Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to Program in Environmental Design (ARPLU) students or restricted to Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).
Recommended: Prerequisite ARCH 3114 with a C- or better.
ARCH 4010 (5) Architectural Appreciation and Design
Introduces basic processes and principles of architectural design. Provides a basis for understanding and evaluating architecture.
**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

ARCH 4100 (6) Studio 3: Capstone in Architecture
The capstone of the studio sequence, this course investigates building technology, structural systems, user experience, and environmental sustainability. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Outcomes include well developed structures designed with a high level of craft, resulting in sophisticated and exhibit-worthy presentations.
**Requisites:** Requires prerequisite course of ARCH 3100 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ARCH 4115 (3) Architecture Building Technology
Through experimentation and testing, the fundamentals of building physics and climate science are taught in this interactive seminar. Students learn the concepts related to structural and mechanical systems necessary for proper building function by first studying and then implementing the key systems through hypothetical building assignments. This class covers active and passive green building systems that are necessary when designing structures for an evolving climate.
**Requisites:** Requires prerequisite course of ARCH 2115 or ENVD 3115 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1001 (1) ENVD First-Year Seminar
Transitions first-year ENVD students into college through the process of discovering their path to educational success. Provide opportunities to facilitate learning through peer support groups and curricular integration with the ENVD core classes.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Social Factors

ENVD 1002 (2) Technology 1: Applications for Environmental Design
Introduces technological competencies to support studio work including design representation and presentation. Students develop fundamental competencies in sketching, graphic design, file management and 3D modeling.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) majors only.

ENVD 1004 (3) Introduction to Environmental Design
Introduces methods, principles and philosophies that guide environmental design. Explores ways of thinking about, and accomplishing, the act of design. Students contemplate the processes and motivations behind design decisions including discussions of environmental sustainability and social responsibility.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) majors only.

ENVD 1010 (3) Studio 1: Introduction to Environmental Products of Design
The first of four introductory studios introduces students to concepts and techniques related to the design of products at a human scale. In an immersive project-based studio environment students develop the foundation of design communication and thinking through a series of hands-on projects with physical outcomes.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: History and Theory

ENVD 1012 (2) Technology 2: Visual Communications
Explores the basic visual communication skills necessary for environmental design through image manipulation, vector and raster graphics, and composite renderings. Students will explore concepts in visual hierarchy, composition, and color theory to inform graphics within each environmental design major.
**Requisites:** Requires prerequisite course of ENVD 1002 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

**Additional Information:** Departmental Category: Methods and Techniques

ENVD 1020 (3) Studio 1: Introduction to Architecture
The second of four introductory studios introduces students to strategies and techniques of architectural design and communication in a hands-on studio environment. Students design a small-scale architectural project that responds to environmental, contextual and programmatic needs while developing the necessary skills for iterative design processes.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1022 (2) Technology 3: Intermediate Applications for Environmental Design
Building on the technological competencies developed in Technology 1 and 2, students explore more advanced competencies in graphic design, 3D modeling, and diagramming.
**Requisites:** Requires prerequisite course of ENVD 1012 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1024 (3) History of the Built Environment
Develops design appreciation through the historical narratives that link people and the built environment. Explores traditions that demonstrate how design has evolved over time to respond to cultural and environmental conditions.
**Requisites:** Requires prerequisite course for ARPLU students of ENVD 1004 (minimum grade C-) or restricted Architectural Engineering (AREN) students with 80+ credits.

ENVD 1030 (3) Studio 1: Introduction to Landscape Architecture
The third of four introductory studios exposes students to concepts and strategies inherent to the practice of landscape architecture. Students analyze and design ecological related systems within an urban context in this immersive studio environment.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1040 (3) Studio 1: Introduction to Planning and Urban Design
The fourth of four introductory studios in which students learn concepts and strategies related to urban planning and design. Students collaboratively develop a design solution to a small-scale problem within an urban fabric using basic skills of analysis and design iteration.
**Requisites:** Restricted to Program in Environmental Design (ARPLU) students.
ENVD 1052 (3) Design and Communication 1
Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation, and communication.
Additional Information: Departmental Category: Methods and Techniques

ENVD 1102 (4) Design and Communication 2
Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by traditional techniques for the advanced practices for design visualization, representation, and communication.
Requisites: Requires prerequisite course of ENVD 1052 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisites ENVD 1104 and ENVD 2003.
Additional Information: Departmental Category: Methods and Techniques

ENVD 1110 (3) Studio 2: Fundamentals of Environmental Products of Design
Building on the foundation introduced in EPoD Studio 1, this studio introduces students to more advanced methodologies and techniques related to the design of products at a human scale while considering the interdisciplinary nature of the other specializations. Using complementary skills in 3D modeling, drawing, diagramming, and through physical making and fabrication, students explore imaginative and innovative design solutions of small-scale products.
Requisites: Requires prerequisite courses of ENVD 1010 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1120 (3) Studio 2: Fundamentals of Architecture
Focusing on the languages of design, as well as on traditional and digital methods of visualizing architectural ideas and forms, this course builds on the skills learned in Studio 1 and begins incorporating the dynamic forces that shape our buildings.
Requisites: Requires prerequisite courses of ENVD 1020 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1130 (3) Studio 2: Fundamentals of Landscape Architecture
Building on skills learned from the introductory studio, this course expands the skills and knowledge needed for the practice of landscape architecture. With a focus on resilient design and an exploration through multiple scales, students design ecological systems in an urban context.
Requisites: Requires prerequisite courses of ENVD 1030 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1140 (3) Studio 2: Fundamentals of Planning and Urban Design
Through a small-scale urban planning and design project, students explore solutions to challenges in dynamic urban systems. Builds on knowledge and skills gained in the introductory studios to explore the human and environmental dimensions of intertwined systems within the built environment.
Requisites: Requires prerequisite course of ENVD 1040 (all minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ENVD 1150 (3) First Year Writing for Environmental Design
Introduces students to fundamentals of effective academic and professional communication with an emphasis in Environmental Design. Projects are designed to develop strong written and oral communication skills as well as building knowledge of research techniques, while classroom activities and discussions challenge students to become more critical and flexible thinkers.
Requisites: Restricted to Environmental Design (ENVD) majors only.

ENVD 1976 (1) Colloquium - Exploring Careers, Research and Practice
Inspiration in the design profession can be found through a series of faculty and professional lectures. Students develop an understanding of the breadth of environmental design careers, research and practice.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Program in Environmental Design (ARPLU) majors only.

ENVD 2001 (3) Human Behavior and Design
Examines reciprocal relationships between people and the built and natural environments and the ways that human well-being is impacted by the built environment. Traces major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Social Factors

ENVD 2003 (3) Ecological Systems in Design
Introduces the essential principles and concepts of ecology as they relate to the design and understanding of the built environment. Students explore interactions between people and nature, the design of resilient ecological systems and ways that the built world is influenced by its environment.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Physical Factors

ENVD 2101 (3) Planning and Implementation: the Context of Design
Explores the regulatory and procedural context in which design decisions are made and implemented. Includes an examination of finance, policy, and development procedures necessary in bringing conceptual designs to life.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.

ENVD 2120 (6) Environmental Design Studio 1
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3115.
Additional Information: Departmental Category: Studios
ENVD 2130 (6) Environmental Design Studio 2
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3003.
Additional Information: Departmental Category: Studios

ENVD 2352 (3) Beginning Digital Applications
Foundation level computing skills for design analytics and representation.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.

ENVD 3003 (3) Site Planning
Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process.
Recommended: Corequisite ENVD 2130.
Additional Information: Departmental Category: Physical Factors

ENVD 3009 (1-6) Special Topics in Environmental Design
Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topic class.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Miscellaneous

ENVD 3052 (3) Introduction to Computer Methods in Environmental Design
Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors with instructor consent.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3100 (6) Environmental Design Studio 3
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3122.
Additional Information: Departmental Category: Studios

ENVD 3009 (1-6) Special Topics in Environmental Design
Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topic class.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.

ENVD 3100 (6) Environmental Design Studio 3
Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.
Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Recommended: Corequisite ENVD 3122.
Additional Information: Departmental Category: Studios

ENVD 3112 (3) Research Issues and Methods in Design and Planning
Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3150 (3) Professional Communication for Design Students
Building on First Year Writing, this class prepares students for the kinds of projects they will undertake as design professionals. Enriches students' awareness of writing as a life-long tool and communicates the importance of writing well. Emphasizes effective written and oral communication skills. Projects explore the many ways in which writing is a powerful tool in the world of design.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.

ENVD 3152 (3) Introduction to Computer Graphics Applications
Explores principles and uses of computer graphics in design. Topics include creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3200 (1-6) Advanced ENVD Studio
Design studio dealing with problems at an intermediate level of complexity: emphasis is on the interaction of form, use, and multiple values and technologies in conjunction with issues and techniques drawn from other content area courses of the curriculum.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Recommended: Prerequisite ENVD 2130.
Additional Information: Departmental Category: Studios

ENVD 3212 (3) Color Theory
Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3252 (3) Computer Graphic Programming
Provides an introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3300 (3-6) Special Topics: Intermediate Design Lab
Design lab exploring new and emerging themes in environmental design.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Studios
ENVD 3352 (3) Intermediate Digital Applications
Intermediate level computing skills for design analytics and representation.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Program in Environmental Design (ARPLU) majors only.
Additional Information: Departmental Category: Methods and Techniques

ENVD 3909 (1-6) Independent Study
By special arrangement with instructor.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Recommended: Prerequisite 3.00 GPA.
Additional Information: Departmental Category: Miscellaneous

ENVD 3919 (1-6) Teaching Assistant
By special arrangement with instructor.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students with 87-180 credits (Seniors).
Recommended: Prerequisite 3.00 GPA.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Miscellaneous

ENVD 3929 (1) Peer Leadership and Mentorship and Transitioning Students
Designed to explore the student transition to university life and engage students in active leadership and mentoring capacity-building activities. Examines the role peers play in leading students through transitional development. Students will learn the theoretical basis for understanding student transition and develop their mentoring capacities as well as examine personal identity and values and its intersection with leadership and mentorship.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Program in Environmental Design (ARPLU) students with 27-180 credits (Sophomore, Junior, or Senior).
Recommended: 3.00 GPA.
Additional Information: Departmental Category: Miscellaneous

ENVD 3939 (1-3) Exploratory Internship
Offers professional experiences allowing students to discover a variety of design-related environments such as community engagement, non-profit work or assisting research. In addition to the internship experience, students attend four classroom sessions providing professional development exercises.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Program in Environmental Design (ARPLU) students with 27-180 credits (Sophomore, Junior, or Senior).
Recommended: Prerequisite 2.00 GPA.
Additional Information: Departmental Category: Miscellaneous

ENVD 3972 (3) Advanced Writing in Environmental Design
Prepares students for researching, planning, and writing a Senior Honors thesis and for professional life. Enriches students’ awareness of writing as a life-long tool and communicates the importance of writing well. Emphasizes clear, persuasive, and effective written and oral communication skills. Projects explore the many ways in which writing is a powerful tool in the world of design. Environmental Design majors only.
Requisites: Restricted to Program in Environmental Design (ARPLU) students. Must have 57 credit hours and a cumulative GPA of 3.0 or higher.
Grading Basis: Letter Grade

ENVD 4009 (1-6) Special Topics in Environmental Design
Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topics.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Recommended: Prerequisite ENVD 2120.
Additional Information: Departmental Category: Miscellaneous

ENVD 4023 (3) Environmental Impact Assessment
Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. By instructor consent, open to nonmajors on a space available basis.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Physical Factors

ENVD 4035 (3) Solar and Sustainable Design
Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Technology and Practice

ENVD 4052 (3) Digital Presentation and Portfolio
Introductory course creating interactive web sites. Covers use of Hypertext Markup Language (HTML) and Flash to create linked pages containing text, images animations, menus, and buttons. Covers principles of site navigation, page layout, and graphic design for designers and planners.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4100 (3-6) Advanced Design Lab 1
Design lab exploring new and emerging themes in design.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C-).
Additional Information: Departmental Category: Studios

ENVD 4112 (3) Architectural Graphics 1
Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4122 (3) Digital Photo for Designers
Explores digital photographic workflow from capture to exhibition. Students gain the ability to document their projects and utilize photography as a means of creative expression. Topics include: using DSLRs, Adobe Lightroom, retouching with Adobe Photoshop, timelapse photography, Adobe Premiere, professional printing, landscape and architectural photography, sharing work through blogs and social media, and submitting work for publication and exhibition.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Methods and Techniques
ENVD 4152 (3) Computer Graphic Applications
Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of images and objects.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4212 (3) Architectural Graphics 2
Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4300 (3-6) Advanced Design Lab 2
Design lab exploring new and emerging themes in design.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of ENVD 4100 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: Studios

ENVD 4311 (3) Housing Policies and Practices
A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Social Factors

ENVD 4322 (1-6) Special Topics: Graphics
Provides an advanced seminar on special issues in design communications.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4340 (4-6) Landscape Design Studio
Studio in landscape design.
Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C). Restricted to Program in Environmental Design major or minor students only.
Additional Information: Departmental Category: Studios

ENVD 4352 (1-6) Special Topics: Computer Methods
Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition.
Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Methods and Techniques

ENVD 4361 (1-6) Special Topics: Social Factors in Design
Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Social Factors

ENVD 4363 (1-6) Special Topics: Physical Factors in Environmental Design
Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Physical Factors

ENVD 4364 (1-6) Special Topics: History and Historiography of Environmental Design
Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: History and Theory

ENVD 4420 (3) Senior Capstone Seminar
Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Technology and Practice

ENVD 4440 (3-6) Landscape Design Studio 2
A preprofessional studio in landscape architecture.
Requisites: Requires prerequisite course of ENVD 4340 (minimum grade C). Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: Studios

ENVD 4764 (1-6) Special Topics: Theory and Criticism in Environmental Design
Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: History and Theory

ENVD 4794 (3) History of Urban Design and Planning
Examines history of European and American planning and urban design in the late 19th and 20th centuries.
Requisites: Restricted to Program in Environmental Design (ARPLU) students.
Additional Information: Departmental Category: History and Theory
Environmental Design - Bachelor of Environmental Design (BEnvD)

Program Overview

Structure of the Undergraduate Curriculum

The Bachelor of Environmental Design curriculum is comprised of a shared core (lasting three semesters) followed by five semesters of coursework focused on one of four majors: architecture, landscape architecture, sustainable planning and design, and environmental product design.

The shared core provides an intensive and balanced introduction to the traditional professions contained within the broad field of environmental design. The core provides students the information and flexibility to hone their career direction and major area. It allows opportunities for hands-on problem solving that features eight-week design studios as the primary teaching pedagogy. Anchored through a combination of lecture courses and studio instruction, the core curriculum builds upon studios where students solve design problems at three important scales of the built-environment: buildings, landscapes and urban systems.

Prospective students often choose to enroll at CU in ENVD because they can advantageously leverage their first three semesters to help determine which specialization matches their strengths and aspirations. Others are attracted to ENVD because they can declare a major at the outset of their studies. Even more will choose ENVD because there is the opportunity to change their mind towards the end of the core and pursue a major to reflect their changing interests without a loss of credit or time towards graduation.

The major coursework in the final five semesters allows students to pursue in-depth projects and gain more specialized skills necessary for pre-professional work or further study. Students can also pursue approved international study abroad options as part of the curriculum as well. The final year culminates into capstone requirements for the chosen major.

Educational Advantages of the BEnvD

The Program in Environmental Design provides a balanced introduction to environmental design. Despite the many design programs across the country, most focus on providing a generalized experience too broad to provide an in-depth exposure to the fundamentals of each discipline. ENVD’s emphasis on both the breadth and depth of design allows students to gain the appreciation, information, skills, and experiences needed to make an informed decision about their career direction.

For the past 50 years, ENVD has retained a focus on studio instruction in small class sizes. From a student’s first semester, they learn to work both in small groups and individually to solve design problems. Unlike most majors across the university, by the end of a student’s first year, the small classes and unique teaching relationships will build relationships with several faculty and a cohort of their peers.

ENVD’s curriculum stresses both critical thinking and applied project work. Experiential learning is a core component of design education with students engaging in design, build and fabrication activities. Student satisfaction within higher education has been directly linked to teaching that incorporates projects where small student groups work together to solve problems that they know are important.
The pedagogy of the program celebrates an interdisciplinary culture for both students and faculty. Mirroring emerging workplace trends in industry, students work within teams. Sometimes students work within multi-disciplinary teams where each profession shares its expertise and coordinates with others and sometimes within inter-disciplinary teams where the separate expertise is not as important as the ability to mutually and collaboratively define and solve a problem. Increasingly, in environmental design, at the end of each project the list of participants is as long as the endless list of credits we watch at the end of a motion picture.

**Education Abroad**

The Program in Environmental Design has, along with the office of Education Abroad, developed an exciting selection of study-abroad options. Studying abroad gives students an array of unique experiences, and it can make students more competitive for graduate study and for employment. Summer programs and faculty-led programs are available to students after their first year of study. Full-semester programs are available to students starting in their third year. The study abroad program provides an academically challenging experience with extensive local support.

Environmental design programs in architecture, urban design or urban planning are offered in Sydney, London, Rome, Denmark and Barcelona. In addition, the office of Education Abroad offers more than 25 programs which offer courses appropriate to design. These courses offer students an opportunity to study the process of design in another culture and to examine their own perceptions and attitudes toward design. Programs outside of the preapproved listing may be considered for approval. Please meet with an ENVD academic advisor for details.

For more information about the study abroad programs, contact:

Education (http://abroad.colorado.edu/) Abroad (https://abroad.colorado.edu)

Boulder, CO 80309-0123
Phone: 303-492-6016

**Required Courses and Credits**

Students must complete a minimum of 120 credit hours subject to the maximum outlined in this catalog, meet all specified university general education requirements, all major core requirements and maintain a GPA of 2.00 or better. Students must complete courses with a grade of C- or better to fulfill university and degree requirements.

The curriculum for the Bachelor of Environmental Design (BEnvD) is subdivided into two parts:

1. The first part consists of a core lasting one-and-a-half years which provides a balanced introduction to each of the majors offered. By the end of the core studies, students select or confirm their intended major.
2. The second part is focused on a selected major. Studies lead to the degree Bachelor of Environmental Design (BEnvD) with a major in either architecture, landscape architecture, sustainable planning and design, or environmental product of design. Each area has specific requirements for completing the major.

**Sample Four-Year Plans of Study**

The first three semesters of the BEnvD curriculum is core, which is prerequisite for each of the majors: architecture, landscape architecture, sustainable planning and design, and environmental product of design. There are corequisite ENVD core courses each semester, and the core courses are sequential from semester to semester.

Majors

Environmental Product of Design
The environmental product of design major takes cues and information from the majors of architecture, landscape architecture, sustainable planning and design and product design and stewards project outcomes towards fostering a better, sustainable environment for all. These outcomes can be entrepreneurial, reproducible, of smaller scale and not necessarily site specific.

Architecture
The architecture major focuses on the design and development of the built environment. At ENVD, we encompass broad topics of sites, program, materiality, structural systems, modern technologies, human interconnectedness and social interaction. This specialty endeavors to teach our students to be responsible citizens and stewards of aesthetic, ethical, social, economic and environmental concerns.

### Landscape Architecture

The landscape architecture major teaches students to design environments in urban, rural and agricultural contexts at all scales. Students learn strategies to repair and strengthen ecological systems, create and restore habitats, manage stormwater, express cultural values, and support human health and well-being. This major encourages students to explore the cultural value of landscapes, to redefine how landscape architects can transform the urban fabric, and to design resilient, climate-responsive projects.

### Sustainable Planning and Design

The sustainable planning and design major examines issues of sustainability and social justice in communities, cities and regions around the world. Heavily centered around community engagement, this major allows students to focus on a variety of topics, such as housing, environmental planning, transportation planning and urban design. Students examine these topics through a combination of design, policy and management perspectives.

### Dual Degree Program

**BEnvD and a Degree in an Outside Major**

In addition to the BEnvD degree, students may pursue a dual degree at CU Boulder. Past students have received the BEnvD degree concurrently with undergraduate degrees in one of the other colleges. Typically, specific course requirements do not change in either program of a dual degree. Additional credit hours (varying by college) may be required.

All undergraduate students must complete the general education requirements and the requirements for their specific major within the Program in Environmental Design in addition to the other requirements. Students considering a dual degree program are encouraged to speak with advisors in both units to determine requirements and procedures for application.

## Environmental Planning - Minor

Environmental planning facilitates decision making to carry out urban planning, urban design, land development, and natural resource conservation with consideration given to environmental, social, political, and economic factors. The field applies the natural and social sciences to promote environmentally sound growth, effective management of natural resources, and solutions to urban development to offer the frameworks necessary for achieving sustainable outcomes. In this sense, environmental planners might employ the traditional skills of landscape architects and urban planners, such as physical planning and site design, to inspire more creative and ecologically informed plans and help mitigate the detrimental effects of development.

The environmental planning minor provides non-ENVD students experience with the process, technical skills and professional practice of environmental planning. To this end, students are required to take courses offering training in software (primarily Geographic Information Systems/GIS), theoretical and conceptual materials, and studio work.

The program is directed towards students interested in either obtaining a graduate degree in planning, urban design or landscape architecture and those wishing to work interdisciplinarily across their major using the tools of planning and landscape architecture.

Exploratory Studies

The Program in Exploratory Studies is an independent program under the Vice Provost for Undergraduate Education, and is home to over 20 percent of incoming students each year. The program is particularly appropriate for those wanting to explore the many offerings at CU Boulder before deciding on a specific academic path. In addition, students who apply to a competitive-admission college or school may be offered admission to the program in exploratory studies, where they will work with advisors either to pursue that initial area of interest or identify related and complementary options on campus.

Students in the program eventually transfer to one of the seven degree-granting colleges, schools and programs on the Boulder campus. Advisors and coaches in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/) work with students to develop academic pathways and explore related career options for more than 70 majors.

Admissions Requirements

Incoming First-Year and Transfer Applicants

Students applying to CU Boulder can select the program in exploratory studies as part of their application process.

Current Students and Intra-University Transfer

Current CU Boulder students interested in exploratory studies can join the program through the Intra-University Transfer (p. 865) (IUT) process.

Guaranteed Admission

Undergraduate students enrolled on the Boulder campus with fewer than 30 credit-hours earned and who are in good academic standing may apply to transfer to the program in exploratory studies. Good academic standing includes students in their first semester on campus who have not yet earned a CU Boulder GPA and students who have completed at least one semester on campus and have earned a cumulative GPA of 2.000 or higher.

Admission Requiring Review

Students who have earned 30 or more credit-hours and students who have earned a GPA below 2.000 are welcome to apply to exploratory studies, but admission is not guaranteed. Admission decisions may be postponed until after final grades are posted and students may be asked to speak with a staff member in exploratory studies for development of a major declaration plan.

Note: Students with a cumulative GPA below 2.000 who are currently on academic suspension from another college on campus are not eligible for an IUT.

Policies and Guidelines

Several policies and guidelines are of particular importance to students in the program in exploratory studies.

Intra-University Transfer

Exploratory studies students work closely with academic advisors throughout their first two semesters to establish a degree plan and move into a degree-granting program. This is accomplished through the Intra-University Transfer (p. 865) (IUT) process and generally takes place after the second or third semester. Requirements vary by college/school.

Recognition of Academic Achievement

Students in the program in exploratory studies are part of the intellectual community on the Boulder campus and may be pursuing admission to competitive admission programs. The program holds academic rigor and quality in the highest esteem and encourages students to be curious and ambitious. In recognition of high academic achievement, the Vice Provost for Undergraduate Education grants scholarly honors each term.

Students achieving a grade point average of 3.600 or higher in any given term are recognized by a letter from the Vice Provost and receive a notation on their transcript. Honors are based on at least 12 credit hours of coursework completed for a letter grade at CU Boulder. Once in a degree-granting program, students from the program in exploratory studies are encouraged to pursue honors that are recognized by each college at commencement.
Credit Limitations and Guidelines

Credits Each Term
In order to maintain good degree progress, students in exploratory studies are encouraged to enroll in an average of 15 credit hours each term.

Declaration of Major
Exploratory studies students must declare a major in a degree-granting program once they have earned 45 credit hours. This generally translates into completion of three semesters of coursework.

Repetition of Courses
If a student takes a course for credit more than once, all grades are calculated into the grade point average. However, the course credit hours only count toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

Students may also retake a course for grade replacement (p. 48) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

Consecutive Withdrawals
Students in the program in exploratory studies who withdraw from all of their registered courses two semesters in a row will have a hold placed on their account, prohibiting them from further registration until they meet with their advisor to assess degree progress.

GPA Requirements, Academic Alert and Scholastic Suspension
Students who fail to meet the minimum cumulative grade point requirement of 2.000 are still permitted to continue their studies on a provisional basis.

Students in their first semester (not including summer) who do not achieve and maintain a 2.000 will be placed on academic alert for the following semester and are required to develop and submit an academic improvement plan with an academic coach. An academic coach will contact students regarding deadlines and requirements for submitting an improvement plan. Scholastic records of students on academic alert are evaluated at the end of that semester. If students demonstrate good progress and have completed an improvement plan with an academic coach but have a cumulative GPA that remains below a 2.000, they will be placed on academic recovery while they work on raising their GPA.

Students who have been on academic alert or who are in their second semester and beyond who fail to meet the minimum cumulative grade point requirement of 2.000 in a given semester are permitted to continue their studies the following semester on a probationary basis. Scholastic records of students are evaluated at the end of the probationary semester and if the student has not achieved an overall 2.000 the student may be placed on suspension.

Students are notified of their academic status (e.g., alert, recovery, suspension) in writing and directed to contact their advisor to discuss options.

Focus on Exploration
The program in exploratory studies helps students explore their interests across all seven colleges and schools on the Boulder campus. In addition to identifying a primary major of interest, exploratory studies encourages students to explore certificates and minors available on campus in order to create a well-rounded and personalized academic experience.

Pathways within Exploratory Studies
There are two plans of study within Exploratory Studies:

- Pre-Business (PREB)
- Exploratory Studies (XXES)

The pre-business program is by invitation only; students in PREB are advised by the Leeds School of Business.

Degree-Granting Options and Intra-University Transfer
The program in exploratory studies does not confer degrees. Therefore, students must transfer into a degree-granting program at CU Boulder via the Intra-University Transfer (IUT) process, generally after the second or third semester.

For more information, view the Intra-University Transfer (p. 865) tab.

Courses
The Office of Undergraduate Education hosts several academic course offerings that are particularly appropriate for students in exploratory studies:

FYSM 1000 First Year Seminar (3) – Have you ever wondered about the origins of the universe? Or what exactly “fake news” means? Or wanted to write a fairy tale? First-Year Seminars tackle these and many other topics by approaching critical thinking and academic curriculum on a completely new level. We asked our inventive professors to develop courses that focus on unusual and thought-provoking topics (e.g., political dialogue, toxic chemicals, morality, and Batman), and then to structure the topics to meet our rigorous academic standards. The First-Year Seminar courses are small, interactive classes—limited to 19 students in each course—and are a great way to explore intriguing topics and establish connections with a faculty member and other students who share similar interests. Most First-Year Seminars are offered in the fall semester with typically 30 to 40 topics from which to choose.

FYXP 1000 Academic Exploration & Critical Decision Making (1) – Taught by advisors in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/), the Academic Exploration Seminar is a one-credit course designed for first-year students in the Program in Exploratory Studies. Students will work through the major exploration process in a guided and intentional way and be introduced to a variety of college success strategies as they critically evaluate their strengths, interests, and goals. Students can expect to leave the course well-equipped to declare a major of interest in a timely fashion and to make a plan for supplementing their degree with opportunities for education abroad, undergraduate research or other co-curricular experiences that best match their interests, skills and abilities.

FYXP 1100 Academic Success Seminar (1) – The Academic Support Seminar is a one-credit course designed for first-year students in the Program in Exploratory Studies and is taught by academic coaches in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/). In this seminar, students develop the skills needed to succeed in college. The class focuses on developing learning strategies, improving executive functioning (time management, organization, self-monitoring, etc.), and setting SMART
goals. Students will identify their strengths and participate in peer-to-peer interaction to foster collaboration and positive outcomes.

**General Education Requirements**

Each college/school on the Boulder campus has a different set of general education requirements. Students in exploratory studies run degree audits (https://www.colorado.edu/registrar/students/degree-planning/audit/run/) by clicking on the “Select a Different Program” option and then running an audit from the degree program they select. Students with interests that span multiple colleges work closely with advisors in the University Exploration & Advising Center (https://www.colorado.edu/exploratorystudies/advising-coaching/) to select courses that meet requirements for multiple degree pathways.

**Intra-University Transfer**

Moving from the program in exploratory studies into one of the seven degree-granting programs at CU Boulder generally requires completion of specific prerequisite coursework, attainment of a specific GPA, and submission of IUT requirements (varies by college/school).

For more information about the IUT process, view the Office of Undergraduate Education’s Intra-University Transfer (https://www.colorado.edu/office-undergraduate-education/intra-university-transfer/) webpage.

To filter through all of the majors, minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z (p. 865) section, or search by the related college/school sections of the catalog:

- College of Arts & Sciences (p. 70): includes majors in the natural sciences, social sciences, and arts and humanities.
- Leeds School of Business (p. 610): includes areas of emphasis in accounting, finance, management and marketing.
- School of Education (p. 633): includes majors in elementary education or leadership & community engagement as well as teacher licensure at all levels.
- College of Engineering & Applied Science (p. 678): includes majors in various engineering fields, computer science, applied sciences, and technology, arts, & media.
- Program in Environmental Design (p. 849): includes areas of emphasis in architecture, planning, landscape architecture and environmental product design.
- College of Media, Communication, and Information (p. 865): includes majors in advertising, PR and media design, communication, critical media practices, information science, intermedia art, writing & performance, journalism and media studies.
- College of Music (p. 923): includes majors in various areas of music education and performance.

**Media, Communication & Information**

The College of Media, Communication and Information (CMCI) prepares students for careers as engaged and effective citizens endowed with deep understanding of the historical and contemporary context of human communication and expression. Mindful of the active role communication plays in shaping human relationships, CMCI trains graduates to study and practice constructive interaction among people, communities, industries and publics. The college equips students with the skills needed to produce, gather, archive, curate, analyze and evaluate the flood of information, messages, images, sounds and ideas that populate our complex and rapidly evolving global media landscape.

To these ends, CMCI resourcefully combines disciplines newly extended and empowered by digital media and the social and cultural transformations those media engender. These include established scholarly, creative and professional fields such as media studies, communication, the history and interpretation of film and television, journalism, advertising and video production in its cinematic, documentary and broadcast forms. But the college also houses both the fast-growing field of information science—a discipline that, through inquiry and innovation, tackles the problems and opportunities facing an increasingly networked society—and the emergent disciplines of intermedia art, design, music, writing and performance.

In giving these activities a collaborative home, CMCI facilitates innovative interactions among them. Its academic structure accordingly stimulates cross-disciplinary cooperation at all levels of curriculum, research and creative work. Further, CMCI promotes the transformational exchanges it nurtures within its own walls for campus-wide benefit. Its organization thus fosters outreach to—and student and faculty participation from—other schools, colleges, centers and facilities throughout CU Boulder and the wider Colorado community.

**Statement of Core Skills, Competencies and Scholarly and Creative Initiatives**

CMCI attracts students, faculty and industry and creative professionals from across the closely related fields of media, communication and information. All of those either rostered in or affiliated with the new college accordingly share a set of skills, competencies and scholarly and creative interests that form a common core. This core is expressed at all levels of the college, from undergraduate curriculum and graduate training to the research and creative work of its faculty and both internal and external affiliates.

**The Undergraduate Experience**

All undergraduates enrolled in CMCI take as part of their experience a core curriculum designed to provide the broad intellectual framework common to each of the individual disciplines in which students eventually major. In addition to conveying the conceptual tools and perspectives all students in the college need, the core curriculum supplies the shared body of knowledge, exemplars and ideas required to build a coherent intellectual and creative community. Each academic unit within the college offers a unique curriculum determined by its faculty and expressed as a set of major requirements. Completion of the major requirements within a discipline provides students with depth of knowledge and expertise appropriate to earning a BA or BS as designated by their discipline.

Additionally, undergraduates enrolled in CMCI acquire the technical and computational skills needed to thrive in today’s networked media environment. Training in these skills is provided through CMCI 1040 (required of all first-year students) and the core computing requirement, and is integrated into each student’s chosen field of study. Finally, students in CMCI complete a secondary area of study outside of their major in order to build the intellectual versatility necessary for successful study and work in the field of media, communication and information.

**Graduate Study**

Curricula leading to advanced degrees are offered by all of the departments in the College of Media, Communication and Information.
Students should consult the Graduate Catalog’s Admissions (p. 985) section for admission and degree requirements. Curricula for graduate programs are listed under each department.

**Policies & Requirements**

The College of Media, Communication and Information provides students with a world-class education to succeed as professionals and citizens in the ever-changing media, communication and information environment. Undergraduate degree programs are available in Communication, Information Science, Journalism, Media Production, Media Studies, and Strategic Communication.

In addition to completion of requirements for their designated major and core requirements for the College, all students in CMCI develop knowledge in a secondary area of study, typically by completing a minor or certificate. This requirement supports breadth of learning and allows students to develop skills outside their chosen major.

**Academic Excellence**

**Dean’s List**

Students in the College of Media, Communication and Information who have completed at least 12 credit hours of CU Boulder coursework for a letter grade in any single semester with a term GPA of 3.75 or better are included on the dean’s list and receive a notation on their transcript and a letter from the dean.

**Graduation with Honors**

CMCI students may graduate with the honors designations of cum laude, magna cum laude or summa cum laude by completing the CMCI honors program, which involves completing a senior honors project within the major. Students interested in graduating with honors should contact the associate chair for their major department to learn more about this opportunity. Students in CMCI may also take honors courses through the College of Arts & Sciences Honors Program (http://www.colorado.edu/honors/).

**Graduation with Distinction**

Students will graduate with CMCI Distinction if they have at least 60 credit hours completed at CU Boulder and have a GPA of 3.75 or higher for all coursework completed at the University of Colorado.

**Program Awards and Scholarships**

Alumni and friends of CMCI have made possible more than 30 annual scholarships and awards to officially admitted students in CMCI. The deadline for application is Feb. 15. For more information and applications instructions, visit the university's scholarships (http://www.colorado.edu/scholarships/) website. Incoming first-year students who have received a CU Boulder Esteemed Scholarship or Presidential Scholarship are automatically considered for a CMCI Merit Scholarship. For more information, visit CMCI’s Financial Aid and Scholarships (http://www.colorado.edu/cmci/life-at-cmci/financial-aid-and-scholarships/) webpage.

**Academic Standards**

**Good Academic Standing**

Good academic standing in the college requires a cumulative GPA of 2.00 or above in University of Colorado work and a 2.00 GPA for all CMCI major coursework. Grades earned at another institution are not used in calculating the GPA at the University of Colorado. However, grades earned in another school or college within the University of Colorado system are used in determining a student’s scholastic standing and progress toward the degree.

**Probation**

Students whose cumulative GPA falls below 2.00 overall or 2.00 in CMCI major coursework are placed on probation. Those students who enroll in any term in the calendar year, excluding summers, after being placed on probation are expected to raise their grade point to the minimum or above by the end of the term. Neither CU Boulder’s summer session nor enrollment through Boulder evening courses counts as a probationary semester. Students are not dismissed at the end of the summer term.

Students placed on academic probation who elect to remain out of school for a full calendar year can return to the university with a two-semester window to achieve the required cumulative GPA or CMCI major GPA. Students on probation who return after a hiatus of one year are placed on a second probation at the end of the semester in which they return if their cumulative GPA or CMCI major GPA remain below the minimums and are dismissed from the university if they do not achieve the minimums by the end of the semester following the imposition of the second probation.

**Scholastic Suspension**

CMCI students are subject to suspension if they do not maintain a cumulative university GPA of 2.00 and a cumulative CMCI major GPA of 2.00.

Students whose GPAs fall below either of these levels are normally placed on probation for one semester, during which they have an opportunity to raise their averages to the required levels. Students who still have a cumulative average below 2.00 or a CMCI major GPA below 2.0 after their semester of probation will be suspended and will not be able to register for University of Colorado daytime courses on any campus during any academic year. Students suspended are eligible for readmission when they have achieved a cumulative 2.00 average or a 2.00 average in CMCI major courses by virtue of work done during the University of Colorado’s summer term (any of the three campuses) and/or through the Division of Continuing Education and Professional Studies (Boulder evening or correspondence courses). Students who choose to enroll in continuing education courses to restore their good standing must maintain a 2.5 GPA or above in each term or be suspended from both day and continuing education classes. They also may return as transfer students when they have overcome their academic deficiencies by enrolling at another institution (i.e., by achieving an overall 2.00 average in the University of Colorado work plus all work taken elsewhere since suspension). These transfer grades are used only for the purpose of readmission and do not remain in the University of Colorado cumulative grade-point average. Suspended students pursuing this latter option have two semesters after readmission to bring their University of Colorado and/or CMCI major GPA up to 2.00 or they are suspended again.

**Academic Ethics**

The College of Media, Communication and Information maintains the highest standards of intellectual honesty. Cheating; plagiarism; illegal possession and distribution of examinations or answers to specific question; alterations, forgery, or falsification of official records; presenting someone else’s work as one’s own or performing work or taking an examination for another student are examples of acts that may lead to suspension or expulsion. Reported acts of academic dishonesty are
referred to the Honor Council. For more information, see the Academic Integrity (p. 22) section.

**Policy on Grade Appeals**

The following shall be the official policy of the College of Media, Communication and Information regarding grade appeals.

Campus policy states that faculty members have primary authority in the area of grading and are charged with carrying out their responsibilities in a professional manner. The Dean's office has the authority and responsibility to deal with changes of grades in special and unusual cases such as those that might involve unprofessional faculty conduct in assigning the grade. Students should be aware, however, that neither Chairs nor Deans can require an instructor to change a properly assigned course grade.

Faculty are expected to assign grades in ways that are consistent, fair and conscientious. When a student believes a course grade has been improperly assigned, the student should first contact the course instructor to see if the issue can be resolved. If discussion between the student and faculty member has not led to a resolution, the student shall have the option of making a formal appeal utilizing the procedures outlined below:

1. The student shall have the option of making a formal written appeal to the chair/associate chair of the department in which the course was taken. The appeal must specify the inappropriate or unprofessional nature of the grade rendered and the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.
2. The chair/associate chair will meet with the student and with the faculty member who taught the course. The instructor will be asked to submit a formal, written response to the student's written appeal. If the chair/associate chair is unable to broker a solution mutually acceptable to both student and instructor, then the chair shall appoint an ad hoc student ethics committee, which will review the dispute. The committee shall consist of two impartial faculty members competent in the subject matter of the course in question.
3. The department chair will convene the committee and provide the committee with the student's written appeal and the written response from the faculty member. Within 30 days, the committee will submit a report and recommendation to the chair, and the chair will recommend to the instructor either:
   a. that the originally assigned grade stand; or
   b. that a new grade be assigned.
4. In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation, the materials will be submitted to the Dean of CMCI who will review the materials and make a final decision within 30 days of receipt. There is no appeal of the decision of the Dean.

This policy applies to the principal instructor in the course, whether that person is a faculty member or GPTI.

**Policy on Waiver of Degree Requirements**

The College of Media, Communication and Information does not waive degree requirements or excuse students from completing degree requirements. Petitions for exceptions to the academic policies stated here may be submitted to the ad hoc Committee on Academic Rules and Policies. Such petitions will be considered only if they meet all three of the following conditions:

- The student must document that she/he has made every effort to fulfill the policy or requirement as defined and must demonstrate that no other options exist for fulfilling the requirement as defined in this catalog.
- The student must document that she/he is prevented from fulfilling the policy or meeting the requirement as defined here for compelling reasons beyond the student's control.
- The student must demonstrate to the satisfaction of the faculty committee that she/he has fulfilled or will fulfill the intent of the policy or the requirement through an appropriate alternative.

Students who believe that their circumstances meet the conditions to submit a petition must first consult with their academic advisor. If the advisor offers options for meeting the requirement or policy as defined here, the student must pursue those options and should not submit a petition.

**Credit and Enrollment Requirements for Admission**

Students will apply to the College of Media, Communication and Information in one of the six undergraduate majors. Students who are not eligible for admission directly into the major may be admitted to the CU Program for Exploratory Studies.

**Transfer Students**

Students applying to transfer into the College of Media, Communication and Information from another institution must meet the following criteria:

- Students who enter with more than 36 credit hours must have a GPA of at least 3.0 from their transfer institution and must have completed an introductory course in the major they intend to pursue.
- Students who enter with 36 or fewer credit hours must have a GPA of at least 3.0 from their transfer institution but do NOT need to have completed the introductory course for the major they intend to pursue. For more information, see the undergraduate Transfer of College-Level Credit (p. 43) section.

**Attendance Regulations**

Students are expected to attend classes regularly and to comply with the attendance policies specified by their instructors at the beginning of each semester. A student who does not attend the equivalent of the first week's sessions of a class during a term may be administratively dropped from the class.

**Credit Policies**

**Major Requirements**

All coursework taken for major requirements must have a grade of C- or better in order to be counted toward the major requirements. Additionally, a grade of C- or better must be earned in CMCI 1040, which is required of incoming first-year CMCI students.

**Pass/Fail**

In addition to the university's general policies, majors in the CMCI may not take any MAPS, core requirements, certificate or minor courses, business, secondary area of study or CMCI courses pass/fail. The one exception to this policy is the APRD internship course (Internship (APRD 4931)), which is a course designated only as P/F and for which 3 credits may be counted toward the major if appropriately registered.

Up to six credit hours outside the major, MAPS, core requirements, certification or minor courses, business or additional field of study may be taken pass/fail, except for transfer students, for whom the limit is one
credit hour in every eight attempted at the University of Colorado, up to the maximum of six credit hours.

Transfer Credits
Credit in subjects transferred from other institutions to the University of Colorado is limited to the amount of credit given for similar work at the University of Colorado. All transfer credit is subject to approval of the associate dean of CMCI. Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Categories of transfer coursework not accepted by the university are described in the undergraduate Transfer of College-Level Credit (p. 43) section. All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions generally carry credits at the level at which they were taught at the previous institution, but can be subject to review on a course-by-course basis.

Residence Requirement
CMCI students must complete a minimum of 45 credit hours in University of Colorado Boulder courses. Of these 45 credit hours, a minimum of 30 credit hours must be in upper-division credit hours completed as a matriculated student in the College of Media, Communication and Information at the University of Colorado Boulder and at least 15 of these upper-division credit hours must be in the major. A maximum of 6 credit hours taken at other University of Colorado campuses (CU Denver and UCCS) can be counted toward the minimum 45 credit hours required on the Boulder campus. Courses taken while on CU Boulder study abroad programs, through CU Boulder Continuing Education or CU Boulder correspondence courses are considered to be in residence.

Senior Requirement
Graduating seniors must file to graduate through Buff Portal. Final deadlines are as follows: April 1 for May (Spring) graduation and November 1 for December (Fall) graduation. However, it is strongly recommended that students file much earlier (by end of Fall semester for Spring graduation and by end of Spring for Fall) in order to receive information and updates related to your graduation, as well as to be listed on the graduation roster and assessed by the graduation coordinator. August graduates will be included in the previous spring graduation. In addition to filing to graduate in the Buff Portal, graduating seniors who wish to be recognized in CMCI ceremonies must also register with the CMCI Advising office by the deadlines that coincide with the CMCI ceremonies.

Advising
Majors are encouraged to consult an academic advisor each registration period. Advising is available from faculty and staff throughout the academic year, and major advising sheets are provided for each sequence. However, students are ultimately responsible for fulfilling all degree requirements. Appointments can be made with CMCI academic advisors in Buff Portal Advising.

Dual Degree/Double Major Programs
Students may complete requirements in two fields and receive two degrees from the university. Such double-degree programs are available combining CMCI with business, engineering, music or disciplines in the College of Arts and Sciences. Students must make application for a double degree program in both CMCI and the Leeds School of Business, the College of Arts and Sciences, the School of Engineering and Applied Sciences or the College of Music. Any other combined program must be arranged by consulting both programs. All double degrees shall consist of a degree within CMCI and a degree outside CMCI.

Students may double major within CMCI. The primary major will determine whether the degree is a BA or BS. Students may not get a double degree within CMCI.

Colorado Student Bill of Rights
In the interests of promoting timely graduation and facilitating the transfer of students among the institutions of higher education in the state of Colorado, the College of Media, Communication and Information and the University of Colorado Boulder adhere to the Student Bill of Rights as presented in Colorado Statute 23-1-125.

- 23-1-125. Commission directive - student bill of rights - degree requirements - implementation of core courses - competency test - prior learning
  a. Student bill of rights. The general assembly hereby finds that students enrolled in public institutions of higher education shall have the following rights:
    i. Students should be able to complete their Associate of Arts and Associate of Science degree programs in no more than 60 credit hours or their baccalaureate programs in no more than 120 credit hours unless there are additional degree requirements recognized by the commission;
    ii. A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
    iii. Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
    iv. Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
    v. Students, upon completion of core general education courses, regardless of the delivery method, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;
    vi. Students have a right to know if courses from one or more public higher education institutions satisfy the students' degree requirements;
    vii. A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferable.

Statewide Guaranteed Transfer of General Education Courses
As of fall 2003, the two-year and four-year transfer articulation agreements among Colorado institutions of higher education were replaced by a statewide guaranteed transfer of approved general education courses taken at any Colorado public institution of higher education. Under the statewide guaranteed transfer program, up to 31–33 credit hours of successfully (C- or better) completed coursework will automatically transfer and apply towards graduation requirements at the receiving institution. The coursework must be drawn from the list of approved guaranteed transfer courses and must meet the distribution requirements of the guaranteed transfer program. Further information about the statewide transfer program, including the list of approved courses and distribution requirements, can be found on the Colorado

As of fall 2006, a student graduating with an Associate of Arts or an Associate of Science degree from a Colorado community college and entering the College of Media, Communication and Information is exempt from the written communication requirement and the lower-division component of the core curriculum, with the exception of CMCI 2030. Note that students are still subject to the MAPS requirements. Additional information on the evaluation of transfer credit of Colorado community college coursework and its application in select arts and sciences major programs can also be found on the College of Arts & Sciences’ Student Resources (http://www.colorado.edu/artsandsciences/student-resources/) webpage.

Students are required to follow the graduation requirements listed in this catalog at the time of their initial entry onto the Boulder campus.

Credit Policies

Advanced Placement Program
See the undergraduate Credit by Examination (p. 34) section.

International Baccalaureate
Any student admitted to a University of Colorado campus after June 30, 2003, who has graduated from high school having successfully completed an International Baccalaureate (IB) diploma, program will be granted 24 credit hours of college credit. No tuition will be charged for these credit hours. These credit hours will be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB diploma program.

In addition, college credit is granted for International Baccalaureate examinations at the higher level with a score of 4 or better. For specific equivalencies, contact the Office of Admissions at 303-492-2458 or visit the International Baccalaureate (http://www.ibo.org/) website.

Credit/No Credit
Credit/no credit changes must occur during the schedule adjustment periods each semester as outlined in the Registrar’s academic calendar.

Credit Taken as a Nondegree Student
Once a student has been admitted to a degree program, credits from the Division of Continuing Education such as ACCESS, Boulder evening credit courses and CU Boulder correspondence classes may be eligible to be applied toward the degree. Students will receive initial advising during orientation once they have been accepted to a degree program in the College of Media, Communication and Information.

Incomplete Grades
An I grade is given at the discretion of the course instructor only when a student has satisfactorily completed a substantial portion of a course and, for reasons beyond the student’s control, is prevented from completing all work for the course within the term. Incomplete grades must be requested by the student and should not be awarded by the instructor for non-attendance. (In the case of nonattendance, the instructor should award the student the grade(s) earned.) If an incomplete grade is given, the instructor is required to document the reasons/grounds for the awarding of the incomplete grade, the specific work and conditions for completion of the course and the time frame within which the coursework must be completed. The maximum time the instructor can allow for the completion of the coursework and subsequent award of a course grade is one year from the end of the term the course was taken. After one year, if no final grade is awarded, the I will change to the grade of F. A copy of the Incomplete Agreement (forms are available from the dean’s office) signed by the student and instructor and accompanied by documentation of the extenuating circumstances that resulted in the awarding of an incomplete should be filed with the Director of Advising’s Office and a copy should be given to the student.

Independent Learning
A maximum of 30 credit hours of correspondence/online learning work may count toward the degree. CMCI and Arts and Sciences courses offered by the CU Boulder Division of Continuing Education carry resident credit.

Independent Study
With departmental approval, students may register for independent study during the normal registration periods for each semester. Students may not register for more than 6 credit hours of independent study credit during any term. No more than 8 credit hours of independent study taken in a single department or program can be applied toward the total credit hours needed for graduation. A maximum of 16 credit hours of independent study may count toward the degree. The minimum expectation for each hour of credit is 25 hours of work.

A student may not use independent study projects to fulfill the college’s general education requirements. Some departments further restrict the use of independent study hours toward meeting major requirements.

Repetition of Courses
If a student takes a course for credit more than once, all grades are calculated into the GPA. However, the course is only counted toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

Students may also retake a course for grade replacement (p. 48) under the grade replacement policy. When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt will still appear on the transcript, but their cumulative GPA and credit totals on the transcript will only include the grade from the latest attempt.

ROTC Credit
The ROTC courses listed below have been certified as acceptable college-level coursework by the faculty of the College of Arts and Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit toward the degree. Courses not included on this list do not count toward any degree requirements. Transfer ROTC coursework must be evaluated as equivalent to coursework on this list to count toward degree requirements.

The Core Curriculum is designed to help CMCI students master ways of doing, thinking and investigating essential to studying and working in media, communication and information fields. These competencies may be studied and practiced in coursework either within or outside the college. Graduates of the college are expected to be able to demonstrate competence in the following:

• Multi-modal composition and expression: being able to use written, spoken, visual and digital media for effective expression, argumentation and communication of ideas and sentiments to audiences.
• Collaboration, design and creative problem solving: being able to work effectively and inventively with others in complex problem solving and design tasks.
• Communicative interaction: being able to look at phenomena from the perspective of symbolic and material interchanges among individuals, collectives and institutions.
• Media literacies: being able to interpret and critically analyze messages and formal conventions (genres, grammars, logics) in multiple modes and media of communication (visual, sonic, discursive) and to consider them from the perspectives of their audiences, political economies and histories.
• Quantitative and computational thinking: being able to approach and solve problems quantitatively and algorithmically, and to apply and utilize computing models and resources when advantageous.
• Institutional and organizational understanding: being able to consider problems, policies and collective action from the perspectives of different institutions and organizations—e.g. political, legal, economic and religious.
• Cultural understanding: being able to consider problems and social experiences comparatively, considering different global and domestic cultures, with attention to categories of race, class, ethnicity, religion, gender and sexuality.
• Historical understanding: being able to consider social, cultural, intellectual, technological and/or institutional phenomena in historical perspective.
• Ethical action: being able to recognize moral issues, deliberate intelligently about them and uphold the ethical standards of particular disciplines and practices.

Educational Goals

Through designated history and diversity courses, the curriculum equips students to live in globalizing worlds, consider issues from multiple perspectives and engage in long-term thinking beyond the contemporary moment. Finally, the curriculum promotes both intellectual cohesion and independent learning through an introductory Common Experience course for all students and specialized Capstone Experiences tailored to particular majors and interests.

Design of the Core Curriculum

The Core Curriculum is designed to be both flexible and comprehensive. While promoting a shared mission and identity for CMCI students through a set of college requirements, the Core Curriculum also promotes breadth and porosity of learning across all the schools and colleges of the CU Boulder campus. Most of the core requirements may be taken either within or outside the college, and many are covered by a student’s major. Students who wish to double degree in a CMCI discipline and a discipline outside CMCI will find that the CMCI Core Curriculum dovetails almost entirely with the core or breadth requirements of other CU Boulder colleges and schools.

## College Requirements

1. **A Common Experience** course sequence—CMCI 1010 and CMCI 1020: lectures + lab/studio (2 courses). This course sequence introduces shared themes, values, ethical issues and competencies across the college and emphasizes the marriage of study and practice that will be the hallmark of CMCI as a whole. Each course is structured as a lecture plus a lab/studio in which students create projects putting the lecturer’s ideas into practice by means of writing, speaking, design, visual presentation and other modes of expression, and by means of collaborative and active learning. Students must receive a C- or better in each course in order for them to count toward completion of the requirement.

2. An upper-division **Capstone Experience**: scholarly, lab-based or studio-based (1 course, 3–4 credit hours). This course fosters students’ research, creative work, service learning and/or invention, and may include teamwork as well as individual achievement. This course may be taken within the major, or it may be offered as an interdisciplinary option.

3. **An Secondary Area of Study** outside the major (variable credit hours). Defined as a double degree, second major, a minor, or an academic certificate, this sequence of courses helps students develop the intellectual versatility necessary for successful study and work in media, communication and information fields.

## Breadth Requirements

*NB: Breadth requirements may be satisfied either within or outside the college. They may also overlap with requirements for individual majors.*

1. **Composition and Expression** (2 courses, 6 credit hours):
   a. Lower-division writing (3 credit hours). This course develops the foundational skills in written expression expected of every CU Boulder graduate.

## Point-of-View Requirements

*NB: Point-of-view requirements may be satisfied either within or outside the college, but at a minimum three of the 12 credit hours must be within CMCI. They may also overlap with breadth requirements and/or major*
requirements. In addition, a single course may be designated both "H" and "D."

1. **Historical Views** (2 "H" designated courses, 0–6 additional credit hours). This requirement enables students to understand that every contemporary issue has a history, and that an understanding of historical context and change is essential to an understanding of the contemporary moment. "H" designated courses emphasize longitudinal thinking and the investigation of the processes and the meanings of change over time.

2. **Diversity and Global Cultures** (2 "D" designated courses, 0–6 additional credit hours). This requirement increases students' understanding of the world's diversity and pluralism. "D" designated courses study some aspect of two broad and interrelated areas:
   a. the nature and meaning of diversity and the experience of groups marginalized because of their race, ethnicity, gender, sexuality or other characteristics; and
   b. cultures other than those of Europe and the United States.

**Academic Advising and Responsibilities**

Students in the college are expected to assume responsibility for planning their academic program in conjunction with their academic advisor in accordance with college rules and policies and with departmental major requirements. Any questions concerning these provisions are to be directed to the student’s academic advisor. The college cannot assume responsibility for problems resulting from students failing to follow the policies stated in the catalog or from incorrect advice given by someone other than an appropriate staff member of the college.

All new students are required to attend a special orientation, advising and registration program on campus before enrolling.

**Advising**

Academic advising is an integral part of undergraduate education. The goal of all academic advising is to help students make responsible decisions as they develop educational plans compatible with their potential and with their career and life goals. Advising is more than the sharing of information about academic courses and programs; it includes encouraging students to formulate important questions about the nature and direction of their education and working with them to find answers to those questions. Advisors confer with students about alternative course schedules and other educational experiences, but students themselves are responsible for selecting the content of their academic program and making progress toward an academic degree.

As students progress through their academic program, their questions and concerns change. CU Boulder offers a system of faculty, professional academic advisors and peer advisors to address these ongoing and multifaceted concerns.

Students are ultimately responsible for choosing appropriate courses, for registering accurately and for meeting all degree requirements. Academic advisors assist students in clarifying their interests, values and goals and help students relate these to academic programs and educational opportunities. As students work with their advisors, the advisors help students develop a coherent and balanced program of study that fulfills graduation requirements and assist students in identifying and integrating into their programs educational experiences outside the classroom that enhance their personal, intellectual and professional development. Academic advisors also assist students in understanding academic policies, requirements, procedures and deadlines.

**Responsibilities of Students and Advisors**

Within the advising system on the Boulder campus, both students and advisors have responsibilities.

**Students are responsible for:**

1. knowing the requirements of their particular academic program,
2. selecting courses that meet those requirements in an appropriate time frame, registering accurately and monitoring their progress toward graduation;
3. consulting with their academic advisor several times every term;
4. scheduling and keeping academic advising appointments in a timely manner throughout their academic career, so as to avoid seeking advising only during busy registration periods;
5. being prepared for advising sessions (for example, by bringing in a list of questions or concerns, having a tentative schedule in mind and/or being prepared to discuss interests and goals with their advisor);
6. knowing and adhering to published academic deadlines;
7. monitoring their position on registration waitlists; and
8. reading their CU email on a weekly basis.

**Advisors are responsible for:**

1. helping students clarify their values, goals and abilities;
2. helping students understand the nature and purpose of a college education;
3. providing accurate information about educational options, requirements, policies and procedures;
4. helping students plan educational programs consistent with the requirements of their degree program and with their goals, interests and abilities;
5. assisting students in the continual monitoring and evaluation of their educational progress; and
6. helping students locate and integrate the many resources of the university to meet their unique educational needs and aspirations.

**General Graduation Requirements**

CMCI students must fulfill the following requirements for graduation:

1. Pass a total of 120 credit hours.
2. Maintain a 2.00 overall GPA and a 2.00 GPA in CMCI major coursework.
3. All courses taken for the major requirements must be passed with a C- or better.
4. Pass 45 credit hours of upper-division work.
5. Complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credit hours, a minimum of 30 credit hours must be upper division credit hours completed as a matriculated student in CMCI. Six of the 45 credit hours may be taken at other University of Colorado campuses. Courses taken while on CU Boulder study abroad programs, through CU Boulder continuing education or CU Boulder correspondence courses are considered to be in residence.
6. Complete a major offered by the College of Media, Communication and Information. Students are subject to the major requirements in force when they declare the major.

7. Complete the CMCI core and MAPS requirements.

Programs of Study

Advertising, Public Relations and Media Design

Advertising, Public Relations and Media Design (APRD) strives to produce leaders in the area of strategic communication who have mastered a design-thinking process grounded in analytical and creative thought. We believe in amplifying our students’ curiosity, increasing their tolerance for risk and encouraging them to look at life and a career with an entrepreneur’s eye for opportunity. APRD is committed to providing students the necessary tools and techniques to think critically, adapt, create and above all lead in a rapidly changing media world.

Our goal is to help students acquire the kind of in-depth expertise in at least one area of strategic communication and design that will enable them to generate ideas and solve problems for a variety of organizations, including but not limited to ad agencies, PR firms, publishing and design firms, nonprofits, start-ups and personal ventures. We produce graduates who are forward-looking and have a deep interest in and knowledge of diverse cultures both within the United States and throughout the world.

Advertising, Public Relations and Media Design actively encourages students to enroll in courses offered both within and outside CMCI. Similarly, many of our courses are open to students in other units on the grounds that the design-thinking process can be used to solve problems in a wide variety of disciplines.

Course code for this program is APRD.

Bachelor’s Degree

- Strategic Communication - Bachelor of Science (BS) (p. 879)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Arnett, Trina D. (https://experts.colorado.edu/display/fisid_158869/)
Instructor; BS, Massachusetts Institute of Technology

Cheval, Melinda Kiger (https://experts.colorado.edu/display/fisid_108537/)
Senior Instructor; BS, West Virginia University

Doty, Dawn (https://experts.colorado.edu/display/fisid_158312/)
Instructor; MA, Johns Hopkins University

Duncan, Thomas R.
Professor Emeritus

Fisher, Jolene (https://experts.colorado.edu/display/fisid_158335/)
Assistant Professor; PhD, University of Oregon

Gangadharbatla, Harsha (https://experts.colorado.edu/display/fisid_153279/)
Associate Professor; PhD, University of Texas at Austin

Griffin, Glenn (https://experts.colorado.edu/display/fisid_159490/)
Associate Professor; PhD, University of Texas at Austin

Hopp, Toby (https://experts.colorado.edu/display/fisid_157745/)
Assistant Professor; PhD, University of Oregon

Labrecque, Joseph (https://experts.colorado.edu/display/fisid_165806/)
Instructor; MA, University of Denver

Lee, Seow Ting (https://experts.colorado.edu/display/fisid_157994/)
Associate Professor; PhD, University of Missouri–Columbia

Ligon, Dan (https://experts.colorado.edu/display/fisid_158313/)
Instructor; MFA, Brown University

Logan, Kelty Irene (https://experts.colorado.edu/display/fisid_147340/)
Associate Professor; PhD, University of Texas at Austin

Moriarty, Sandra E.
Professor Emerita

Robbs, Brett
Professor Emeritus

Schauster, Erin E. (https://experts.colorado.edu/display/fisid_156310/)
Assistant Professor; PhD, University of Missouri–Columbia

Slayden, David Lee (https://experts.colorado.edu/display/fisid_113297/)
Associate Professor; PhD, Indiana University Bloomington

Sriramesh, Krishnamurthy (https://experts.colorado.edu/display/fisid_163947/)
Professor; PhD, University of Maryland College Park Campus

St. John, Burton (https://experts.colorado.edu/display/fisid_163948/ #teaching)
Professor; PhD, Saint Louis University

Vargo, Christopher (https://experts.colorado.edu/display/fisid_158320/)
Associate Professor; PhD, University of North Carolina

Weaver, Kay
Chair, Professor; PhD, University of Stirling (Scotland)

Willis, Erin (https://experts.colorado.edu/display/fisid_156068/)
Associate Professor; PhD, University of Missouri–Columbia

Courses

APRD 1003 (3) Principles of Strategic Communication

Introduces the foundations, nature, and practices of advertising and public relations and the various industry functions - including account management, market research, account planning, media planning, creative strategy, creative execution, branding, image reputation and crisis management. This course offers historical, organizational, financial, creative and critical perspectives concerning strategic communication.

Requisites: Restricted to students with 65 units or less completed.

Grading Basis: Letter Grade
APRD 1004 (1) Fundamentals of Grammar
Teaches students the basic rules of grammar, punctuation, word choice and sentence structure so that they can write clear and concise messages that convey a desired meaning, apply punctuation in an accurate and effective manner, and differentiate between style conventions.
Grading Basis: Letter Grade

APRD 2001 (3) Strategic Thinking in Advertising and Public Relations
Reviews historical and contemporary views of critical and strategic thinking, as well as strategic practices utilized in advertising, branding, and public relations through the use of readings, exploration of case studies, lectures, individual and group exercises, and client projects.
Requisites: Requires a prerequisite course of APRD 1003 or APRD 1000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 2004 (3) Introduction to Research Methods and Insights
Provides students with the fundamental skills necessary to develop research-based strategies to address challenges faced by advertising, public relations, and marketing professionals in their efforts to address client communication needs.
Requisites: Requires a prerequisite course of APRD 1003 or APRD 1000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 2005 (3) Strategic Communication Writing
Introduces students to strategic writing across multiple media platforms and demonstrates the different forms of writing used in the strategic communication subfields. Students will learn strategies for crafting and delivering effective messages to target audiences.
Requisites: Requires prerequisite courses of APRD 1004 and APRD 1001 and APRD 1002 or APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 2006 (3) Software and Design Applications
Equips students with the practical knowledge and critical skills necessary to effectively employ visual design in advertising and public relations practice. Students will be introduced to both the fundamental principles of graphic design and the technical tools used to bring design ideas to life.
Requisites: Requires prerequisite courses of APRD 1004 and APRD 1001 and APRD 1002 or APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 3000 (3) Intermediate Creative Concepts
Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires a prerequisite course of APRD 2003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3001 (3) Visual Design
Students are introduced to design elements and principles, research and visual storytelling. They are challenged to communicate intellectual, sensory and emotional concepts by learning a visual vocabulary of type, color, and form expressed in a variety of mediums and dimensions.
Requisites: Requires prerequisite courses of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3002 (3) Communication Platforms
Concentrates on strategies and tactics advertisers and marketers use to communicate their brand stories to their desired audiences. These include traditional media planning and placement - TV, print, radio, and out-of-home - as well as new areas like digital, social, and experiential approaches to communications. Students will learn how to create, develop, and present communication plans and campaigns in an interactive and fast-paced environment.
Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.
Grading Basis: Letter Grade

APRD 3003 (3) Strategic Communication Research Methods
Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the targets relationship with specific product categories and identify the emotional and practical needs that create brand relationships.
Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

APRD 3004 (3) Account Management
Examines managerial and decision making processes of advertising and related brand communication functions. Emphasis on determining opportunities, integrating with other elements of promotion mix, setting objectives, establishing budgets, and measuring advertising and communication effectiveness.
Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

APRD 3005 (3) Content Strategy and User Engagement
Explore and understand the importance of content as a brand building tool. Students will gain the ability to use analytics to create strategy that allows the brand to have meaningful and cohesive conversation with its community.
Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 3006 (3) History of Advertising
Explores the critical moments in advertising history from the start of the Industrial Revolution through the current post digital era.
Requisites: Requires a prerequisite course of APRD 1000 or APRD 1003 (minimum grade C-).
Grading Basis: Letter Grade
APRD 3007 (3) Curiosity for Strategists
Introduces students to the practice of curiosity as the basis of creative problem solving. Students will participate in exercises and exploration based projects to increase productive curiosity, critical thinking and creative products, which will inform the development of integrated marketing communication campaigns.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3008 (3) Qualitative Research Methods
Exposes students to the principles and methods of qualitative methodology including interviews, focus groups and ethnography. Explores how these methods inform the practice of strategic communication.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C). Restricted to Strategic Communication (STCM) majors with subplans of Advertising (ADV) or Public Relations (PRL) only.

Grading Basis: Letter Grade

APRD 3009 (3) Brand Solutions
Explains the value of a brand in a marketing and advertising environment: how to build, manage, and protect a brand. Specific areas covered include what a brand is and why it matters, how a brand creates value, ways to measure and understand the value of a brand, managing new and established brands, and the role of consumer insight in managing a brand.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

Grading Basis: Letter Grade

APRD 3010 (3) Consumer Insights
Teaches students how to determine the emotional as well as the practical needs that drive the use of a particular category of products or services. Using a variety of qualitative research methods, as well as survey research, students will learn how to identify consumer insights and brand insights for purposes of building a creative strategy.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

Grading Basis: Letter Grade

APRD 3100 (3) User Experience & User Interface Design
Explores how to create and produce effective and engaging designs for dynamic information across a variety of screens while maintaining brand identity. Extending the design principles learned in previous classes, the student will concept for user interfaces (UI) and navigational frameworks that optimize usability and accessibility.

Requisites: Requires prerequisite course of APRD 3001 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3102 (3) Story Design I
Explores the development of interactive concepts that meet the strategic brief's brand objectives. Emphasis is placed first on developing strong digital ideals. Students also master the styles appropriate for different digital media and then use those skills.

Requisites: Requires prerequisite of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3103 (3) Strategic Writing for Public Relations
Emphasizes communication tactics: How to plan, write, and produce public relations tools; select audience and media; utilize print and electronic media. Focuses on Associated Press style and advanced writing techniques.

Requisites: Requires prerequisite courses of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3104 (3) Digital Storytelling for Public Relations
Provides students a new skill set in digital storytelling ideas, production, and analysis. Students will develop the skills to produce creative online stories that will reach strategic audiences. We will look at the changing roles of the storyteller in news, promotion, and public relations while discussing and analyzing media consumption habits that encourage a seamless transition from consumer to creator. This course is designed for public relations students within the strategic communication major.

Requisites: Requires prerequisite courses of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3105 (3) Public Relations Strategy and Implementation
Exposes students to concepts in strategic planning and implementation of public relations efforts. Students will come to understand the organization's internal and external communications and identify potential crises in the development of public relations strategy. This class provides an overview of the public relations process and its application to the development of strategy. Students will also understand implementation and evaluation of strategy.

Requisites: Requires prerequisite courses of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3112 (3) International Public Relations
Introduces students to the cultural, social and economic issues relevant to strategic communication in the global arena. Provides students with the foundational tools necessary to both understand and effectively navigate the often complex world of strategic intercultural communication. Specific topics will include exploration of the contextual factors that influence public relations practice in different nations/regions, discussion of the various theoretical models that govern global PR practice and critical evaluation of international PR case studies/campaigns.

Requisites: Requires a prerequisite course of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3300 (3) Crisis Communication in Public Relations
Explores theories and research related to public relations communication before, during and after a crisis; examines the fundamentals of organizational communication, crisis management and strategic planning.

Requisites: Requires prerequisite course of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade
APRD 3301 (3) Social Media Strategies
Emphasis on how social media and internet marketing influence public relations; understand the fundamentals and best practices in social media management, visual communication and mobile applications.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C). Restricted to Strategic Communication (STCM) majors with subplans of Advertising (ADV) or Public Relations (PRL) only.

Grading Basis: Letter Grade

APRD 3302 (3) Case Studies in Public Relations
Designed to help develop and refine critical thinking in selecting, creating and applying tools, techniques and principles of public relations to a variety of managerial cases and problem situations.

Requisites: Requires prerequisite course of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3400 (3) Concept Design
Introduces students to Design Thinking and the techniques for designing ideas into concepts. This course will lead students through the design thinking process of 1) Empathize, 2) Define, 3) Ideate, 4) Concept, 5) Prototype, 6) Test. The emphasis will be on the first four steps.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan only.

Grading Basis: Letter Grade

APRD 3401 (3) Concept Design II
Building on the fundamentals mastered in APRD 3400 (Concept Design), this course takes design thinking for strategic communication purposes to the next level. Students will tackle projects of greater complexity, designing concepts for mobile applications, social platforms, interactive experiences, and others. This class prepares the foundation for and ladders into APRD 4600 Media Design Portfolio I.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 and APRD 3400 (all minimum grade C). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

Grading Basis: Letter Grade

APRD 3402 (3) Video Design
Building upon the fundamentals of the three required Media Design classes (Concept Design, Visual Design, and Story Design), Video Design teaches students how to work within a specific timeline to deliver video for strategic communication purposes that demonstrates understanding of pace, structure, and tempo. Previously offered as a special topics course.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 and APRD 3400 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

Recommended: Prerequisites APRD 3500 or APRD 3001.

APRD 3500 (3) Story Design II
Explores the uses of story and how the design of story must adapt to different platforms and genres, including both short- and long-form narratives, visual narrative, film, personal essay and advertising copywriting.

Requisites: Requires prerequisite course of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

Grading Basis: Letter Grade

APRD 3501 (1) Software Applications 2
Equips students with the critical skills necessary to effectively employ intermediate design software skills in advertising and public relations practice. Students will expand upon existing creative software skills and explore concepts and techniques when working with visual design and media content, motion design, animated compositions, audio and video production, and additional intermediate level topics.

Requisites: Requires prerequisite course of APRD 2006 (minimum grade D). Requires corequisite course of APRD 3503. Restricted to Strategic Communication (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Pass/Fail

APRD 3503 (3) Concepting
Teaches techniques and develops personal discipline inherent to the generation of novel, sophisticated creative work based on a solid concept; the distinctive, guiding idea that drives campaign messages. Assignments are evaluated in group critiques and each student completes a final portfolio by semester’s end.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Requires corequisite course of APRD 3501.

Restricted to Strategic Communication (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Letter Grade

APRD 3504 (1) Software Applications 3
Equips students with the critical skills necessary to effectively employ advanced design software skills in advertising and public relations practice. Students will expand upon prior creative software skills and explore advanced concepts and techniques when working with general visual media design, 3D compositing, interactive motion design, user interface design, animation concepts, data-driven visuals, and will explore additional media platforms not covered in previous courses.

Requisites: Requires prerequisite courses of APRD 2006 and APRD 3501 (minimum grade D). Restricted to Strategic Communication (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Pass/Fail

APRD 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change
Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3523 and ATLS 3523

Grading Basis: Letter Grade

APRD 3700 (1-3) Field Study in Strategic Communication
Creates an immersive experience for students in regards to the history, business practices and current thinking of top industry companies. Students will first complete course work at CU Boulder and then travel to major industry hubs to visit advertising, design, PR and other marketing communication companies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of APRD 1000 (minimum grade C). Restricted College of Media, Communication Information (CMCI) or Business (BUSN) majors only with 60-180 units completed.

Grading Basis: Letter Grade
APRD 4000 (3) Public Relations Event Planning
Introduces students to the planning and execution of special events. Specifically, the course will locate special event planning within the broader context of organizational strategy and will introduce students to project management through proposal development, scheduling, budgeting and evaluation components that underlie successful event production. Will culminate in the execution of a full-scale event near the end of the semester.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 4010 (3) Strategic Health Communication
Introduces students to theory, research and contemporary concerns in health communication. Focuses on strategic communication for public service and public education campaigns related to health. Includes advertising and health promotion, community relations, public service programs, advocacy, online communities and social media management.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.
Grading Basis: Letter Grade

APRD 4100 (3) Brands and Culture
Explores the intersection between culture and marketing communication. Students will examine brand communities, brand and category culture as well as popular culture and the impact on and within marketing communication. The goal is for students to become more aware of the importance of culture in the ability of communication to disrupt the status quo within a market.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C). Restricted to Strategic Communications (STCM) majors with a subplan of Advertising (ADV) or Public Relations (PRL) and at least 70 credits only.
Grading Basis: Letter Grade

APRD 4101 (3) Advertising Media Planning
Examine how owned, earned and paid (or traditional and non-traditional) media campaigns are planned, budgeted, executed and evaluated.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2005 and APRD 2006 (all minimum grade C). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan and at least 70 credits only.
Grading Basis: Letter Grade

APRD 4102 (3) Sustainable Brand Practices: Ethics Cases in Advertising and PR
Explore contemporary issues and ethics cases in advertising and public relations and how these practices impact the long-term success of a brand. Students will explore branding concepts and theories of ethics to examine some of the current controversies in which advertising and public relation campaigns are involved and how these issues can be dealt with in an ethical and socially responsible manner.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C). Restricted to Strategic Communications (STCM) majors with a subplan of Advertising (ADV) or Public Relations (PRL) and at least 70 credits only.
Grading Basis: Letter Grade

APRD 4300 (3) Strategic Communication Analytics and Metrics
Provide students with a base knowledge of analytics and metrics used in strategic communication. Students will learn how to obtain and clean big data, how to analyze and turn it into insights and how to present and communicate insights into actionable recommendations.

Requisites: Requires a prerequisite course of APRD 2005 and APRD 2006 or APRD 2000 or APRD 2002 (minimum grade C). Restricted to Strategic Communication (STCM) majors with a minimum of 70 hours and a subplan of Advertising (ADV) or Public Relations (PRL) only.
Grading Basis: Letter Grade

APRD 4301 (3) Social Media Listening
Provides the practical understanding and application of strategic social media listening from the brand perspective in advertising and public relations, focusing on critical thinking and the ethics of using social media data. Provides students with hands-on experience in industry leading listening tools including Brandwatch, Social Studio, Meltwater and Hootsuite. Equips students with the skills needed to find relevant conversations, uncover insights then apply their perspectives to management for business impact.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 4302 (3) Marketing Data Visualization
Teaches students how to use data visualization to tell business stories based upon the analysis of marketing and business data. Students will learn basic data concepts, types, and uses. They will explore, summarize, and analyze the data using various techniques and best practices with Tableau Software.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.
Grading Basis: Letter Grade

APRD 4303 (3) Search Advertising Strategies
Build, manage and evaluate digital advertising campaigns for a non-profit organization. Teams of students are assigned a local non-profit and will evaluate, develop, and execute search advertising campaigns for their use. The course also provides a general overview of the search advertising landscape, "paid search." Course prepares students for careers in advertising agencies, media agencies, marketing departments and search consultancies.

Requisites: Requires prerequisite courses APRD 2005, APRD 2006, and APRD 3002 (minimum grade C). Restricted to Strategic Communications (STCM) majors with Advertising Strategy (ADV) subplan only.
Recommended: Prerequisite APRD 4300.

APRD 4403 (4) Strategic Communication Campaigns
Gives students the opportunity to work in small groups to develop material for an actual client. Examines basic principles of group dynamics and effective teamwork while conducting research, developing strategies and creating a multimedia campaign. All work is presented to the client.

Requisites: Requires prerequisite course of APRD 3001 or APRD 3002 or APRD 3003 or APRD 3004 (minimum grade C). Restricted to Strategic Communication (STCM) majors with a minimum of 85 credits only.
Additional Information: Departmental Category: Advertising Media Design
APRD 4404 (3) Advanced Ad Campaigns NSAC
Work and design an ad campaign for a real world client through the National Student Advertising Competition (NSAC). Students in the course commit to the fall and spring semesters in the same academic year for 6 total credit hours.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires a prerequisite course of APRD 3001 or APRD 3010 or APRD 3105 or APRD 4506 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 80 hours completed.
Grading Basis: Letter Grade

APRD 4405 (4) Strategic Communication Capstone
Puts into practice knowledge from previous coursework to plan and execute a strategic communication campaign. Students work with others, operating as an agency. Students will develop one or more strategic communication campaigns. In addition, students will practice organizational and leadership skills; design and layout skills; produce a plans book; and pitch the proposed campaigns to the class and the client.
Requisites: Requires prerequisite courses of APRD 3001 or APRD 3010 or APRD 3105 or APRD 4506 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with 85 or more credits.
Grading Basis: Letter Grade

APRD 4406 (3) Advanced PR Campaigns BATEMAN COMPETITION
Offers students the opportunity to develop a PR campaign for the Bateman Competition, PRSSA's national study competition for public relations students. Previously offered as a special topics course.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only and who have completed at least 80 credit hours.

APRD 4453 (3) Advertising and Society
Examines criticisms and contributions of advertising in society and the economy.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) students with a minimum of 73 hours taken.
Additional Information: Departmental Category: Advertising Media Design

APRD 4501 (3) Design for Social Innovation
Provides an introduction to design thinking as a means to drive social change and solve real-world problems. This studio class is project based and asks students to experiment with new behaviors of work and learning, including: collaboration, iteration, prototyping, empathizing, craft and inference. Field work and collaboration with teammates are required.
Requisites: Requires prerequisite course of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan only.
Grading Basis: Letter Grade

APRD 4503 (3) Portfolio 1
Enhances student conceptual abilities and generates both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that’s exhibited in an awards show judged by advertising professionals. Instructor consent required.
Requisites: Requires a prerequisite course of APRD 3000 or JOUR 3503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.
Additional Information: Departmental Category: Advertising Media Design

APRD 4504 (3) Copywriting Seminar
Offers an intensive exploration of the craft across a variety of genres. Students gain an understanding of the power of words and the use of distinctive voices, with implications for strategic advertising copywriting. Students are also expected to research and write creative briefs. Copywriters take this course with APRD 4506 - Advertising Track Portfolio I.
Requisites: Requires prerequisite course of APRD 3503 (minimum grade C-) and corequisite course of APRD 4506. Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.
Grading Basis: Letter Grade

APRD 4505 (3) Art Direction Seminar
Offers an in-depth examination of formal graphic design principles and their application in advertising via lectures, reading assignments, and projects. Topics include color theory, typography, and layout as well as applied skills associated with an art director’s daily work. Art directors take this course with APRD 4506 - Creative Track Portfolio I.
Requisites: Requires prerequisite course of APRD 3503 (minimum grade C-) and corequisite course of APRD 4506. Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.
Grading Basis: Letter Grade

APRD 4506 (3) Creative Track Portfolio Development I
Focuses on the development and execution of portfolio pieces reflecting the pursuit of sound strategic and conceptual thinking. All work is done by art director/ writer teams, and finished executions are produced as the process of portfolio building begins. This work is reviewed by a jury of creative professionals at an end-of-semester critique.
Requisites: Requires prerequisite course of APRD 3503 (minimum grade C-) and corequisite course of APRD 4504 or APRD 4505. Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.
Grading Basis: Letter Grade

APRD 4507 (3) Creative Track Portfolio Development II
Focuses on the continued development and professional-level execution of a complete advertising portfolio reflecting the mastery of strategic and conceptual thinking. Each creative team’s work is prepared and evaluated according to the highest industry standards and reviewed by a jury of creative professionals at an end-of-semester critique. Students are also advised regarding job search strategies and personal branding. Students must be admitted to the advertising creative track. The course may be repeated as a directed study with instructor permission.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of APRD 4506 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.
Grading Basis: Letter Grade

APRD 4523 (3) Portfolio 2
Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerrilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. Instructor consent required.
Requisites: Requires a prerequisite course of APRD 4503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.
Additional Information: Departmental Category: Advertising Media Design
APRD 4543 (3) Strategic Brand Management
Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans and a minimum of 85 credits only.
Additional Information: Departmental Category: Advertising Media Design

APRD 4600 (3) Media Design Portfolio I
Develop a variety of design concepts and execute them at a professional level. Students are assigned projects typical of those handled by design firms to demonstrate their ability in areas such as branding, product design, interaction design, etc. Students will also design their own online portfolio. Creative work is presented in a juried show at the end of the semester. Department requisite: students must apply with a portfolio, the quality will determine enrollment.
Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan.
Grading Basis: Letter Grade

APRD 4601 (3) Media Design Portfolio II
Refine the skills learned in APRD 4600 and further development of work at a professional level. With help from visiting professionals, students continue to develop a body of work that provides their mastery of user-centered design and branding across a variety of real-world assignments. The final portfolio is judged in the student creative show, juried by design professionals. Department requisite: students must apply with a portfolio, the quality will determine enrollment.
Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan.
Grading Basis: Letter Grade

APRD 4700 (3) Advertising Intensive
Immerses students in the process of creating successful communication and deepens their understanding of current industry standards and practices. Students will learn, develop and execute all aspects of the communication process under the guidance of professionals. Offered Maymester only.
Requisites: Requires a prerequisite course of APRD 1003 (minimum grade C). Restricted to Strategic Communication (STCM) majors with 57-180 credits (Junior or Senior) only.
Grading Basis: Letter Grade

APRD 4841 (1-4) Undergraduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

APRD 4873 (1-3) Special Topics
Special Topics.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Strategic Communication (STCM) majors only with 57-180 credits (Juniors or Seniors)
Additional Information: Departmental Category: Advertising Media Design

APRD 4931 (1-6) Internship
Internship course.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of APRD 3001 or APRD 3002 or APRD 3103 or APRD 3503 (all minimum grade C-).
Grading Basis: Pass/Fail

Strategic Communication - Bachelor of Science (BS)

In the Department of Advertising, Public Relations and Media Design, students learn how to generate ideas and solve problems for brands and issues through a design thinking process that is grounded in analytical and creative thought. With the explosion of digital and social media, there's never been a more exciting time to work in the rapidly growing field of strategic communication.

The department offers a bachelor's degree in strategic communication—an umbrella term that refers to the way in which organizations use advertising, public relations and media design to accomplish their communication goals. Undergraduate students can choose to specialize in one of four track areas below.

Program Tracks
Advertising Strategy
The Advertising Strategy track prepares students for careers in account management, account planning, or media management. These advertising careers require knowledge of brand-building, audience engagement across media platforms, data analysis and strategy development.

Advertising Creative
The Advertising Creative track is an application-only sequence that prepares students for opportunities in art direction and copywriting. It is an intensive program designed to provide students with an impressive portfolio of work as well as an in-depth appreciation for the ethics and challenges of the creative process.

Public Relations
The Public Relations track will prepare you for a career in one of the nation's fastest-growing fields. Career opportunities within public relations include—but are not limited to—the roles of publicist, copywriter, event planner, social media manager and spokesperson.

Media Design
The Media Design track provides the methods and processes to solve a strategic communication problem, design an original concept and bring those concepts to life. Graduates are employed as digital producers, social media managers, app designers, graphic designers, user experience strategists and interaction designers.

Requirements
General Requirements
Each degree track requires 41 credit hours, comprised of the 23-credit-hour departmental Core Curriculum and 18 credit hours of specialized coursework (the Advertising Creative track requires 19-20 credit hours).
The courses of Core Curriculum include Strategic Communication Capstone (APRD 4405), a 4-credit-hour capstone course completed in the student’s final year.

**Core Curriculum**
Students must take the following courses to complete the department core requirement.

<table>
<thead>
<tr>
<th>Code</th>

<tr>
<td>APRD 4405</td>
<td>Strategic Communication Capstone (plus 1 credit hour of lab/workshop)</td>
<td>4</td>
</tr>
</tbody>
</table>

**Total Credit Hours**: 23

**Secondary Area of Study**
In addition to coursework required for the major, all students in STCM must complete a secondary area of study outside of STCM. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree or any credit-based certificate program of at least 12 credit hours.

**Program Tracks**

**Advertising Strategy Track**
The advertising strategy track consists of three required courses and three electives totaling 18 credit hours. Up to six credit hours of elective requirements can be satisfied by an internship.

## Sample Plan of Study

The following provides an example of how the core requirements for a BS in Strategic Communication could be fulfilled within four years. Please refer to the specific track requirements to determine the number of electives required for the advertising strategy, advertising creative, public relations and media design tracks. Specific details on the Core Curriculum requirements for the College of Media, Communication and Information can be found in Policies & Requirements (https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumbtext).

### Course Title Credit Hours

#### Year One

**Fall Semester**
- APRD 1003 Principles of Strategic Communication 3
- CMCI 1040 Foundational CMCI (4), or CMCI Core or Elective (3) 4
- Quantitative Thinking 3
- Lower Division Writing 3

**Credit Hours** 13

**Spring Semester**
- APRD 1004 Fundamentals of Grammar 1
- APRD 2001 Strategic Thinking in Advertising and Public Relations 3
- APRD 2004 Introduction to Research Methods and Insights 3
- CMCI 1040 Foundational CMCI (4), or CMCI Core or Elective (3) 3
- CMCI Core (Natural World with Lab) 4

**Credit Hours** 14

#### Year Two

**Fall Semester**
- APRD 2005 Strategic Communication Writing 3
- CMCI Core Computing 3
- CMCI Core or Elective (P/S; H & A; Hist V; Div & Global) 6
- Secondary Area 3

**Credit Hours** 15

**Spring Semester**
- APRD 2006 Software and Design Applications 3
- CMCI Core (Natural World) 3
- CMCI Core or Elective (P/S; H & A; Hist V; Div & Global) 6
- Secondary Area 3

**Credit Hours** 15

#### Year Three

**Fall Semester**
- APRD Program Track Core or Elective 9
- CMCI Core or Elective (P/S; H & A; Hist V; Div & Global) 3
- Secondary Area 3

**Credit Hours** 15

**Spring Semester**
- JRNL 3651 Media Law and Ethics 3
- APRD Program Track Core or Elective 3
- CMCI Core or Elective (P/S; H & A; Hist V; Div & Global) 7
- Upper Division Composition or Elective 3

**Credit Hours** 16

---

1. APRD 3504 is only required for students following the Art Direction sequence.
### Year Four

**Fall Semester**

- APRD Program Track Core or Elective: 3 credits
- CMCI Core or Elective (P/S; H & A; Hist V; Div & Global): 10 credits
- Secondary Area: 3 credits

**Credit Hours:** 16

**Spring Semester**

- Strategic Communication Capstone: 4 credits
- APRD Program Track Core or Elective: 3 credits
- Secondary Area: 3 credits
- Electives: 6 credits

**Credit Hours:** 16

**Total Credit Hours:** 120

---

### Learning Outcomes

The Advertising, Public Relations and Media Design Department has established that these are vital learning outcomes:

- The ability to conduct and use research in support of strategic communication initiatives.
- The ability to strategically identify and assess problems relating to organizational and/or branded communication.
- The ability to clearly and professionally articulate ideas using both written and verbal means.
- The ability to conceptualize and execute creative ideas.
- Awareness of the structures and cultures of professionalism and the workplace, including project management and working in teams.
- Awareness of the impact of media and strategic communication on the broader scene of diverse societies and cultures.

---

### Communication

In the Department of Communication, students learn about communication practices that underlie all of our social interactions, both in face-to-face interaction and in new forums, such as social media. The department is a vibrant community of scholars who share a commitment to excellence and innovation in communication research and teaching.

Our undergraduate degree blends the best of a broad, liberal arts education with practical skills that contribute to career and life success. We also offer a minor in communication.

Students will acquire broad knowledge in communication, including:

- Communication contexts (e.g., interpersonal, group, organizational, public, intercultural and digital).
- Ethical issues and responsibilities of communication practice.
- Fostering and supporting inclusive and just communities.
- History of communication and rhetorical study.
- Implications for shifting communication technologies.
- Methods for investigating communication problems.

Students will also acquire the skills and abilities to:

- Design innovative and influential messages.
- Develop inclusive and responsible communication practices.

---

### Course code for this program is COMM.

### Bachelor's Degree

- Communication - Bachelor of Arts (BA) (p. 886)

### Minor

- Communication - Minor (p. 888)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

COMM 1210 (3) Perspectives on Human Communication
Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMM majors.

Additional Information:
- Arts Sci Core Curr: Contemporary Societies
- Arts Sci Gen Ed: Distribution-Social Sciences
- MAPS Course: Social Science

COMM 1300 (3) Public Speaking
Develops confidence and competence in writing and delivering presentations. Examines public speaking in a variety of personal, civic and professional settings. Required for COMM or COMN majors.

COMM 1600 (3) Group Interaction
Learn communication skills to be a better group member and enhance group effectiveness in a variety of professional and civic contexts. Practice group communication skills through an innovative group project and online simulation. Focuses on topics such as group development & socialization, decision making, conflict management, technology & virtual group work, difference & diversity, planning & coordination, leadership & management, and ethics. Required for COMM and COMN majors.

COMM 2000 (3) Topics in Communication
Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2320 (3) The Craft of Argument
Focuses on the practice of argumentation in public life with attention to how the process of critical thinking leads to the invention of arguments. Students use argumentation theory to craft ethical and well-reasoned appeals and to critically evaluate the arguments of others. Formerly COMM 3310. Students who took this course previously as COMM 3310 cannot re-take it for credit.

COMM 2400 (3) Discourse, Culture and Identities
Considers how communication is central to constructing who people are and examines social controversies related to talk and identities. Students learn to analyze and understand discourse, defined as everyday talk and conversation, through the practice of discourse analysis.

Additional Information:
- GT Pathways: GT-SS3 - Soc Behav Sci:Hmn Behav, Cult, Soc Frame
- Arts Sci Core Curr: Human Diversity
- Arts Sci Gen Ed: Distribution-Social Sciences
- Arts Sci Gen Ed: Diversity-U.S. Perspective

COMM 2410 (3) The Practice of Intercultural Communication
Prepares students to approach intercultural communication as interaction across cultural difference. Teaches the discovery of how culturally variable communication practices (e.g., word and language choice, speech acts, personal address, silence, nonverbal communication, etc.) can lead to the breakdown of coordinated interaction, and how coordination can be restored. Examines broader social, cultural, and political contexts in which intercultural interactions occur.

Additional Information:
- Arts Sci Gen Ed: Distribution-Social Sciences

COMM 2500 (3) Interpersonal Communication
Examines how communication processes such as language and nonverbal behavior shape perceptions of self, influence identity, and impact interpersonal roles and relationships. Students learn theories of human interaction and consider how this can be used to improve relational communication.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.
COMM 2650 (3) Business and Professional Communication
Develops knowledge of concepts and skills required for successful participation in contemporary workplace communication. Focuses on communication processes associated with contexts such as sales, leadership, diversity, teamwork, customer service, and conflict. Facilitates students conduct of self-assessment, networking, interviewing, and other career-development strategies. Provides students training in informative and persuasive business presentations.
Recommended: Prerequisites COMM 1300 and COMM 1600.
Grading Basis: Letter Grade

COMM 3000 (3) Issues in Communication
Explores select issues in communication.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3210 (3) Communication Theory
Reviews multiple theories of communication and how they address a variety of personal, relational, group, organizational, and social problems. Develops new approaches to understanding and improving human communication.
Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

COMM 3300 (3) Rhetorical Thinking
Reviews the classical tradition of rhetoric and its relevance to current events and public issues. Students learn how rhetorical perspectives help us create new ways of thinking, speaking, and acting through practicing creative message design.
Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

COMM 3320 (3) Persuasion in Society
Learn personal and professional skills to become more persuasive in a variety of communication contexts, and develop a broader and more critical understanding of the culture of persuasion that pervades all aspects of society.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors). Requires prerequisite of COMM 1210 and COMM 1600 (all minimum grade C-).

COMM 3330 (3) Social Movements
Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others. Formerly COMM 2360.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3340 (3) Political Communication
Explores the role of communication in politics, emphasizing how language drives policies and campaigns. Students learn communication strategies in order to craft innovative campaign messaging.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3370 (3) Environmental Communication
Introduces the growing field of environmental communication, including historical events, key concepts, legal landmarks, technological developments and public controversies at the intersection of the environment, economics and social justice. Focuses on persuasive communication in the public sphere, as well as the constitutive power of communication to name and redefine what has been and might become possible in our environmental imaginations.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

COMM 3410 (3) Intercultural Communication
Explores complex relationships between culture and communication processes from various conceptual perspectives. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions. Recommended Prerequisites: COMM 1210 and COMM 1600.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

COMM 3420 (3) Gender and Communication
Examines gender as a social practice that remains vital to identities, relationships, and institutions in contemporary society. Treats gender as something we do or enact through communication, rather than as something we are or have, and explores the implications of this shift in perspective. Investigates how gender interacts with sexuality, race, class, nation, age, ability, and other aspects of identity.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

COMM 3430 (3) Communication, Culture and Sport
Examines the communicative, historical and cultural aspects of sport in contemporary American society including the intersections of power, gender/sexuality, race and class.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

COMM 3510 (3) Family Communication
Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3530 (3) Communication, Technology, and Society
Examines how electronic media influence our communication in relationships and communities. Focuses on how we use technology to create shared meanings, express identities, and coordinate interaction, and why such efforts succeed and fail. Also focuses on political and ethical questions concerning the development of communication technology in a global society characterized by conflict and inequality.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Recommended: Prerequisites COMM 1210 and COMM 1600.
COMM 3620 (3) Advanced Teamwork and Collaboration
Explores communication and collaboration in complex situations (e.g., extreme environments e.g., space travel; cross-sector collaborations). Reviews and applies key processes of team/group communication and collaboration to the context of extreme teams to identify communication issues and interventions relevant in complex organizing or dangerous situations.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Grading Basis:** Letter Grade

COMM 3630 (3) Organizational Communication
Learn to understand and critique organizations and organizing from a communication perspective. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Recommended:** Prerequisites COMM 1210 and COMM 1600.
**Grading Basis:** Letter Grade

COMM 3700 (3) Communication and Conflict Management
Examines interdisciplinary concepts and theories enabling students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict. Teaches practical skills in conflict management areas such as bargaining, facilitation, mediation and negotiation.
**Equivalent - Duplicate Degree Credit Not Granted:** PACS 3700
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Grading Basis:** Letter Grade

COMM 3740 (3) Qualitative Research Methods
Learn to collect and analyze qualitative data (interviews, observations, focus groups) in order to answer research questions about communication and society. Focuses on research that investigates meaning, understanding, process, and interpretation in order to enhance our knowledge of human interaction.
**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
**Recommended:** Prerequisites COMM 1210 and COMM 1600.
**Grading Basis:** Letter Grade

COMM 3750 (3) Quantitative Research Methods
Introduces empirical communication research. Students develop skills in collecting data and analyzing statistical research. Students conduct an original research project applying numerical analysis to communication behavior.
**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
**Recommended:** Prerequisites COMM 1210 and COMM 1600.

COMM 3760 (3) Rhetorical Research Methods
Considers what it means to do rhetorical research. Explores various methods for analyzing all forms of public discourse, such as political speeches, advertising, activist campaigns, and popular entertainment, to better understand their effects and influence.
**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.
**Recommended:** Prerequisites COMM 1210 and COMM 1600 and COMM 3300.

COMM 4000 (1-6) Advanced Topics in Communication
Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application. May be repeated twice for credit on different topics.
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Recommended:** Prerequisites COMM 3210 and COMM 3300.

COMM 4100 (3) Seminar in Honors Thesis Writing and Research
Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills.
**Requisites:** Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.
**Grading Basis:** Letter Grade

COMM 4220 (3) Senior Seminar: Functions of Communication
Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.
**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.
**Grading Basis:** Letter Grade

COMM 4300 (3) Senior Seminar: Rhetoric
Requires students to synthesize and demonstrate what they’ve learned in the major. Please refer to the specific description listed for the current semester. Each seminar will vary greatly in format and content.
**Requisites:** Requires prerequisite course of COMM 3300 (minimum grade C). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4400 (3) Senior Seminar: Organizational Communication
Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.
**Equivalent - Duplicate Degree Credit Not Granted:** COMM 5600
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4510 (3) Senior Seminar: Interpersonal Communication
Requires students to synthesize and demonstrate what they’ve learned in the major. Please refer to the specific description listed for the current semester. Each seminar will vary greatly in format and content.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4500 (3) Senior Seminar: Organizational Communication
Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.
**Equivalent - Duplicate Degree Credit Not Granted:** COMM 5600
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite course of COMM 3210 (minimum grade C). Restricted to students with 80-120 credits (Senior) Communication (COMM or COMN) majors only.
COMM 4610 (3) Senior Seminar: Communication Studies of Science and Technology
Requires students to synthesize and demonstrate what they’ve learned in the major. Please refer to the specific description listed for the current semester. Each seminar will vary greatly in format and content.
Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior Communication (COMM or COMN) majors only.
COMM 4840 (1-6) Undergraduate Independent Study
Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 36 credit hours required for the major.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.
Recommended: Prerequisites COMM 3210 and COMM 3300.
COMM 4930 (1-6) Internship
Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper and employer evaluation) of significant learning. The 14-hour limit in the major applies to any combination of independent study and internship credit and does not count toward the 36 hours required for the major.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only. Requires 2.5 or higher cumulative GPA
Recommended: Prerequisite 57 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA and a faculty sponsor.
Grading Basis: Pass/Fail
COMM 4950 (1-6) Senior Thesis: Honors
For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis.
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisite COMM 4100 and overall GPA of 3.35 or higher and a COMM or COMN GPA of 3.50 or higher.
Additional Information: Arts Sciences Honors Course

Communication - Bachelor of Arts (BA)
The BA in communication provides a broad-based liberal arts degree designed to foster students’ abilities to understand, analyze, and effectively engage in a wide range of communication practices. It encourages critical thinking about the ways that symbols and interactions contribute to social problems and solutions.

The major provides instruction and practice in the skills of effective communication and collaborative problem-solving that employers are looking for—speaking, writing, reading, listening, asking good questions, utilizing media and working in groups. Students learn how to design innovative messages, build quality personal and professional relationships, elevate their critical thinking skills, and are prepared to thrive in a variety of professions.

Requirements
Required Courses and Credits
Majors must complete a minimum of 36 credit hours of coursework in communication, at least 18 of which must be upper division (3000 level or higher). Only courses with grades of C- or better count toward the major, and the overall major GPA must be 2.000 (a C- is 1.700).

Note: In addition to major requirements, communication majors must complete CMCI Core Curriculum requirements. The Core Curriculum requirements for the College of Media, Communication and Information can be found in Policies & Requirements (https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumtext).

Students who wish to major in communication should meet with a department advisor, where they will be advised of any changes to this list of requirements.

COMM 3620 Advanced Teamwork and Collaboration
COMM 3630 Organizational Communication

COMM Elective
One additional COMM elective, any level.  

Independent Study/Internships
Up to 8 credit hours of independent study and 6 credit hours of internships may be taken. These are upper-division elective hours but do not count toward major requirements. Eligible students interested in graduating with department honors should contact the department’s honors coordinator as soon as possible.

Total Credit Hours 36

Secondary Area of Study
In addition to coursework required for the major, all students in COMM must complete a secondary area of study outside of COMM. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree, or any credit-based certificate program of at least 12 credit hours. Secondary areas of study typically require 15-21 credit hours.

Additional Information
The department encourages its majors to take related courses in other departments in CMCI as well as anthropology; business; English; ethnic studies; history; linguistics; philosophy; political science; sociology; speech, language and hearing sciences; and theatre and dance.

The department also encourages participation in optional programs such as study abroad, internships and graduating with honors.

1 Detailed list available in major requirements section of catalog.

Learning Outcomes

Students will:

- Critically reflect on their roles within social interactions.
- Develop innovative and creative messages to solve problems.
- Utilize communication theories to analyze intersectional differences and power in society.
- Strategize how to engage with communities to create social change through communication practices.
- Understand the value of communication research develop and support claims, and evaluate different forms of data and evidence.
- Practice effective and inclusive group communication to work together toward a collective outcome.

Communication - Minor

Employers consistently rank communication skills among the most important qualities they look for in potential employees. Communication specialists are uniquely able to analyze and understand the work of communication in the world and design the kinds of processes that generate satisfying, effective, just and sustainable futures in relationships, organizations and communities.

A minor in communication teaches students how to design innovative messages, build quality personal and professional relationships, foster critical thinking skills, and prepares students to thrive in a variety of professions.

Requirements

Students pursuing the minor must complete a minimum of 18 credit hours of coursework in communication, at least 9 of which must be upper division (3000 level or higher). Only courses with grades of C- or better count toward the minor, and the overall minor GPA must be 2.000 (a C- is 1.700). They may apply no more than 6 credit hours of transfer work, including 3 credit hours of upper-division credit. Independent study and internship hours will not count toward the COMM minor requirements.

Students who wish to minor in communication should meet with a department advisor, where they will be advised of any changes in this list of requirements.

Critical Media Practices

Critical media practices addresses the changing landscape of electronic media making by developing student analytical and production skills across a wide range of platforms, practices and technologies. The department explores the creative potential of cross-platform media production, as well as time-based media arts practices, such as immersive media production, sound practices and performance media. Our convergent approach to media spans a variety of media tools including digital photography, audio/video editing and single camera video production, computational media, open source programming and emergent tools under development. Our students acquire the skills and perspective to critically understand and actively contribute to this new constellation of audio-visual media making possibilities. The Department of Critical Media practices aims to prepare students to pursue careers as media art creators and critical citizens for the 21st century.

Production coursework encourages the development of personal style as students explore the expressive potential of emergent media practices, with a particular emphasis on the documentary impulse and making the "invisible" visible. Our program explores media art from a critical perspective: its nature, its history and its place in the contemporary world. Students are required to analyze not only existing media but also their own work. In this way the program presents media art as a way of engaging and knowing the world. At the graduate level, our department features an MFA degree in Interdisciplinary Documentary Media Practices and a Graduate Certificate in Interdisciplinary Documentary Media Practices. The department also offers a practice-led Ph.D. in Emergent Technologies and Media Art Practices. The Center for Documentary and Ethnographic Media is affiliated with our program. Our department collaborators include faculty and students from Anthropology, Art and Art History, Center for the American West, Center for Asian Studies, Dance, English, Film Studies, Geography, Music and programs within the College of Media Communication and Information.

Course code for this program is CMDP.

Courses

CMDP 1400 (4) Introduction to Contemporary Media Cultures
Prepares students for critical practices in contemporary media cultures in a global context. Explores the diversity of media practices, including narrative and non-narrative forms, emphasizing aesthetics and visual studies. In lectures and recitations students will explore video, sound, the internet and other multi-media platforms of expression.

CMDP 2010 (3) Information, Media and Technology
Surveys the history of information technologies and modern techniques of information production, storage, transmission and retrieval. Equips students with an understanding of technological transformations in interpersonal, organizational and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society.

CMDP 2100 (3) Approaches to Historical Media Practices
Investigates historical and cultural discourses in the formation of media practices. Examines practices such as performance media; cinematic media, media art, and their aesthetic alignment to cognate movements throughout history.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CMDP 2500 (3) Introduction to Media Practices
Working in design groups, students will explore the expressive potential of media through the production of short projects, discussions, readings, formal analysis, and critique. Provide a basic introduction to media practices as an extension of "visual thinking" and through approaches to storytelling, and hybrid media forms.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 2510 (1-3) Critical Media Practices Workshop I
Training in narrow topics of media practices.

Repeatable: Repeatable for up to 3.00 total credit hours.

CMDP 2820 (3) Exploring Culture and Gender Through Film
Explores the concepts of culture and gender from an anthropological perspective through media. By experiencing texts, images and sounds about other ways of life, students will learn the basic concepts of cultural anthropology and learn to think critically about documentary and ethnographic media material.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) undergraduate students only.

CMDP 2860 (2) Performance Audio Recording
Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering, addressing contemporary issues in technology, web, and performance media. Uses recorded material from in-class sessions.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2081

Requisites: Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 2870 (2) Recording Design
Provides hands-on instruction in various sound recording techniques. Addresses acoustics, sound reinforcement, studio maintenance and troubleshooting. Taught through labs and individual recording projects.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2091

Requisites: Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3110 (3) Electronic Arts Survey
Explores the development of electronic media art through screenings, readings, lectures and discussions.

Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 3150 (3) Sonic Histories
Introduces students to the history and theory of sound, through aesthetic, conceptual, and technological, developments. This course explores the physicality of sound, what sound can do inside and outside the artistic sphere, investigate sounding and listening as cultural and social acts, and study major developments in radio, electronic music, sound art, science and technology studies, and sound studies.

Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 3210 (3) Interactive Digital Cultures
Examines how the uses of interactive media have changed the classical dynamics of human communication, allowing multidirectional, non-linear and multimedia practices. In this course, students will study the various aesthetic, narrative, emotional and cultural elements of the interface in areas such as non-linear video, the web, games and hypermedia.

Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C-).
CMDP 3310 (3) Performance Media Cultures
Reflect on the cultural construction of old and new performance media through the lens of emerging practices and contemporary discourse. From ancient theatre to cinema, interactive television to YouTube, and multi-media dance performances to computer games, this course explores how media shape, and are shaped by, various historical and contemporary audiences and contexts.
Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 3350 (3) Modes of Documentary Media History
Introduces students to the variety of practices by examining their emergence, evolution and cultural impact in the global sphere. Students discover the major themes and genres in documentary work from photography, cinema, audio, hypermedia and the public debates they have engendered. Through lectures, screenings and research, develop critical perspectives on the international and transcultural dimensions of documentary media history.
Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 3400 (3) Media Aesthetics
Builds students' ability to watch, reflect on, and write about media images. The course will be grounded in the analysis of media practices with special focus on media style and storytelling techniques. Explores media aesthetics from formal, cultural, and theoretical perspectives. Formerly CMDP 2400.
Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CMDP 3450 (3) Critical Perspectives in Media Practices
Examines the contemporary landscape of media practices across platforms, such as film, social media, painting, video, and web art. This integrative exploration focuses on production contexts, circulation and reception through the lens of critical and interpretive frameworks. Drawing from key texts by major scholars and the works of media practitioners, students develop globally informed, critical perspectives for understanding.
Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 3510 (1-3) Critical Media Practices Workshop II
Training in narrow topics of media practices. Open to CMCI students and by permission of the instructor.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3600 (3) Creative Media Making
Focus on developing an understanding of the principles, forms and aesthetics of media production. Working in design groups on small-scale media preproduction and production exercises, screenings and critiques, students learn creative solutions to problems in realizing expressive media projects. Formerly CMDP 2600.
Requisites: Requires prerequisite of CMDP 2500 (minimum grade C).

CMDP 3610 (3) Contemporary Image Making Practices
Provides students the technical skills for in depth exploration of the evolving principles and strategies of digital image making. Students will create small-scale projects with the primary emphasis on cinematographic experimentation and innovative visual techniques.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3620 (3) Images and Stories
Learn and apply innovative non-traditional approaches to scripting and storytelling, including automatic thinking, idea sketches, visual notes, outlines and storyboards, serials, aleatoric methods, diagrams, locations, photographs and short stories. Focuses on methods of exploring scripting methods outside of the fixed and rule-bound traditional model of storytelling as a means of introducing students to discover their own scripting techniques.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3700 (3) Digital Photographic Practices
Explores the creative possibilities of photography; students work on projects that combine concepts and techniques with contemporary practice and current modalities of exhibition and social distribution. Emphasis is placed on the student's personal growth through aesthetic and intellectual development in relation to current technologies. Formerly CMDP 3500.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3710 (3) Audio/Vision 360
Introduces techniques, software and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice.
Requisites: Requires prerequisite course of CMDP 3750 (minimum grade C).

CMDP 3720 (3) Multimedia Composition
Combine writing with media such as video, music, animation and podcasting on the computer. Includes a unit on web-site design and ends with each student creating their own website and posting on it the project they created for the course.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3730 (3) Media Production Methods and Ideas
Explores creative approaches to idea formation, conceptualization, and organization for the moving image employing critical thinking, improvisation and visual storytelling techniques. Includes forms of creative writing, storytelling and preproduction techniques and strategies. Previously CMDP 2710.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3740 (3) 3D for Extended Realities: Animation
Explore computer animation in the making of short projects that may address topics such as: nonfiction, immersive environments and digital compositing. Designed to develop the student's understanding of movement, timing, scripting, editing and color composition. Through screenings and discussions students will gain an appreciation of history and practices of animation.
Requisites: Requires prerequisite course of CMDP 3750 (minimum grade C).
CMDP 3750 (3) Introduction to Extended Realities
Introduces concepts and practices associated with immersive media production, specifically as it applies to extended reality. Emphasizing hands-on experience, students will gain knowledge about basic 3D modeling, creating fully-immersive virtual reality experiences, and building augmented reality applications.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3800 (3) Documentary Media Poetics
Investigates documentary cinema and media practices through class discussions, research papers, hands on exercises and the screenings. Cross-references documentary photography and moving-image documentary in the production of short digital projects. Explores the distinctive contributions of digital technologies to documentary image making. Formerly CMDP 2810.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3810 (3) Engaged Documentary Media Practices
Combining research, scripting methods and field trips, students produce short media non-fiction storytelling projects emerging from an engagement with historical events, contemporary issues and the world around us.
Requisites: Requires prerequisite course of CMDP 3800 (minimum grade C).

CMDP 3820 (3) Performance Media Practices
Develop a performance vocabulary within the context of various media platforms. Through creating individual and collaborative performance projects, students will explore performance design issues such as movement, blocking and staging with projection, sensors, sound and other media tools.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3830 (3) Advanced Performance Media Workshop
Study practical, technical and theoretical strategies of performing with and through media. This is an in-depth course that investigates a narrow scope drawn from topics that may include dance/movement, the illustrated lecture, projection environments, digital sensing, responsive lighting or acoustic strategies for performance.
Requisites: Requires prerequisite course of CMDP 3820 (minimum grade C).

CMDP 3840 (3) Sound Practices
Explores the aesthetics of sound through the study of sound art and sound culture. Reading and discussion covers theories, technologies, and histories that drive the medium. Students apply concepts by designing and building their own soundscapes. Classes will be organized around hands-on activities, lecture, and discussion of readings.
Requisites: Requires prerequisite course of CMDP 2500 or MUSC 2081 (minimum grade C). Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3860 (3) Sonic Arts I
Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 2061 and MUEL 2061
Requisites: Requires prerequisite course of CMDP 3840 (minimum grade C). Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3880 (3) Hearing Image, Seeing Sound
Explores how artists, filmmakers, composers, and others have forged connections between sound and image, and how we might learn from them to create our own meaningful creative work. Readings and screenings will dig deep into the genealogies of film sound, and students will create their own imaginative combinations of sound and image throughout the semester.
Requisites: Requires prerequisite course of CMDP 3840 (minimum grade C).

CMDP 3910 (3) Media Production Topics
Rotating topics in media production techniques.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 3990 (3) Media Professional Seminar
Learn aspects of professional development in media production. Through workshops, class trips and assignments students will learn of the many opportunities found within media production.
Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 4110 (3) Cultures of Digital Sound
Introduces students to a variety of critical scholarship and debates about our sonic environment through an examination of how sound interfaces with different facets of media production. Consisting of listening, analyzing and differentiating sound in different contexts, students will deepen their understanding of the relationship between sight and sound in cultural production.
Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 4220 (3) Digital Archives in Media Practices
Examine the formation of screen cultures (narrative, experimental, documentaries and multi-media video art) in the context of the cultural globalization of the moving image. Through lectures, seminars and research projects students explore the formation and evolution of screen cultures on various platforms such as digital cinema, web environments, video art, multi-channel installations and the moving image on mobile interfaces.
Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 4310 (3) Screen Culture and Globalization
Examine the formation of screen cultures (narrative, experimental, documentaries and multi-media video art) in the context of the cultural globalization of the moving image. Through lectures, seminars and research projects students explore the formation and evolution of screen cultures on various platforms such as digital cinema, web environments, video art, multi-channel installations and the moving image on mobile interfaces.
Requisites: Requires prerequisite course of CMDP 1400 (minimum grade C).
CMDP 4320 (3) Media Engagement in Digital Diasporas
Offers students critical and interpretive frameworks for understanding the cultural and historical significance of digital diasporas and these communities' use of digital technologies for communication, community building and the creation of digital documents about migration and connectivity with the homeland.
**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 4410 (3) Topics in Contemporary Media Technologies
Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminar, students explore the work of contemporary thinkers and practitioners in the field.
**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 4450 (3) Topics in Contemporary Media Technologies
Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminars, students explore the work of contemporary thinkers and practitioners in the field.
**Requisites:** Requires prerequisite course of CMDP 1400 (minimum grade C).

CMDP 4460 (3) Dance for Camera
Explores the practices and techniques of moving-image production course with an emphasis on capturing human movement. The class develops skills in the areas of camera usage, digital editing, choreography, sound, and visual composition.
**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C).

CMDP 4610 (3) Small Screen Storytelling
Shoot footage on or for mobile screens including narratives, microdocumentaries, music videos, short stories and collaborative exquisite corpse projects. Students will complete work and distribute through various outlets on the internet.
**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 4620 (3) Media Environments
Explore the design and implementation of multimedia environments. Students will develop strategies for creating media exhibitions and/or performance environments with projection and sounds activated by sensors. This course is ideal for performers, dancers and media artists as well as those desiring to present information in novel ways, such as working with archival or non-fiction materials.
**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C).

CMDP 4630 (3) Introduction to Computational Media
Develop the technical and conceptual skills for computational media practices. Through individual and collaborative projects, students will explore the creative use of electronics and microcontrollers (including wearable and other embedded systems) through relevant programming environments. Introduces visual programming with a focus on signal processing for image and sound.
**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 4640 (3) Multimedia Sound
Learn what sound is and where it comes from; how to create, analyze, alter, mix, and record it digitally in the studio and in the field; and how it can interact creatively with other media. In addition to analyzing how professionals use sound, students will create five sound-based projects of their own.
**Requisites:** Requires prerequisite course of CMDP 3840 (minimum grade C).

CMDP 4650 (3) Collaborative Performance Media Making
Explores the potential of collaborative performance media making through interdisciplinary, collaborative, media-for-live-performance production. Students create their own original performative works, reflect on both their own and their peers' works, and revise and revisit their creative work.
**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C).

CMDP 4660 (3) Dance for Camera
Explores the practices and techniques of moving-image production course with an emphasis on capturing human movement. The class develops skills in the areas of camera usage, digital editing, choreography, sound, and visual composition.
**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C).

CMDP 4710 (3) Projection Practices
Design and implement projection-based media projects and explore projection practice as a distinct field. Through individual and collaborative projects, this course explores projection for live events, installation, moving images and site-specific or community-based projects. Students will be introduced to emergent software and hardware for projection design.
**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 4720 (3) Installation and Performance Media
Focusing on live image and sound processing in constructed or natural environments, students will work individually or collaboratively on an installation project that engages with the intersection of performance and media. Potential models include site specific work, illustrated lecture, gallery installation, movement and dance with projection mapping, participatory media and virtual environments.
**Requisites:** Requires prerequisite course of CMDP 3820 (minimum grade C).

CMDP 4730 (3) Digital Art and Emergent Technologies
Explores digital artistic practices across contexts and disciplines in various contexts. Emphasizes web and networked media as it applies to digital practices in sound, image, language, spatial and time-based arts.
**Requisites:** Requires prerequisite course of CMDP 2500 (minimum grade C).

CMDP 4740 (3) Advanced Virtual Reality
This course provides advanced technical training in the arena of virtual reality (VR), as well as an in-depth perspective on the history of VR, its practical and artistic applications as well as its societal implications. Throughout the semester students also engage in discussions centered around best practices for immersive storytelling and user experience.
**Requisites:** Requires prerequisite course of CMDP 3750 (minimum grade C).
CMDP 4760 (3) Topics in Immersive Media
Rotating topics in extended realities.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requirements: Requires prerequisite course of CMDP 3750 (minimum grade C-).

CMDP 4810 (3) Advanced Documentary Practices
Combine research and production to produce short documentary media projects, which explore the world we live in. Focusing on practice, this course explores stylistic options employed on documentaries that give voice to different perspectives on the world. Students will be able to identify the tactics and strategies of documentaries in a variety of media, and will include visits with professional documentary makers. Students will complete a final documentary project.
Requirements: Requires prerequisite course of CMDP 3800 (minimum grade C-).

CMDP 4820 (3) Ethnographic Media
Explores emerging creative documentary practices through visual research, fieldwork, oral histories and the construction of innovative ethnographies. Through ethno-fiction, eco-ethnography, photography, indigenous media and cinema, students explore the development of ethnographic documentary and visual anthropology in both traditional and experimental forms. Projects are developed with an emphasis on the ethical and political challenges of representation through media technologies.
Requirements: Requires prerequisite course of CMDP 3800 (minimum grade C-).

CMDP 4841 (1-4) Undergraduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CMDP 4860 (3) Sonic Arts II
Learn strategies and techniques for generating and manipulating sound with computer-specific tools. Students’ projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia and performance projects.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 4111
Requirements: Requires prerequisite course of CMDP 3840 or MUEL 2061 (minimum grade C-).

CMDP 4870 (3) Sound and Technology
Exploration of issues, techniques and tools of music and sound technology. Topics vary and may include: interactive systems for performance; music and mobile media; electronic music instrument design; digital synthesis and signal processing; music in multimedia; sound practices and analysis. Lecture during work sessions will support student projects.
Requirements: Requires prerequisite course of CMDP 3840 or MUEL 2061 (minimum grade C-).

CMDP 4900 (3) Concepts and Practices of Contemporary Media
This Media Production capstone course explores the application of new media technologies in depth and engages students in an ongoing dialogue about the cultural context of new media technologies and their own work. Students will produce a major media project that synthesizes methods of media making into modes of communication and expression. Students are encouraged to take this course during their final semester.
Requirements: Requires prerequisite course of CMDP 3600 (minimum grade C-) and a minimum of 95 credit hours. Restricted to Media Production (DCMP) majors (not minors).

CMDP 4931 (1-6) Internship
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requirements: Requires prerequisite of CMDP 3600 (minimum grade C-).
Restricted to MDPD majors.

Media Production - Bachelor of Arts (BA)
For the Bachelor of Arts in Media Production, students will first complete foundational courses in theory and practice and then take advanced courses in media production and critical studies.

Students from within or outside the College of Media, Communication and Information (CMCI) can pursue coursework within the Department of Critical Media Practices (DCMP), provided they meet course prerequisites, though seating priority is given to declared majors.

Program Tracks
Once the basic requirements are completed, students in this major may elect to focus on one of five areas of concentration:

- Integrative media
- Documentary
- Sound practices
- Performance media
- Immersive media

Requirements
General Requirements
Students will take the foundational courses in theory and practice, CMDP 1400 and CMDP 2500, before proceeding to advanced courses in media production. Critical studies courses require that students take CMDP 1400.

In addition to the basic requirements, students in this major may elect to focus on a specific area of concentration (Documentary, Sound Practices, Immersive Media or Performance Media). Students may also elect to follow a comprehensive approach to media production (Integrative Media Practices) provided by a 9-credit-hour elective structure. Students from within or outside the college may pursue coursework within CMDP, provided they meet course prerequisites, though seating priority is given to declared majors. With advisor and faculty guidance, CMDP majors may elect to design a 12-credit-hour concentration derived from areas within the college.

All students will be required to take the capstone course Concepts and Practices of Contemporary Media (CMDP 4900) in their final year. Students are encouraged to take the capstone course during their final semester.

### Concentration Areas

#### Integrative Media Practices Concentration
Students follow the basic major requirements, but also select 9 credit hours of studio elective courses (in addition to the required core studio elective courses).

#### Documentary Concentration
Students follow the basic major requirements and complete 9 credit hours of coursework within CMDP focusing on documentary storytelling. For this concentration students take the gateway course CMDP 3800 Documentary Media Poetics, followed by 6 credit hours of coursework selected from the following options:

- CMDP 3810 Engaged Documentary Media Practices
- CMDP 4810 Advanced Documentary Practices
- CMDP 4820 Ethnographic Media

#### Sound Practices Concentration
Students follow the basic major requirements and complete 9 credit hours of coursework within CMDP focusing on Music Technology. For this concentration students take the gateway course CMDP 3840 Sound Practices, followed by 6 credit hours of coursework selected from the following options:

- CMDP 3860 Sonic Arts I
- CMDP 4860 Sonic Arts II
- CMDP 4870 Sound and Technology
- CMDP 3880 Hearing Image, Seeing Sound
Performance Media Concentration
Students follow the basic major requirements and complete 9 credit hours of coursework within CMDP focusing on Performance Practice. For this concentration students take the gateway course CMDP 3820 Performance Media Practices, followed by 6 credit hours of coursework selected from the following options:

- CMDP 3830 Advanced Performance Media Workshop
- CMDP 4620 Media Environments
- CMDP 4650 Collaborative Performance Media Making
- CMDP 4660 Dance for Camera
- CMDP 4720 Installation and Performance Media

Immersive Media Concentration
Students follow the basic major requirements, but instead of taking electives they complete 9 credit hours of coursework within CMDP focusing on Immersive Media Practices such as virtual and augmented reality. For this concentration students take the gateway course CMDP 3750 Introduction to Extended Realities, followed by six credit hours of coursework selected from the following options:

- CMDP 4750 Advanced Virtual Reality
- CMDP 3740 3D for Extended Realities: Animation
- CMDP 3710 Audio/Vision 360
- CMDP 4760 Topics in Immersive Media

Secondary Area of Study
In addition to coursework required for the major, all students in MDPD must complete a secondary area of study outside of MDPD. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree or any credit-based certificate program of at least 12 credit hours.

Sample Four-Year Plans of Study
Integrative Media Practices Concentration
Students follow the basic major requirements and select 9 credit hours of studio elective courses (in addition to the core studio elective courses).

Media Production - Minor

The minor in media production is designed to give students majoring in any discipline foundational skills in media making, while also allowing students to pursue a range of elective courses in their particular areas of creative interest.

Requirements

The minor consists of a total of 19 credit hours, with three required media production courses that combine theory with technical skill in order to prepare students for upper division study.

Students must complete all classes for the minor with a grade of C- or better and an overall GPA in the minor of 2.0.

Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Learning Outcomes

Upon completing the program, students will have:

- Knowledge of, and the ability to use, the creative process as a way of knowing.
- Understanding of how to critically engage media making as experience, cognition, and world-making.
- The ability to self-reflect on their roles within communication networks.
- The ability to collaborate on the conception and production of innovative works.
- Appreciation of their role as they engage with their communities, carefully considering how their work shapes society and culture.
- The ability to initiate conversations about pressing issues that transcend cultural and national divides, and communicate with diverse audiences to bring about systemic change through media, communication and information.

CMDP 3740  3D for Extended Realities: Animation
CMDP 3750  Introduction to Extended Realities
CMDP 3800  Documentary Media Poetics
CMDP 3810  Engaged Documentary Media Practices
CMDP 3820  Performance Media Practices
CMDP 3830  Advanced Performance Media Workshop
CMDP 3840  Sound Practices
CMDP 3860  Sonic Arts I
CMDP 3880  Hearing Image, Seeing Sound
CMDP 3900  Media Professional Seminar
CMDP 4610  Small Screen Storytelling

CMDP 4630  Introduction to Computational Media
CMDP 4640  Multimedia Sound
CMDP 4650  Collaborative Performance Media Making
CMDP 4660  Dance for Camera
CMDP 4710  Installation and Performance Media
CMDP 4720  Projection Practices
CMDP 4730  Digital Art and Emergent Technologies
CMDP 4750  Advanced Virtual Reality
CMDP 4760  Topics in Immersive Media
CMDP 4810  Advanced Documentary Practices
CMDP 4820  Ethnographic Media
CMDP 4840  Undergraduate Independent Study
CMDP 4860  Sonic Arts II
CMDP 4870  Sound and Technology

Total Credit Hours 19

Information Science

Undergraduate students majoring in information science will explore the intersection of human values and the information technologies that influence everyday life. Students will synthesize knowledge and skills integrating design, computation, and data analysis. Students will investigate, understand, and engage contemporary issues around our increasingly digitized life. Topics include communicating with data, design, quantitative and qualitative data collection and analysis, how culture and history shape technology, ethics, and technology for social good. This project-centered major prepares students with a professional portfolio and project experience for in-demand careers.

Course code for this program is INFO.

Bachelor’s Degree

• Information Science - Bachelor of Science (BS) (p. 903)

Minors

• Data Science - Minor (p. 905)
• Information Science - Minor (p. 906)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Barker, Lecia Jane (https://experts.colorado.edu/display/fisid_101367/)
Associate Professor; PhD, University of Colorado Boulder

Brubaker, Jed Richards (https://experts.colorado.edu/display/fisid_156193/)
Assistant Professor; PhD, University of California, Irvine

Courses

INFO 1101 (3) Computation in Society
Introduces students to modern information and communication technology, the basic principles of software and programming, the fundamental role of algorithms in modern society, computational reasoning, the major organizations in the information sector and fundamental interactions between humans and information technology. Appropriate for students with limited prior experience with computing. Fulfills the CMCI computing requirement.
Grading Basis: Letter Grade

INFO 1111 (4) Introduction to Information Science: Understanding the World Through Data
Provides a hands-on survey of key concepts and theories in Information Science, including the nature of information, everyday experience of data, technologies that generate data, and how data are conveyed and represented. Students will critically examine texts, systems, and interpretations of data from multidisciplinary perspectives. Through design explorations, activities, and group projects, students will develop facility representing and transforming information.
Grading Basis: Letter Grade
INFO 1121 (4) Designing Interactions
Provides an introduction to human-centered design and the universal requirements of interactions with data, information and technologies. Studio experiences challenge students to consider the impact that information and computing technology design choices have on a) enabling diverse audiences to access, manipulate and experience information, and b) how differences get encoded by data and technology, ultimately reflecting biases.

Grading Basis: Letter Grade

INFO 1201 (4) Computational Reasoning 1: Information Transformation
Introduces principles of computational thinking through the examination of text-based artifacts (e.g., tweets, album rankings, and song lyrics) using the Python programming language. Students will be exposed to a high-level overview of how computer programs can be used to explore, discover, and communicate information contained within these artifacts.

Equivalent - Duplicate Degree Credit Not Granted: LING 1200 or CSCI 1200

INFO 1301 (3) Statistics for Information Science
Introduces concepts and techniques for characterizing and quantifying data. Students will learn to summarize, visualize, and interpret data with descriptive statistics and will learn the foundations of statistical inference and modeling. Topics include statistical distributions and the normal distribution, hypothesis testing and statistical significance, and linear regression.

Grading Basis: Letter Grade

INFO 2001 (1) Information Science Portfolio and Professional Development
Facilitates career development through the disciplined reflection about and presentation of one’s work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in information science.

Requisites: Restricted to Information Science (INFO) majors and minors.

Grading Basis: Letter Grade

INFO 2131 (3) Information Ecosystems
Introduces students to techniques for working with communities, organizations, and institutions in the transformative use of information. Develops students’ ability to listen for (and mediate among) diverse, discordant voices and values. Employs qualitative research, design explorations, activities, and small group projects as students examine, navigate, and design for complex interactions across ecosystems.

Grading Basis: Letter Grade

INFO 2201 (4) Computational Reasoning 2: Representations of Data
Surveys techniques for accessing, exploring, and analyzing real-world data in various formats. Students will acquire, process, and visualize this data in order to communicate their findings to a general audience. Requires demonstrated proficiency with introductory computer programming.

Requisites: Requires prerequisite course of INFO 1201 or CSCI 1300 or CSCI 1200 or LING 1200 or ATLS 1300 (minimum grade C-).

INFO 2301 (3) Quantitative Reasoning for Information Science
Introduces methods for quantifying and analyzing different types of data, covering foundational concepts in discrete mathematics, probability, and predictive modeling, along with complementary computational skills to apply these concepts to real problems. Covers counting and combinatorics, logic, set theory, introductory probability, common probability distributions, regression, and model validation. Requires demonstrated proficiency with introductory computer programming.

Requisites: Requires prerequisite course of INFO 1201 or CSCI 1200 or CSCI 1300 or LING 1200 or ATLS 1300 (all minimum grade C-).

Grading Basis: Letter Grade

INFO 3101 (3) History of Computing and Information
Focusing on two topics: the changing role of information in everyday life over time and the increasing role of information in disciplinary studies such as social science, engineering, computer science, mathematics, digital humanities. Examines information related academic disciplines, businesses, industries and technologies from multiple perspectives from the 17th century to the present.

INFO 3401 (3) Information Exploration
Teaches students how to use information to identify interesting real world problems and to generate insight. Students will learn to find, collect, assemble and organize data to inspire new questions, make predictions, generate deliverables, and work towards solutions. They will learn to appropriately apply different methods (including computational, statistical and qualitative) for exploratory data analysis in a variety of domains.

Requisites: Requires prerequisite course of INFO 2201 and INFO 2301 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior)

Grading Basis: Letter Grade

INFO 3402 (3) Information Exposition
Teaches students to communicate information to a wider audience and construct stories with data across a variety of domains. Students will learn to use data for rhetorical purposes, applying visual, statistical and interpretative methods. Students will learn to think critically about ethical and social implications of using data in expository media, including identification of bias.

Requisites: Requires prerequisite course of INFO 2201 and INFO 2301 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

INFO 3501 (3) Open Collaboration
Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5501

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade
INFO 3502 (3) Online Communities
Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants’ motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5502
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 3503 (3) Everyday Information Behavior
Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information online. Students learn to analyze the informational dimensions that occur in their everyday lives.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5503
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 3504 (3) Digital Identity
Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5504
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 3505 (3) Designing for Creativity and Learning
Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5505
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 3506 (3) Online Fandom
Explores and analyzes fan communities in a digital context. Through applied research, students will investigate online spaces devoted to participatory and remix culture, media fandom, and fan creation. This class will draw concepts and methods from fan studies, social computing, ethnography, data science, and sociology to drive project-based inquiry.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5506
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 3507 (3) Data and the Humanities
Introduces students to foundational computing and statistical concepts for analyzing humanities data. This course discusses the influence of digitization and data on humanist inquiry and exposes students to techniques for working with data in different areas of the humanities, including literature, history, and art. The course emphasizes technical practices involved in humanist data analysis. Comfort with programming is strongly encouraged.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5507
Requisites: Restricted to students with 55-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 3508 (3) Personal Information Management
Explores and analyzes personal information management: the organization of our digital “stuff”, including course assignments, internship documents, files shared with others via the cloud, social media posts, step counts captured by smartwatches, and location traces collected by phones. In this course, students will participate in a semester-long design research project exploring ways to re-imagine how technology handles our digital stuff.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4001 (1) Information Science Portfolio and Professional Development
Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in information science.
Requisites: Restricted to Information Science (INFO) majors and minors.
Grading Basis: Letter Grade

INFO 4601 (3) Ethical and Policy Dimensions of Information and Technology
Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5601
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4602 (3) Information Visualization
Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5602
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade
INFO 4603 (3) Survey Research Design
Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5603
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4604 (3) Applied Machine Learning
Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5604
Requisites: Requires prerequisite courses of INFO 2201 or INFO 2301 or CSCI 2270 (all minimum grade C). Restricted to students with 57-180 credits (Junior or Senior).
Grading Basis: Letter Grade

INFO 4605 (3) Ethnographic Research in Applied Settings
Demonstrates the power of ethnography as an investigative approach that is useful in design, evaluation and question formation for information scientists across all workforce sectors. Teaches students how to be keen observers of the unusual as well as the everyday to reveal meaningful insights that elaborate information science projects. Degree credit not granted for INFO 4605 and INFO 5605.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4606 (3) Critical Technical Practice
Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5606, ATLS 4606, and ATLS 5606
Grading Basis: Letter Grade

INFO 4607 (3) Software Engineering for Data-Centered Systems
Explores design and engineering of systems for data storage and analysis. Introduces fundamental development concepts used in real-world data systems. By combining software engineering with knowledge from data science and human-centered computing, prepares students to develop systems, interpret and modify codebases, understand modern concepts for managing data at scale, and work in teams to create cutting-edge applications for consumer use.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5607
Requisites: Requires prerequisites of INFO 2201 or CSCI 2270 (all minimum grade C). Restricted to students with 57-180 credits (Junior or Senior)
Grading Basis: Letter Grade

INFO 4608 (3) Community-Based Design
Surveys techniques in cooperative design with community members as collaborators rather than subjects. Students will explore approaches such as participatory design and co-design. Students will work in teams in partnership with community stakeholders to create tools, experiences, or systems that meet the needs of communities, contribute to social change, and/or lead to advancing academic knowledge.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5608
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4609 (3) User-Centered Design
Surveys the theoretical and practical foundations of human-computer interaction and user-centered design. Students learn theories of interaction (including cognitive, organizational, collaborative, and task-based approaches), user interface design techniques, design guidelines, and usability testing in the context of developing technology. Course content is explored through a variety of interfaces (desktop, mobile, touch, vision, audio, etc.) and contexts (personal, organizational, cross-cultural, etc.).
Equivalent - Duplicate Degree Credit Not Granted: INFO 5609
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4611 (3) Ubiquitous Computing Experience Design
Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5611
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4613 (3) Network Science
Introduces theories and methods for analyzing relational data in social, information, and other complex networks. Students will understand the processes and theories explaining network structure and dynamics as well as develop skills analyzing and visualizing real-world network data. No math or statistics training required, but course will assume familiarity with Python.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5613
Requisites: Requires prerequisite course of INFO 3402 (minimum grade C). Restricted to students with 55-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4700 (3) Senior Capstone
Provides senior level INFO students an opportunity to demonstrate the culmination of their learning in the major by designing and implementing a significant information system or developing a research question, typically in response to a problem of personal interest related to or informed by their secondary area of specialization. Reinforces project planning, public presentation and ethic skills.
Requisites: Restricted to Information Science (INFO) majors only with a minimum of 90 hours.
Grading Basis: Letter Grade
INFO 4800 (1-3) Leadership Practicum in Information Science
Equips students for taking on leadership roles in the interdisciplinary context of information science. Students will learn to facilitate learning among students with diverse backgrounds and expertise, developing communication and mentoring skills and gaining exposure to a variety of learner-centered design strategies and pedagogical approaches. Enrollment is by invitation and at the discretion of the instructor.
Repeatability: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Information Science (INFO) majors only.
Grading Basis: Letter Grade

INFO 4841 (1-4) Undergraduate Independent Study
Undergraduate independent study.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Information Science (INFO) majors only.
Grading Basis: Letter Grade

INFO 4871 (3) Special Topics
Special topics.
Repeatability: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

INFO 4900 (1-6) Research Experience in Information Science
Provides research experience in information science. Students will contribute to the construction of new knowledge, helping to answer current research questions or to solve contemporary problems in the domain. Enrollment is by invitation and discretion of the advising faculty member.
Repeatability: Repeatable for up to 12.00 total credit hours.
Grading Basis: Letter Grade

Information Science - Bachelor of Science (BS)
Undergraduate students majoring in information science will explore the intersection of human values and the information technologies that influence everyday life. Students will synthesize knowledge and skills integrating design, computation, and data analysis. Students will investigate, understand, and engage contemporary issues around our increasingly digitized life. Topics include communicating with data, design, quantitative and qualitative data collection and analysis, how culture and history shape technology, ethics, and technology for social good. This project-centered major prepares students with a professional portfolio and project experience for in-demand careers.

Requirements
Program Requirements
The BS in information science requires 51 credit hours within the major. Students will also complete the CMCI Core as part of their general education. A secondary area of study, which is also part of the CMCI Core, will be used to synthesize knowledge of information science with an application domain.

Portfolio & Professional Development and Capstone Series
The Department of Information Science values project-based learning, team-based learning, the development of good professional practice and the development of specializations at the undergraduate level. The Portfolio & Professional Development as well as the Capstone courses are a critical part of cohort-building in the major, and are designed to create a community of learners who are prepared to tackle ambitious projects together, individually and in preparation for internship and post-baccalaureate opportunities.

Facilitates development of careers in Information Science through the disciplined reflection about and presentation of one’s work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in Information Science.

Senior Capstone
The Senior Capstone (INFO 4700) provides senior-level Information Science students an opportunity to demonstrate the culmination of their learning in the major by designing and implementing a significant information system or developing a research question, typically in
response to a problem of personal interest related to or informed by their Secondary Area of Study. The course reinforces project planning, public presentation, collaboration and professional ethics skills.

**Total Credit Hours: 3**

**Upper-division Electives in Information Science**

Information Science students will take a total of 5 upper division elective courses. These courses fall into two general categories, Investigations and Mastery.

In Investigations courses, students deeply engage in specific domains, applying the skills they have learned in the foundation courses through instructor-guided projects. Examples of Investigations courses include: Digital Identity, Designing for Creativity and Learning, Digital Humanities, Personal Information Management, and Online Community.

Special Topics (INFO 4871) courses may be approved as electives.

**Total Credit Hours: 15**

**Secondary Area of Study**

In addition to the coursework required for the major, all students in INFO must complete a secondary area of study outside of INFO. This can be met by any of the following: a minor, a second major within CMCI, a double degree or a credit-based certificate program of at least 12 credit hours offered by a department in any school or college at CU. Information Science majors may not receive an Information Science minor nor a Data Science minor.

Students are encouraged to select one of the programs of study described above, since these have been officially approved by experts who can either provide a formal certificate or list the minor on a student’s official transcript upon graduation. In exceptional circumstances, however, students may apply to complete an individualized secondary area of study equal to or greater than 18 credit hours. Application for an individualized secondary area of study must be submitted and approved before the student has earned 50 credit hours.

**Sample Four-Year Plan of Study**

**Learning Outcomes**

Students will be able to:

- Design, prototype and analyze information artifacts.*
- Identify and implement multiple methods for information collection and analysis, from small data to big data, from quantitative to qualitative.*
- Write computer programs to answer questions and generate interactive artifacts.*
- Understand and be able to apply key methods for generating insights from data.*
- Accurately and persuasively communicate information to different audiences.*
- Understand and evaluate social contexts and ethical implications of information technologies.
- Identify biases in technologies and understand their ethical ramifications.

* Program Learning Outcomes with an asterisk are included in the program's assessment plan and assessed at least once every 3 years.

**Bachelor’s–Accelerated Master’s Degree Program(s)**

The Bachelor’s–Accelerated Master’s (BAM) degree program options offer currently enrolled CU Boulder undergraduate students the opportunity to receive a bachelor’s and master’s degree in a shorter period of time. Students receive the bachelor's degree first, but begin taking graduate coursework as undergraduates (typically in their senior year). Because some courses are allowed to double count for both the bachelor's and the master's degrees, students receive a master’s degree in less time and at a lower cost than if they were to enroll in a stand-alone master's degree program after completion of their baccalaureate degree. In addition, staying at CU Boulder to pursue a bachelor’s–accelerated master's program enables students to continue working with their established faculty mentors.

The Information Science Bachelor’s–Accelerated Master’s degree at CU Boulder has been created in recognition of the increasing demand for master's level training and research skills.

**Admissions Requirements**

In order to gain admission to the BAM program named above, a student must:

- Fill out the “intent” form, around the junior year, for admission to the program.
- Have a cumulative GPA of 3.0 or better.
- Have completed MAPS requirements.
- Submit a resume or CV.

**Program Requirements**

Students may take up to and including 12 credit hours while in the undergraduate program which can later be used toward master's degree requirements. Six credits may be double-counted toward both the bachelor’s degree and master’s degree, effectively shortening the expected time to completion for the master’s degree from three semesters to two. Graduate courses will not be counted as satisfying program requirements unless a grade of "B" or higher is earned. Double-counted courses may not be used toward a subsequent doctoral program (or additional master's program) at CU Boulder.

- Students must maintain a 3.0 cumulative GPA at all times in the program.
- Students must apply to graduate at the beginning of the semester in which they will complete the bachelor's degree requirements.
- Students must apply to continue with the master's degree program.
- Students will be matriculated into the master's program without further program review.
- Students must maintain a cumulative 3.0 GPA while in the master's program, including in the courses being used toward the master's degree.

**Data Science - Minor**

Data science is a multidisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from structured and unstructured data.

This minor provides students with an introduction to the core concepts and skills of data science in computing, statistics and information science to complement existing majors in CMCI fields, in the social sciences and in the arts and humanities.

The program is specifically designed as an add-on to existing quantitative methods courses and sequences in the social sciences. Students in such degree programs who wish to add data science experience and credentials to their course of study can complete the minor without additional course prerequisites. For this reason, some aspects of the curriculum (particularly the quantitative methods area) are quite flexible, allowing students to acquire this background through subject-specific study in a variety of disciplines.

**Required Courses and Credits**

The minor is divided into three areas: computing, quantitative methods, and electives. Computing courses cover basic programming and data structures with an emphasis on the Python programming language. Because of the variation in credit hours associated with quantitative methods courses, the total hours for the minor vary between 19–22.

Information Science majors may not receive an Information Science minor nor a Data Science minor. Students may not receive both the Information Science minor and the Data Science minor.

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework attempted in the minor department must be equal to 2.00 (C) or higher.

Aside from course prerequisites for the courses listed below, there are no other prerequisites for the minor.
### Required Courses

Students must choose one Introduction course and one Literacies course and meet any prerequisites.

#### Introduction Courses (choose one)

<table>

1. There are two sections each of INFO 3401 and INFO 3402. Section 100 is for students who have completed the prerequisites INFO 2301 and INFO 2201. Section 200 includes prerequisites for the other pathways into the minor.

### Requirements

All coursework applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The GPA for all coursework attempted in the minor department must be equal to 2.00 (C) or higher.

#### Elective coursework in areas related to data science; one of these courses must be in Information Science

1 Courses cannot count as both required and personalization. Must meet prerequisites for courses that require them.

**Journalism**

The Department of Journalism is founded on the principle that a well-informed and engaged public is essential to democracy—perhaps more so now, at a time of dizzying change, than it has ever been—and that, in the face of this change, journalism retains a unique role in contributing to civic life and to the quality of public discourse.

We put this principle to work by helping students become constructive participants in an ever-evolving global media landscape, where distinctions between producers and consumers of content have blurred. More specifically, we prepare them, at both the undergraduate and graduate levels, for careers in journalism and other fields of public communication. We train students to gather information from a diversity of sources, to analyze it critically, and to report what is significant, through stories and other media forms across multiple media platforms. We encourage ethical awareness so that students will think independently, being prepared to reflect on and to help shape media practices and norms rather than take them at face value.

We believe in the integration of classroom instruction with practical experience. Many of our students work for, and manage, campus online news and entertainment sites, television programs and a radio station. They intern at broadcast stations, newspapers, magazines, websites and social media companies. Lastly, as a faculty, and with the help of colleagues elsewhere in our College who are working on new and innovative forms of human communication, we are committed to improving journalism through pioneering research and creative work.

**Course code for this program is JRNL.**

**Bachelor’s Degree**

- Journalism - Bachelor of Arts (BA) (p. 911)

**Minor**

- Journalism - Minor (p. 913)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

**Courses**

**JRNL 1000 (3) Principles of Journalism and Networked Communication**

Surveys the history, practices and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society.

**Additional Information:** Departmental Category: Core Curriculum and General Electives
JRN 1871 (1-3) Special Topics for First-Year Students
Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.
Repeatability: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Core Curriculum and General Electives

JRN 2000 (3) Writing for the Media
Introduces students to writing news for a range of news media platforms, including print / online, broadcast, social media and more, and teaches them how to use the appropriate grammar and style conventions for those media types. Also introduces students to various types of stories, from breaking news to features to profiles, and to basic reporting skills. Students encouraged to take concurrently with JRN 2001.
Requisites: Requires prerequisite of JRN 1000 (minimum grade C-). Restricted to Journalism (JRN) majors and minors only.

JRN 2001 (3) Fundamentals of Reporting Technologies
Develops news-gathering skills for work in news enterprises. Students learn skills for working with technologies used in news reporting and in storytelling for various media formats. Students are introduced to a range of technologies for recording, editing and producing. Students encouraged to take concurrently with JRN 2000.
Requisites: Requires prerequisite of JRN 1000 (minimum grade C-). Restricted to Journalism (JRN) majors and minors only.

JRN 2014 (3) Race and Sports Journalism
Examines the intersection of sports journalism and race. It investigates the subject from two distinct but related perspectives. First, the class looks historically at how race has been covered in both journalism generally and sports journalism more specifically. Then it seeks to understand the effects of said coverage.

JRN 2301 (3) Journalism Ethics and History in Film
Examines how the depiction of journalists evolves over time through watching classic films. Also, the course studies how journalists depicted in film enact (or do not enact) ethical norms of the profession. Through the reading of cinema as text, and in conjunction with written texts, the class will discuss how these depictions in popular culture have, over time, impacted the way American society views the media.

JRN 2401 (3) Media Coverage of Diverse Populations
Explores the ways in which issues of gender, gender expression, sexual orientation, race, ethnicity and religion play out in news coverage and how news organizations approach coverage of marginalized groups in society.
Grading Basis: Letter Grade

JRN 3102 (3) Photojournalism I
Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making.
Requisites: Requires a prerequisite course of JRN 2001 (min grade C-). Restricted to Journalism (JRN) majors or minors with a minimum of 57 credits only.
Additional Information: Departmental Category: Print Online Journalism

JRN 3112 (3) Concepts in Visual Culture
Studies the principles, theories and language of visual communication, emphasizing the evaluation and use of images in mass media. Designed to help students build theories and practices learned in previous classes and perfect their skills integrating words and pictures in communication to gain a greater appreciation of the visual world.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRN 3201 (3) Critical Perspectives on Journalism
Introduces students to the critical perspectives most often employed in qualitative analysis of journalistic texts and practice: Marxism, psychoanalytical criticism, semiology, sociological criticism, structuralism, etc. Emphasis is upon texts from contemporary print and broadcast media, although students may also explore documentary film and literary journalism.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRN 3202 (3) Covering Political Campaigns
Provides a blend of theoretical understanding and on the ground experience for students interested in learning about the forces that shape election coverage and the practicalities of reporting on the local and national races for public office.
Requisites: Requires prerequisite course of JRN 2000 (minimum grade C-).

JRN 3211 (3) History of Broadcasting
Offers a broad overview of significant broadcast programs, the institutions and sociocultural and economic influences that have steered the course of radio, television and electronic media history in the United States.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRN 3221 (3) History of Digital Journalism
Explores the history, economics and traditions of digital technologies. Addresses the interaction between digital technologies, culture and economy with particular emphasis on the effects on digital journalism. Concludes with a focus on how these concepts are embraced by new journalism market models.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRN 3231 (3) History of Documentary Film
Explores the evolution of the documentary, both in feature films and on television, to understand how the genre offers both historical context and an understanding of the world in which we live.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRN 3241 (3) History of Journalism
Explores the foundations of journalism practice in a historical context. Students study the evolution of the news industry and analyze examples of contemporary broadcasting, photography, online and print media in light of the past.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRN 3401 (3) Sociology of News
Provides students with an introduction to the factors that shape news reporting and production, including gatekeeping, intermedia agenda setting, pack journalism, beat structures, news values and issues unique to the various platforms on which news is delivered.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
JRNL 3402 (3) Social Media Storytelling
Investigates the theory, ethics and best practices in storytelling across a variety of social media platforms including, but not limited to, Facebook, Twitter, Instagram, Snapchat, Medium and YouTube. Examines best practices for social media engagement. Students develop a story for multiple platforms and analyze the story performance on the sites and make recommendations for best practices.
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (all minimum grade C-). Restricted to JRNL majors and minors with 57-180 credits (Juniors or Seniors).

JRNL 3552 (3) Editing and Presentation
Explores copy editing, graphic principles and processes, new media technology.
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (all minimum grade C-). Restricted to JRNL majors and minors.
Additional Information: Departmental Category: Print Online Journalism

JRNL 3614 (3) Principles of Audio Production
Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Journalism (JRNL) minors with a minimum of 45 hours taken.
Additional Information: Departmental Category: Broadcast Journalism

JRNL 3644 (3) Digital Video Production I
This course teaches essential video production skills in both field and studio operation, camera and editing work, lighting, and multi-camera studio directing. Students will learn how to develop the narrative of a video, shoot quality footage for the story, and to apply best journalistic practices to positively impact society on multiple media platforms.
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to JRNL majors or minors with a minimum of 45 completed hours.
Additional Information: Departmental Category: Broadcast Journalism

JRNL 3651 (3) Media Law and Ethics
Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Provides students with an overview of the theories, ethics, codes, and analytical models that are used in journalism, and introduces students to a variety of ethical issues that can arise in journalism.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Journalism (JRNL) minors with a minimum of 45 hours taken.

JRNL 3674 (3) Digital Video Production 2
This course teaches students how to do live video production work on streaming services, such as Livestream, and event productions. Students also cover the studio production side of NewsTeam, a live student-produced newscast. In addition, students will do field production projects to sharpen their video storytelling skills.
Requisites: Requires prerequisite course of JRNL 3644 (minimum grade C-).
Additional Information: Departmental Category: Broadcast Journalism

JRNL 3704 (3) Sports Writing
Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRNL 3804 (3) Sports, Media and Society
Examines how sports, culture and especially the media, with a specific focus on journalism, all come together to influence society. Explores how sports communication affects, and is affected by, the issues and tension that touch society at large, such as law and politics, race, gender, sexuality and disability.
Equivalent - Duplicate Degree Credit Not Granted: MDST 3331
Requisites: Restricted to CMCI students with a minimum of 45 credits completed or non-CMCI students who have completed CMCI 2001 (minimum grade D-).

JRNL 4002 (3) Reporting 2
Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics.
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (all minimum grade C-). Restricted to JRNL majors and minors.
Additional Information: Departmental Category: Print Online Journalism

JRNL 4004 (3) The Sports Media Industry
Examines the business practices and frameworks of the sports that journalists cover. Topics include market-driven journalism, the growth of sports coverage throughout the 20th century, the technologies impacting sports business today, and the way money impacts coverage. Finally, the class explores the unique issues and challenges posed by the different financial structures of amateur and professional sports and how they influence sports coverage and reporting.
Requisites: Restricted to Journalism (JRNL) majors or Sports Journalism (SJR) minors only with 57-180 credits (Junior or Senior) only.

JRNL 4011 (3) Principles of Media Relations
Provides students with information about the ethics, history and practice of media relations (community affairs, community relations, customer relations, government relations, industry relations, internal communications, public relations, press agency, public affairs, publicity, etc.). Introduces students from multiple academic disciplines to the genres of writing required for a media relations career.
Requisites: Restricted to students with a minimum of 45 credits completed.

JRNL 4102 (3) Photojournalism Portfolio
Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5102
Requisites: Requires a prerequisite course of JRNL 3102 (minimum grade C-).
Additional Information: Departmental Category: Print Online Journalism

JRNL 4311 (3) Literary Journalism
Explores the telling of nonfiction stories through the techniques of fiction, through study of American literary journalists, from the New Journalism of the 1960s through current longform narrative multimedia. Students will read and analyze narrative nonfiction from several periods of American history in order to expand their own storytelling repertoire. The class will emphasize in-depth reporting for narrative, character and scene development, narrative arc and structure and the use of dialogue. They will also explore the particular ethical dilemmas faced by writers of creative nonfiction.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5311
Requisites: Requires prerequisite course of JRNL 2000 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
JRNL 4344 (3) Video Documentary Production
Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5344
Requisites: Requires a prerequisite course of JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4351 (3) Reporting Wars, Conflict and Peace
Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples’ lives, governmental decisions and news media operations.

Requisites: Restricted to Journalism (JRNL) majors or minors with a minimum of 73 hours taken.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 4354 (3) Video News Reporting
Focuses on writing and reporting compelling visual stories using mobile devices and video cameras. Students also learn storytelling techniques of backpack video journalism and reporting for broadcast television and online news.

Requisites: Requires a prerequisite course of JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4401 (3) News and Public Perception
Considers the impact that news and journalistic practice have on the public through processes like agenda setting and second-level agenda setting, as well as issues such as news avoidance, the spiral of silence and political cynicism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRNL 4402 (3) Journalism and Social Identity
Provides a discussion-based inquiry into the role of journalism and journalists in the representation of intersectional identities, focusing on race, gender, sexual expression and socioeconomic class in the United States. The study and practice of journalism in this course will address issues of trust, power, privilege and ethics inherent in reporting across difference.

Requisites: Requires prerequisite course of JRNL 2401 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

JRNL 4411 (3) International Media and Global Crises
Investigates how media organizations, audiences and other international organizations function during various global crises, such as national disasters, climate change and health epidemics, due to imbalanced distribution of wealth and resources, ethnic tensions and diplomatic failures.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

JRNL 4502 (3) Reporting 3
Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5502
Requisites: Requires prerequisite courses of JRNL 3552 and JRNL 4002 (all minimum grade C-). Restricted to JRNL majors and minors.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4521 (3) Data Journalism
Instructs students in data-driven investigative reporting, from practice to ethical considerations. The class includes hands-on, in-depth instruction in gathering data, processing, presenting, and writing about data as a critical tool in journalistic storytelling. Students learn to read, interpret and critique data analysis for journalistic purposes.

Requisites: Requires prerequisite course of JRNL 2000 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors with 57 or more credits completed.

JRNL 4562 (3) Digital Journalism
Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5562
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Print Online Journalism

JRNL 4572 (3) News Corps
CU News Corps provides students the opportunity to immerse themselves in a single project and then produce an in-depth text based or multimedia explanatory/investigative story for publication in professional media. Students spend several weeks studying the subject in question before reporting and producing their stories.

Requisites: Requires prerequisite course of JRNL 3674 or JRNL 4002 or JRNL 4354 or JRNL 3402 or JRNL 3552 or JRNL 4344 or JRNL 4602 or JRNL 4614 or JRNL 4802 or JRNL 4822 (minimum grade C-).

Grading Basis: Letter Grade

JRNL 4602 (3) Opinion Writing
Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5602
Requisites: Requires a prerequisite course of JRNL 2000 (minimum grade C-). Restricted to Journalism (JRNL) majors or minors with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Print Online Journalism

JRNL 4614 (1-3) Advanced Audio Practices
Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of JRNL 3614 (minimum grade C-). Restricted to CMCI majors or JRNL minors.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4624 (4) NewsTeam
Students participate in Newsteam Boulder, a program broadcast live over the Boulder cable television system.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5624
Requisites: Requires prerequisite course of JRNL 4354 (minimum grade C-).

Additional Information: Departmental Category: Broadcast Journalism
JRNL 4634 (1-3) Broadcast Projects
Covers interpretation, preparation, and/or reporting in programs for broadcast media. Students produce radio or television documentaries and informational/entertainment programs.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5634
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires a prerequisite course of JRNL 3644 (minimum grade C). Restricted to JRNL majors or minors.
Additional Information: Departmental Category: Broadcast Journalism
JRNL 4651 (3) Advanced Media Ethics
Examines the responsibilities, the power and the problems of news media through the lens of ethical inquiry. Applies the philosophical and other perspectives from humanities and social sciences to consider ethical frameworks for guiding journalism in an era of technological disruption. Examines issues including privacy, conflicts of interest, undercover reporting, use of graphic images, interviewing trauma victims and other concerns in journalism through the lens of moral philosophy, best practices and codes of ethics.
Requisites: Requires prerequisite course of JRNL 3651 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).
JRNL 4674 (3) Digital Video Production 3
Provides students with in-depth experience in directing and producing live video productions. Students learn how to create show rundowns and graphics.
Requisites: Requires a prerequisite course of JRNL 3674 (minimum grade C).
Additional Information: Departmental Category: Broadcast Journalism
JRNL 4684 (3) The Art of Visual Storytelling
Teaches students how to raise the production value of their work based on standards used by professionals. Students learn how lenses, lights and contrast can affect an image; how to assemble their shots with pacing and rhythm; how to apply color grading techniques to give video a cinematic look; and how to create motion graphics for titles and lower thirds.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5684
Requisites: Requires a prerequisite course of JRNL 3644 (minimum grade C). Restricted to JRNL majors or minors only.
Additional Information: Departmental Category: Broadcast Journalism
JRNL 4702 (3) Arts/Cultural Reporting and Criticism
Emphasizes composition of criticism for the performing arts and other areas of entertainment.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5702
Requisites: Requires a prerequisite course of JRNL 2000 (minimum grade C). Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Print Online Journalism
JRNL 4704 (3) Athletic Media Relations
Offers the opportunity to both observe and experience what is required to work in the world of intercollegiate athletic media relations and professional sports public relations. Covers how to write and how to budget the vital components of publications, media bias and crisis management.
Requisites: Requires prerequisite course of JRNL 3704 (minimum grade C).
JRNL 4714 (3) Sports Broadcasting
Teaches students how to do live sports television production. Students will learn the sports TV business from the ground up, and be responsible for participating in the broadcasting of three to four live sporting events.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
JRNL 4724 (3) Sports Announcing
Teaches students about sports talk and sports announcing, how to interview sports celebrities and the legal considerations and ethics of the business. Students will be doing play-by-play and color of live sporting events. Department consent required.
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
JRNL 4802 (3) Feature Writing
Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5802
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C). Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Print Online Journalism
JRNL 4822 (3) Reporting on the Environment
Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic and cultural dimensions of environmental subjects.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 5822
Requisites: Requires prerequisite courses of JRNL 2000 and JRNL 2001 (minimum grade C). Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Print Online Journalism
JRNL 4841 (1-4) Undergraduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
JRNL 4874 (1-3) Special Topics
Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to JRNL majors or minors with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Broadcast Journalism
JRNL 4931 (1-6) Internship
Internship
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of JRNL 3674 or JRNL 4002 or JRNL 4354 or JRNL 3402 or JRNL 3552 or JRNL 4344 or JRNL 4602 or JRNL 4614 or JRNL 4802 or JRNL 4822 (minimum grade C).

**Journalism - Bachelor of Arts (BA)**

Journalism majors develop skills in information gathering, storytelling and analysis across a variety of platforms—including television, social media, mobile devices, radio and print—using an ever-expanding variety of media tools and technologies. In addition to their professional preparation, students take courses in a core curriculum that provides a range of conceptual and interdisciplinary options and develop an individualized secondary area of study (18 credit hours). Students complement their skill competencies with a study of sports journalism, media and diversity, ethics, history, data journalism, international media,
law, literary journalism, news and public perception, sociology of news, visual culture, and other conceptual courses offered in the department and elsewhere in the college and university.

### Requirements

#### Required Courses and Credits

Within the college standard of 120 credit hours for the bachelor’s degree, the BA in journalism requires 36 credit hours as follows.

#### Secondary Area of Study (18 credit hours)

In addition to the coursework required for the major, all students in JRNL must complete a secondary area of study outside of JRNL. This can be met by any of the following: a minor, a double degree, a second major or an approved minor substitute composed of at least 18 credit hours. Application for a minor substitute must be submitted and approved before the student has earned 50 credit hours.

### Sample Four-Year Plan of Study

This is an example of how the requirements for a BA in Journalism could be scheduled within a four-year period. For more information on the Core Curriculum requirements for the College of Media, Communication and Information, please read the Policies & Requirements (https://catalog.colorado.edu/undergraduate/colleges-schools/media-communication-information/policies-requirements/#corecurriculumtext) section of this catalog.

Learning Outcomes
Adhering to the Accrediting Council on the Education in Journalism and Mass Communications Professional Values and Competencies, as the accrediting agency for CMCI’s Journalism programs, all B.A. graduates of Journalism Department should be aware of certain core values and competencies and be able to:

• Demonstrate an understanding of the history and role of professionals and institutions in shaping communications.

• Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity.

• Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.

• Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve.

• Apply tools and technologies appropriate for the communications professions in which they work.

Journalism - Minor
In consultation with their advisers, students who are majoring in another discipline may pursue a minor in journalism. Because journalism is a popular career choice for students in other units—art and art history, business, communication, English, sociology, women and gender studies, and other fields in the College of Arts and Sciences, the College of Media, Communication and Information, and the Leeds School of Business—we offer an 18-credit hour journalism minor (six courses) with the courses and options listed under the Requirements tab.

Requirements
Students must complete 18 credit hours of coursework toward the minor with a grade of C- or better and an overall GPA in the minor of 2.0. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Students will take two required courses, JRNL 1000 and JRNL 2000, which will introduce them to a range of possible interests from broadcasting to print and online media to digital and emerging media and writing for the media. After successfully completing JRNL 1000 and 2000, students should select one 2000-level course and three 3000- or 4000-level journalism courses.

Students may emphasize conceptual and theory courses, may select skills courses that help to prepare them for possible careers, or complete a combination of the two. Students in the minor may take up to three credits of independent study and three credits of internship.

Students may not use the same journalism courses for both the journalism minor and the sports media minor.

Media Studies

The Department of Media Studies specializes in sophisticated, cutting-edge research on the media technologies that underlie contemporary culture, economy and politics. Students learn how media industries, practices and narratives shape the way we think about and relate to the world around us. Enter our tight-knit community and participate in innovative media production work and research projects that engage emerging technology practices, seek to understand new digital cultures, and strive to change society in meaningful ways.

Media studies students examine ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and artistic approaches to the study of media and culture, and interdisciplinarity in its theoretical and methodological approaches, the media studies degrees span traditional boundaries between theory and practice. The program fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

Course code for this program is MDST.

Courses

MDST 1001 (3) Foundations of Media Studies
Introduces students to key issues and debates and contemporary applications of critical media studies focusing on economic, social, political and cultural implications. Provides an understanding of the relationship between theory and practice and equips students with the tools to critically analyze various forms of textual transmission.
Grading Basis: Letter Grade

MDST 1002 (3) Introduction to Social Media
Introduces students to network structures and principles, the technology and infrastructures that allow them to flourish, and the cultures that grow up through and around them. Explores how social media enables community, how it assembles and empowers agents of change and how design informs individual and group behavior.
Grading Basis: Letter Grade

MDST 1003 (3) Critical Media Literacies
Learn to strategically access, analyze, evaluate, and produce communication in a variety of forms. This course explores the expanding nature of literacy in a digital world. Students will use applied research practices and communication tools to expand their existing media literacy skills and to design innovative presentations and projects that take advantage of new media.
Grading Basis: Letter Grade

MDST 2001 (3) Introduction to Global Media
Explores a world in which new media have enabled humans to be joined in a global system of socio-cultural and economic relations. Underscores the political dimensions of global media, the convergence of global culture, and the ways in which values are produced. Prepares students to become critical of media practices and empowered as active civic participants.
MDST 2002 (3) Media and Communication History
Examines the historical development of communication forms, tools, technologies and institutions (orality, writing, printing, photography, film, radio, television, computers, internet); their influence on culture (forms of expression and social relationships); and their impact on social and individual experience. Applies knowledge of communication history to contemporary social issues and problems in media and society, domestically and internationally.

MDST 2010 (3) Media and Social Movements
Surveys the history and contemporary efforts of social activists to bring about democratic media reform and examines how media are used as tools for connecting and advancing social movements. Emphasis is given to media activism and social movements in the United States, as well as to similar and related transnational activism and movements.

Requisites: Requires a prerequisite course of MDST 1001 (minimum grade C-).

Grading Basis: Letter Grade

MDST 2011 (3) Disruptive Entrepreneurship in the Internet's New Economies
Grapples with the disruptive business models that drive the online economy: both the dominant ones and the alternatives vying to transform it. In addition to the Silicon Valley model, this course explores lesser known internet economies around the world and proposals for a more equitable online future.

Grading Basis: Letter Grade

MDST 2012 (3) Hacker Culture
Chronicles the evolution of hacker culture from its origins as a geeky subculture to a criminal underground to its adaptation by CEOs. Considers how hacker formations sometimes represent a new kind of politics, sometimes a rejection of politics. Explores the contested figure of the hacker in the past, present and science-fiction of the internet.

Grading Basis: Letter Grade

MDST 2031 (3) Documentary and Social Change
Explores how local, national and international filmmakers use documentaries to provide cultural observation, education, entertainment and memories to making sense of and transform the realities of contemporary societies. Emphasizes contemporary issues and practices in the production of documentaries, including the participatory means such as the crowdsourcing of documentary footage and the use of newer, non-theatrical means of distribution.

Grading Basis: Letter Grade

MDST 2032 (3) Visual Literacies & Design
Examines visual cultural experiences from critical perspectives and social effects. The course acquaints students with visual design in ways that include image-making as a cognitive and perceptual practice, the production of visual significance and meaning, and the role of technology in creating and understanding mediated images. Students will use a variety of means to produce visual narratives.

Grading Basis: Letter Grade

MDST 3001 (3) Media Research
Introduces theoretical approaches and practices used to analyze the content, structure, influence and contexts of media. Explores factors shaping media, including: politics, economics, technology, cultural traditions. Studies concepts, theoretical approaches and research methods of media criticism, and adopts and adapts these frameworks in analyses of mediated communication.

MDST 3002 (3) Digital Culture and Politics
Examines issues at the intersection of digital media, culture and politics, such as regulation and network architecture, piracy and hacking, and grassroots activism. Engage with a range of theories about cultural politics, democracy, liberalism and neo-liberalism in relation to digital information and communication technologies.

MDST 3021 (3) Comic Books: Culture and Industry
Explores practices of comic culture across a broad range of graphic stories. Using culture studies approaches to industry analysis and fan community discourses, students examine culture created through and around graphic texts, particularly representations of race, gender, sexuality, institutions and ideology. Considers the political economy of the comic industry, the struggles of independent producers and active fan practices.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

MDST 3022 (3) Social Media Cultures
Expands students’ understanding of network cultures, including how social media tools influence conversation strategies, how interfaces interact with perceived communication values, and how network boundaries reinforce distinct cultural identities. Students engage in projects to measure network behavior, create strategic messages to achieve communication and information goals, and to engage in social listening.

Requisites: Restricted to students with 55 or more hours.

Grading Basis: Letter Grade

MDST 3021 (3) Media, Culture and Globalization
Surveys the political and economic structures of media system in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3201 (3) Media Industries and Economics
Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Core Curriculum and General Electives
MDST 3331 (3) Sports-Media Complex
Explores the rich connections between the sports industry, spectating, the media complex and social life. Using theories of cultural studies and drawing on specific examples from the sports world, students focus on how sport shapes and reinforces understandings of gender, race, class and sexuality. Addresses major questions about the political economy, commodification, mediation and reception of the spectacle of the sports complex, as well as politics and cultural consequences of its transnational reach.
Equivalent - Duplicate Degree Credit Not Granted: JRNJ 3804
Requisites: Restricted to College of Media, Communication, and Information (CMCI) students with a minimum of 45 credit hours completed, or non-CMCI students who have completed CMCI 2001 (minimum grade D-).
Grading Basis: Letter Grade

MDST 3341 (3) Designing Alternative Media Platforms
Explores alternative forms of media to exhibit student research and build connections with community leaders. Surveys alternative exhibition traditions such as Social Practice, Relational Aesthetics and Craftivism to expand the impact of student work, culminating in the design of a unique cultural event focusing on each individual's research. Software/digital presentation skills.

MDST 3401 (3) Media, Food and Culture
Explores the topic of food as a subject of popular culture: essential to life and the enter of local, national and transnational conflict and social movements. Students will examine media representations of food, what our food choices say about us and what the mediated politics of food mean for our collective future.
Requisites: Requires a prerequisite course of MDST 2002 (minimum grade C-).
Grading Basis: Letter Grade

MDST 3711 (3) Media and Popular Culture
Examines culture in the form of discourse, symbols, and texts transmitted through the media. Explores the relationship between such mediated culture and social myth and ideology.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3791 (3) Media and the Public
Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of "the public sphere" and "public opinion" have long been linked to debates about the proper relationship between media and democratic citizenship.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCIU) or Program in Journalism Mass Communication (JOURU) majors only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4003 (3) Digital Media Production and Design
Introduces techniques, technologies of online development and online media presentation. Contextualizes the technical and social implications of the Internet through historical and critical perspectives. Students engage in online media projects designed to emphasize the affordances, conventions and usability considerations of effective online communication.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5003
Requisites: Restricted to students with 55 or more hours.
Grading Basis: Letter Grade

MDST 4111 (3) Crime, Media and Contemporary Culture
Addressed in the course are a range of issues from within a variety of literatures that consider the ways in which the media cover crime. Those literatures are particularly drawn from sociology and the emergent, and increasingly dominant, field of cultural criminology. The focus of the class is to get students to think of "crime" as a constructed and mediated concept and set of narratives that often create problematic public "understandings".
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4211 (3) Asian Media and Culture
Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5211
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).
Additional Information: Departmental Category: Asia Content

MDST 4221 (3) Media Technology and Cultural Change
Explores how media technologies affect social orders and shape cultural practices across the globe. Compares and critically evaluates different theories of technology, emphasizes the social construction of technology, asks how media technologies inform conceptions of social reality and individual identity and considers how media technologies can be understood across a range of academic disciplines.
Requisites: Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).
Grading Basis: Letter Grade

MDST 4231 (3) Youth Media: Culture and Politics
Emphasizes the sociological understandings of youth cultures, identities and practices in relation to media and politics. Topics include the influences of consumer branding, participatory culture, youth media production and representation, use of social media, mobile phones, gaming, and other digital media, and integrating them around themes of youth styles, gender, ethic, political identities, consumer culture, social behavior and other trends.
Requisites: Requires prerequisite course of MDST 3711 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).
Grading Basis: Letter Grade

MDST 4241 (3) Visual Culture and Human Rights
Provides the critical tools needed to understand images and their impact on the recognition and restitution of human rights claims.
The course examines both visual practices (e.g. documentation, archiving, witnessing, advocacy and surveillance) and visual media (e.g. photography, film, video, drone and satellite images), unpacking the growing entanglement between visual culture and human rights.
Requisites: Restricted to students with 55 or more hours.
Grading Basis: Letter Grade

MDST 4311 (3) Mass Communication Criticism
Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media.
Equivalent - Duplicate Degree Credit Not Granted: MDST 5311
MDST 4331 (3) Gender, Race, Class, and Sexuality in Popular Culture
Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4341 (3) International Media and Global Crises
Examines strengths and limits on media’s role in globalized crises (e.g., financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Media Studies (MDST) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Asia Content

MDST 4361 (3) TV and the Family in American Culture and Society
Examines the history and character of two central institutions in American society—the family and television—to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4371 (3) Media and Religion
Examines the way religion uses media as a social and political force. Introduces the major themes and trends in the mediation of religion and the religious infusion of the media in professional, popular, and emerging media contexts.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4372 (3) Islam, Pop Culture and Media
Explores the shifting boundaries of cultural and religious Muslim identities through media representation and production in Muslim-majority countries and in the West. Using popular culture as a complex site of struggle, this course examines how Muslims address questions of gender, ethnicity, class, democracy, sexuality, religion, and modernity in a variety of media forms and practices.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

MDST 4401 (3) Fan and Audience Studies
Considers how audiences and fans are conceptualized, how they are constructed by media enterprises and how they operate within their cultural ecosystems. While media shape the sociocultural, political and economic dimensions of the social world, fan studies suggest a more active set of practices form sites of resistance and enable a greater degree of influence over cultural production.

Requisites: Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (all minimum grade C-).

Grading Basis: Letter Grade

MDST 4601 (3) Media Law, Policy and Ethics
Explores ethical and legal complexities of information and communication technology. Combines real-world inquiry with creative speculation to probe everyday ethical dilemmas faced by digital consumers, creators and coders, as well as policy-makers. Explore themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

MDST 4841 (1-4) Undergraduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4871 (1-3) Special Topics
Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with a minimum of 75 hours taken.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4931 (1-6) Internship
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Prerequisite of MDST 2002 and MDST 3001 and MDST 3002. (All require minimum grade of C-). Restricted to MDST majors

Additional Information: Departmental Category: Core Curriculum and General Electives

Media Studies - Bachelor of Arts (BA)

The Bachelor of Arts in media studies program emphasizes the creative and analytical skills needed to make sense of current and future trends in media, and to gain a deep understanding of the history and development of various means and forms of communication.

Explorations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.

Requirements

Required Courses and Credits

Students pursuing the BA in media studies complete 12 courses, for 36 credit hours. MDST requires an internship (3 credit hours; MDST 4931) in a field of the student’s choice, and a capstone course (3 credit hours; MDST 4221 or MDST 4401), both usually completed in the senior year.

MDST 4931 Internship 3

Students would then take six hours of Media Practice courses offered by MDST, other departments or programs in CMCI or departments outside CMCI. The Media Practice component consists of courses involving hands-on work in the CMCI Departments of Advertising, Public Relations and Media Design; Journalism; Information Science or Critical Media Practices; or in the Creative Technology and Design program in ATLAS. Courses meeting this requirement include: MDST 1003, MDST 2010, MDST 2011, MDST 2012, MDST 2031, MDST 2032, MDST 3341, MDST 4003, ATLS 1300, ATLS 2000, ATLS 2100, ATLS 2200, ATLS 2300, CMDP 2500, CMDP 2860, CMDP 2870, CMDP 3510, CMDP 3600, CMDP 3610, CMDP 3620, CMDP 3700, CMDP 3720, CMDP 3810, CMDP 3820, CMDP 3830, CMDP 3840, CMDP 3860, CMDP 4610, CMDP 4620, CMDP 4640, CMDP 4900, INFO 1111, INFO 1121, INFO 4602, JRNL 2001, JRNL 3102, JRNL 3552, JRNL 3614 and JRNL 3644.

Electives/Areas of Concentration
Select three courses from any of the following: 2

Media, Technology & Society
MDST 2010 Media and Social Movements
MDST 2011 Disruptive Entrepreneurship in the Internet’s New Economies
MDST 2012 Hacker Culture
MDST 3331 Sports-Media Complex
MDST 3341 Designing Alternative Media Platforms
MDST 3401 Media, Food and Culture
MDST 3711 Media and Popular Culture
MDST 4111 Crime, Media and Contemporary Culture
MDST 4331 Gender, Race, Class, and Sexuality in Popular Culture
MDST 4361 TV and the Family in American Culture and Society
MDST 4371 Media and Religion
MDST 4372 Islam, Pop Culture and Media
MDST 4601 Media Law, Policy and Ethics

Global Media Industries & Culture
MDST 2001 Introduction to Global Media
MDST 2010 Media and Social Movements
MDST 3201 Media, Culture and Globalization
MDST 3321 Media Industries and Economics
MDST 3331 Sports-Media Complex
MDST 3401 Media, Food and Culture
MDST 4211 Asian Media and Culture
MDST 4371 Media and Religion
MDST 4372 Islam, Pop Culture and Media
MDST 4601 Media Law, Policy and Ethics

Advocacy, Entrepreneurship & Social Change
MDST 2010 Media and Social Movements
MDST 2011 Disruptive Entrepreneurship in the Internet’s New Economies
MDST 2012 Hacker Culture
MDST 2031 Documentary and Social Change
MDST 3321 Media Industries and Economics
MDST 3341 Designing Alternative Media Platforms
MDST 3401 Media, Food and Culture
MDST 3711 Media and Popular Culture
MDST 3791 Media and the Public
MDST 4231 Youth Media: Culture and Politics
MDST 4601 Media Law, Policy and Ethics

Secondary Area of Study
In addition to coursework required for the major, all students in MDST must complete a secondary area of study outside of MDST. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree or any credit-based certificate program of at least 12 credit hours.

Requirements
A minimum of 18 credit hours is required for the minor, including 9 credit hours of courses numbered 3000 or above.

All courses counted toward the minor must be completed with a grade of C- or better. No pass/fail work may be applied. No more than six credit hours of transfer work may be applied to the minor, including 3 hours of upper-division credit. The grade point average for minor degree coursework must be equal to 2.00 or higher.

Learning Outcomes
Upon completing the program, students will have:

- Awareness of communication and power within and across networks.
- An understanding of the historic and contemporary systems of inequity across social identities, nationalities, socioeconomic class and the role of media, communication and information in both creating and addressing them.
- Competence to conduct research using at least one method appropriate to media research.
- The ability to produce compelling and effective problem-solving in their given fields.

Media Studies - Minor
The minor in media studies (MDST) emphasizes the creative and analytical skills needed to make sense of current and future trends in media, and to gain a deep understanding of the history and development of various means and forms of communication.

Exploitations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.
Sports Media

Sports Media - Minor

The mission of the minor in sports media is to broaden students’ understanding of the role of sports in society by enhancing the quality of public communication on sports, especially the quality of sports journalism and the delivery of sporting events. The goal of the minor is to take the student’s interest in sports and provide perspective so that they can tell a meaningful story of the sport either through journalistic reporting, media relations or entertainment.

Additional information on the minor may be found on CMCI’s Sports Media Minor (https://www.colorado.edu/cmci/sportsmediaminor/) webpage.

Requirements

Required Courses and Credits for CMCI Students

Students who minor in journalism may not use the same JRNL courses for the JRNL minor and for the sports and media minor.

Total Credit Hours 18

1 The minor requires either MDST 1001 or MDST 1002 as a core course. The other introductory course may be used as an elective towards the 18 required hours, but the minor must still result in 18 hours (the introductory course used as a core requirement does not also count as an elective).

Total Credit Hours 15

1 JRNL majors may not use any JRNL classes to meet the requirements in this section.

2 If students would like to take a practicum or internship: Practicums are preferred; students must petition the minor’s director to be able to complete internship credit. The internship does not replace the internship required for the major. Prerequisites for either the practicum or the internship are MDST 3331 or JRNL 3804 and at least junior standing.
If students would like to take a practicum or internship: Practicums are preferred; students must petition the minor’s director to be able to complete internship credit. Prerequisites for either the practicum or the internship are CMCI 2001 and MDST 3331 or JRNL 3804 and at least junior standing.

Music

The CU Boulder College of Music inspires artistry and discovery, together.

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers seven undergraduate and graduate degrees in 24 fields of study, along with an array of interdisciplinary opportunities, including certificates in music technology and entrepreneurship.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

The college maintains a ratio of approximately one tenure-track faculty member for every eight students. This close interaction inspires and equips students to develop their talents, refine their passions and ultimately succeed in their professional endeavors.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; broad cultural programs (concerts, recitals, lectures) for the university and Boulder communities; favorable conditions for research in music; and service activities to the state and nation.

The Bachelor of Arts in Music, Bachelor of Music and Bachelor of Music Education degrees are granted by the university, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must complete an online graduation application and schedule a final checkout appointment by December 15 for May/August graduation and by October 1 for December graduation.

Entrepreneurship Center

The Entrepreneurship Center for Music (ECM) is a national leader in professional development for musicians. The ECM equips today’s music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offerings include courses for credit, an undergraduate certificate in music entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 111-seat Recital Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky Auditorium.

The college’s outstanding Howard B. Waltz Music Library is considered to be among the nation’s most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

Performances

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, visit the college’s Events (http://www.colorado.edu/music/events/) webpage.

Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers
Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

**Major Fields & Degrees**

Undergraduate degrees include the bachelor of music (BM), the bachelor of arts in music (BA) and the bachelor of music education (BME). Students may also elect to earn a certificate in music technology or music entrepreneurship in conjunction with their degree. In addition to a substantial core of studies in music, the BA in music program allows a wide choice of study in areas outside of music. BA areas of concentration include: composition, musicology, performance and jazz studies. The major emphasis areas in the BME program are: choral, choral-general, instrumental and instrumental-general.

Incoming freshmen and transfer students in the College of Music are declared as music majors at the beginning of their first semester. The music minor may be declared when an active student has a CU Boulder GPA (as early as second semester, freshman year).

Students may pursue double degrees in music and an outside field such as engineering, business, etc. Questions may be directed to the Academic Services office, College of Music, 303-492-0037, or ugradmus@colorado.edu.

**Policies & Requirements**

**Academic Excellence**

**Honors at Graduation**

Students achieving a cumulative GPA of 3.70–3.79 graduate with honors, 3.80–3.89 with high honors and 3.90–4.00 with highest honors. These students are recognized at commencement.

**Scholarships and Awards**

A number of scholarships and awards are designed specifically for students in the College of Music. Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory degree progress by:

1. demonstrating adequate performance in weekly applied lessons, ensemble and scholarship auditions, applied proficiencies/juries, and recitals/preview;
2. maintaining at least a 3.0 cumulative grade point average in those classes that count toward the music degree; and
3. successfully completing at least two-thirds of the credit hours attempted while a music major at CU Boulder.

**Academic Standards**

**Academic Ethics**

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the CU Boulder Honor Code (see the Academic Integrity (p. 22) section).

**Scholastic Requirements**

To remain in good academic standing, a student must maintain at least a 2.00 cumulative grade point average (GPA) and make satisfactory progress toward the degree as defined by the College of Music and area faculty.

First semester freshmen or transfer students are given a grace semester and will be placed on academic alert if the cumulative GPA is below 2.00. After the second semester, if the semester GPA is above 2.00 but the cumulative is below 2.00 then the student is placed on academic probation. If the second semester and cumulative GPAs remain below 2.00 then the student is placed on academic suspension.

Academic probation is an official notification that a student's grades are unsatisfactory. Any undergraduate student who has a cumulative or semester grade point average below 2.00 is automatically placed on academic probation for the following three semesters. (Cumulative GPA is calculated on grades earned at this university). Students placed on academic probation will be limited to one ensemble and 15 credit hours.

If a probationary student's GPA (semester and/or cumulative) at the end of any probationary semester is not 2.00 or above it will result in automatic suspension. Any undergraduate student who has a cumulative or semester GPA below 1.00 is automatically suspended without a probationary period.

While on suspension, students may not register for regular day classes during the fall or spring semester on any CU campus and are not considered eligible for graduation. To regain good academic standing, suspended students must earn a semester GPA of 2.00 or higher and raise their cumulative GPA to 2.00 or above during the following term by successfully completing at least 12 credit hours (with no withdrawals, no incomplete grades, and no courses taken pass/fail) through the Division of Continuing Education and Professional Studies or summer session.

Courses taken at other campuses or institutions will not be used for purposes of reinstatement, but credits earned may be transferred according to normal procedures and policies after reinstatement and readmission. Suspended students who raise their cumulative GPA to 2.00 or above may then petition for readmission and receive a personal hearing before the associate dean. Suspended students who do not raise their cumulative GPA to 2.00 or above are dismissed from the college and university. Students who have been dismissed must reapply for admission to the university after being reinstated by the college.

Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, enroll in ensemble and maintain a minimum cumulative GPA of 3.00. Students who have a cumulative GPA below 3.00 will be placed on scholarship probation for a maximum of two semesters (consecutive or cumulative), provided the GPA improves each semester. Students on scholarship probation who do not earn a cumulative GPA of 3.00 or higher by the end of the probationary period will have their scholarships revoked.
Appeals

Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog. Appeals should be directed to the Associate Dean for Undergraduate Studies. College of Music policies are in addition to the campus policies.

Credit and Enrollment

Admission Requirements

In addition to the entrance requirements of the university outlined in Undergraduate Admission in the General Information section, freshman and transfer students must meet College of Music entrance requirements. Successful College of Music applicants have extensive prior experience in music (including private study), the ability to read and sight-read music notation, an understanding of music fundamentals or basic music theory and elementary piano skills. Students with appropriate skill in piano sight reading and keyboard harmony may be able to test out of all or part of the keyboard musicianship requirement included in their degree plan. Students with an AP Music Theory test score of 4 are credited with one semester of music theory and aural skills, and those with a test score of 5 are credited with two semesters.

Auditions

An audition is required for all prospective undergraduate music majors. Undergraduate auditions are held in Boulder on selected Saturdays in February. Alternate audition dates may also be scheduled if necessary. If travel distance is prohibitive, prospective students may substitute a high-quality recording. Applicants should identify themselves by name and list selections and titles at the beginning of the recording. In order for students to be fully considered for financial assistance, live auditions should be completed during the general audition weekends in February or recordings should be received by Feb. 15. Students should prepare a 10–20 minute audition program in accordance with the audition requirements listed on the college’s Auditions (http://www.colorado.edu/music/admissions/prospective-undergraduates/auditions/) webpage.

Contact the undergraduate office at 303-492-8468 or ugradmus@colorado.edu for more information.

Admissions decisions for music composition applicants are based on a review of scores and sound recordings for at least three contrasting works. If the portfolio of scores and recordings is considered acceptable for admission to the music composition program, applicants are then invited to schedule an instrumental/voice audition.

Admissions decisions for music education applicants are based on academic qualifications, audition results and an interview conducted by two or more music education faculty members. Interviews address written and verbal communication skills, motivation and goals related to music teaching, prior music teaching experiences and affective characteristics associated with effective music teachers. For more information about music education interviews, visit the college’s Music Education (http://www.colorado.edu/music/departments/music-education/) webpage and contact the music education chair.

Transfer Students

Transfer students from within the university and from other universities must meet the general requirements of the university and the specific requirements of the College of Music, including the audition. A minimum GPA of 2.0 for students transferring from within the university and 2.75 for students transferring from other universities is required. See the undergraduate Admissions (p. 25) section for specific requirements.

Attendance Requirements

Successful work in the College of Music is dependent on regular attendance in all classes. At the beginning of each semester, instructors will inform students of policies governing grading and attendance in each class. Students are expected to attend classes and comply with the attendance requirements specified by their instructors. For ensembles and other performance classes, attendance at dress rehearsals, major concerts and other approved/sanctioned performances, as listed in the course syllabus, is also required.

Ensembles

All undergraduate students enrolled in applied music must participate in a university ensemble appropriate to and required by their degree program. (Students enrolled in conducting courses must concurrently be enrolled in a conducted ensemble.) Voice performance majors are not required to be in ensembles during the semester of their senior recital, and bachelor of music education students are exempt from ensemble participation during the student teaching semester. Any student who studies applied music beyond degree requirements must participate concurrently in a university ensemble. Double majors need be in only one ensemble at a time.

Sophomore Proficiency

Students must pass a variety of jury tests and proficiency exams during their degree work. Each applied area has different requirements, so students need to consult the chair of their area and/or studio professor. However, all students must pass a sophomore proficiency exam. Students who cannot pass this exam receive an incomplete grade and cannot progress to the junior level of applied study until the proficiency is achieved. Studio professors provide students with proficiency and repertoire requirements.

Course Load

The normal academic load for an undergraduate student in the College of Music is 15–17 credit hours. Schedules of fewer than 12 or more than 19 credit hours must have approval of the associate dean for undergraduate studies of the College of Music.

Dropping a Course

Students should adhere to the deadlines posted on the Office of the Registrar website for dropping a course each semester. After a certain date each semester, a special action form signed by the instructor and associate dean for undergraduate studies is required to drop a course.

Pass/Fail Option

The pass/fail option for 12 credit hours is open only to Bachelor of Music and Bachelor of Arts in Music students. Music education students may only use the pass/fail option for student teaching. Pass/fail credit hours are to be selected from nonmusic courses and are in addition to those that may be taken in honors. Courses so elected are taken according to the pass/fail policies of the college or school concerned.

Pass/fail credit hours that transfer students can apply toward degree requirements from departments within the university are limited to 1 in every 8 credit hours earned in the College of Music.

Residence Requirement

Of the credit hours required for an undergraduate degree, the last 56 credit hours must be completed in residence in the College of Music. This may be reduced by the associate dean for undergraduate studies for excellent work done in this university and for high scholarship exhibited.
at previous institutions attended. In no case shall the minimum be fewer than 40 credit hours distributed over three semesters. At least 9 credit hours in applied music (private instruction) must be earned in this college for the degrees bachelor of music and bachelor of music education, and 6 credit hours for the bachelor of arts in music.

**Student Work**
Any recital required for graduation is recorded. Arrangements are to be made through the College of Music Operations Office, and a recording fee is charged. The original recording is placed in the Music Library.

**Programs of Study**

**Music**
Undergraduate degrees include the Bachelor of Music (BMus) and the Bachelor of Arts in music (BAMus). Students may also elect to earn a certificate in music entrepreneurship, music technology or music theory in conjunction with their degree.

In addition to a substantial core of studies in music, the BAMus program allows a wide choice of study in areas outside of music.

BMus areas of concentration include: composition, musicology, performance and jazz studies.

**Bachelor’s Degrees**

- Music - Bachelor of Music (BMus) (p. 938)
- Music - Bachelor of Arts in Music (BAMus) (p. 936)

**Minor**

- Music - Minor (p. 950)

**Certificates**

- Music Entrepreneurship - Certificate (p. 950)
- Music Technology - Certificate (p. 951)
- Music Theory - Certificate (p. 951)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Assistant Professor; BM, Oberlin Conservatory

Smith, Jeremy L. (https://experts.colorado.edu/display/fisid_118265/)
Professor; PhD, University of California, Santa Barbara

Socolofsky, Annika
Assistant Professor; PhD, Princeton University

Spera, Nicolo Ruggero Ferruccio (https://experts.colorado.edu/display/fisid_148406/)
Assistant Professor; DMA, University of Colorado Boulder

Spillman, Robert
Professor Emeritus

Stanley, William J. (https://experts.colorado.edu/display/fisid_103616/)
Associate Professor; DMA, University of Illinois at Urbana–Champaign

Steinmetz, Branden (https://experts.colorado.edu/display/fisid_165415/)
Instructor; DMA, Michigan State University

Swadener, Marc
Professor Emeritus

Swanson, Elizabeth (https://experts.colorado.edu/display/fisid_159726/)
Assistant Professor, Faculty Director; DMA, Northwestern University

Teitelbaum, Benjamin Raphael (https://experts.colorado.edu/display/fisid_151338/)
Assistant Professor; PhD, Brown University

Tetreault, Michael
Instructor; MM, Royal Academy of Music

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Thomas, Susan (https://experts.colorado.edu/display/fisid_163986/)
Professor, Faculty Director; PhD, Brandeis University

Thornton, Michael Robert (https://experts.colorado.edu/display/fisid_116318/)
Professor; BM, Temple University

Walter, Douglas W. (https://experts.colorado.edu/display/fisid_101811/)
Professor; DMA, Temple University

Waters, Keith John (https://experts.colorado.edu/display/fisid_107518/)
Professor; PhD, University of Rochester

Weiss, Meta (https://experts.colorado.edu/display/fisid_164484/)
Senior Instructor; DMA, The Juilliard School

Wetherbee, Charles Tyler (https://experts.colorado.edu/display/fisid_151515/)
Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles
Professor Emeritus
Courses

MUSC 1081 (3) Intensive Music Theory
Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.

Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher
Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1101 (2) Semester 1 Theory
Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1111 (2) Semester 2 Theory
Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1
Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading
Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 1326 (2) Guitar Musicianship and Accompanying
Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to guitar performance majors.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 1544 (1) Italian Diction
Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Vocal

MUSC 1554 (1) English Diction
Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.

Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Vocal

MUSC 1802 (3) Introduction to Musical Styles and Ideas
Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 2041 (1) Applications of Music Technology (5-week segment)
Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

MUSC 1081 (3) Intensive Music Theory
Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.

Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher
Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1101 (2) Semester 1 Theory
Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1111 (2) Semester 2 Theory
Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1
Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading
Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 1326 (2) Guitar Musicianship and Accompanying
Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to guitar performance majors.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 1544 (1) Italian Diction
Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Vocal

MUSC 1554 (1) English Diction
Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.

Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Vocal

MUSC 1802 (3) Introduction to Musical Styles and Ideas
Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.

Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 2041 (1) Applications of Music Technology (5-week segment)
Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade
MUSC 2061 (3) Introduction to Music Technology
Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 2061 and CMDP 3860
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2081 (2) Prepared for the Soundcheck
Provides an overview of the recording process from the performer’s perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2860
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2091 (2) Recording Techniques
Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2870
Requisites: Requires prerequisite course of MUSC 2081 or MUEL 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2101 (2) Semester 3 Theory
Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2103 (2) Introduction to Music Education
Introduces students to the broad range of skills and responsibilities inherent to the music education profession. Explores current topics in public school music teaching while developing teaching skills through supervised field experience. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 1103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 2111 (2) Semester 4 Theory
Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSCU) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2121 (1) Aural Skills Lab, Semester 3
Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.
Requisites: Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2131 (1) Aural Skills Lab, Semester 4
Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSCU) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2325 (2) Applied Harmony for the Keyboard
Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2365 (2) Introduction to Accompanying
An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2608 (1) Alexander Technique
Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception, physical coordination and mind-body awareness. Applies these contexts to specific musical activities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5608
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2772 (3) World Musics: Asia and Oceania
Highlights music in Asia and Oceania using current ethnomusicological materials.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Ethnomusicology

MUSC 2782 (3) World Musics: Africa, Europe, and the Americas
Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Ethnomusicology
**MUSC 2918 (2) Building Your Music Career**
Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.
**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5918
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.
**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 2988 (1) Introduction to Music Research**
Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.
**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 2997 (1) Sophomore Proficiency**
To be completed by the second semester of the sophomore year.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.
**Grading Basis:** Pass/Fail

**MUSC 3013 (1) String Class**
For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.
**Requisites:** Restricted to College of Music (MUSCU) majors or graduate students only.
**Additional Information:** Departmental Category: Music Education

**MUSC 3023 (1) Woodwind Class**
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.
**Additional Information:** Departmental Category: Music Education

**MUSC 3033 (1) Brass Class**
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.
**Additional Information:** Departmental Category: Music Education

**MUSC 3041 (2) Instrumentation and Arranging**
Learn to create professional arrangements for a diverse combination of instruments and/or voices. The course will work through instrumentation, score and part preparation, and issues of orchestration to prepare music student to create successful arrangements for a wide range of concert music settings. Final arranging projects will be geared towards individual interests.
**Requisites:** Requires prerequisite course of MUSC 2101 and MUSC 2121 (all minimum grade C). Restricted to College of Music (MUSC) students only.

**MUSC 3043 (1) Percussion Class**
Provides an introduction to techniques and pedagogical principles necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all string, voice and choral music education students. Offered fall only.
**Grading Basis:** Letter Grade

**MUSC 3051 (2) Jazz Improvisation I**
Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.
**Recommended:** Prerequisite for non-jazz majors MUSC 2111.
**Additional Information:** Departmental Category: Theory and Composition

**MUSC 3061 (2) Jazz Improvisation II**
Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.
**Requisites:** Requires prerequisite course of MUSC 3061 (minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.

**MUSC 3071 (2) Jazz Theory and Aural Foundations I**
Focuses on theory and analysis of jazz progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.
**Requisites:** Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
**Additional Information:** Departmental Category: Theory and Composition
MUSC 3091 (3) Jazz Theory and Aural Foundations 2
Presents the grammar and syntax of jazz and is the second course of the sequence. Units of study include elements of form, harmonic substitution, reharmonization, non-standard forms and harmonic progressions. Post-tonal concepts as they relate to jazz are introduced as well as foundational studies in jazz rhythm. Aural studies of all theoretical material is integrated throughout the semester.
Requisites: Requires prerequisite course of MUSC 3081 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 3133 (2) Teaching General Music I
Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3153 (2) Teaching Woodwind Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3163 (2) Teaching String Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3176 (2) Conducting I
Introduces conducting and rehearsal techniques. Performance participation in the appropriate ensemble (band, choir or orchestra). Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3186 (2) Conducting II
Introduces conducting and rehearsal techniques. Department enforced corequisite: performance participation in the appropriate ensemble (band, choir, or orchestra). Offered spring only.
Requisites: Requires prerequisite course of MUSC 3176 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices
Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.
Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3223 (2) Teaching Brass Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3226 (1) Percussion Literature and Pedagogy for Undergraduate Percussion Majors
Explores, examines and analyzes percussion music, performance techniques and how to teach them through readings, discussion, analysis, extensive listening, and score study. The course is designed to meet the specific needs and requirements of the individual student.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3243 (2) Teaching Percussion Instruments
Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all instrumental band music education students. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3253 (2) Jazz Techniques for the Music Educator
Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisites MUSC 1111 and MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 3256 (2) Guitar Pedagogy
Survey and develop appropriate teaching materials and techniques; learn how to identify and address the most common technical problems experienced by guitar students; create strategies for how to avoid the development of problems in guitar beginners.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3273 (2) String Pedagogy and Literature
Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisites MUSC 2103 and MUSC 3163.
Additional Information: Departmental Category: Music Education
MUSC 3345 (2) Piano Pedagogy 1
Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3355 (2) Piano Pedagogy 2
Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3363 (2) Marching Band Techniques
Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.
Requisites: Requires prerequisite course of MUSC 2103 and EMUS 1287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3444 (1) French Diction
Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Recommended: Prerequisite MUSC 3464.
Additional Information: Departmental Category: Music Education

MUSC 3464 (1) German Diction
Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 3642 (3) History of Jazz 1
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 3652 (3) History of Jazz 2
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from the 1950's to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered spring only.
Requisites: Requires a prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3772 (3) West African Music and Culture in Ghana
Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 3772
Requisites: Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.
Additional Information: Departmental Category: Musicology

MUSC 3802 (3) History of Western Music 1
Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.
Requisites: Requires prerequisite course of MUSC 1111 or MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Musicology

MUSC 3812 (3) History of Western Music 2
Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Musicology

MUSC 3997 (1) Junior Recital
To be completed by the second semester of the junior year.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4001 (2) New Musical Styles and Practices
Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix of analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition
MUSC 4011 (2) 16th Century Counterpoint
Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5011
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4012 (3) African Music
Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 4012 and MUSC 5012
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4021 (2) 18th Century Counterpoint
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4031 (2) Jazz Arranging 1
Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.
Requisites: Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4041 (2) Orchestration
Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4061 (2) Tonal Analysis
Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4071 (2) Post-Tonal Theory and Analysis
Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4078 (1) Piano Technician for Pianists
Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5078
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite piano majors.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4091 (2) Jazz Arranging 2
Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.
Recommended: Prerequisite MUSC 3081.
Additional Information: Departmental Category: Theory and Composition

MUSC 4101 (1-3) Theory and Aural Skills Review
Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4103 (1) Introduction to Student Teaching
Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.
Requisites: Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Interdepartmental

MUSC 4106 (2) Guitar Literature
An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5106
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music
MUSC 4111 (2) Composing at the Computer
Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4112 (3) Ethnomusicology
Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4113 (3) Teaching General Music 2
Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4121 (3) Topics in Music Technology
Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4122 (3) Music in Jewish Culture
Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, family and liturgy. Includes opportunities for creative and critical engagement with Jewish music.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4122
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 4133 (3) Student Teaching Practicum
Offers practice teaching under the guidance of a master music teacher.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4142 (3) American Indian Music
Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4143 (2) Topics in Choral Music Education
Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5143
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4151 (2) Topics in Music Analysis
Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade B).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Theory and Composition

MUSC 4152 (3) East Asian Music
Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music’s relationship to religion, politics, language, literature, dance and theatre.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4153 (1) Percussion Class and Pedagogy
Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4161 (2) Advanced Jazz Composition and Analysis
Provides in depth listening, score study, and analysis, exploring major composers in jazz and their innovations in composition. "Foundational" topics concerning melody, form, and orchestration are studied to provide a framework for further analysis. Influences of western art music, American folk and popular music considered. Final projects to be performed and recorded by a CU jazz ensemble.
Requisites: Requires prerequisite of MUSC 3091 and MUSC 3081 (all minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.
Grading Basis: Letter Grade
MUSC 4163 (2) Choral Literature for School Ensembles
Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4168 (3) World Music Theories
Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5168
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Recommended: Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.
Additional Information: Departmental Category: Theory and Composition

MUSC 4171 (2) Advanced Jazz Improvisation and Analysis
Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Playing a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.
Repeatable: Repeatable for up to 12.00 total credit hours.
Grading Basis: Letter Grade

MUSC 4176 (2) Conducting 3
This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5176
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of MUSC 3186 (minimum grade B-). Restricted to College of Music undergraduates majoring in Music Education (MUSE) only.
Grading Basis: Letter Grade

MUSC 4191 (2) Advanced Recording
Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiplemicrophones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.
Requisites: Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4193 (1) Student Teaching Seminar
Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4194 (3) Advanced Jazz Improvisation and Analysis
Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Playing a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.
Repeatable: Repeatable for up to 12.00 total credit hours.
Grading Basis: Letter Grade

MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues
Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theory and practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to College of Music (MUSC) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 4203 (1) Music Methods Practicum
Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4223 (2) Secondary Music Teaching Approaches
Prepares students to teach and facilitate musical learning in non-performance secondary music classes. Includes units on music technology, music theory, music appreciation and class guitar. Connects experiential components to strategies for teaching and project design for middle and high school classrooms. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-).
Grading Basis: Letter Grade

MUSC 4313 (3) Teaching Choral Music
Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5313
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 4323 (3) Differentiating Instruction in K-8 Music Classrooms
Designed to focus on differentiating and individualizing instruction for K-8 music students representing diverse cultural, linguistic, and ability backgrounds. Includes developmental and practical orientations to pedagogical issues including planning, instruction and assessment. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning and engagement in music instruction.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Grading Basis: Letter Grade

MUSC 4325 (2) Keyboard Literature 1
Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard
MUSC 4335 (2) Keyboard Literature 2
Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4336 (2) Brass Pedagogy
Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5336
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4346 (2) Woodwind Pedagogy
Analyzes pedagogical techniques and philosophies of teaching wood instruments, and examines materials. Offered every other spring term.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4405 (2) Basso-Continuo Accompaniment
Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5405
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4443 (3) Teaching Instrumental Music
Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5443
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4608 (1) Advanced Studies in the Alexander Technique
Continues investigation of the benefits of Alexander’s principles regarding mind-body awareness begun in MUSC 2608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5608
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2608 (minimum grade C). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4666 (3) Chamber Music Lit WW/Prc
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4712 (3) Renaissance Music
Provides a repertory and analysis of polyphonic music, 1400-1600.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5712
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4752 (3) Women in Music
Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5752
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4772 (3) History of Opera
Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5772
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4802 (3) Studies in 20th Century Music
Offers intensified work in history of music in the 20th century. Topics vary from year to year.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5802
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4852 (3) 17th and Early 18th Century Music
Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5852
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4862 (3) African American Music
Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Studies individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology
**MUSC 4872 (3) Late 18th and 19th Century Music**
Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5872

**Requisites:** Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSCU) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4892 (3) Latin American Music**
Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5892

**Requisites:** Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSCU) majors only.

**Additional Information:** Departmental Category: Musicology

**MUSC 4908 (1-3) Internship in Music Business**
Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student’s career goals. A minimum of 48 hours is required per semester for one credit.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5908

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Grading Basis:** Pass/Fail

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4957 (1-4) Senior Thesis**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

**MUSC 4958 (2) Community Performances**
Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5958

**Requisites:** Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4978 (3) Introduction to Arts Administration**
Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5978

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4988 (3) The Entrepreneurial Artist**
Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 5988

**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

**Recommended:** Prerequisite MUSC 2918.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 4997 (1) Senior Recital**
To be completed by the second semester of the senior year.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.

**Additional Information:** Departmental Category: Theses and Recitals

### Music - Bachelor of Arts in Music (BAMus)

The Bachelor of Arts in Music program provides a broad education in music within a liberal arts context. Although students may elect to pursue special interests, the primary emphasis is on the development of basic musicianship, an ability to perform music and a broad knowledge of the foundations and principles of music as an art. The Bachelor of Arts in Music may be completed with an emphasis in musicology and world musics or an emphasis in music technology and media studies. Roughly 50% of Bachelor of Arts students are working on a second major outside of the College of Music.

#### Requirements

**General Requirements**

A minimum of 120 credit hours with an overall GPA of 2.00 must be earned for the BA in music degree. Of these credit hours, at least 68 (66 for musicology or music technology emphases) must be in non-music courses. Thirty must be at the 3000 or 4000 level. A minimum of 44 credit hours (51 for musicology or music technology emphases) is required in music courses.

In addition to the general requirements listed above, the following specific general education requirements must be met:

- Six credit hours of English composition.
- Three credit hours of Quantitative Reasoning and Mathematical Skills
- Twelve credit hours of Social Sciences
- Twelve credit hours of Natural Sciences.
- Basic proficiency in one foreign language equal to three semesters at the university level. This requirement also may be fulfilled by three years of study in high school in one language or by passing a university proficiency examination.
- Non-music requirements to fulfill the minimum requirement of credit hours outside of music.

The normal pattern for private applied instruction in this degree is one half-hour lesson per week for 2 credit hours. Not more than 16 credit hours (9 for musicology emphasis, 11 for music technology emphasis) in private instruction may be used toward the degree.
Students registered for applied music must participate in an ensemble as recommended by their applied faculty. A maximum of 4 credit hours (6 for musicology emphasis) in ensemble can apply to the BA in music degree.

A recital may be given with permission of the chair of the applied faculty area and the student’s advisor.

Music - Bachelor of Music (BMus)

The undergraduate degrees in music emphasize knowledge and awareness of:

- solo performance and technique, including the various musical styles used in compositions for students’ musical instruments or voice;
- each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students’ performance medium;
- ensemble performance, including familiarity with major composers in the student’s performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- concert and recital opportunities, including literature composed for different performance forces;
- theoretical studies, including tonal harmony, counterpoint, voice-leading and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and
- historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States and musical cultures other than those of Europe.

Concentration Areas

The four-year professional curriculum leading to the Bachelor of Music degree emphasizes creative skill, academic achievement and artistic performance in music. Concentration areas are offered in performance, composition, musicology and jazz studies.

Requirements

Program Requirements

A half recital in the junior year and a full recital in the senior year are required of students in the performance concentration areas, except musical theatre. Students should check with their advisor about preview policies.

A senior thesis is required of students in musicology. Music composition students must complete a senior project. Musical theatre students produce a senior showcase. Student advisors must approve senior thesis, senior project, and senior showcase plans.

Ensemble and chamber music requirements are specified in the degree plan for each concentration as approved by applied area faculty. Exceptions to these requirements must be approved by the major advisor and associate dean in consultation with area chairs and ensemble conductors.

Students pursuing the Bachelor of Music degree will be required to take one 3-credit-hour course in English composition through the Program for Writing and Rhetoric or the English department. Courses such as First-Year Writing and Rhetoric (WRTG 1150), Writing, Reading, Culture (ENGL 1001) or Introduction to Creative Writing (ENGL 1191) fulfill the requirement. The credit hours are applied in the liberal arts electives category. Students are strongly encouraged to complete this requirement by the end of their freshman year.

Concentration Areas

See the Plans of Study (p. 938) tab for concentration-specific recommended plans of study.

Credit Hours 32

Total Credit Hours 120
### Musical Theatre Concentration Area

Students pursuing the musical theatre concentration area must register for an appropriate ensemble each semester that they are enrolled in applied instruction. These may include choral, opera, or musical theatre ensembles. Major role in musical theatre or opera in junior and senior year with approval of Voice/MT/Opera faculty. Senior showcase performance excuses student from ensemble in final semester.

Acting and dance courses offered by Theatre and Dance are encouraged to be a large part of the 20 non-music elective credit hours.

Elective music courses (MUEL) cannot fulfill non-music requirements. Students with MAPS deficiencies are required to complete at least one course each semester until all deficiencies have been addressed.

Elective music courses (MUEL) cannot fulfill non-music requirements. Students with MAPS deficiencies are required to complete at least one course each semester until all deficiencies have been addressed.

Learning Outcomes
Students completing any of the bachelor of music degree tracks are expected to acquire the ability to:

- Perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding.
- Demonstrate an understanding of theoretical studies, including sight-reading and ear training.
- Demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

Dual Degree Programs
**Double Major in Music Performance**
Eligible students in the College of Music, with approval of faculty in the relevant areas or departments, may complete a double major in music performance. Normally, such programs take at least five years to complete. Students pursuing a double major in music performance must complete at least 15 additional credit hours beyond the 120 credit hours required for a single performance major. Requirements pertaining to applied study, chamber music, sophomore proficiency, junior recital and senior recital must be fulfilled separately for each degree; up to four
credit hours of university ensemble can be applied to both majors when appropriate and with faculty/advisor approval. Students completing all requirements are awarded a single bachelor of music degree with two majors.

The decision to earn more than one degree or major in the College of Music should be carefully weighed, as it may be more advantageous for a student to complete a single degree/major and then begin work on a graduate degree in music.

**BMus/BMusEd in Music Performance and Music Education**

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual degree in music performance (woodwinds, brass and percussion, strings, voice, or jazz emphasis) and music education (instrumental or choral tracks). Requirements for these dual degree program range from 139 to 150 credit hours, and a minimum of 10 semesters of study (including one semester of full-time student teaching) is typically necessary to complete all requirements.

**Double Degree in Music and an Outside Major**

Students may complete requirements in two fields and receive two degrees from the university. Approximately 20-25 percent of music majors are studying a second major outside of music.

**Music - Minor**

The College of Music offers a 19-credit music minor for students across the CU Boulder campus. The music minor is open to all students in good academic standing who have a sincere interest in making music a part of their university education, regardless of prior experience levels or backgrounds.

Students pursuing the music minor are required to complete a basic music theory course and participate in at least one music ensemble. Beyond that, students may choose from a variety of course options focused on creating or making music, as well as appreciating and thinking about music in relation to historical or sociocultural issues. Many elective course options for the music minor have been approved for the Arts & Sciences General Education Requirements.

For questions about the music minor, please send a message to the program manager at music.minor@colorado.edu.

**Requirements**

To declare your interest in the music minor, please submit the Declaration Form (https://www.colorado.edu/music/sites/default/files/attached-files/minor_declaration_form_0.pdf).

Grades in courses applied to the music minor must be a C- or higher. View the degree checklist (https://www.colorado.edu/music/sites/default/files/attached-files/music_minor_2020-21.pdf) to start planning your minor.

Total Credit Hours: 19

1. Students with appropriate background and instructor approval may substitute MUSC 1101 and MUSC 1121 for MUEL 1081.

**Music Entrepreneurship - Certificate**

The Certificate in Music Entrepreneurship is an innovative program administered by the Entrepreneurship Center for Music (ECM) in partnership with the Leeds School of Business.

The certificate, open to music majors only, will include a minor in business plus academic and experiential credits within the College of Music. This robust curriculum positions the College of Music among the nation’s leading programs in arts entrepreneurship.

For more information, contact Jeff Nytch at jeff.nytch@colorado.edu.

**Requirements**

The undergraduate certificate in music entrepreneurship requires a minor in business (12 credit hours), plus six academic and experiential credit hours within the College of Music.
To qualify for the certificate, MUSC 2918 Building Your Music Career must be successfully completed or in-progress.

Interested students should elect participation in the certificate program by no later than the end of the sophomore year.

**Music Technology - Certificate**

The College of Music is pleased to offer an 18-credit certificate in music technology.

The curriculum consists of a variety of courses designed to provide a strong background in using technology to compose and produce music. The courses range from an introductory survey of music software and hardware to in depth studies of DSP synthesis, algorithmic composition, recording and post-production techniques, film scoring, and many other topics. The software used in many of the classes includes Logic Pro, ProTools, Ableton Live, Finale, Lilypond, MAX, PD, SuperCollider, Csound, Final Cut Pro, Audacity, SoundHack and Spear.

For more information, contact John Drumheller at drumhell@colorado.edu.

**Requirements**

This certificate requires 18 credit hours, including five music technology courses.

For those courses that do not have an MUEL prefix, non-majors will need instructor permission to enroll in the class.

To qualify for the certificate, the 2061 introductory course must be successfully completed or in-progress.

Total Credit Hours 18

1 May be repeated up to three times as topics vary.

**Music Theory - Certificate**

The certificate in music theory provides students the opportunity to take more varied upper-level courses and develop independent projects under faculty mentorship. The certificate provides students with a formal acknowledgement of their work in music theory, potentially serving as a stepping-stone to graduate school, private teaching, theory teaching in primary or secondary schools or work in music-related media and technology.

**Requirements**

**Admission Requirements**

Students need a minimum average grade of B+ or higher for freshman and sophomore music theory and aural skills classes to qualify for the certificate.

Application for the certificate takes place either sophomore or junior year. In order to apply, students must submit a statement of purpose. Applications can be sent directly to the chair of Music Theory area, currently Keith Waters (keith.waters@colorado.edu).
### Required Courses and Credits

The curriculum consists of 18 credit hours. Students will typically take between one or two required courses per semester. Students need to maintain a minimum average grade of B+ or higher.

Elective outside major within or beyond the College of Music, with advisor permission

Total Credit Hours 18

### Music Education

Music education faculty teach courses and supervise field experiences designed to prepare students for careers in preK-12 music education. The comprehensive curriculum and program standards have combined to produce a near 100 percent job placement rate for music education graduates.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and generalization. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

### Admission to the Teacher Education Program

Teacher education is a campuswide function at the University of Colorado. Admission to the music education program in the College of Music does not constitute admission to the teacher education program. Students must apply to the School of Education through the music education chair at the beginning of their junior year or at the time 65 credit hours have been completed toward the BMusEd degree (including approved transfer credits). Students may not register for certain education courses and student teaching until they are admitted to the teacher education program.

Requirements for recommended admission to the teacher education program:

- Minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75
- Minimum grade of C- in MUSC 2103
- Twenty-five hours of documented, supervised field experience
- Satisfactory functional piano ability as demonstrated by passing the proficiency examination or completing prescribed course work
- Satisfactory performance ability as demonstrated by meeting the sophomore proficiency requirements in an applied area of study
- Recommendation by the music education faculty; an interview with each student is held by the members of the music education faculty during the first semester of the sophomore year to review the student’s progress and qualifications for admission to the teacher education program.

For further information, please refer to the Handbook for Undergraduate Studies in Music Education.

### Student Teaching

Students wishing to receive a student teaching assignment must complete an application and submit it to the School of Education through the chair of the music education faculty early in the semester preceding the student teaching semester. Prerequisites for student teaching:

- Admission to the teacher education program
- A minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75
- Completion of all required music education and education courses in the music education curriculum
- Satisfactory performance ability as demonstrated by passing the junior recital
- Passing score on the PRAXIS II Music Assessment
- Recommendation by the music education faculty

### Bachelor's Degree

- Bachelor of Music Education (BMusEd) (p. 962)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

- Austin, James R. (https://experts.colorado.edu/display/fisid_103455/) Professor; PhD, University of Iowa
- Dockendorf, Matthew Paul (https://experts.colorado.edu/display/fisid_154511/) Instructor; DMA, Michigan State University
- Heil, Leila (https://experts.colorado.edu/display/fisid_149780/) Associate Professor; PhD, University of Colorado Boulder
- Miranda, Martina L. (https://experts.colorado.edu/display/fisid_140091/) Associate Professor; DMA, Arizona State University; PhD, Arizona State University
Courses

MUSC 1081 (3) Intensive Music Theory
Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.
Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1111 (2) Semester 1 Theory
Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher
Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 1111 (2) Semester 2 Theory
Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.
Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1
Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading
Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.
Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 1326 (2) Guitar Musicianship and Accompanying
Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo. Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Offered only to guitar performance majors.
Requisites: Requires prerequisite course of MUSC 1325 (1) Piano Sight Reading
Additional Information: Departmental Category: Voice

MUSC 1802 (3) Introduction to Musical Styles and Ideas
Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.
Requisites: Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 2041 (1) Applications of Music Technology (5-week segment)
Explores the use of technology, software, applications, and tools in a variety of creative, performance, pedagogical, and entrepreneurial contexts. Addresses the opportunities and challenges posed by evolving technologies. Emphasizes project-oriented learning.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

Rickels, David Aaron (https://experts.colorado.edu/display/fisid_120180/)
Associate Professor; DMA, Arizona State University

Roeder, Matthew J. (https://experts.colorado.edu/display/fisid_120180/)
Associate Professor; DMA, University of Colorado Boulder
MUSC 2061 (3) Introduction to Music Technology
Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 2061 and CMDP 3860
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2081 (2) Prepared for the Soundcheck
Provides an overview of the recording process from the performer’s perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2860
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2091 (2) Recording Techniques
Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.
Equivalent - Duplicate Degree Credit Not Granted: CMDP 2870
Requisites: Requires prerequisite course of MUSC 2081 or MUEL 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2101 (2) Semester 3 Theory
Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2103 (2) Introduction to Music Education
Introduces students to the broad range of skills and responsibilities inherent to the music education profession. Explores current topics in public school music teaching while developing teaching skills through supervised field experience. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 1103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 2111 (2) Semester 4 Theory
Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.
Requisites: Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSCU) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2121 (1) Aural Skills Lab, Semester 3
Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.
Requisites: Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2131 (1) Aural Skills Lab, Semester 4
Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis). Offered spring only.
Requisites: Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSCU) majors only.
Additional Information: Departmental Category: Theory and Composition

MUSC 2325 (2) Applied Harmony for the Keyboard
Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2365 (2) Introduction to Accompanying
An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.
Requisites: Requires a prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 2608 (1) Alexander Technique
Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception, physical coordination and mind-body awareness. Applies these contexts to specific musical activities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5608
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2772 (3) World Musics: Asia and Oceania
Highlights music in Asia and Oceania using current ethnomusicological materials.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Musicology

MUSC 2782 (3) World Musics: Africa, Europe, and the Americas
Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Musicology
MUSC 2918 (2) Building Your Music Career
Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5918
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 2988 (1) Introduction to Music Research
Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2997 (1) Sophomore Proficiency
To be completed by the second semester of the sophomore year.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Theses and Recitals

MUSC 3013 (1) String Class
For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.
Requisites: Restricted to College of Music (MUSC) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3023 (1) Woodwind Class
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3033 (1) Brass Class
For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3041 (2) Instrumentation and Arranging
Learn to create professional arrangements for a diverse combination of instruments and/or voices. The course will work through instrumentation, score and part preparation, and issues of orchestration to prepare music student to create successful arrangements for a wide range of concert music settings. Final arranging projects will be geared towards individual interests.
Requisites: Requires prerequisite course of MUSC 2101 and MUSC 2121 (all minimum grade C). Restricted to College of Music (MUSC) students only.

MUSC 3043 (1) Percussion Class
Provides an introduction to techniques and pedagogical principles necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all string, voice and choral music education students. Offered fall only.
Grading Basis: Letter Grade

MUSC 3051 (2) Beginning Composition
Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3061 (2) Jazz Improvisation I
Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite for non-jazz majors MUSC 2111.
Additional Information: Departmental Category: Theory and Composition

MUSC 3071 (2) Jazz Improvisation II
Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.
Requisites: Requires prerequisite course of MUSC 3061 (minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 3081 (3) Jazz Theory and Aural Foundations 1
Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.
Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition
MUSC 3091 (3) Jazz Theory and Aural Foundations 2
Presents the grammar and syntax of jazz and is the second course of the sequence. Units of study include elements of form, harmonic substitution, reharmonization, non-standard forms and harmonic progressions. Post-tonal concepts as they relate to jazz are introduced as well as foundational studies in jazz rhythm. Aural studies of all theoretical material is integrated throughout the semester.
**Requisites:** Requires prerequisite course of MUSC 3081 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.

MUSC 3133 (2) Teaching General Music I
Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.
**Requisites:** Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3153 (2) Teaching Woodwind Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3163 (2) Teaching String Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.
**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3176 (2) Conducting I
Introduces conducting and rehearsal techniques. Performance participation in the appropriate ensemble (band, choir or orchestra). Offered fall only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3186 (2) Conducting II
Introduces conducting and rehearsal techniques. Department enforced corequisite: performance participation in the appropriate ensemble (band, choir, or orchestra). Offered spring only.
**Requisites:** Requires prerequisite course of MUSC 3176 (minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices
Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.
**Requisites:** Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3223 (2) Teaching Brass Instruments
For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3226 (1) Percussion Literature and Pedagogy for Undergraduate Percussion Majors
Explores, examines and analyzes percussion music, performance techniques and how to teach them through readings, discussion, analysis, extensive listening, and score study. The course is designed to meet the specific needs and requirements of the individual student.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Requires prerequisite course of MUSC 2997 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

MUSC 3243 (2) Teaching Percussion Instruments
Provides an introduction to playing techniques and pedagogical principles necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Required of all instrumental band music education students. Offered fall only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

MUSC 3253 (2) Jazz Techniques for the Music Educator
Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisites MUSC 1111 and MUSC 2103.

Additional Information: Departmental Category: Music Education

MUSC 3256 (2) Guitar Pedagogy
Survey and develop appropriate teaching materials and techniques; learn how to identify and address the most common technical problems experienced by guitar students; create strategies for how to avoid the development of problems in guitar beginners.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

MUSC 3273 (2) String Pedagogy and Literature
Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.
**Requisites:** Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisites MUSC 2103 and MUSC 3163.

Additional Information: Departmental Category: Music Education
MUSC 3345 (2) Piano Pedagogy 1
Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3355 (2) Piano Pedagogy 2
Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 3363 (2) Marching Band Techniques
Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.
Requisites: Requires prerequisite course of MUSC 2103 and EMUS 1287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 3444 (1) French Diction
Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.
Recommended: Prerequisite MUSC 3464.
Additional Information: Departmental Category: Music Education

MUSC 3446 (1) German Diction
Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.
Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Voice

MUSC 3642 (3) History of Jazz 1
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 3652 (3) History of Jazz 2
Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from the 1950's to the present, including the various traditions, practices, historical events and people most important to its evolution. Offered spring only.
Requisites: Requires a prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 3772 (3) West African Music and Culture in Ghana
Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.
Equivalent - Duplicate Degree Credit Not Granted: MUEL 3772
Requisites: Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.
Additional Information: Departmental Category: Musicology

MUSC 3802 (3) History of Western Music 1
Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3812.
Requisites: Requires prerequisite course of MUSC 1111 or MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Musicology

MUSC 3812 (3) History of Western Music 2
Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.
Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Musicology

MUSC 3997 (1) Junior Recital
To be completed by the second semester of the junior year.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4001 (2) New Musical Styles and Practices
Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition
MUSC 4011 (2) 16th Century Counterpoint
Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5011
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4012 (3) African Music
Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5012
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4021 (2) 18th Century Counterpoint
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4021 (2) 18th Century Counterpoint
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4031 (2) Jazz Arranging 1
Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.
Requisites: Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4041 (2) Orchestration
Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4061 (2) Tonal Analysis
Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4071 (2) Post-Tonal Theory and Analysis
Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4078 (1) Piano Technician for Pianists
Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5078
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite piano majors.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4091 (2) Jazz Arranging 2
Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensemble. Offered spring of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.
Recommended: Prerequisite MUSC 3081.
Additional Information: Departmental Category: Theory and Composition

MUSC 4101 (1-3) Theory and Aural Skills Review
Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCU) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4103 (1) Introduction to Student Teaching
Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.
Requisites: Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4106 (2) Guitar Literature
An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5106
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music
MUSC 4111 (2) Composing at the Computer
Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142

MUSC 4112 (3) Ethnomusicology
Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4113 (3) Teaching General Music 2
Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4121 (3) Topics in Music Technology
Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2061 (minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4122 (3) Music in Jewish Culture
Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4122
Grading Basis: Letter Grade

MUSC 4133 (3) Student Teaching Practicum
Offers practice teaching under the guidance of a master music teacher.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4142 (3) American Indian Music
Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4143 (2) Topics in Choral Music Education
Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5143
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4151 (2) Topics in Music Analysis
Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade B).
Grading Basis: Letter Grade

MUSC 4152 (3) East Asian Music
Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4153 (1) Percussion Class and Pedagogy
Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4161 (2) Advanced Jazz Composition and Analysis
Provides in depth listening, score study, and analysis, exploring major composers in jazz and their innovations in composition. "Foundational" topics concerning melody, form, and orchestration are studied to provide a framework for further analysis. Influences of western art music, American folk and popular music considered. Final projects to be performed and recorded by a CU jazz ensemble.
Requisites: Requires prerequisite of MUSC 3091 and MUSC 3081 (all minimum grade D). Restricted to College of Music (MUSC) undergraduate students only.
Grading Basis: Letter Grade
MUSC 4163 (2) Choral Literature for School Ensembles
Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4168 (3) World Music Theories
Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5168
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Recommended: Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.
Additional Information: Departmental Category: Theory and Composition

MUSC 4171 (2) Advanced Jazz Improvisation and Analysis
Surveys important jazz improvisers and their historical context. Students engage in multiple methods of transcription and analysis. Listening plays a central role throughout the course and class discussions will foster the ability to engage in critical analysis of performances. The final project is an in-depth transcription of analysis of an improvisation.
Repeatable: Repeatable for up to 12.00 total credit hours.
Grading Basis: Letter Grade

MUSC 4176 (2) Conducting 3
This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5176
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of MUSC 3186 (minimum grade B-). Restricted to College of Music undergraduates majoring in Music Education (MUSE) only.
Grading Basis: Letter Grade

MUSC 4191 (2) Advanced Recording
Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.
Requisites: Requires prerequisite course of MUSC 2091 (minimum grade D). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 4193 (1) Student Teaching Seminar
Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.
Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues
Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theory and practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Musicology

MUSC 4203 (1) Music Methods Practicum
Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4223 (2) Secondary Music Teaching Approaches
Prepares students to teach and facilitate musical learning in non-performance secondary music classes. Includes units on music technology, music theory, music appreciation and class guitar. Connects experiential components to strategies for teaching and project design for middle and high school classrooms. Offered fall only.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-).
Grading Basis: Letter Grade

MUSC 4313 (3) Teaching Choral Music
Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5313
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2103.
Additional Information: Departmental Category: Music Education

MUSC 4323 (3) Differentiating Instruction in K-8 Music Classrooms
Designed to focus on differentiating and individualizing instruction for K-8 music students representing diverse cultural, linguistic, and ability backgrounds. Includes developmental and practical orientations to pedagogical issues including planning, instruction and assessment. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning and engagement in music instruction.
Requisites: Requires a prerequisite course of MUSC 2103 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.
Grading Basis: Letter Grade

MUSC 4325 (2) Keyboard Literature 1
Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard
MUSC 4335 (2) Keyboard Literature 2
Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4336 (2) Brass Pedagogy
Analyses pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring term.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5336
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4346 (2) Woodwind Pedagogy
Analyzes pedagogical techniques and philosophies of teaching wind instruments, and examines materials. Offered every other spring term.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Letter Grade

MUSC 4405 (2) Basso-Continuo Accompaniment
Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5405
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 4443 (3) Teaching Instrumental Music
Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5443
Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Education

MUSC 4608 (1) Advanced Studies in the Alexander Technique
Continues investigation of the benefits of Alexander’s principles regarding mind-body awareness begun in MUSC 2608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5608
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 2608 (minimum grade C). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4666 (3) Chamber Music Lit WW/Prc
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4712 (3) Renaissance Music
Provides a repertory and analysis of polyphonic music, 1400-1600.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5712
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4752 (3) Women in Music
Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5752
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4772 (3) History of Opera
Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5772
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4802 (3) Studies in 20th Century Music
Offers intensified work in history of music in the 20th century. Topics vary from year to year.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5802
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4852 (3) 17th and Early 18th Century Music
Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5852
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4862 (3) African American Music
Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology
MUSC 4872 (3) Late 18th and 19th Century Music
Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5872
Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4892 (3) Latin American Music
Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5892
Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.
Additional Information: Departmental Category: Musicology

MUSC 4908 (1-3) Internship in Music Business
Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5908
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4957 (1-4) Senior Thesis
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

MUSC 4958 (2) Community Performances
Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5958
Requisites: Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4978 (3) Introduction to Arts Administration
Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5978
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4988 (3) The Entrepreneurial Artist
Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 5988
Requisites: Restricted to College of Music (MUSCU) undergraduate students only.
Recommended: Prerequisite MUSC 2918.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4997 (1) Senior Recital
To be completed by the second semester of the senior year.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.
Additional Information: Departmental Category: Theses and Recitals

NCMU 1172 (0.3-3) Body Mapping for Musicians
Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 1177 (0.3-3) Kabuki: A Musical Theater
Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 1178 (0.3-3) Getting Inside the Music of the Colorado Music Festival
Repeatable: Repeatable for up to 3.00 total credit hours.

Music Education - Bachelor of Music Education (BMusEd)

The Music Education Department's experienced music teacher educators aim to prepare students for successful careers in K–12 music education. Courses focused on learning principles and teaching methods, field experiences in elementary and secondary schools, and opportunities for involvement and leadership in special programs and organizations (e.g., Middle School Ensemble Program, Summer Music Academy, Collegiate Chapter of the National Association for Music Education) provide students with the knowledge base, skills, and practical experience needed to teach music effectively. Over the past 20 years, there has been a near 100 percent job placement rate for graduates of the music education program.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and comprehensive preparation. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

Program Emphases

Four basic curricular options are provided for students pursuing the Bachelor of Music Education degree:

- choral
- choral–general
- instrumental
- instrumental–general

The choral–general and instrumental–general emphases include a larger concentration of coursework and field experiences related to elementary
general music teaching, while the choral and instrumental emphases involve more specialized coursework and field experiences related to the teaching of choir, orchestra or band classes at the secondary level. Within each degree emphasis, students have a limited number of elective credits that may be used to further customize degree work according to their interests and needs.

As first-year students, BME students primarily complete core studies in music and liberal arts, but also enroll in their first music education course (Becoming a Music Teacher). The first early field experiences are completed during the sophomore year. During the junior year, students enroll in capstone methods courses and specialized electives that allow for more detailed and sustained study of curricular models, instructional materials, and teaching methods. Internships and full-time student teaching provide culminating experiences during the senior year, as students work in partnership with experienced public school teachers and assume the role and responsibilities of a professional music educator. Internship and student teaching placements are chosen in consultation with faculty advisors and the music education chair.

Requirements

A minimum of 126 credit hours with a cumulative GPA of 2.75 must be earned for the BME degree, with no grade below C- in a course.

In addition to 40 credit hours of teacher education coursework and 150 clock hours of field experience, music education majors complete 24 credit hours in liberal arts disciplines (English composition, arts and humanities, mathematics, social sciences, natural sciences) and 62 credit hours in music (music theory and aural skills, musicology and ethnomusicology, applied study, ensemble, keyboard and voice, and conducting).

General education requirements in the liberal arts and core requirements in music are designated by the music education faculty and approved by the College of Music curriculum committee.

Four-Year Plans of Study

Choral Music Emphasis

Students must take keyboard or voice as the primary applied area, or petition the music education faculty for an exception. A minimum of five of the seven semesters of required ensemble registration must be in a conducted choral ensemble (University Singers, University Choir, Collegiate Chorale or Women’s Chorus). For keyboard majors, two semesters of independent accompanying may be applied to the ensemble requirement. Students must be enrolled in a conducted choral ensemble when concurrently enrolled in Conducting I (MUSC 3176) or Conducting II (MUSC 3186).

Dual Degree Program
BMus/BMusEd in Music Performance and Music Education
Qualified music majors who have been approved by the relevant major
departments may elect to complete a dual degree in music performance
(woodwinds, brass and percussion, strings, voice or jazz emphasis) and
music education (instrumental or choral tracks). Requirements for these
dual degree program range from 139 to 148 credit hours, and a minimum
of 10 semesters of study (including one semester of full-time student
teaching) is typically necessary to complete all requirements.

Academic Enrichment Programs
Education Abroad
CU Boulder Education Abroad offers more than 350 approved programs in
over 65 countries around the world. Program options exist for every major
and are offered for every term including winter break and summer break,
with numerous options of varying lengths and credit amounts. Planning
to go abroad varies by major, but it is recommended that students have
an initial planning conversation with an academic advisor as early as
possible.
A growing list of over 10,000 pre-approved courses provides approved
courses abroad for various degree requirements. Program costs vary, and
include over 30 programs that are comparable to semester costs for in-
state students. Students can use existing financial aid and institutional
scholarships for a semester/year abroad, and additional scholarship
opportunities exist.

Please see the following links for additional information and resources:

lists.

Library Research
Several courses in information access and library research methods
are offered to students who wish to explore the structure, organization,
retrieval and evaluation of information for their study and career needs.

Course code for this program is LIBR.

Faculty
While many faculty teach both undergraduate and graduate students,
some instruct students at the undergraduate level only. For more
information, contact the faculty member’s home department.

Preprofessional Programs
Preprofessional advising resources have been developed at CU Boulder to help undergraduate students, and previously graduated students, prepare for further study at professional schools. CU Boulder does not offer preprofessional undergraduate majors or degrees. Completion of preprofessional prerequisites does not guarantee admission to a professional school. However, preprofessional advisors are well-equipped to provide information about professional schools within Colorado, and beyond, and can help students to prepare well for further professional study.

Health Professions
Students can prepare to enter the undergraduate professional health science program in nursing at the Anschutz Medical Campus of the University of Colorado by taking courses on the Boulder campus.

Students whose goals include entering the medical, dentistry, physical therapy, physician assistant, pharmacy or public health programs and schools at the Anschutz Medical Campus, or the veterinary medicine or occupational therapy programs at Colorado State University in Fort Collins, can complete any undergraduate major at CU Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school. In fact, a baccalaureate degree is recommended for most health professions.

At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a pass/fail basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process.

In all cases, admission committees are concerned with students’ compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations, compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations,
and staying power (physical and motivational). In addition to formal coursework, students should have experience in people-related activities (especially those related to their field of choice), so that they can be more certain of their motivation for health careers. Also, health-related activities expose premed and other health science hopefuls to various patients and illnesses. The health professions require, or strongly recommend, such experience.

Some of the professional programs at the Anschutz Medical Campus give preference to Colorado residents and residents of WICHE (Western Interstate Commission on Higher Education) states; interested students should check with individual programs for specific policies. Students from other states usually can obtain at CU Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply to their state school, as well as to other public and private professional schools, to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces available, many students need to pursue alternative goals. Therefore, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Advising for preprofessional study in the health sciences is conducted through the Preprofessional Advising Office in the University Club. Check the pre-health advising (http://www.colorado.edu/advising/pre-health/) website for information on prerequisite courses, events, volunteer opportunities, student pre-health organizations, applications and many other useful resources. Students should attend a pre-health advising session at orientation, then begin to follow the Pre-Health Pathway sequence of meetings early in their undergraduate careers to help plan coursework and extracurricular experience in preparation for applying to programs of their choice. Current students and alumni may schedule pre-health meetings through MyCUHub (http://www.colorado.edu/mycuhub/). The Preprofessional Advising Office offers an extensive array of workshops and informational meetings, as well as a spring Health Professions Information Day.

Pre-Law

Students who plan to apply to law school upon completing their baccalaureate degree do not have to complete any specific course requirements for admission to law school. Instead, they should major in the discipline that best suits their intellectual interests and talents. Pre-law students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions. Students should become familiar with mathematical analysis and scientific reasoning, and develop excellent oral and written communication skills.

Pre-law advising is available in the Preprofessional Advising Office. In addition, the Preprofessional Advising Office sponsors a fall Law Fair, spring Law Day and a year-long speaker series. Contact the Preprofessional Advising Office in University Club 111 for more information. Check the pre-law advising (http://www.colorado.edu/advising/pre-law/) webpage for information on events, the student pre-law organization, applications and many other useful resources. Current students and alumni may schedule pre-law advising appointments through MyCUHub (http://www.colorado.edu/mycuhub/). (http://aaportal.colorado.edu)

Presidents Leadership Class

The Presidents Leadership Class (PLC) is a scholar community with academic and experiential curricula with focus on leadership development through an exploration and honing of our six domains of leadership development (http://www.colorado.edu/plc/plc-advantage/how-we-develop-leadership/). Skills are developed in interdisciplinary, academic, experiential and service environments and through exposure to the key issues in Colorado leadership. PLC students are enrolled in all the schools and/or colleges across campus and participate in the PLC curriculum as a complement to their regular coursework.

The PLC is a program of CU Boulder and has a Board of Advocates representing Colorado business, educational, nonprofit and government communities.

Admission and Enrollment

Admission to the PLC is considered a great accomplishment for incoming CU Boulder students. Most PLC students are admitted prior to the beginning of their first year at CU Boulder; however, limited spots are reserved for qualified rising sophomores through a second point-of-entry application. Selection criteria include academic excellence, a growth mindset, a willingness to challenge oneself, empathy, humility and resiliency. Each year, 50 first-year students are enrolled, comprising both Colorado residents and nonresidents. Instructions on how to apply to PLC are available on the PLC website (http://www.colorado.edu/plc/). The application is part of the CU Boulder Scholarship Application through the Office of Financial Aid and Scholarship Services. The application is due by February 15. To access the application, visit the Apply Now (http://www.colorado.edu/plc/apply-now/) webpage.

Only students who are accepted into the PLC are eligible to enroll in PLC courses (PRLC) with few exceptions for for PRLC 2820, ENLP 3100, PRLC 3810 and PRLC 3800. Students receive credit for the General Education requirements for Social Sciences for PRLC 1810 and PRLC 1820. The course PRLC 3810 counts towards upper-division humanities credits for engineering students.

Academic Program

The PLC provides students with unique academic courses, purposeful experiential education and real-life experiences that:

• Support academic and professional excellence
• Grow critical thinking and analytical capabilities
• Develop extraordinary creativity in problem solving
• Hone abilities of thoughtful implementation of sustainable solutions
• Cultivate moral reasoning and ethical decision making
• Develop an appreciation for a community to which students want to impact and contribute to

PLC provides opportunities by uniting the support of the university, local and statewide leaders. The academic curriculum is supplemented by a substantial experiential learning curriculum and professional development opportunities.

For more information on the PLC Curriculum Strategy and the research behind it, visit the Presidents Leadership Class (http://www.colorado.edu/plc/) website.
Required Courses and Credits

PLC students tend to declare and complete the Leadership Studies Minor (LSM) (p. 656), however, it is not a requirement of the program. Courses in addition to the courses listed below have been added to the list of courses accepted to complete PLC. Information about the other courses and many academic/experiential opportunities available is on the PLC website. (https://www.colorado.edu/plc/current-students/courses/)

The capstone course, LEAD 4000 is not required of PLC students, but is required for the LSM.

Scholarship Programs and Opportunities

The PLC offers many scholarships to fully participating students over the course of their undergraduate career. The first-year award is a merit award of $1,000 that is awarded upon selection into the program. The first-year scholarship is non-renewable and not award automatically after the first year. PLC students have the opportunity to apply or be nominated for a number of other scholarships to substantially help fund their undergraduate education upon their second year in the program. Below is a list of available scholarships primary to PLC students. All PLC allocated scholarships are dispersed through the Office of Financial Aid, and are calculated directly against the cost of attendance.

- William A. Douglas Endowment
- FirstBank Scholars
- Dr. Larry Allen Endowment
- Flanagan & Walker Scholarships
- Hoelscher Memorial Scholarship
- Annabelle K. Lutz Voss Scholars
- Tim Pestotnik Scholarship
- Leo Hill Endowment
- The Ruyle Family Scholarship
- PLC Enrichment Fund Scholarship
- PLC Student Staff Fellowship
- PLC Student Staff Fellowship

Courses

PRLC 1810 (3) Leadership Foundations and Applications I
Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness.
Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.
Grading Basis: Letter Grade
Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Gen Ed: Distribution-Social Sciences

PRLC 1820 (3) Leadership Foundations & Applications II
Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels.
Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.
Grading Basis: Letter Grade
Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

PRLC 2820 (3) Multilevel Issues in Leadership
Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.
Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.

PRLC 2930 (1-3) Leadership Internship
Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission and further refine their own theories of what constitutes effective leadership. Students also complete a meaningful project over the course of the internship. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

PRLC 3800 (3-4) Global Inquiry for 21st Century Leadership
Introduces students to the ways in which leadership and sustainable development theory converge, challenges students to examine these issues in specific contexts around the world, and provides them with practical training in cross-cultural competency and leadership skills.
Requisites: Requires prerequisites PRLC 1810 (minimum grade C).
Restricted to Presidents Leadership Class members.
Recommended: Prerequisites PRLC 1820, PRLC 2820 or ENLP 3100.
Grading Basis: Letter Grade

PRLC 3810 (3) Global Issues in Leadership
Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

PRLC 4010 (3-4) 21st Century Leadership
An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.
Requisites: Requires prerequisite courses of PRLC 1810 and PRLC 1820 (all minimum grade C). Restricted to students in the Presidents Leadership Class (PPLC) only.
**PRLC 4081 (3) Icons of the American Republic**
Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process.

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors).
**Recommended:** Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2223 or PSCI 2004.
**Additional Information:** Departmental Category: American

**Reserve Officers Training Corps (ROTC)**

Enrollment in Reserve Officers Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer’s educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation.

**Military Programs**
- Air Force Aerospace Studies (U.S. Air Force) (p. 972)
- Military Science (U.S. Army) (p. 973)
- Naval Science (U.S. Navy & U.S. Marine Corps) (p. 975)

**Air Force Aerospace Studies (U.S. Air Force)**

U.S. Air Force ROTC offers several programs leading to a commission in the U.S. Air Force concurrent with completion of a baccalaureate degree.

CU Boulder students who wish to register for AFROTC classes sign up for them through the normal course registration process. AFROTC credit for graduation varies with each college. Students should contact the appropriate college for credit determination.

**Scholarship Programs**

**Air Force ROTC Scholarship Program**

Normally a scholarship board is held at the end of each semester for students who have at least one semester of full-time college credit. Students can compete for scholarships in most academic majors. Students selected for this program receive scholarships that pay up to $18,000 in tuition, a book allowance, nonrefundable educational fees and subsistence each month, tax-free. These scholarships are available in all academic disciplines and are two to three years in length.

**USAF Medical Programs**

Qualified nursing students can compete for nursing scholarships. These scholarships can lead to a career as an Air Force officer, serving as a nurse. Students may also compete for a prehealth designator. If selected, they would receive a scholarship for medical school.

**Requirements Programs**

Other programs are frequently available based on current Air Force needs. The unit administrative officer in Boulder (303-492-8352) can discuss the best alternatives. Interested students should make initial contact as early as possible to create the best selection opportunity, as selection is on a competitive basis. There is no obligation until a formal contract is entered.

**Standard Four-Year Program**

This standard program is designed for incoming freshmen, or any student with four years remaining until degree completion. It consists of three parts: the general military course (GMC) for lower-division (normally freshman and sophomore) students; the professional officer course (POC) for upper-division students (normally juniors and seniors); and the leadership laboratory (LLAB) attended by all cadets. Completion of a two-week summer field training program is required prior to commissioning.

**Modified Four-Year Program**

Certain undergraduate and graduate students may be eligible for this program. It is offered to full-time, regularly enrolled degree students and requires at least five semesters of full-time college work (undergraduate or graduate level, or a combination). May only be available to students pursuing academic majors in demand. Those selected for this program must complete the field training program during the summer months as a prerequisite for entry into the professional officer course the following fall semester.

**Leadership Lab**

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer.

**Faculty**

Burk, Paul Mason
Assistant Professor; Major, U.S. Air Force; MBA, St. Xavier University

Cruz, Steven
Assistant Professor; Major, U.S. Air Force; MS, University of Colorado Colorado Springs

Courses

AIRR 1010 (1) Heritage and Values I
This course provides an introduction to the Air Force, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1020 (1) Heritage and Values II
A continuation of AIRR 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1234 (0) Leadership Laboratory
All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab).

Grading Basis: Pass/Fail

AIRR 2010 (1) Team and Leadership Fundamentals 1
This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 2020 (1) Team and Leadership Fundamentals 2
A continuation of AIRR 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training, which follows the AS200 level.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3010 (3) Leading People and Effective Communication 1
This course is designed to build on the leadership fundamentals taught in the AS200 level. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3020 (3) Leading People and Effective Communication 2
A continuation of AIRR 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4010 (3) National Security, Leadership Responsibilities/Commissioning Preparation 1
This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4020 (3) National Security/Leadership Responsibilities/Commissioning Preparation 2
A continuation of AIRR 4010. This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.

Additional Information: Departmental Category: Air Force Aerospace Studies

Military Science (U.S. Army)

The Department of Military Science is a leadership program leading to an officer’s commission in the Active Army, Army Reserve or National Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

The course code for this program is MILR.

Scholarship Programs

College freshmen, sophomores and juniors may be eligible for four-, three- and two-year scholarships, regardless of academic major. Interested students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year.

All scholarship recipients receive full tuition and fees, a $1,200 book allowance and a stipend of $300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

Simultaneous Membership Program

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately $240 in monthly drill pay, plus a monthly ROTC stipend of $300–500. Additionally, SMP participants receive Army National Guard or reserve
tuition benefits of up to $4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

**Army ROTC Course Credit**

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

**Registration**

Army ROTC classes begin with MILR prefix. Register for classes through the normal course registration process. For more information, visit the Army ROTC (http://www.colorado.edu/arotc/) website or contact the enrollment and scholarship officer at CU Boulder at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

**Requirements**

**Four-Year Program**

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

**Basic Courses (MSI & MSII)**

Basic courses (MSI & MSII) cover Army history and organization, as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

**Advanced Courses (MSIII & MSIV)**

Advanced courses (MSIII & MSIV) cover leadership, tactics and unit operations, training techniques, military law and professional ethics. Additionally, a four-week summer leadership camp at Fort Knox, Kentucky, is a requirement between the junior and senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the Professor of Military Science (PMS).

**Two-Year Program**

College students entering as a sophomore, junior or senior with four semesters of college remaining (including Grad School), can attend the two-year Basic Camp, which is a 4-week course conducted at Fort Knox, Kentucky, where students learn the same skills and fundamentals of military science, leadership, values and ethics taught in the basic course classes. Then students are ready to begin the advanced course when they return to college. Basic Camp is a paid internship and the academic equivalent to the MSI/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending Basic Camp or completing the ROTC basic courses. Enlisted soldiers pursuing advanced placement must obtain permission from the PMS.

**Faculty**

Braun, Joel D.
Assistant Professor; Captain, U.S. Air Force; MBA, Western International University

Cacic, John D.
Assistant Professor; Captain, U.S. Air Force; MBA, Central Michigan University

Cairney, John T.
Chair, Professor; Colonel, U.S. Air Force; MS, Air Force Institute of Technology

Dawson, Edward E.
Assistant Professor; Lieutenant, U.S. Navy; BS, The Citadel

Freund, Karl
Military Science Instructor; Sergeant, U.S. Army

Garbers, Patrick
Assistant Professor; Contractor, U.S. Army; BS, Chapman University

Gough, Michael J.
Chair, Professor; Colonel, U.S. Marine Corps; MS, Naval Postgraduate School

Hale, Bobby L.
Assistant Professor; Captain, U.S. Air Force; MBA, Columbia Station University

Johanson, Luke
Assistant Professor; Captain, U.S. Air Force; MA, Northern Arizona University

Knutson, Joel P.
Assistant Professor; Major, U.S. Marine Corps; BA, Pacific Lutheran University

Lawson, Duane W.
Assistant Professor; Lieutenant, U.S. Navy; BS, University of Florida

League, Dustin R.
Assistant Professor; Lieutenant, U.S. Navy; BS, University of Kansas

Lojka, Jason
Chair, Professor; Lieutenant Colonel, U.S. Army; MS, Naval Postgrad School

Morgan, Walt
Associate Professor; Commander, U.S. Navy; MA, Naval War College

Palermo, Scott
Assistant Professor; Major, U.S. Army National Guard; MS, Webster University

**Courses**

MILR 1011 (2) Adventures in Leadership 1

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.

**Additional Information:** Departmental Category: Military Science (U.S. Army)
MILR 1021 (2) Adventures in Leadership 2
Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 2031 (3) Methods of Leadership and Management 1
Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self-development. Students continue to refine effective written and oral communication skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 2041 (3) Methods of Leadership and Management 2
Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3052 (3) Military Operations and Training 1
Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squadron and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3062 (3) Military Operations and Training 2
Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3090 (1) Military Theory and Tactical Leadership
Application of military domain knowledge, small unit leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. MS5 students do not need to be enrolled in a MILR corequisite.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a corequisite course of MILR 1011 or 1021 or 2031 or 2041 or 3052 or 3062 or 4072 or 4082.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4072 (3) Leadership 1: Adaptive Leadership
Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: discusses personal growth, effective communication, critical thinking, problem solving and ethical leadership.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4082 (3) Leadership 2: Leadership in a Complex World
Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: develops universal leadership attributes such as critical thinking and problem solving, understanding the contemporary operating environment and improved inter-personal dynamics/team building skills.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4840 (1-3) Independent Study
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a MILR corequisite.

Departmental Category: Military Science (U.S. Army)

Naval Science (U.S. Navy & U.S. Marine Corps)

Scholarship Programs
NROTC offers two-, three- and four-year scholarship programs. Navy scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a $375 book allowance per semester and a $250 per month subsistence allowance. This subsistence allowance gradually rises to $400 by the student’s senior year. Advanced standing students receive a $350 per month subsistence allowance their junior year and $400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) scholarship students must complete one year of calculus, physics and English, one semester of American military history or national security policy and a cultural course.

Commissioned Service
Opportunities for commissioned service are presently available in the unrestricted line (surface, subsurface, aviation, special warfare and special operations) in the U.S. Navy. Opportunities in ground and aviation specialties are available in the U.S. Marine Corps. Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All
commissioning programs require that the student be working toward, and receive, a college degree.

The Navy also offers a program leading to a regular commission in the Marine Corps.

The course code for this program is NAVR.

Requirements

The number of NROTC credit hours that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Naval science coursework is offered in the fall and spring semesters only.

For additional information, visit the Naval Reserve Officers Training Corps (http://www.colorado.edu/nrotc/) website.

Courses

NAVR 1010 (2) Introduction to Naval Science
Introduction to the naval profession. Instruction emphasizes the mission, organization and warfare components of the Navy and Marine Corps. Included is an overview of officer and enlisted ranks and rates, training, education, Naval customs and courtesies, military justice, leadership and nomenclature. Exposes the student to the professional competencies required to become a Naval/Marine Corps officer.

Additional Information: Departmental Category: Naval Science

NAVR 2020 (3) Seapower and Maritime Affairs
Surveys international maritime history and provides a review of American maritime history and policy. Examines American naval involvement in regional and global conflicts, evolution in technology and management, the role of the navies in foreign policy, and the influence of seapower on history.

Additional Information: Departmental Category: Naval Science

NAVR 3020 (3) Naval Operations and Seamanship
Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.

Additional Information: Departmental Category: Naval Science

NAVR 3030 (3) Naval Engineering Systems
Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.

Additional Information: Departmental Category: Naval Science

NAVR 3040 (3) Weapons and Systems Analysis
Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

Additional Information: Departmental Category: Naval Science

NAVR 3101 (3) Evolution of Warfare
Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.

Additional Information: Departmental Category: Naval Science

NAVR 3201 (3) Fundamentals of Maneuver Warfare
Prepares future military officers and other leaders for service by studying modern tactical principles, current military developments and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Naval Science

NAVR 4010 (3) Leadership and Management
Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

Additional Information: Departmental Category: Naval Science

Faculty

Dodds, Thomas J.
Professor; Colonel, U.S. Marine Corps; MS, National Defense University

Dodge, Jamieson B.
Assistant Professor; Lieutenant, U.S. Navy; BS, Auburn University

Dziwulski, Shelby L.
Assistant Professor; Lieutenant, U.S. Navy; BS, University of Maryland

Kauffman, Regina P.
Associate Professor; Commander, U.S. Navy; MBA, Naval Postgraduate School

Murphy, Sean B.
Assistant Professor

Seiders, Joden L.
Assistant Professor; Lieutenant, U.S. Navy; BA, Ashford University
NAV 4020 (3) Leadership and Ethics
Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.

Additional Information: Departmental Category: Naval Science

NAV 4030 (3) Navigation
Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, electronic fixing, global positioning system, and voyage planning.

Additional Information: Departmental Category: Naval Science

Undergraduate Residential Programs

Residential Academic Programs (RAPs)
A number of the residence halls are home to residential academic programs (RAPs), whereby students live in and take special classes in their hall that meet core curriculum and/or other course requirements. All of these programs charge additional $850 fees per academic year.

- Baker RAP (https://www.colorado.edu/bakerrap/) is designed for freshmen and sophomores in the College of Arts and Sciences or Program in Exploratory Studies interested in the natural sciences and environmental studies.
- CMCI/Communication RAP (http://living.colorado.edu/get-involved/raps-cmci/) offers 200 first- and second-year students a program to explore many different areas of communication, ranging from processes of face-to-face interaction to the impact of media and technology on daily life.
- Engineering Honors RAP (http://living.colorado.edu/get-involved/raps-engineering-honors/) provides educational experiences that match the abilities and ambitions of some the very best students at CU.
- Farrand RAP (http://living.colorado.edu/get-involved/raps-farrand/) offers small seminar courses in the liberal arts taught by award-winning faculty selected to help create a close intellectual and social community. About 400 mostly first-year students from the College of Arts and Sciences or Program in Exploratory Studies participate. The program focuses on the study of the humanities within the larger frame of culture and society.
- Global Engineering RAP (http://living.colorado.edu/get-involved/raps-global-engineering/) prepares engineering students for the new global conditions of the engineering professions through experiencing international culture, mastering a second language and gaining confidence with IT-driven international communication and collaboration.
- Global Studies RAP (http://living.colorado.edu/get-involved/raps-global-studies/) promotes the recognition of global interdependence, encourages the study of foreign languages and international affairs and emphasizes the value of international education. This year-long program connects participants with a peer group of students who have similar interests and goals. The staff is knowledgeable about CU Boulder’s many international resources, and the faculty incorporate international work into their teaching and research.
- Health Professions RAP (http://living.colorado.edu/get-involved/raps-health-professionals/) accommodates approximately 270 first and second-year students. This community is ideal for students interested in exploring coursework and career options in the health professions such as clinical practitioners, researchers or policymakers. Courses offered include a rich mix of science courses well suited for IPHY, MCDB and NRSC majors, and other interested in the life sciences, supplemented by select general education courses.
- Honors RAP (http://living.colorado.edu/get-involved/raps-honors/) is the residential component of the Honors Program of the College of Arts and Sciences. It promotes and sustains academic excellence within a lively community setting. First-year students take one, onsite, seminar-style three-credit-hour course each semester. Beyond the classroom, Honors RAP offers a variety of co-curricular and student-led activities that enhance the learning experience. It is open to approximately 335 first-year and continuing honors-qualified students in the College of Arts and Sciences.
- Leeds Business RAP (http://living.colorado.edu/get-involved/raps-leeds/) (Leeds RAP) is a targeted community that is comprised exclusively of students who are business majors. Leeds RAP seeks to build individuals who are well-rounded, prepared, engaged and equipped to succeed in 21st century workplaces and take roles as global leaders. Students in the program develop supportive relationships with faculty and staff, including an in-house academic advisor, as well as with peer mentors.
- Libby Arts RAP (http://living.colorado.edu/get-involved/raps-libby/) (LRAP) is a living and learning community that unites several arts disciplines and core requirement options in one program. Our mission is to foster the skills students need to develop into creative leaders of tomorrow. Our guiding principles are creativity, curriculum and community.
- Pre-Business RAP (http://living.colorado.edu/get-involved/raps-pre-business/) is a community of first-year students pursuing a business degree, but have not yet been directly admitted into the Leeds School of Business. The program provides a supportive and preparatory path for students to transfer into Leeds their sophomore year.
- Sewall RAP (http://living.colorado.edu/get-involved/raps-sewall/) is a program for first- and second-year students enrolled in the College of Arts and Sciences or Program in Exploratory Studies who have an interest in the study of history, education, and society, or are considering a career in the teaching professions. The program offers small classes taught in Sewall Hall, co-curricular activities that support the RAP’s theme and help build community, and personalized attention from faculty and staff dedicated to student success.

Living and Learning Communities

Living and Learning Communities (LLCs) also enhance the learning environment. Several communities offer themed housing without the formal connection to faculty found with the RAPs.

- Active Living LLC (http://living.colorado.edu/get-involved/llds-active-living/) offers students in Darley North a living community in which all participants strive to lead an intentionally active lifestyle. Events in the program inspire the holistic development of mind, body and spirit. Ultimately, Active Living participants aim to achieve academic success and fulfillment of their personal needs and goals.
- Lucile Berkeley Buchanan LLC (http://living.colorado.edu/get-involved/llds-buchanan-community/) provides a supportive, social and communal space for black-identified students and their community allies. Students gain access to artifacts, critical conversation and educational programming that create an inclusive and productive atmosphere within the residence hall.
- Multicultural Perspective LLC (http://living.colorado.edu/get-involved/llds-multicultural-perspectives/) is a community that
provides a safe space for students to talk and learn more about social justice issues through conferences, events and dialogue. This program partners with the Spectrum Living & Learning Community.

- The Quadrangle Engineering LLC (http://living.colorado.edu/get-involved/llcs-quad-engineering/) is comprised of students studying engineering, applied science or mathematics who live in Aden, Brackett, Cockerell or Crosman halls. This program offers residents on-site tutoring, access to a computer lab configured to match that in engineering computer labs, enhanced academic support services, wireless computer access and calculus work groups in residence. An additional fee of $130 per academic year was charged in 2016–17 to cover support activities (fee is subject to change).

- Spectrum LLC (http://living.colorado.edu/get-involved/llcs-spectrum/), part of the Multicultural Perspective LLC, offers a variety of social and educational activities including leadership opportunities. Spectrum is designed to provide a supportive place for individuals of all sexual identities including gay, lesbian, bisexual, transgender and queer people and their allies. The Spectrum living area has gender-neutral bathrooms.

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

#### Baker

**Barlow, Lisa K.** (https://experts.colorado.edu/display/fisid_100137/)
Senior Instructor; PhD, University of Colorado Boulder

**Breed, Michael D.** (https://experts.colorado.edu/display/fisid_103631/)
Faculty Director; PhD, University of Kansas

Zerella, Michael (https://experts.colorado.edu/display/fisid_151090/)
Instructor; PhD, University of Colorado Boulder
Graduate education at the University of Colorado began in 1892. In 1909, the Graduate School was organized with a separate faculty. The mission of the Graduate School is to facilitate and enhance the educational experiences of all graduate students and to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU Boulder graduate degree. Currently overseeing more than 120 graduate programs, the Graduate School is responsible for planning, implementing and evaluating graduate programs and graduate education policies and procedures.

The Graduate School along with the Graduate Faculty develops and administers programs according to the needs of the campus and in accord with the general standards of excellence and sound academic administration established by the Graduate School and the Graduate School Rules (http://www.colorado.edu/GraduateSchool/policies/_docs/GraduateSchoolRules.pdf). Academic policies governing graduate education are initiated by the faculty in accordance with the Laws of the Board of Regents. The Graduate School Executive Advisory Council, which consists of members of the Graduate Faculty, advises the Dean of the Graduate School and Vice Provost for Graduate Affairs on issues concerning Graduate School policies and programs. The Dean of the Graduate School and Vice Provost for Graduate Affairs reports to the Provost.

The Graduate School also supports a variety of centers and programs that are not affiliated with any single college. These include the Center for Humanities and the Arts, the Center for STEM Learning, the Center for Native American and Indigenous Studies, the Center for the Study of Origins, the Center for Critical Thought, The Colorado European Union Center of Excellence, and the Program in Environmental Design.

**Academic Calendar & Exams**

**Academic Calendar**

The campus operates year round, with fall and spring semesters of 16 weeks each, a winter session in between fall and spring semesters, and a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session, a 10-week session and two intensive (one- or more-week) sessions.

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar’s Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage. (http://colorado.edu/registrar/)

The University of Colorado at Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the Observance of Religious Holidays and Absences from Classes and/or Exams (http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-and-or-exams/).

**Final Examinations**

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule as published by the Office of the Registrar each semester. Unless notified otherwise in writing during the first week of classes, students enrolled in undergraduate courses should assume that an examination will be given. While it may be appropriate not to give a final in some undergraduate courses, such as independent studies, laboratory courses, seminars, project-based courses and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Graduating seniors are not exempt from final examinations. Students enrolled in graduate courses should consult with their instructors on whether final examinations will be administered.

1. The final examination in a course should be given as scheduled by the Office of the Registrar and not at other times, even if the instructor and all students in a course agree to such a change. An instructor may allow individual students to take the final examination at an earlier or later time if the instructor is satisfied that an exception is based on good and sufficient reasons and if such an exception is unlikely to materially advantage or disadvantage the interests of other students in the course.
2. Students should consult with their instructors and course syllabi for final examination information for courses that are scheduled at non-standard times and are not included in the published final examination schedule.
3. Final examinations in summer courses and in courses offered during special (variable length) sessions in fall and spring semesters are typically administered on the last regular meeting day of the course. No Common Exams for multiple sections of a single course may be scheduled for special session courses.
4. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. For courses in sessions of ten weeks or longer, no examinations may be given during the week of classes preceding the start of the campus’s final examination period; however, assignments listed in the syllabus such as papers, lab practicums, presentations, portfolios and projects may be due during that week.
5. Class sessions or graded assignments of any kind, including papers, lab practicums, presentations, portfolios and projects, may not take place or be due on a day designated in the academic calendar as a Reading Day.
6. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for the last exam or exams scheduled on that day. When students have two final examinations scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the course that meets later in the week during the term or, if the two courses meet on the same day during the term, the course that meets later in the day. Students must make arrangements with the instructor of the affected course(s) by the standard deadline to drop a course in that term and are expected to provide supporting written information of these situations to qualify for exceptions.
7. The submission deadline for grades each semester or special session is 96 hours after the conclusion of the final examination, excluding designated university holidays.
8. The Provost (or designee), in consultation with the Senior Vice Chancellor (or designee), may either reschedule or cancel final examinations in response to inclement weather or other emergencies that result in a campus closure during the final examination period. The administration’s determination of whether to reschedule or to cancel final examinations is based on the number of exam periods affected by the closure and the timing of the closure.

**Rescheduled Exams**

A final examination may be rescheduled within the final examination period. Students who do not participate in a rescheduled final examination are not guaranteed any make-up examination or alternative assignment, and in such cases students will be assigned course grades based on tests, assignments and other graded work completed up to the end of the term.

**Canceled Exams**

If a final examination is canceled, course grades will be assigned based on tests, assignments and other graded work completed up to the end of the term. Faculty may also offer a make-up examination and/or allow for an alternative assignment to be submitted after the final examination period. However, such opportunities must be made available to all students enrolled in the course, all final work must be received and graded no later than the end of the first week of the subsequent term (inclusive of summer session), and faculty must then submit change of record information for students whose course grades change due to their work on make-up examinations or alternative assignments.
**Academic Integrity**

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish. The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

**Honor Code**

Academic Dishonesty includes any act in which a student gains, or attempts to gain, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Plagiarism.** Portrayal of another’s work or ideas as one’s own; improper citation of another’s work, including, but not limited to, one’s own previous work.

2. **Cheating.**
   a. **Unauthorized Use.** Use of prohibited notes or study aids; allowing another party to do one’s work/exam and turning in that work/exam as one’s own; copying another student’s course work; collaborating on course work when prohibited; failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi; and/or use of electronic devices when not expressly permitted.
   b. **Clicker Fraud.** Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.

3. **Fabrication.** Falsification or creation of data, research, or resources, altering graded work without the prior consent of the course instructor.

4. **Lying.** Deliberate falsification with the intent to deceive, as applied to an academic submission of information.

5. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, or, an assignment, or in the aiding of Academic Dishonesty.

6. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code violation, or in connection with any other form of Academic Dishonesty.

7. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by SCCR staff.

8. **Unauthorized Access.** Gaining unauthorized access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; or secure information on an online server.

9. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course instructors involved.

10. **Aiding Academic Dishonesty.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.

A student accused of violating the Honor Code has the right to due process through Student Conduct & Conflict Resolution. Students will receive notice through their Colorado.edu email address, and are encouraged to meet with a Conduct Coordinator to share their perspective on the allegations. Full details of the Honor Code adjudication process are on the Student Conduct & Conflict Resolution website (https://www.colorado.edu/scr/honor-code/).

**Academic Records**

**Diplomas**

A diploma is issued for each degree earned at the University of Colorado Boulder. Doctoral graduates will be invited to receive their diplomas from the Graduate School on or after the date of the university-wide ceremony or degree conferral (diplomas may be picked up or mailed if not attending the ceremony). Diplomas are mailed to all other graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. All financial obligations with CU must be resolved before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved certificate from Fall 2015 onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents registration for future terms and prevents the release of the diploma and academic transcript. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (http://www.heartlandecsi.com/) website. Questions may be directed to University Student Loans & Debt Management in the Bursar’s Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar’s Diplomas (http://www.colorado.edu/registrar/alumni/diplomas/) webpage.

**Enrollment & Degree Certification**

Through Buff Portal (https://buffportal.colorado.edu/), students may print an official enrollment certification at no charge. Advanced registration enrollment verifications (https://www.colorado.edu/registrar/students/records/info/verifications/#after_you’ve_registered_amp_before_the_first_day_of_classes-1771) are available to students enrolled in at least a half-time enrollment status for an upcoming term up to three weeks prior to the term. Official certification of enrollment is available after the third week of classes of a semester. This certification may be for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree
verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student’s name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the academic enrollment status and federal regulation determines the financial aid enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar’s enrollment status grid on the Check Your Enrollment Status (https://buffportal.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic/financial aid enrollment status.

Students may also obtain verification of degree by ordering an official transcript or requesting an official degree certification through the Office of the Registrar.

**Transcripts**

**Official Transcripts**

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&j_id=73anAeWu6k3ErXO); no IdentKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

Transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

**Unofficial Transcripts**

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student’s career at CU Boulder, as this transcript does not carry the registrar’s signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

**Educational Record Changes**

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

**Degrees**

**Graduate Degrees**

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of the Environment (MENV)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMEd)
- Master of Science (MS)
  - Professional Master of Science in Aerospace Engineering Sciences (MSAES)
  - Professional Master of Science in Civil Engineering (MSCVE)
  - Professional Master of Science in Computer Science (MSCPS)
  - Professional Master of Science in Electrical Engineering (MSEE)
  - Professional Master of Science in Environmental Engineering (MSENV)
  - Professional Master of Science in Mechanical Engineering (MSME)
- Master of Studies in Law (MSL) (through School of Law)
- Doctor of Audiology (AudD)
- Doctor of Musical Arts (DMA)
- Doctor of Philosophy (PhD)
- Juris Doctorate (JD) (through School of Law)

**Bachelor's–Accelerated Master's Degrees**

Bachelor’s–accelerated master's (BAM) degree programs are offered in several departments. These programs allow a student to receive both a bachelor's and master's degree in five years of study without compromising the academic integrity of either degree.

BAM programs are open only to highly qualified CU Boulder undergraduates. Students are typically admitted during the junior year with an intent application reviewed by their program. BAM students must apply online to graduate with their bachelor’s degree for the semester in which degree requirements are complete, and must also apply at that time to be formally admitted to continue with the accelerated master’s program. (Students who were admitted prior to July 2019 follow a concurrent bachelor’s/master’s structure, and the two degrees are awarded simultaneously when requirements for both degrees are met.) Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School.

Students interested in a BAM program should inquire with their program of interest for information regarding admissions and detailed program guidelines and requirements.

Please see below for currently approved BAM degree programs offered, listed by college and school. Or, explore BAM program options in the Programs A-Z section (https://catalog.colorado.edu/archive/2021-2022/programs-a-z/#filter=filter_53) of the catalog.

**College of Arts and Sciences**

- Art and Art History
- Chinese/Asian Languages and Civilizations
- Cinema Studies/Art and Art History
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
• French
• German Studies/German
• Integrative Physiology
• Japanese/Asian Languages and Civilizations
• Linguistics
• Mathematics
• Mathematics/Applied Mathematics
• Philosophy
• Physics
• Religious Studies
• Russian Studies/Russian
• Theatre

**Leeds School of Business**
• Accounting/Accounting or Accounting Taxation
• Finance/Accounting or Accounting Taxation

**School of Education**
• Ethnic Studies/Education

**College of Engineering and Applied Science**
• Aerospace Engineering
• Applied Mathematics
• Applied Mathematics/Technology, Cybersecurity, and Policy
• Architectural Engineering/Architectural Engineering or Civil Engineering
• Chemical Engineering or Chemical and Biological Engineering/Chemical Engineering
• Civil Engineering/Architectural Engineering or Civil Engineering
• Computer Science
• Computer Science/Technology, Cybersecurity, and Policy
• Electrical Engineering or Electrical and Computer Engineering/Electrical Engineering
• Electrical Engineering or Electrical Engineering/Technology, Cybersecurity, and Policy
• Engineering Physics/Physics
• Environmental Engineering/Civil Engineering, Environmental Engineering, or Mechanical Engineering
• Mechanical Engineering

**College of Media, Communication, and Information**
• Information Science

**Dual Degrees**
In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

**Combinations within the Graduate School**
• Applied Math/MCD Biology
• Audiology/Speech, Language and Hearing Sciences (both through the Department of SLHS)
• Engineering Management/Aerospace Engineering
• Engineering Management/Computer Science
• Engineering Management/Electrical Engineering
• Engineering Management/Mechanical Engineering
• Engineering Management/Telecommunications
• Music (two areas)
• Religious Studies/Asian Languages/History (any two)

**Combinations with MBA**
• Anthropology/MBA
• Art and Art History/MBA
• Business Analytics/MBA
• Computer Science/MBA
• Environmental Studies/MBA
• German Studies/MBA
• Master of the Environment/MBA
• Supply Chain Management/MBA
• Telecommunications/MBA
• Theatre/MBA

**Combinations with Law**
• Business Administration/Law
• Environmental Studies/Law
• Juris Doctor/Bachelor of Laws with the University of Alberta faculty of Law, Canada
• Medicine/Law
• Public Administration/Law
• Telecommunications/Law
• Urban and Regional Planning/Law

**Certificates**
Graduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who have been verified with completed certificate requirements will have the certificate(s) posted to their academic records at the time of graduation.

Non-degree students who are approved to pursue select certificate programs must be admitted through Continuing Education. Where applicable, students may enroll in graduate certificates in Specialized Programs (p. 1685) as either non-degree or degree-seeking students.

**Graduate Course Load**
For graduate students, enrollment status depends on a student’s level (doctoral or master’s), the type of classes they are taking and, for doctoral students, candidacy status. The status is also based on university policy and state and federal regulations. University policy determines the academic enrollment status and federal regulation determines the financial aid enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the National Student Clearinghouse.

For academic purposes, full-time status is determined by university policy. For requirements for your academic load and status, visit the Graduate School Rules (Section 8: Full-time Status and Minimum Registration Requirements) (https://www.colorado.edu/graduateschool/graduate-school-policies-procedures/).

Typically in the fall and spring semesters, full time status is one of the following:
• 5 credit hours of graduate coursework.
• 8 credit hours of combined graduate/undergraduate coursework.
• 12 credit hours of undergraduate coursework or a varying number of thesis/dissertation credit hours, depending upon the student’s status.

Summer course load requirements vary.

For financial aid full time and half time course-load requirements, which may be different than those set by the Graduate School, graduate students should consult the financial aid load columns of the enrollment status grid (https://www.colorado.edu/registrar/sites/default/files/attached-files/enrollmentstatusgrid.pdf) and the Office of Financial Aid (https://www.colorado.edu/financialaid/aid-graduate-professional-students/) website. Students may also refer to Office of the Registrar’s enrollment status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic and financial aid enrollment status.

Graduate students may register for a maximum of 15 credit hours per semester toward a degree during the fall and spring semesters.

### Academic Standards & Advising

#### Academic Standards

##### Grade Point Average

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

##### Nonacceptable Grades

1. A student who receives a grade of C+ or below in a course may retake the course under the grade replacement policy (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/), if eligibility standards are met.
2. Courses in which grades below B- (2.70) are received are not accepted for doctoral programs.
3. Courses in which grades below C (2.00) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail.

##### Student Ethics

#### Academic Dishonesty

The University of Colorado Boulder is dedicated to maintaining the highest standards of intellectual honesty. Commitment to these standards is the responsibility of every student, faculty and staff member. The Honor Code (https://www.colorado.edu/sccr/honor-code/) was designed to uphold CU Boulder’s standards of academic integrity and intellectual honesty, as well as to provide quick resolution of reports of student academic misconduct. The Honor Code process is supported by the Boulder Faculty Assembly.

All students of the University of Colorado Boulder are subject to the Honor Code for academic matters. Students must sign a statement agreeing to abide by all university policies, including the Honor Code, as a condition of admission to the university. Students who violate may be subject to discipline as set forth by the Honor Code.

#### Research Integrity

All research and scholarly/creative work must comply with requirements regarding research integrity. Allegations of plagiarism, fabrication, falsification, and other forms of research misconduct will be investigated by the Standing Committee on Research Misconduct. The Office of Research Integrity (https://www.colorado.edu/researchinnovation/rcr/research-misconduct/) provides further information and clarification on related issues and processes. Students should also review the university policy (https://www.cu.edu/ope/aps/1007/) on Misconduct in Research, Scholarship, and Creative Activities.

#### Probation

A student whose cumulative GPA falls below 3.00 is placed on academic probation. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student’s cumulative GPA is at or below 2.50, a dean’s administrative stop is placed on the student’s record, and the student may be withdrawn from coursework for upcoming semesters. Individual departments may have specific probation requirements.

If, after the two-semester probationary period, the student’s cumulative GPA is still below 3.00 or if other conditions placed by the major department or Graduate School are not met, a dean’s administrative stop will be placed on the student’s record and he or she may be subject to dismissal.

A provisionally admitted student whose GPA falls below 3.00 has a dean’s administrative stop placed on his or her record pending a review by the major department and the Graduate School.

### Graduate School Advising

Graduate students receive degree-specific advising from their academic department. Faculty advisors are assigned to students according to departmental policies.

The Graduate School provides academic student services and fosters connection to campus partners and resources. Staff members offer expert guidance related to Graduate School and campus policies and procedures. Specific areas of expertise include registration requirements and requests, committee and general examination requirements, general academic standards, degree requirements which apply to all students and exceptions to general requirements.

The Graduate Student Services office also assists in the navigation of thesis/dissertation and graduation process, including associated exceptions, deadlines and degree conferral. Our staff can assist in a number of additional areas at the dean's office level.

For general inquiries, contact Graduate Student Services at gradinfo@colorado.edu or call 303-492-8220.

#### Admissions

Graduate School admission is handled by individual academic departments; see the specific college, school and program sections for details. For more information, visit Graduate School Admissions (http://www.colorado.edu/graduateschool/admissions/).

#### Application Procedures

Students seeking admission to a CU Boulder master’s or doctoral program apply directly to the appropriate department. An applicant for admission must present complete application materials, including:

- the graduate application, available online at Graduate School Admissions (http://www.colorado.edu/graduateschool/admissions/),
- unofficial transcripts for all academic work completed to date,
• a non-refundable application fee (currently $60 for domestic applicants and $80 for international applicants),
• three or four letters of recommendation (please check with your program to obtain the required number of recommendations needed), and
• test scores and other materials as required by specific departments.

A completed application must be submitted by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term.

Admission Requirements

Regular Degree Students

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

• They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
• They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
• They have had adequate preparation to enter graduate study in the chosen field.
• They have at least a 2.75 (on a 4.00 scale) undergraduate GPA (for engineering, 3.00). (Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 credit hours of relevant graduate coursework with at least a 3.25 average.)
• They meet additional requirements for admission established by the major department.

Provisional Degree Students

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit hours earned by persons in provisional degree status may count toward a degree at CU Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 credit hours in two semesters (or equivalent for part-time students) with a 3.00 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

Highly qualified undergraduate students may be recommended for admission to a BAM degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified by each department.

Dual Degree Programs

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program’s approved guidelines. Minimum standards and qualifications for admission and continuation are specified by each department. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping coursework.

Nondegree Students to Regular Degree Status

Students with nondegree status applying to a graduate degree program should talk to the academic department about specific resident requirements before applying to the program. The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought; individual departments may have more restrictive limits. Learn more about transfer of credit on the Graduate School’s admissions page (https://www.colorado.edu/graduateschool/admissions/).

Former and Suspended Students

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit a Graduate Readmit application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU Boulder.

A regular degree student who is dismissed for failure to maintain a 3.00 GPA is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student’s major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

Students Transferring from Other CU Campuses

Students transferring from another CU campus to CU Boulder must apply to and be accepted by the Boulder campus.

Students Changing Major Departments

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an approved interdisciplinary major combination, students should contact their home department for instructions on this process.
Credits & Grading
Grading System
The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

Standard Grade Points per Hour of Credit

Requests for incomplete grades must be initiated by the student and only when, for reasons beyond their control, the student is unable to complete the class requirements within the semester of enrollment. A substantial amount of work must have been satisfactorily completed before approval for such an incomplete grade is given.

If an instructor grants a request for an incomplete, the instructor sets the conditions under which the coursework can be completed and the time limit for its completion or if the class should be retaken.

If an incomplete class is retaken, it must be completed on the Boulder campus or through Boulder Continuing Education coursework, and the student must re-register for the course and pay the appropriate tuition. The initial grade of I is not removed from the transcript if the course is retaken within one year.

Grade Point Average
The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, NC, *** (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is an example GPA calculation for a hypothetical semester:

Grade Earned: A; Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A-; Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+; Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P or P+; Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F; Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
Total of 15 credit hours with 44 credit points, so 44/15 = 2.93 GPA

For individual GPA calculations related to academic standing and graduation from a college or school, students should refer to their academic dean's office.

Credit Policies
No Credit
Coursework to be applied toward an advanced degree may not be taken for no credit (NC). Courses taken for no credit cannot be used toward the minimum credit load requirement for full-time or half-time status, and are not eligible for tuition remission coverage. Graduate students also cannot use the no-credit class(es) towards their TA/RA appointment.
Pass/Fail
No coursework to be applied toward an advanced degree may be taken pass/fail.

Transfer Credit
Transfer credits from accredited institutions are accepted by CU Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system or credits earned as a nondegree student within the CU system. Students seeking a degree from CU Boulder must complete the majority of their coursework while enrolled as degree-seeking students.

With the approval of the Graduate School and at the discretion of the unit, students may transfer up to and including 24 hours from a CU Boulder graduate certificate program, taken as a CU Boulder non-degree student, toward a graduate degree.

The following rules apply to transferring credit to CU Boulder graduate programs:

- The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought (see below; individual departments may have more restrictive limits).
- Work already applied toward a graduate degree received from CU Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Courses applied toward an undergraduate degree may not be transferred to the CU Boulder Graduate School.
- All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework that is to be applied to a graduate degree at CU Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credit hours of graduate coursework as a regular, degree-seeking student at the Boulder campus with a 3.00 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.

Graduate Credit for CU Boulder Seniors
With the exception of students enrolled in a bachelor's-accelerated master's (BAM) or concurrent bachelor's/master's degree program, seniors at CU Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 credit hours), provided such work is completed with a grade of B or above in coursework at CU Boulder, comes within the five-year course time limit, has not been applied toward another degree and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

Grade Replacement Policy Update
Updates to CU Boulder's grade replacement policy, effective Spring 2022, were approved by the Provost in February 2022. As this change occurred during the 2021–22 academic year, both versions of the policy are included below.

Grade Replacement Policy (through Fall 2021)
Repeating Courses
Students may repeat courses at any point in their academic career without invoking grade replacement. In those cases, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations. Some academic programs have limits on the number of course repeats allowed for specific courses.

Grade Replacement
Under the grade replacement policy, degree-seeking undergraduate and graduate students may retake a course in which they earned a low grade in an attempt to improve their cumulative GPA.

When a student retakes a course for grade replacement, the grade earned in the most recent prior attempt remains on the transcript. Their semester and cumulative GPA and credit totals are updated to exclude the most recent prior attempt.

General Eligibility
Course Requirements
Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

- Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail or for no credit).
- Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). Exceptions: Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.
- Not exceed the total grade replacement credit limit for an academic career.
- Undergraduate: Up to 10 credit hours of grade-replacement coursework.
- Graduate: Up to 6 credit hours of grade-replacement coursework.

Student Requirements
To apply for grade replacement, students must:

- Be an active degree-seeking undergraduate or graduate student at CU Boulder (law and nondegree students are not eligible). Students who have graduated cannot use grade replacement for a course taken in a completed career.
- Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

Invoke Grade Replacement
To request to retake a course for grade replacement, students must:
1. Register for the class for an upcoming semester.
2. Submit the grade replacement request form by the published deadline for the semester/session in which the class is being offered. There are no exceptions for late submissions.

After being reviewed for eligibility, students are notified via email whether their request was approved or denied.

Revoking or Cancelling a Request
Students who revoke grade replacement, but who no longer wish to retake courses for grade replacement must revoke or cancel their request by the published deadline for the semester/session in which the class is being offered. Once the deadline has passed, requests cannot be revoked or changed. The grade earned in the most recent attempt will be the final grade that calculates in GPA and credit totals, even if it’s lower than the grade earned in the most recent prior attempt.

Additional Information
For more information on course repetition and grade replacement, visit the Office of the Registrar website (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/) or view the grade replacement policy in full (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/).

Grade Replacement Policy (effective Spring 2022)

Grade Replacement
CU Boulder students (excluding Law students) who previously earned a low grade in an eligible course may repeat that course in a later term and be eligible for grade replacement. Grade replacement affords students the opportunity to improve their cumulative GPA.

Grade replacement is applied automatically at the end of each term to eligible courses and students.

Under grade replacement, the grade earned in the most recent prior attempt of a course will still appear on the transcript, but it will be replaced in cumulative GPA and credit totals as long as the latest grade earned is the same or better. If a lower grade is earned in the latest attempt, grade replacement is not applied and the grades from both attempts will be used in computing cumulative and major grade point averages, total credits and academic standing.

When students repeat courses that are not eligible for grade replacement, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations. Some academic programs have limits on the number of course repeats allowed for specific courses or the number of attempts for degree applicability.

General Eligibility

Course Requirements
Only courses offered by and taken through CU Boulder are eligible for grade replacement. To qualify for grade replacement, the course also must:

- Be taken at CU Boulder for a letter grade (i.e., not taken pass/fail or for no credit).
- Not be a special topics course or any other course designated in the catalog as repeatable for credit (e.g., independent study, field experience, dissertation hours). Exceptions: Topics courses WRTG 1100, WRTG 1150, WRTG 1160, WRTG 1250, WRTG 3020, WRTG 3030, WRTG 3035 and WRTG 3040 are eligible for grade replacement regardless of topic.

Student Requirements
To quality for grade replacement, students must:

- Be an active student at CU Boulder (law students are not eligible).
- Students who have graduated cannot use grade replacement for a course taken in a completed academic career.
- Have earned a C- or lower (undergraduate students), or a C+ or lower (graduate students) in the most recent prior attempt of a course.

Opting Out of Grade Replacement
Students may repeat courses at any point in their academic career without invoking grade replacement by submitting an opt-out request to Office of the Registrar by the last day of classes of the term. In those cases, the grade and credits earned in each attempt are included in student credit and GPA totals and calculations.

Additional Information
For more information on grade replacement, visit the Office of the Registrar website (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/) or view the grade replacement policy in full (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/policy/).

Degree Requirements

Master’s Degree Requirements

A student enrolled in a master’s program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are the minimum standards of the Graduate School; additional requirements are set forth by the major department.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the Dean of the Graduate School.

Minimum Registration Requirement
For purposes of deciding full-time registration status, a student must meet one of the following criteria:

Master’s Students

- One who is carrying a minimum of 5 credits of graduate-level coursework (pass/fail or for a grade), 8 credits of combined undergraduate and graduate coursework or 12 hours of undergraduate-level coursework
- At least 1 master’s thesis hour
- At least 1 hour of "Master’s Candidate for Degree"

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

Master’s degree minimum registration requirements can be met only by registering full-time at CU Boulder for at least two semesters, part-time for at least four semesters, or full-time for at least one semester and part-time for at least two semesters.
Degree Requirements

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (coursework) option. At least 24 credit hours must be completed at the 5000 level or above; these 24 credit hours must include a minimum of 4, but not more than 6, thesis credit hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study coursework cannot exceed 25 percent (rounded to the nearest whole number) of the coursework required for the master's degree.

Language Requirement

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Master's Thesis

A thesis, which may be research or expository, critical or creative work, is required of every master's degree candidate under Plan I. Every thesis presented in partial fulfillment of the requirements for an advanced degree must accomplish the following:

- represent the equivalent of 4–6 credit hours of work, and
- comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.

The final grade is withheld until the thesis is completed; if the thesis is not finished at the end of the term in which the student is registered, an in-progress (IP) grade is reported.

Candidacy and Graduation

To be granted a master's degree, a student must become a candidate for that degree by filing an Application for Admission to Candidacy with the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred. Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Time Limit

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin coursework to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the Dean of the Graduate School. Such petitions must be endorsed by the student’s major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any coursework completed more than five years prior to the completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Taking a leave of absence does not extend the student’s time limit, but may be used as a reason to request an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the Dean of the Graduate School for an extension.

Comprehensive-Final Examination

Each candidate for a master's degree is required to complete a comprehensive final examination/thesis defense after the other requirements for the degree have been substantially completed. In some programs, non-thesis students are instead required to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department and will not complete a final examination.

The examination/defense may be given near the end of the student’s last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. The following rules apply to the comprehensive-final examination/thesis defense:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.

2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination. The examination/defense must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.

3. The examination/defense is given by a committee composed of three Graduate Faculty members appointed by the department with approval of the Dean of the Graduate School. The chair of the committee must have a regular Graduate Faculty appointment. Other committee members must have either a regular or special Graduate Faculty appointment.

4. The examination/defense, which may be oral, written, or both, must cover the thesis (if applicable), which should be essentially complete, other work completed in courses and seminars in the major field, and all work presented for the degree.

5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive-final examination/thesis defense may attempt it once more after a period of time determined by the examining committee.

Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.
**Doctoral Degree Requirements**

The Doctor of Philosophy (PhD), Doctor of Musical Arts (DMA) and Doctor of Audiology (AuD) are the highest academic degrees conferred by CU Boulder. The requirements stated below are minimal requirements for all candidates for the PhD degree; additional conditions are found in department announcements. Additional requirements for the Doctor of Musical Arts (p. 1608) are available from the College of Music. Additional requirements for the Doctor of Audiology (p. 1265) are available from the Department of Speech, Language and Hearing Sciences.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

**Admission**

If a student is admitted to a master's program and wants to continue on to a doctoral program in the same department, they should consult their home department on the proper procedure.

**Minimum Registration Requirement**

For purposes of deciding full-time registration status, a student must meet one of the following criteria:

**PhD students**

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one doctoral dissertation credit prior to passing the comprehensive exam
- a minimum of 5 dissertation hours after passing the comprehensive exam

**DMA students**

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework prior to passing the comprehensive exam
- at least one hour of coursework numbered TMUS 8200-8399 or "precandidate for Doctor of Musical Arts" before the comprehensive examination
- at least one hour of coursework numbered TMUS 8200-8399 or "candidate for Doctor of Musical Arts" after the comprehensive examination

**AuD students**

- one who is carrying a minimum of 5 credits (pass/fail or for a grade) of graduate-level coursework, 8 credits of combined undergraduate and graduate coursework, or 12 credits of undergraduate-level coursework.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

The minimum registration requirement for doctoral students is full-time registration for six semesters of graduate degree credit beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from another accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work completed at CU Boulder.

**Degree Requirements**

The minimum requirements for the PhD or DMA degree are 30 credit hours of coursework at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement. The minimum requirements for the AuD degree are 89 credit hours of coursework at the 5000 level or above.

Unless otherwise specified by departmental requirements, all courses taken at the 5000 level or above that were taken for the master's degree at CU Boulder may be applied toward the PhD degree. Coursework taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

**Preliminary Examination**

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in departmental requirements. Students who are thus evaluated are notified immediately of the results.

**Language Requirement**

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

**Dissertation Credit-Hour Requirement**

To complete the requirements for the PhD a student must register for a minimum of 30 dissertation credit hours. A student may not register for more than 10 dissertation credit hours in any one semester, including summer.

**Comprehensive Examination**

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (P/F or for credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks prior to the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the Dean of the Graduate School. The board shall consist of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular Graduate Faculty appointment. Other committee members must have regular or special Graduate Faculty appointments. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.
4. The examination, which may be oral, written or both, tests mastery of a broad field of knowledge, not merely formal coursework.

**Admission to Candidacy**

A student must formally apply for admission to candidacy for the doctoral degree on forms supplied by the Graduate School upon passing the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

**Graduation**

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

**Continuous Registration Requirement**

A PhD student is required to register continuously as a full-time student, for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student not being required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration for three rather than the minimum of five dissertation credit hours. Off-campus status (3 credits of dissertation hours) is considered part-time. All university considerations for part-time status apply.

DMA students who have passed their comprehensive exams must maintain continuous registration by registering for a minimum of one credit hour of DMA dissertation credits (TMUS 8100–8399) or TMUS 8029 in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the final examination is passed.

AuD students who have passed their comprehensive exams must maintain continuous registration by registering for four or five hours of graduate-level coursework each semester as required by the audiology program, with five hours being taken during the semester in which the final examination is passed.

Additional full-time and part-time registration requirements may exist for international students or students receiving or deferring financial aid, though degree requirements remain the same. Affected students should consult with International Student and Scholar Services or the Office of Financial Aid for more information.

A student who fails to register continuously for required hours after passing the comprehensive examination must retake and pass the examination, to regain status as a student in good standing in the Graduate School. The department may require that the student validate coursework more than five years old. At its discretion, the department may petition the Dean of the Graduate School for a time limit for the student's time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

**Dissertation Defense/Final Exam**

After the PhD dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. The following rules apply to the PhD dissertation defense/non-PhD doctoral final examination:

1. PhD students must be registered as full time, regular degree-seeking students at CU Boulder, for a minimum of 5 dissertation hours during the semester in which they pass the final examination. DMA students must be registered, full-time for DMA dissertation credits (courses 8200–8399) or TMUS 8029 during the semester in which they pass the final examination. AuD students must be registered full time with at least 5 hours of graduate level coursework. (Graduate School Rules, 18)

2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date. The examination must be scheduled not later than the posted deadline for the semester in which the degree is to be conferred.

3. This examination is wholly or partly oral, the oral part being open to anyone.

4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU Boulder Graduate Faculty. The chair and outside member of the committee must have regular Graduate Faculty appointments. The other committee members must have either regular or special Graduate Faculty appointments.
Faculty appointments. The outside member must either have a regular Graduate Faculty appointment in a different department at CU Boulder or hold a special Graduate Faculty appointment with approval to serve as outside member. More than one dissenting vote disqualifies the candidate in the final examination. The chair and all committee members must participate in the examination, with the mode of participation (e.g. in person, remotely) defined by the committee and approved by the department.

5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

**Dissertation Requirements**

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student’s major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and signature page on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation credit hours is submitted to the Graduate School.

**Sequestration of Dissertations**

Dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and kept on file electronically at Norlin Library. Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to sequester the student’s dissertation to protect university rights to intellectual property. The university accepts the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This sequestration should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

**Graduate Faculty Appointments for Courses and Exams**

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master’s or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact the departmental graduate program assistant for questions concerning these appointments.

**Distance Education**

The University of Colorado Boulder offers master’s degrees, graduate certificates, and individual graduate courses online in several disciplines. Students may enroll in a single course, in a graduate certificate, or in a full master’s degree program at CU Boulder. Students applying for admission to a degree program may enroll in courses as non-degree students before being accepted, but should typically apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward graduate degree requirements once a student is admitted into that program. With Graduate School and unit approval, a maximum of 24 hours can be transferred toward a graduate degree if the hours were part of a graduate certificate program and were taken as a CU Boulder non-degree student.

For more information, visit the Graduate School website (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/) and contact the individual graduate program of interest directly.

**Graduation**

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees are conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar’s Graduation & Commencement (http://www.colorado.edu/registrar/students/graduation/) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

**Commencement**

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder’s Commencement (http://www.colorado.edu/commencement/) website.

**Diplomas**

Please see the Academic Records (p. 982) section.

**New Student & Family Programs**

New Student & Family Programs (NSFP) supports new students and families throughout their transition and involvement at the University of Colorado Boulder.
In order to aid in the transition to CU Boulder, all incoming graduate students have the opportunity to participate in New Graduate Student Welcome Day. This optional program is critical to the graduate experience as it helps new students learn more about CU Boulder while providing an opportunity to connect with program advisors, faculty, current students and student support services. New graduate students should check their CU Boulder email account for more information about engagement opportunities and other important next steps.

New Student & Family Programs also collaborates with campus partners, including the Graduate School, to plan fall and spring welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs website.

**Registration & Enrollment**

**Registration**

Visit the Office of the Registrar’s Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean’s office for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

**Confirmation Deposit**

All new degree students pay a one-time $200 confirmation deposit when they first confirm their intent to enroll at CU Boulder. Students are not permitted to register if the university has not received the deposit.

Confirmation deposits are refunded to students upon graduation or official withdrawal from CU Boulder within established dates and procedures. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

**Buff Portal**

Student registration and other important information and services are available through Buff Portal (https://buffportal.colorado.edu/). Students access the portal using a secure CU login name and IdentiKey password. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

**Registering for Classes**

All CU Boulder students register for classes through Buff Portal, where they can also check their assigned registration periods, view any holds that may prevent registration (see "Holds"), see to-do lists and obtain their advisor’s name and contact information.

New incoming students and transfer undergraduate students receive their registration instructions and information during the New Student Welcome Experience. Continuing students may consult the academic calendar or view their registration dates in Buff Portal; they are also notified by email each semester of upcoming registration periods.

If a student misses their assigned registration window, they must wait until the schedule adjustment period (fall only) or open enrollment to register for classes. No exceptions are made to this policy.

Registration instructions are also available on the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

**Enrollment Dates**

Each term, students are assigned enrollment dates based on the number of credits they have completed. Accessible in Buff Portal, the enrollment assignment indicates the dates and times during which the student may enroll, as well as the maximum number of credits they can take. Students who miss their assigned dates must wait until the schedule adjustment (fall only) or open enrollment periods to register for classes.

Priority registration has been formally approved for specific populations of students who have unique scheduling needs. Priority registration does not override university or departmental policies, holds, permissions, etc., nor does it guarantee the provision of classes at specific times. Student populations with priority registration, which often occurs within the enrollment period specified for their class (i.e., freshmen, sophomores), may include students with disabilities, military veterans and student athletes.

**Holds**

A hold may be placed on a student’s record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold details in Buff Portal.

**Special Registration**

**Intercampus Enrollment Program**

CU Boulder students enrolled in at least one Boulder main campus class may be allowed to register for up to two classes or 6 credit hours, whichever is greater, on another University of Colorado campus, excluding Anschutz Medical Campus.

Classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (http://www.colorado.edu/registrar/students/registration/registration-programs/) webpage.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take coursework on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent
Community Auditors Registration Form on the Auditors program through Continuing Education by completing the Community members age 18–54 can register for the Community Auditors Program through the CU Boulder Alumni Association and qualify for reduced rates. Registration and eligibility information is available on the Senior Auditors Program (http://www.colorado.edu/alumni/programs/senior-auditors/) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Late Registration
We recommend students register for classes as soon as their registration period begins. If a student enrolls after the third Friday of the semester (fall or spring), they will be assessed a $100 late-registration fee (this is different than charges assessed for late payments of the university bill). For more information, visit the Add a Class (https://www.colorado.edu/registrar/students/registration/register/add/) webpage.

The late registration fee also applies to graduate students registering as candidates for degree or for thesis credit hours.

University Employees and Dependents
CU Boulder offers a tuition benefit to eligible employees and their dependents. For current benefit information, visit Employee Services’ Employee Tuition Waiver Benefit (https://www.cu.edu/employee-services/employee-tuition-benefit/) website.

Auditing
Individuals who have not been admitted to the university and who wish to attend regular classes may do so by obtaining auditor’s status. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course and request to take the course as no-credit (https://www.colorado.edu/registrar/students/registration/register/edit/#what_it_is=1719). A course must be offered with the student option grading basis to be eligible for no-credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Community Auditors
Community members age 18–54 can register for the Community Auditors program through Continuing Education by completing the Community Auditor Registration Form on the Community Auditors (http://ce.colorado.edu/programs/community-auditors/) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

Community auditors pay for three credit hours at the in-state undergraduate tuition rate in the College of Arts and Sciences. The cost is a flat rate and, with instructor permission, auditors may audit as many classes as desired. Nonrefundable payment is due at the time of enrollment.

Senior Auditors Program
Individuals 55 years and older can register for the Senior Auditors Program through the CU Boulder Alumni Association and qualify for reduced rates. Registration and eligibility information is available on the Senior Auditors Program (http://www.colorado.edu/alumni/programs/senior-auditors/) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Dropping & Adding Classes

Procedures
Students can add or drop classes in Buff Portal. For more information, visit the Enroll in Classes (http://www.colorado.edu/registrar/students/registration/enroll/) webpage.

Deadlines
For specific drop and add deadlines for both the regular 16-week and special fall and spring sessions, visit the Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage. For summer deadlines, visit the Summer Session Calendars (http://www.colorado.edu/summer/resources/calendars/) webpage.

Add a Class
• Students may add classes in Buff Portal during designated registration periods each term.
• After this time period, students must contact the instructor or the instructor’s department and request to be added to a class. Their request may be denied based on lack of attendance, fire code capacity being met, lack of pre-requisites, etc. If a student is added to a class after their designated registration period, then the university cannot guarantee timely review of the student’s financial aid or processing of the tuition and fee bill.

Drop a Class
• No Record Drop: Students may drop individual classes in Buff Portal with a refund and no record (no W grades) through the third Wednesday of a regular 16-week fall or spring session and through the add/drop deadline of any special fall or spring session (summer dates vary).
• Drop with Record: After the third Wednesday of a 16-week fall or spring session or the add/drop deadline of any special fall or spring session, students may continue to drop classes without instructor/advisor approval in Buff Portal through Friday of the tenth week of the regular 16 week fall or spring session or the Deadline to Drop a Class (Summer Session Calendars) date (summer dates vary). However, tuition and fees are assessed and grades of W appear on the transcript.

Drop with Record: After the 10-week drop or Deadline to Drop a Class in Buff Portal with a refund and no record (no W grades) through the add/drop deadline of any special fall or spring session (summer dates vary).
• Late Drop: After the 10-week drop or Deadline to Drop a Class in Buff Portal deadline for any special fall or spring session, instructor and dean signatures are required to drop a class. Some colleges may require additional approval or processes, such as petitioning the dean (students should check with their school or college). Class drops are generally not approved after this date except in extraordinary circumstances. Tuition and fees are assessed and grades of W appear on the transcript.

Students dropping all of their classes should see the Withdrawal section.
Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar’s Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage and review the current term’s withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student’s record. This hold prevents receipt of a diploma or an academic transcript of work at the university and registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar’s Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (https://catalog.colorado.edu/archive/2021-2022/undergraduate/student-finances/#policiestext) or the Graduate Tuition and Fee Policy (https://catalog.colorado.edu/archive/2021-2022/graduate/student-finances/#policiestext) sections.

Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

Graduate Leave of Absence

Graduate and MBA students who do not maintain continuous enrollment (summer excluded) must apply for a leave of absence or be discontinued from the university. Graduates and students who wish to take a leave of absence from the university must submit an application by the published deadline in a given term and get approval from their department and their school, college or program to avoid having to reapply.

Graduate students taking an approved leave of absence are allowed two inactive semesters (plus summer), and are guaranteed a place in their current college or school and in their current major when they return to the university. Students must not have any disciplinary holds and must be in good academic standing with the university. Students registered for the semester in which they plan to begin their leave of absence must formally withdraw. See the section on withdrawal procedures above.

For an application and more information, visit the Leave of Absence (https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/) webpage.

Student Affairs

Health & Wellness

Health and Wellness Services

Health and Wellness Services is a part of the CU Boulder Division of Student Affairs. As part of Student Affairs, we are collectively committed to the success and well-being of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings. To learn more, visit Health and Wellness Services (http://www.colorado.edu/health/).

Medical Services

Medical Services is the primary health care resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (https://www.colorado.edu/healthcenter/). (https://www.colorado.edu/healthcenter/)

Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus and online mental health and psychiatric services for a variety of concerns including academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (http://www.colorado.edu/health/counseling/).

Disability Services

Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit Disability Services (http://www.colorado.edu/disabilityservices/).

CU Boulder Student Health Insurance Plan (SHIP)

All students are required to have health insurance while attending CU Boulder. Students may elect coverage through an individual health insurance plan, through a family member or employer or the CU Gold Student Health Insurance Plan (SHIP). Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit
hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process.

All students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (http://www.colorado.edu/health/insurance/health-insurance/) webpage.

Note: Plans available through the health insurance marketplace meet CU’s health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (http://connectforhealthco.com/) website. Nonresident students may sign up through their home state health exchange or through the national Healthcare.gov (https://www.healthcare.gov/) website.

Housing

Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie’s List, CU’s rental database, on the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office. The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website or call 303-492-7053. Office hours are 8 a.m.—5 p.m., Monday—Friday. Summer hours are 7:30 a.m.—4:30 p.m.

Graduate & Family Housing

The University of Colorado Children’s Center provides child care for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing & Dining Services (https://living.colorado.edu) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office
1350 20th Street, #A10
University of Colorado Boulder
Boulder, CO 80302
T: 303-492-6384

graduatefamilyhousing@colorado.edu

Student Conduct & Colorado Creed

Student Conduct & Conflict Resolution

The mission of Student Conduct & Conflict Resolution is to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors.
- Promoting harm repair and responsible community membership.
- Cultivating the wellbeing and safety of the University of Colorado (CU) Boulder community.

Clarification of Values

1. The student will understand the effect of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy, and will commit no further violations of policy.
3. The student will gain understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through the Student Conduct & Conflict Resolution process, the student will be asked to reflect on their beliefs, ethics, and values.
   a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the university community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Authority

Article 7, Part B, of the Laws of the Regents requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding behavioral problems should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, University of Colorado Boulder, 10 UCB Boulder, CO 80309, phone 303-492-5550.

Jurisdiction

1. This document governs:
   a. Student conduct that occurs on, or as it relates to, university property or at official functions and university-sponsored programs conducted away from the campus. University property is defined as land, buildings, digital space, and facilities in possession of or owned, used, or controlled by the university, or funded by university budgets.
   b. Student conduct that occurs off university property is subject to this policy if:
      i. adversely affects the health, safety, or security of any member of the university community, including the student alleged
to have violated university policy, or the mission of the university;
ii. involves any records or documents of the university;
iii. involves conduct that may be a violation of federal, state, or local law as determined by SCCR.
c. For purposes of this policy, the university’s mission is broadly defined to include both its academic goals and the importance of developing civic responsibility in our students.
d. Wherever the Student Code of Conduct refers to “responding student”, the same also applies to Recognized Student Organizations (RSOs). RSOs, as described in the Student Organization Handbook (https://www.colorado.edu/involvement/), are general student organizations recognized by the Center for Student Involvement (CSI) and the University. For additional information, see L.5 of the Student Code of Conduct (https://www.colorado.edu/sccr/student-conduct/).

2. Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR’s jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.

3. The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.

4. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section L.1 of the Student Code of Conduct (https://www.colorado.edu/sccr/student-conduct/).

5. For jurisdictional information pertaining to academic misconduct, see Section L.2 of the Student Code of Conduct (https://www.colorado.edu/sccr/student-conduct/).

6. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to Student Conduct & Conflict Resolution or the Office of Admissions.

Student Conduct Process
Informal Resolution
This process may generally include, but is not limited to, a meeting with a conduct officer, completion of the agreement, and/or participation in the Restorative Justice program as is referenced in Section H.5 of the Student Code of Conduct (https://www.colorado.edu/sccr/student-conduct/).

During the meeting, if the conduct officer determines that the informal resolution process may be appropriate, the conduct officer will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational sanctions assigned by the conduct officer, then SCCR will consider the matter to be resolved informally.

Formal Resolution
This process generally includes: (i) written notice of the factual allegations and alleged violations of the Student Code of Conduct; (ii) the opportunity to meet with the conduct officer to address the allegations and provide information to the conduct officer; (iii) the conduct officer reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and (iv) written notice to the responding student of the conduct officer's determinations.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.

Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.

The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) policies. For more information, visit the OIEC (https://www.colorado.edu/oiec/) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the Policies (https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/) webpage.

Colorado Creed
The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

• Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
• Respect the rights of others and accept our differences.
• Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.
For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

**Student Resources**

The Division of Student Affairs (http://www.colorado.edu/studentaffairs/) offers many on-campus resources for our students. Visit our offices to learn more.

**Student Life & Involvement**

- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your group — and yourself — by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (https://custudentgov.org/): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Helping CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community of 28 chapters.
- Housing & Dining (https://www.colorado.edu/living/): Explore information about on-campus life, including residence halls, meal plans and dining options!
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie’s List, register your party and learn about the legal aspects of off-campus living.
- Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Home to the CU Book Store and student offices, as well as plenty of entertainment and dining options.

**Health & Wellness**

- Counseling & Psychiatric Services (https://www.colorado.edu/counseling/): Offers confidential, on-campus mental health and psychiatric services including workshops, groups, individual counseling and medication management.
- CU Collegiate Recovery Center (https://www.colorado.edu/recoverycenter/): A supportive student community offering free support meetings, sober social events, recovery coaching and referrals for students.
- Health Promotion (https://www.colorado.edu/health/promotion/): Assists students in developing skills to make healthy decisions through outreach and education, including workshops, classes, events and conversations.
- Medical Services (https://www.colorado.edu/healthcenter/): Provides on-campus health and wellness services including medical care, nutrition, physical therapy, sexual and reproductive health and more.
- Office of Victim Assistance (https://www.colorado.edu/ova/): Offers free and confidential support, consultation, advocacy and counseling for students, staff and faculty who’ve experienced a traumatic, disturbing or life-disruptive event.
- Recreation Services (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and the Outdoor Program.

**Student Support & Development**

- Career Services (https://www.colorado.edu/career/): Find student and alumni jobs, fine-tune your resume, learn about your strengths, land that internship and make connections with employers.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (https://www.colorado.edu/studentlegal/): Offers accessible, low-cost legal advice and education to students regarding their rights, responsibilities and how to navigate the legal system.
- Students Support & Case Management (https://www.colorado.edu/studentaffairs/ascm/): Provides individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Serves prospective and current student veterans and veteran dependents, including program information, policies, pay and support.
- Volunteer Resource Center (https://www.colorado.edu/volunteer/): Explore volunteer opportunities for CU Boulder students and staff throughout the greater Boulder community.

**Student Data Privacy**

**Annual Notice to Students**

As a CU Boulder student, it’s important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
The following items of student information have been designated by the university to restrict the release of directory information by placing a notice on the student’s record.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

**Directory Information**

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name
- hometown (city, state)
- campus email address
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/ terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

2 Campus email addresses are only disclosed to requestors who agree to not use them for solicitation.

**Withholding Directory Information**

Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

**Student Consent for Release of Confidential Information**

Students may authorize the university to release educational information to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

**Release of Disciplinary Information**

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student’s academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student’s conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student’s conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

**Student Finances**

**Costs**

**Confirmation Deposit**

All new students (in-state, out-of-state and international) must confirm their intent to enroll and pay the $200 confirmation deposit. The deposit is nontransferrable, nonrefundable and must be paid by all students, regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit.
The confirmation deposit is not applied to the tuition bill. It is refunded after graduation or official withdrawal within established dates and guidelines, and after paying any outstanding university obligations.

**Estimated Costs**

Costs for students attending CU Boulder vary depending on program of study, state residency (tuition classification), personal needs and individual interests. Estimates on the Bursar’s Office website from the links below are based on 2020–21 rates. Tuition and fees are approved annually by the Board of Regents and are usually updated by May 1 on the Bursar’s Office website (https://www.colorado.edu/bursar/costs/). Please check back for current rates.

See Graduate Colorado Resident Costs (https://www.colorado.edu/bursar/costs/fallspring-costs/graduate-colorado-resident/)

See Graduate Nonresident & International Costs (https://www.colorado.edu/bursar/costs/graduate-nonresident-and-international/)

Notes:

- Residency classification (http://www.colorado.edu/registrar/students/state-residency/) for tuition is determined by Colorado law.
- These estimates do not include a one-time new student fee (https://www.colorado.edu/bursar/costs/other-charges/new-student-fee/) ($62-$145) or the Student Health Insurance Plan ($1,948 per semester). Health insurance is mandatory to attend CU Boulder but U.S. students have the opportunity to submit proof of private insurance if they choose. See the Health & Wellness section (p. 996). Different health insurance guidelines apply to international students. See International Student and Scholar Services Health Insurance & Immunizations (https://www.colorado.edu/isss/students/new-students/health-insurance-immunizations/) for more information.
- Additional costs such as transportation, medical and personal expenses should also be considered for planning purposes. The Bursar’s Office Costs (https://www.colorado.edu/bursar/costs/) pages provide estimates of indirect costs which may help students plan accordingly.
- Students planning to attend summer session can visit the Bursar’s Office (https://www.colorado.edu/bursar/costs/summer-costs/) website for summer rates.
- Tuition for no-credit (NC) courses (p. 987) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees should check with their home department(s) regarding tuition costs.

**Bills & Payments**

**Online Bills**

The university bill includes tuition, mandatory fees, student health insurance (see health insurance requirement (https://www.colorado.edu/health/insurance/)) and other direct-university costs. Costs are billed one semester at a time. Textbooks, digital course materials and supplies up to $1,500 from the CU Book Store can be charged to the bill. Adjustments made throughout the semester will appear on the student account (e.g., health insurance waiver, dropping or adding courses, etc.). Additional costs such as housing, transportation, medical and personal are not charged on the university bill but should be considered for planning purposes. See the Bursar’s Office Costs (https://www.colorado.edu/bursar/costs/) pages for examples of indirect costs.

Bills for fall are available in mid-August, depending on a student’s registration date. Spring bills are available in mid-January. Emails are sent to students’ colorado.edu addresses and to authorized payers when bills are available online. New and unpaid charges are billed each subsequent month. Failure to check email or receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students can log into Buff Portal (https://buffportal.colorado.edu) and authorized payers can log in to CUBill&Pay (https://quickpayasp.com/cu/boulder/tuition/authorized.do) at any time to view the bill.

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

**Authorized Payers**

Family members do not automatically have access to CUBill&Pay to view and pay the tuition bill because of federal privacy laws (http://www.colorado.edu/registrar/students/records/ferpa/). If they are helping pay the bill on the student’s behalf, students must give them access to CUBill&Pay by authorizing them as payers (https://www.colorado.edu/bursar/billing/#accessbill). Students can authorize payers in Buff Portal (https://buffportal.colorado.edu). Students are ultimately responsible for payment of the bill.

Authorized Payer access is separate and distinct from CU Guest Access (https://www.colorado.edu/registrar/students/records/prvacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). If a family member is helping pay tuition and fees on a student’s behalf, we recommend giving them authorized payer access and CU Guest Access.

If a third, non-related party is helping pay the bill (e.g., military, countries sponsoring international students), then see the 3rd Party Sponsorships (https://www.colorado.edu/bursar/payments/payment-options/3rd-party-sponsorships/) webpage.

**Payments**

Payment due dates are on the 5th of the month. The primary deadlines are Sept. 5 for fall semester and Feb. 5 for spring semester. Dates may be subject to change.

**Payment Methods**

Payments can be made online from a traditional U.S. checking or savings account (electronic check or eCheck). No fees are associated with payment method making it the most cost-effective option.

We also accept American Express, Mastercard, Visa and Discover. A nonrefundable 2.75% fee (charged by NelNet Business Solutions) applies to all credit and debit card transactions. We encourage payment from a checking or savings account to save money and avoid paying the service fee.

We have partnered with Flywire to accept payments from international students worldwide. Students and families can easily and securely make education payments in their own currency, using local payment methods from their home. Flywire offers real-time tracking, 24x7 multilingual support and a best price guarantee on exchange rates.
Learn about other Payment Options (https://www.colorado.edu/bursar/payments/payment-options/) on the Bursar’s Office website.

Payment Plans
Payment plans are also available for students and authorized payers to pay tuition and fees in monthly payments on a monthly basis over the course of the semester. For more information, visit the Payment Plans (https://www.colorado.edu/bursar/payments/payment-plans/) webpage.

Also see the Policies (p. 1002) section.

Tuition and Fee Policies

Add/Drop Tuition Adjustment
Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (https://www.colorado.edu/registrar/students/calendar/).

Bachelor’s-Accelerated Master’s Degree Programs
Bachelor’s–accelerated master’s (BAM) degree programs are offered in several departments. The BAM program structure applies to students admitted on July 1, 2019 or later. Students admitted to programs before July 1 fall under the concurrent bachelor’s/master’s degree program structure, and should review the information in the 2018-19 University Catalog’s Student Finances section (https://catalog.colorado.edu/archive/2018-19/graduate/student-finances/#policiestext). Students should work with their program to review the full academic guidelines which apply to their situation.

1. Students are admitted to the BAM program around the junior year with an intent application, and will complete their undergraduate work at undergraduate status. A program-specific number of credits to be used toward the graduate degree can be taken while at undergraduate status.

2. Students must apply to graduate when undergraduate requirements are complete, will receive the bachelor’s degree along the way. They must also apply to continue with the accelerated master’s program. They will complete the remainder of the master’s degree requirements at graduate status.

3. Prior to completing the baccalaureate degree, students are assessed undergraduate tuition rates. Once admitted to the master’s program and at graduate status, students are assessed graduate tuition rates. (In-state graduate students are assessed resident graduate tuition, but do not receive COF.)

4. Undergraduate and graduate students are considered for different types and amounts of financial aid, with graduate students primarily being offered student loans (https://www.colorado.edu/financialaid/aid-graduate-professional-students/). Financial aid will automatically adjust when students change to graduate status.

Credit and Debit Card Service Fee
A nonrefundable 2.75% service fee charged by NelNet Business Solutions applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings account (electronic check or eCheck).

Dispute Rights
To dispute tuition and mandatory fee charges, students must make a formal appeal to the Bursar’s Office by the end of the semester (last day of finals). Disputes will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Learn more about the process, complete the tuition dispute form and submit the documentation online on the Tuition Dispute (https://www.colorado.edu/bursar/billing/tuition-dispute/) webpage. If you disagree with the charges and fail to avail yourself of the dispute process by the end of the semester, you will have waived your right to dispute the charges.

Failure to Make Payment
Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on the student record and remain until the balance is paid in full. A financial hold will prevent students from being able to:

- Adjust their current schedule (drop or add classes).
- Register for future classes.
- Receive transcripts.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due as follows:

<table>
<thead>
<tr>
<th>Balance Due</th>
<th>Late Charge</th>
</tr>
</thead>
<tbody>
<tr>
<td>$10-99.99</td>
<td>$5</td>
</tr>
<tr>
<td>$100-299.99</td>
<td>$10</td>
</tr>
<tr>
<td>$300-499.99</td>
<td>$20</td>
</tr>
<tr>
<td>$500-699.99</td>
<td>$30</td>
</tr>
<tr>
<td>$700-899.99</td>
<td>$40</td>
</tr>
<tr>
<td>$900 and over</td>
<td>$50</td>
</tr>
</tbody>
</table>

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of twelve percent) to the unpaid principal balance less any payments or credits made.

After the end of the semester, past due accounts are referred to the university’s Student Debt Management department (SDM) for collection. Students will have an opportunity to establish a university-approved repayment agreement. Establishing a repayment agreement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30 percent of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student’s account. The student may be responsible for reasonable attorneys’ fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the
amount owed to the university, the university may certify to the Colorado Department of Revenue information required for the recovery of past due debt.

**Nondegree Students**

Nondegree students enrolled in undergraduate courses are assessed tuition at the A&S undergraduate rate. Nondegree students enrolled in graduate courses are assessed tuition at the A&S graduate rate. Nondegree students enrolled in both graduate and undergraduate courses are assessed tuition at the undergraduate A&S rate. See the Continuing Education (https://ce.colorado.edu/resources/topics/tuition-access/) site for further information.

**Returned Payments**

A $20 fee is charged for all payments (regardless of the amount) returned due to insufficient funds, closed account, payment stopped, or for other reasons. A $30 fee is charged by NelNet Business Solutions for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when payment is made. A financial hold may also be placed on a student’s account and they may be liable for collection costs and attorneys’ fees as allowed by Colorado laws.

**Students Registered on More than One Campus**

Students registering for courses on more than one campus of the university during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credits for which they are registered on that campus. Students may be eligible to use the intercampus enrollment program (https://www.colorado.edu/ registrar/students/registration/registration-programs/), in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

**Tuition and Fee Agreement and Disclosure**

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (https://www.colorado.edu/bursar/payments/payment-agreement/).

**Tuition Classification**

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (http://www.colorado.edu/ registrar/students/state-residency/).

**Withdrawal Policy Regarding Tuition and Fees**

Students who pay the $200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and new transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by semester but occur about ten days before the first day of instruction. For the current refund and assessment schedule, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

If students withdraw after the deadline to withdraw without being assessed a financial penalty, but before 11:59 p.m. on the third Wednesday of instruction, they are assessed a $200 withdrawal processing fee. The confirmation deposit is automatically applied to the withdrawal fee.

After the third Wednesday of instruction (the first drop deadline), there are three additional assessment periods.

- From the third Wednesday of instruction through the fifth Wednesday, students will be charged 40 percent of total tuition and mandatory fees (CUSG student fees and capital construction fee).
- After the fifth Wednesday of instruction through the seventh Wednesday, students will be charged 60 percent of total tuition and mandatory fees (CUSG student fees and capital construction fee).
- After the seventh Wednesday of instruction, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may dispute tuition and mandatory fee charges through the Bursar’s Office through the last day of finals.

To comply with federal financial aid regulations, financial aid recipients’ loan and scholarship awards may be adjusted.

Visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage for current information. The Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (http://www.colorado.edu/summer/) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due to the university at the time of withdrawal must make arrangements for payment with the Bursar’s Office. Withdrawals are handled through the Office of the Registrar.

**Funding for Graduate School**

Graduate students at CU Boulder can obtain financial support for their studies in a number of ways.

**Financial Aid**

The University of Colorado offers financial assistance for graduate students who demonstrate financial need. Students apply by completing the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/sa/fafsa/) available beginning October 1 for the upcoming school year. Colorado residents may be eligible for the Colorado Graduate Grant (https://www.colorado.edu/financialaid/types-aid/grantsassitantships-graduate-students/) program and the Graduate Fee Grant (https://www.colorado.edu/financialaid/types-aid/grantsassitantships-graduate-students/) program through the Office of Financial Aid.

**Loans**

Graduate students will also be considered for two federal loan programs:
Federal Direct Unsubsidized Loans (https://www.colorado.edu/fina...direct-loans-graduate-students/)
The University of Colorado Boulder participates in the Federal Direct Loan program. The lender is the U.S. Department of Education rather than a bank or other financial institution. Students are automatically considered for a Direct Loan after submitting their FAFSA.

Federal Graduate PLUS Loans (https://www.colorado.edu/fina...graduate-aid/grad-students/federal-graduate-plus-loans/)
The Federal Graduate PLUS Loan is available to students enrolled at least half-time (4 credit hours) in a graduate or professional program and who meet all of the other general eligibility requirements for the federal student aid programs. This loan requires a credit check.

Students can also choose to use private loans (https://www.colorado.edu/fina...aid/private-loans/) from banks and other financial institutions.

Departmental Funding
The majority of graduate student funding is awarded through the departments. The main sources of student support are usually in the form of either teaching and research assistantships or training grants.

Teaching and Research Assistantships
Departments may award teaching or research assistantships, which provide a stipend, tuition coverage and partial insurance coverage. They do not cover student fees. Students should contact their department (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/) with any questions regarding the availability of these types of funding.

Students should also review the Student Faculty Appointment information available from the Departmental Funding (https://www.colorado.edu/graduateschool/funding/departmental-funding/) webpage.

Training Grants
Departments may provide students with funding through training grants, providing graduate students the opportunity to work closely and collaboratively with mentors and other graduate students on specific long-term projects. Primarily science, engineering and social science departments offer this type of grant. The primary focus is on completion of the PhD. Students should consult directly with their home department to find out what opportunities are available in this area.

Students should contact their department with any questions regarding these types of funding.

Awards and Grants
Information on CU Boulder and regional grants and awards for which students may directly apply directly can be found on the Graduate Student Awards and Grants (https://www.colorado.edu/graduateschool/funding/awards-grants/) as well as the Office of Financial Aid's Scholarship site (https://www.colorado.edu/scholarships/).

Other Funding Opportunities
Graduate Students are encouraged to seek funding by applying for fellowships and awards. While there are a number of fellowships and grants that are funded through the university, the majority are awarded by governmental agencies, private foundations and corporations. A partial list of extramural and university fellowships can be found on the Graduate School's website (https://www.colorado.edu/graduateschool/funding/national-fellowship-opportunities/).

Tuition Classification
In-State and Out-of-State Tuition Classification
Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. The University of Colorado does not have discretion to make exceptions to the rules as established by state law.

New students are classified as in-state or out-of-state residents for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation to have their status reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrarsoffice/students/state-residency/) webpage.

Basic Requirement for Establishing Colorado Residency
To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or "domicile,“ is defined as a person’s true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits. An individual who seeks to establish domicile while registered as a student is presumed to establish Colorado domicile solely for tuition purposes unless there is clear and convincing evidence to the contrary.

Colorado in-state tuition classification requires Colorado domicile for 12 consecutive months. A person must be 22 years of age or older, married, a graduate student or an emancipated minor to begin the 12-month period of establishing domicile in Colorado. Unemancipated minors qualify for in-state status if their parents have been domiciled in Colorado for at least one year.

Evidence of Domicile
Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver’s license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado.
• Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, but individuals should take action on all factors that are appropriate in their circumstance.

**Domicile Exceptions**

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

• Colorado National Guard members
• Active duty military stationed in Colorado and their dependents
• Honorably discharged members of the U.S. Armed Forces and their dependents
• Returning active-duty military members
• Canadian military stationed in Colorado
• ASSET law qualified students with three years of Colorado high school and graduation
• Children of new faculty members at Colorado state colleges and universities
• Employees of companies moving to Colorado receiving government economic incentives
• Western Regional Graduate Program enrollees in specific major fields of study
• Olympic athletes training in Colorado
• Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

**Unemancipated Minors**

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

**Emancipation**

An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student’s parents and all others have entirely surrendered the right to the student’s care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who give false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

**University Policies**

**Alcohol and Other Drugs**

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual’s actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

• **Campus housing**: See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
• **Student Code of Conduct**: See the Student Code of Conduct (https://www.colorado.edu/sccr/student-conduct/).
• **Safety**: Annual Security and Fire Safety Report (http://www.colorado.edu/clery/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (http://www.colorado.edu/health/counseling/) webpage or call 303-492-2277.

**Smoking**

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

“Smoking” as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. “Smoking products” include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.
This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (http://www.colorado.edu/clery/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration webpage (https://oit.colorado.edu/node/2377/).

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

Diversity & Nondiscrimination

Commitment to Diversity

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning.”—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed
to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.

**Colleges & Schools**

**Arts & Sciences**

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor’s/master’s degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with—and lead—the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.

- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and coworkers.

The college is also dedicated to outstanding undergraduate education, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through “academic neighborhoods” in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

**Programs of Study**

**Anthropology**

The Department of Anthropology offers graduate programs leading to the Master of Arts and Doctor of Philosophy degrees with specializations in the subdisciplines of archaeology, biological anthropology and cultural anthropology. Students who acquire an advanced degree are equipped to transmit to others the knowledge, central principles, theories and research methods that have been developed in the discipline of anthropology.

Successful candidates will have a reasonable knowledge of the historical development of general anthropological concepts and theory and of directly relevant concepts and knowledge from related disciplines. In addition, successful candidates for the doctoral degree are expected to carry out and report original anthropological research within a circumscribed area of specialization. They are also expected to be capable of teaching the precepts of their specialty and of guiding future candidates for the doctoral degree through a program of research training.

**Course code for this program is ANTH.**

**Master’s Degree**

- Anthropology - Master of Arts (MA) (p. 1013)

**Doctoral Degree**

- Anthropology - Doctor of Philosophy (PhD) (p. 1014)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Bamforth, Douglas (https://experts.colorado.edu/display/fisid_101027/) Professor; PhD, University of California, Santa Barbara
Courses

**ANTH 5000 (3) Quantitative Methods in Anthropology**
Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4000

**Requisites:** Restricted to graduate students only.

**ANTH 5020 (3) Explorations in Anthropology**
Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

**Equivalent - Duplicate Degree Credit Not Granted:** ANTH 4020

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.
ANTH 5045 (3) Introduction to Museum Anthropology
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and MUSM 5045
Requisites: Restricted to graduate students only.

ANTH 5060 (3) Nutrition and Anthropology
Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4060
Requisites: Restricted to graduate students only.

ANTH 5070 (3) Methods in Biological Anthropology
Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4070
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5080 (3) Anthropological Genetics
Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4080
Requisites: Restricted to graduate students only.

ANTH 5110 (3) Human Evolutionary Biology
Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4110

ANTH 5120 (3) Advanced Biological Anthropology
Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4120
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective
Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4125
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ARTH 4129 and CLAS 4129 and CLAS 5129

ANTH 5130 (3) Advanced Osteology
Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4130

ANTH 5150 (3) Human Ecology: Biological Aspects
Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

ANTH 5160 (3) Early Hominin Paleoecology
Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4160
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5170 (3) Primate Evolutionary Biology
Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4170

ANTH 5210 (3) Southwestern Archaeology
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4210

ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico
Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4220
Requisites: Restricted to graduate students only.

ANTH 5224 (3) Archaeology of the Maya and Their Neighbors
Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4224
Requisites: Restricted to graduate students only.
ANTH 5240 (3) Geoarchaeology
Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4240
Requisites: Restricted to graduate students only.

ANTH 5245 (3) Ceramics in Archaeology
Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4245

ANTH 5270 (3) Plains Archaeology
Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4270

ANTH 5330 (3) Human Ecology: Archaeological Aspects
Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4330
Requisites: Restricted to graduate students only.

ANTH 5345 (3) Archaeological Theory
Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.
Requisites: Restricted to graduate students only.

ANTH 5350 (2-6) Archaeological Field and Laboratory Research
Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4350
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5380 (3) Lithic Analysis and Replication
Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4380
Requisites: Restricted to graduate students only.

ANTH 5390 (3) Research Methods in Archaeology I
Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4390
Requisites: Restricted to graduate students only.

ANTH 5400 (3) Research Methods in Archaeology 2
Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

ANTH 5455 (3) Epistemology in Archaeology
Examines the logic of scientific inference in general and important issues in inference in archaeology specifically. It focuses on the fundamental problem of arguing from evidence based on the things people left behind to the lives those people led, the fundamental problem in archaeology. We examine general topics to start, including analytic bias, constructing and borrowing theory, and the development of archaeological interpretation over time, using recent and older literature. We then turn to analysis of published case studies and finish with cases from specific research topics the students are working on. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5460 (3) Archaeology and Contemporary Society
Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.
Requisites: Restricted to graduate students only.

ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4470 and MUSM 4912 and MUSM 5912
Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade

ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development
Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4500
Requisites: Restricted to graduate students only.

ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology
Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4530
Requisites: Restricted to graduate students only.

ANTH 5570 (3) Anthropology of Fishing
Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4570
Requisites: Restricted to graduate students only.
ANTH 5605 (3) Anthropology of Neuroscience
Examines the connections between the production and social uptake of neuroscience knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, ‘disability’ and ‘neurodiversity,’ child development, gender, ‘risk’ and neoliberal governance, and the production of scientific expertise.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4605
Grading Basis: Letter Grade

ANTH 5610 (3) Medical Anthropology
Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4610

ANTH 5630 (3) Nomadic Peoples of East Africa
Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4630
Requisites: Restricted to graduate students only.

ANTH 5700 (3) Practicing Anthropology
Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4700
Requisites: Restricted to Anthropology (ANTH) graduate students only.
Grading Basis: Letter Grade

ANTH 5730 (3) Latin American Politics and Culture through Film and Text
Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4730

ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power
Ground students’ understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the “post-socialist” context.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4735
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ANTH 5745 (3) Science, Technology and Society
Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4745
Grading Basis: Letter Grade

ANTH 5750 (3) Culture and Society in South Asia
Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4750
Additional Information: Departmental Category: Asia Content

ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge
Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4755
Grading Basis: Letter Grade

ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia
Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4760
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Asia Content

ANTH 5770 (3) Core Course—Archeology
Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5780 (3) Core Course—Cultural Anthropology
Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5785 (3) Advanced Seminar in Cultural Anthropology
Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5790 (3) Core Course—Biological Anthropology
Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.
Requisites: Restricted to Anthropology (ANTH) graduate students only.
ANTH 5795 (3) Proseminar in Anthropology
Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.
Requisites: Restricted to graduate students only.

ANTH 5840 (1-6) Guided Study
Directed individual research based on a specific area of specialization.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 5919 (3) Collections Research Practicum: Archaeology
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4919 and MUSM 5919
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ANTH 5930 (1-6) Anthropology Internship
Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4930
Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 6150 (3) Critical and Theoretical Issues in Museums
Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4930
Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 6500 (3) Issues in Indigenous Languages
Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 5795 and LING 5011
Grading Basis: Letter Grade

ANTH 6500 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology
Discusses current research and theoretical issues in the field of cultural anthropology.
Repeatable: Repeatable for up to 18.00 total credit hours.

ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology
Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ANTH 7015 (3) Seminar: Archaeology of Selected Areas
Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated up to 9 total credit hours.
Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 7030 (3) Seminar: Archaeology
Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7140 (3) Seminar: Archaeology of Selected Areas
Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated up to 6.00 total credit hours.
Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7300 (3) Seminar: Research Methods in Cultural Anthropology
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Anthropology (ANTH) graduate students only.
Grading Basis: Letter Grade
ANTH 7600 (3) Human Ecology: Cultural Aspects
Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years. Formerly ANTH 5600.

ANTH 7620 (3) Seminar: Ethnography and Cultural Theory
Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

ANTH 7840 (1-6) Independent Research
Research aimed at developing a solution to an originally conceived research problem. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section. Repeatable: Repeatable for up to 30.00 total credit hours.

Anthropology - Master of Arts (MA)

Departmental Subdisciplines
Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. CU Boulder offers terminal MA degrees in two subdisciplines: Archaeology and Cultural Anthropology.

Archaeology
The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropologists study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

Cultural Anthropology
Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website (https://www.colorado.edu/anthropology/people/faculty/), where you will find up-to-date and detailed profiles of each faculty member.

Dual Degree Program - Anthropology (MA/MBA)
Learn more on the dual degree(s) tab (p. 1014).

Requirements

Prerequisites
To be considered for admission as a regular degree student, applicants for the terminal MA degree should have a minimum undergraduate grade point average of 3.00 (4.00 = A). Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered.

Application Requirements
Inquiries about application procedures, processes and administration should be directed to the main departmental office via email at anthro@colorado.edu. Students who hope to work with specific faculty members can contact them individually with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and January 15 for all other applicants.

Course Requirements
Additional information about other specific areas of specialization and other requirements for the degree may be obtained by consulting the Department of Anthropology Graduate Handbook and referencing the Master's Degree Requirements section. Information can also be obtained by contacting the Department of Anthropology directly anthro@colorado.edu

Archaeology Subdiscipline
The terminal MA track in archaeology is for students intending to earn only an MA degree who enter the program with BA, BS or non-anthropology MA or PhD degrees. The degree is designed for students who wish to pursue careers outside of academia (e.g., Cultural Resource Management, government service, etc.). The terminal MA is a non-thesis degree, but does require that students take a 3-credit independent research course (ANTH 7840) that will include the completion of a publishable paper and an oral defense of that paper by their MA committee.
Anthropology - Doctor of Philosophy (PhD)

Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. Of these, the first three are major curricular options available to graduate students in anthropology at CU Boulder.

Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, community archaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology links with biological anthropology in a number of ways. For instance, archaeologists encountering burials frequently turn to biological anthropologists for analyses of stature, health and other topics. Many archaeologists and biological anthropologists share a deep interest in human ecology, the ways people have adapted to their environments and have affected those environments.

Archaeology also relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

Biological Anthropology

Biological anthropology encompasses genetics (the study of gene structure, processes and patterns of inheritance), paleoanthropology (the
study of human and primate evolution in the fossil record), osteology (the study of the skeleton), paleopathology (the study of evidence of disease and trauma in skeletal and fossil remains), primatology (the study of the behavior and ecology of nonhuman primates) and human biology (biocultural study of biological variation in living human populations).

The biological anthropology faculty at CU have interests and research strengths that cross sub-disciplinary boundaries and foster collaboration with faculty and graduate students in other disciplines and subdisciplines. We share an interest in human ecology, the broad integrative area of anthropology that focuses on the interactions of culture, biology and the environment. We also share an interest in the processes of globalization, which are rapidly changing many aspects of the modern world. As biological anthropologists, we are well positioned to analyze the impact of globalization on the interaction between biology and behavior, and to analyze human and primate adaptations to changing environments and declining biodiversity.

The department offers training in several different aspects of ecology: general ecology, early hominin paleoecology, nutritional, community and evolutionary ecology. Our research foci also include anthropogenic and climatic effects on primate behavior and biology; conservation biology; primate evolution; feeding biology of humans and non-human primates; biogeochemical techniques for studying the diets and habitats of modern and fossil fauna; life history; endocrinology; growth and development; and maternal and infant health.

We carry out research and offer training and research opportunities at a wide range of international sites, including: Beza Mahafaly, Madagascar; Lajuma Research Centre and the Mokopane Conservation Centre, South Africa; The Cradle of Humankind World Heritage Site, South Africa; 12 museums in South Africa, Kenya and Ethiopia; Keneba, The Gambia; Ta Kou Nature Reserve, Kien Luong Karst area and Khau Ca Forest area, Vietnam. Our laboratories offer analytical capabilities and training in a broad range of methods, from measurement of human energy expenditure, to immunoassay and mid-infrared spectroscopy, to plant nutritional analysis. Our field sites offer training and research on primate health, community ecology, plant-animal interactions, forest ecology, nutritional ecology, conservation biology, dental ecology and paleoecology.

Please note that we do not train students specifically in forensics.

Cultural Anthropology
Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are derived from ethnographic methods, including long-term fieldwork, interviews, participant-observation and other qualitative research techniques. Among the topical interests of the cultural faculty are gender and sexuality, human ecology, environmental anthropology, medical anthropology, science and technology studies, nationalism and ethnic identity, capitalism and markets, tourism, and history and memory. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world. To learn more about the expertise and current research of the cultural anthropology faculty, please visit the department website, where you will find up-to-date and detailed profiles of each faculty member (https://www.colorado.edu/anthropology/people/faculty/).

Requirements
Prerequisites
To be considered for admission to one of the anthropology PhD programs, applicants should have a minimum undergraduate grade point average of 3.00 (4.00 = A) and/or a MA in anthropology or a closely related topic. Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered.

Admission Requirements
Inquiries about application procedures, processes and administration should be directed to the main departmental office. Students who hope to work with specific faculty members can contact them with questions about advising or research expertise. Applications must be completed and submitted no later than December 1 for international students and January 15 for all other applicants.

Students with no previous graduate work may apply for entrance into the terminal MA program in archaeology or cultural anthropology. Students with no previous graduate work may also apply directly into the PhD program in archaeology, biological anthropology or cultural anthropology. Students who have or will have completed an MA degree in anthropology or an MA or MS in a closely related discipline by the time of their admission may be eligible for transfer credits on a case by case basis.

Course Requirements
Coursework beyond the MA must include a minimum of 12 credit hours and 30 dissertation credit hours.

Archaeology Subdiscipline
The PhD track is for students wishing to earn a PhD who enter the program with a BA, BS, or non-anthropology MA or PhD degrees. The degree requires at least 42 credits of coursework with up to 21 transferable from previous graduate work along with 30 credits of dissertation research. Students entering with a BA, BS, or non-anthropology MA or PhD degrees are required to take ANTH 7840 by their third semester, which will include the completion of a publishable paper and an oral defense of that paper by their PhD committee. Students entering with an MA are exempt from ANTH 7840. Students entering with an MA in Anthropology from CU Boulder can transfer up to 30 credits including any of the required courses listed below.

Foreign Language Requirement
Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

The Department of Anthropology offers graduate training at the PhD level in the area of biological anthropology. Biological anthropology students holding a bachelor’s degree are eligible for direct admission to the PhD program. Students holding a master’s degree (or other advanced degree such as MS or MD) are also eligible for the program. Student pathways differ depending on the degree they hold upon admission. Degree plans will be individualized according to students’ prior training and professional activities. The goal of the program is to train students to pursue academic and allied careers with an emphasis on research.

The degree requires at least 42 hours of coursework, along with a minimum of 30 hours of dissertation research hours. Applicants holding an advanced degree may transfer up to 21 hours of previous coursework credits, to be determined on a case-by-case basis.

**Recommended Coursework**

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology and relevant topics in other departments (such as geology and geography). Other classes can include any relevant to a student’s program of study, including archaeological area and topical classes, ethnographic theory and area classes, and classes in related departments (such as geology, geography, biology, etc.). Elective classes should be chosen in consultation with each student’s advisor.

**Biological Anthropology Subdiscipline**

Students entering the PhD program with an MA from another institution must complete one 5000-level graduate class in Biological Anthropology (see Core Requirements in MA section for suggestions) within the first two years. They must also take Quantitative Methods in Anthropology (ANTH 5000) within the first four semesters if they do not have equivalent training on their record.

The degree requires at least 42 hours of coursework, along with a minimum of 30 hours of dissertation research hours. Applicants holding an advanced degree may transfer up to 21 hours of previous coursework credits, to be determined on a case-by-case basis.

**Foreign Language Requirement**

Students who will require language training for the successful completion of their dissertation research are expected to identify and begin study of that language, preferably in their first year.

One 5000-level archaeology course that requires analysis of archaeological materials using laboratory methods. Examples include:

- ANTH 5245: Ceramics in Archaeology
- ANTH 5380: Lithic Analysis and Replication
- ANTH 5919: Collections Research Practicum: Archaeology

At least three 7000-level seminars in archaeology. Examples include:

- ANTH 7030: Seminar: Archaeology
- ANTH 7140: Seminar: Archaeology of Selected Areas
- ANTH 7840: Independent Research (publishable paper)

Other courses determined with advisor (5000 level or above)

- ANTH 8990: Doctoral Dissertation

Total Credit Hours: 72

Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

**Recommended Coursework**

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology and relevant topics in other departments (such as geology and geography). ### Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics. Each of these areas is described below.

**Course codes for this program include APPM and STAT.**

### Computational Mathematics

The study of computational mathematics has grown rapidly over the past 15 years and has allowed mathematicians to answer questions and develop insights not possible only 20-30 years ago. Modern computational methods require an in-depth knowledge of a variety of mathematical subjects which include linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis, and nonlinear equations.

Since computers are invaluable tools for an applied mathematician, students are expected to attain a highly professional level of computer literacy and gain a substantial knowledge of operating systems and hardware.

Computational mathematics courses include the study of computational linear algebra, optimization, numerical solution of ordinary and partial differential equations, solution of nonlinear equations as well as advanced seminars in wavelet and multi-resolution analysis.

### Mathematical Biology

Recent advances in our ability to quantitatively study biological phenomena have provided a tremendous number of exciting opportunities for applied mathematicians. The careful modeling, analysis and simulation of these systems using the standard tools of applied mathematics has led to novel and non-intuitive insights into biology.

Furthermore, a deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques and methodologies (a challenge to which applied mathematics is particularly well suited). Research areas in APPM encompass immunology, infectious diseases, cardiology, neuroscience and genetics. For more information, see the Mathematical Biology Group (http://mathbio.colorado.edu/) webpage.

### Mathematical Geosciences

Mathematical geosciences encompass quantitative modeling, analysis and simulation of all aspects of the Earth system. Our faculty’s research intersects a broad range of geosciences: from the geodynamo to ocean circulation, from computational methods for seismic imaging to the impacts of weather on epidemiology, from tsunamis to stochastic weather generators. The complex and multiscale nature of geophysical systems, in many cases, requires the development of new mathematical tools and simulation strategies, a challenge to which applied mathematics is particularly well suited.

Appropriate coursework includes analysis and computation, probability and statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

### Applied Nonlinear PDEs and Dynamics

The Applied Mathematics Department’s research in nonlinear PDEs and dynamics is intrinsically interdisciplinary, i.e., involves the study of mathematical problems with direct physical application. Physically inspired research problems invariably lead to complex nonlinear phenomena so that, in addition to mathematical analysis, their solution
requires a deep understanding of the underlying application area, and
often requires knowledge and experience in numerical computation.
The faculty in Applied Mathematics specializing in this area of research
generally work on problems in nonlinear waves, dynamical systems,
partial differential equations and applications. Topics of interest
include wave motion, solitons and traveling waves, dispersive shock
waves, integrable systems, pattern formation, qualitative structure and
bifurcation theory, dynamics on networks, and transport phenomena.
Application areas include numerous areas of physics (fluid dynamics,
condensed matter, optics, plasma), biology (neural systems, ecology), and
sociology (crime, social networks).

Courses in this field include dynamical systems, nonlinear waves and
many advanced seminar courses. Research talks in this field are regularly
offered in the Dynamics Seminar and the Nonlinear Waves Seminar.

Suitable background coursework includes analysis, numerical analysis,
partial differential equations, mathematical modeling and methods of
applied mathematics.

Statistics and Data Science

Statistics and Data Science are the studies of empirical inquiry.
Statistical Science focuses on the development of data analytic
methods that are ubiquitous and applicable in all sciences, as well
as the theoretical underpinnings supporting such approaches. Data
Science focuses on the application of such methods to data problems,
including development of implementations and associated studies of
computational aspects. Of chief importance is the role of interdisciplinary
research to solve scientifically impactful problems, which often motivate
the need for new statistical methodology. Faculty members working
in statistics and data science cover a breadth of expertise and domain
knowledge including Bayesian computation, epidemiology, statistical
climatology, statistics for energy science, signal processing and image
analysis, networks, machine learning for physical systems, uncertainty
quantification as well as the study of collaborative research.

Appropriate coursework includes statistics, probability, computation
and mathematical analysis as well as background courses in one of the
sciences or engineering fields in which one intends to do research.

Stochastic Processes and Applications

The Stochastic Processes and Applications (SPA) research group aims
to develop and apply probabilistic tools to model, predict and analyze
randomness in real-life phenomena. As such SPA encompasses various
areas of both theoretical and applied probability, including Bayesian
networks, computational biology, computational probability, discrete
probability, mathematical finance, Markov processes, Markov chain
Monte Carlo (MCMC) algorithms, optimal stopping, stochastic control,
stochastic differential equations and random graphs.

For more information on courses and research opportunities,
visit the Department of Applied Mathematics website (http://
www.colorado.edu/amath/).

Master’s Degrees

• Applied Mathematics - Master of Science (MS) (p. 1024)
• Applied Mathematics - Professional Master of Science (MSAM)
  (p. 1025)

Doctoral Degree

• Applied Mathematics - Doctor of Philosophy (PhD) (p. 1027)

Faculty

While many faculty teach both undergraduate and graduate students,
some instruct students at the undergraduate level only. For more
information, contact the faculty member's home department.

Courses

APPM 5120 (3) Introduction to Operations Research
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and MATH 5120
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

APPM 5320 (3) Introduction to Dynamics on Networks
Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4320
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems
Department enforced prerequisite courses: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course: APPM 3310 or MATH 3130 or MATH 3135.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4350
Requisites: Restricted to graduate students only.

APPM 5360 (3) Methods in Applied Mathematics: Complex Variables and Applications
Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4360
Requisites: Restricted to graduate students only.
APPMM 5370 (3) Computational Neuroscience
Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4370
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 2360 and APPM 3310 and STAT 4000 or equivalent courses.

APPMM 5380 (3) Modeling in Applied Mathematics
An exposition of a variety of mathematical models arising in the physical and biological sciences. Students’ modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4380
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

APPMM 5390 (3) Modeling in Mathematical Biology
Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering. Department enforced prerequisites: APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 or instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4390
Requisites: Restricted to graduate students only.

APPMM 5430 (3) Methods in Applied Mathematics: Applications of Complex Variables
Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; topics in asymptotic methods. Department enforced prerequisite: APPM 4360 or APPM 5360.
Requisites: Restricted to graduate students only.

APPMM 5440 (3) Applied Analysis 1
Discusses the elements of basic real and complex analysis, Banach spaces, $L_p$ spaces and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Department enforced prerequisites: APPM 4400 and APPM 4450.
Requisites: Restricted to graduate students only.

APPMM 5450 (3) Applied Analysis 2
Continuation of APPM 5440. Department enforced prerequisite: APPM 5440.
Requisites: Restricted to graduate students only.

APPMM 5460 (3) Methods in Applied Mathematics: Dynamical Systems and Differential Equations
Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos and Hamiltonian systems. Department enforced prerequisites: APPM 2360 and APPM 3310 and APPM 4440.
Requisites: Restricted to graduate students only.

APPMM 5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations
Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green’s functions and related integral equations. Department enforced prerequisites: APPM 4350 or MATH 4470 and APPM 4360 or MATH 3450.
Requisites: Restricted to graduate students only.

APPMM 5480 (3) Methods of Applied Mathematics: Approximation Methods
Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods and applications to differential and integral equations. Department enforced prerequisite: APPM 5470.
Requisites: Restricted to graduate students only.

APPMM 5490 (3) Theory of Machine Learning
Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.
Recommended: Prerequisites APPM 4440 and CSCI 5622.

APPMM 5510 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4510, STAT 4250 and STAT 5250
Requisites: Restricted to graduate students only.

APPMM 5515 (3) High-Dimensional Probability for Data Science
Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4515
Recommended: Prerequisites APPM 3310 and APPM 3570, or equivalent.
APPM 5530 (3) Stochastic Analysis for Finance
Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4530, STAT 4230 and STAT 5230
Requisites: Restricted to graduate students only.

APPM 5560 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4560, STAT 4100 and STAT 5100
Requisites: Restricted to graduate students only.

APPM 5565 (3) Random Graphs
Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4565
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 5570 (3) Statistical Methods
Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4570
Requisites: Restricted to graduate students only.

APPM 5580 (3) Introduction to Statistical Learning
Consists of applications and methods of statistical learning. Covers multiple linear regression, classification, regularization, splines, tree-based methods, support vector machines and unsupervised learning.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4580
Requisites: Requires prerequisite course of APPM 4570 or APPM 5570 (minimum grade C). Restricted to graduate students only.

APPM 5590 (3) Statistical Modeling
Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software. Department enforced prerequisite: APPM 4570 or APPM 4520 or MATH 4520 or instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4590
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APPM 5600 (3) Numerical Analysis 1
Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Department enforced prerequisite: APPM 3310 or MATH 2130 and experience with a scientific programming language.
Requisites: Restricted to graduate students only.

APPM 5610 (3) Numerical Analysis 2
Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: APPM 5600 or MATH 5600.
Requisites: Restricted to graduate students only.

APPM 5620 (3) Numerical Linear Algebra
Develops and analyzes methods for the solution of square nonsingular linear systems, linear least squares problems, eigenvalue problems, and rank estimation. Direct and iterative methods are covered, as well as methods for dense and sparse problems. Requires solid background in linear algebra and proficiency with scientific computing.
Requisites: Restricted to graduate students only.

APPM 5650 (3) Randomized Algorithms
Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.
Equivalent - Duplicate Degree Credit Not Granted: STAT 5650
Requisites: Restricted to graduate students only.
Recommended: Prerequisite APPM 4440 or equivalent.

APPM 5720 (1-3) Open Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4720
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APPM 6470 (3) Advanced Partial Differential Equations
Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Department enforced prerequisite: APPM 5470.
Requisites: Restricted to graduate students only.

APPM 6520 (3) Mathematical Statistics
Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Department enforced prerequisite: APPM 5520 or MATH 5520.
Requisites: Restricted to graduate students only.

APPM 6550 (3) Introduction to Stochastic Processes
Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560 or instructor consent.
Equivalent - Duplicate Degree Credit Not Granted: MATH 6550
Requisites: Restricted to graduate students only.
APPM 6560 (3) Measure-Theoretic Probability
Introduces a series of fundamental concepts and results in probability theory, using rigorous measure-theoretic language. Provides a solid foundation for further studies and research in probability, stochastic processes, statistics, and data science.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisites Undergraduate analysis at the level of APPM 4440.

APPM 6570 (3) Stochastic Differential Equations
Devoted to a comprehensive investigation of stochastic differential equations, as well as their important applications in Finance, Physics, and Engineering. Consists of three main topics: stochastic integration, the theory of stochastic differential equations (SDEs), and applications of SDEs.
**Recommended:** Prerequisite APPM 6560 or MATH/APPM 6550.

APPM 6610 (3) Introduction to Numerical Partial Differential Equations
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite APPM 5610 or graduate numerical linear algebra.

APPM 6640 (3) Multigrid Methods
Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.
**Requisites:** Restricted to graduate students only.

APPM 6900 (1-6) Independent Study
Introduces graduate students to research foci of the Department of Applied Mathematics.
**Requisites:** Restricted to graduate students only.

APPM 6930 (1-3) Professional Master’s Culminating Experience
Provides an opportunity for an Applied Mathematics Professional Master’s student to complete their Culminating Experience (CE) project with an advisor. Before enrolling, the student is expected to have an advisor who has agreed to guide a proposed CE project.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

APPM 6940 (1) Master’s Candidate for Degree
**Grading Basis:** Letter Grade
**Requisites:** Restricted to graduate students only.

APPM 6950 (1-6) Master’s Thesis
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.

APPM 7100 (3) Mathematical Methods in Dynamical Systems
Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc.
**Requisites:** Requires prerequisite course of APPM 5460 (minimum grade D-). Restricted to graduate students only.

APPM 7300 (3) Nonlinear Waves and Integrable Equations
Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Department enforced prerequisites: APPM 4350 and APPM 4360.
**Requisites:** Restricted to graduate students only.

APPM 7400 (1-3) Topics in Applied Mathematics
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

APPM 7900 (1-3) Independent Study
Introduces graduate students to research foci of the Department of Applied Mathematics.
**Requisites:** Restricted to graduate students only.

APPM 8100 (1) Seminar in Dynamical Systems
Introduces advanced topics and research in dynamical systems.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8300 (1-3) Nonlinear Waves Seminar
Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation, and corporative research of new topics in PDE and analysis.
**Requisites:** Requires prerequisite course of APPM 5440 (minimum grade D-). Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8400 (1) Mathematical Biology Seminar
Introduces advanced topics and research in mathematical and computational biology. Instructor consent required.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

APPM 8500 (1) Statistics, Optimization and Machine Learning Seminar
Research-level seminar that explores the mathematical foundations of machine learning, in particular how statistics and optimization give rise to well-founded and efficient algorithms.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

APPM 8600 (1) Seminar in Computational Mathematics
Introduces advanced topics and research in computational mathematics.
**Requisites:** Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8900 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.
**Repeatable:** Repeatable for up to 30.00 total credit hours.
**Requisites:** Restricted to graduate students only.
STAT 5000 (3) Statistical Methods and Application I
Introduces exploratory data analysis, probability theory, statistical inference, and data modeling. Topics include discrete and continuous probability distributions, expectation, laws of large numbers, central limit theorem, statistical parameter estimation, hypothesis testing, and regression analysis. Considerable emphasis on applications in the R programming language.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4000
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

STAT 5010 (3) Statistical Methods and Applications II
Expands upon statistical techniques introduced in STAT 4000. Topics include modern regression analysis, analysis of variance (ANOVA), experimental design, nonparametric methods, and an introduction to Bayesian data analysis. Considerable emphasis on application in the R programming language.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4010
Requisites: Requires prerequisite STAT 5000 (minimum grade C-)
Grading Basis: Letter Grade

STAT 5100 (3) Markov Processes, Queues, and Monte Carlo Simulations
Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4510 and APPM 4560
Requisites: Restricted to graduate students only.

STAT 5230 (3) Advanced Statistical Modeling
Introduces methods, theory and applications of modern statistical models, from linear to hierarchical linear models, to generalized hierarchical linear models, including hierarchical logistic and hierarchical count regression models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples will be demonstrated using statistical programming language R.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

STAT 5250 (3) Data Assimilation in High Dimensional Dynamical Systems
Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4530, APPM 5530 and STAT 4230
Requisites:Restricted to graduate students only.

STAT 5400 (3) Spatial Statistics
Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to spines.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4430
Requisites: Restricted to graduate students only.

STAT 5520 (3) Introduction to Mathematical Statistics
Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4520 and MATH 4520 and MATH 5520
Requisites: Restricted to graduate students only.

STAT 5530 (3) Mathematical Statistics
Covers the theory of estimation, confidence intervals, hypothesis testing, and decision theory. In particular, it covers the material of APPM 5520 in greater depth, especially the topics of optimality and asymptotic approximation. Additional topics include M-estimation, minimax tests, the EM algorithm, and an introduction to Bayesian estimation and empirical likelihood techniques. Recommended Prerequisite is a one-semester calculus-based probability course such as MATH 4510 or APPM 3570. Credit not granted for APPM 5530 and STAT 5520 or MATH 5520.
Requisites: Restricted to graduate students only.

STAT 5540 (3) Introduction to Time Series
Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: APPM 5520 or MATH 5520.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4540 and MATH 4540 and MATH 5540
Requisites: Restricted to graduate students only.

STAT 5610 (3) Statistical Learning
Consists of applications and methods of statistical learning. Reviews multiple linear regression and then covers classification, regularization, splines, tree-based methods, support vector machines, unsupervised learning and Gaussian process regression.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4610
Requisites: Restricted to graduate students only.

STAT 5630 (3) Computational Bayesian Statistics
Introduces Bayesian statistics, normal and non-normal approximation to likelihood and posteriors, the EM algorithm, data augmentation, and Markov Chain Monte Carlo (MCMC) methods. Additionally, introduces more advanced MCMC algorithms and requires significant statistical computing. Examples from a variety of areas, including biostatistics, environmental sciences, and engineering, will be given throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4630
Requisites: Requires prerequisite courses of (STAT 5520 or MATH 5520 or STAT 5530) and (APPM 5560 or STAT 5100 or APPM 6550 or MATH 6550) (all minimum grade C-).
Recommended: Prerequisite prior programming and basic statistical modeling experience is required.
STAT 5650 (3) Randomized Algorithms
Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.
Equivalent - Duplicate Degree Credit Not Granted: APPM 5650
Requisites: Restricted to graduate students only.
Recommended: Prerequisite APPM 4440 or equivalent.

STAT 5680 (3) Statistical Collaboration
Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4680
Requisites: Requires a prerequisite course of STAT 5520 or MATH 5520 (minimum grade C-). Restricted to graduate students only.
Grading Basis: Letter Grade

STAT 5690 (2) Advanced Statistical Collaboration
Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4690
Requisites: Requires prerequisite course of STAT 4680 or STAT 5680 (minimum grade C-). Restricted to graduate students only.
Grading Basis: Letter Grade

STAT 5700 (3) Philosophical and Ethical Issues in Statistics
Introduces students to philosophical issues that arise in statistical theory and practice. Topics include interpretations of probability, philosophical paradigms in statistics, inductive inference, causality, reproducible, and ethical issues arising in statistics and data analysis.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4700
Grading Basis: Letter Grade

Applied Mathematics - Master of Science (MS)
The MS degree is only available to current degree-seeking students at CU Boulder who are in the applied mathematics PhD program, another CU Boulder PhD program, or who qualify for the computational science and engineering track, the Bachelor’s–Accelerated Master's, or the MS/MA in applied mathematics and molecular, cellular and developmental biology dual degree (see details below).

Those who are not currently attending CU Boulder should apply to the Applied Mathematics - Professional Master of Science (MSAM) (p. 1025) program.

Students should carefully read the program’s Requirements (p. 989) section. For more information, visit the department’s Applied Mathematics Graduate Student Supplement (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/).

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Applied Mathematics - Bachelor of Science (BS) (p. 704)

Requirements
Prerequisites
The MS degree is only available to current degree-seeking students at CU Boulder who are in the applied mathematics PhD program, another CU Boulder PhD program, or who qualify for the computational science and engineering track, the Bachelor’s–Accelerated Master’s, or the MS/MA in applied mathematics and molecular, cellular and developmental biology dual degree (see Overview section).

Those who are not currently attending CU Boulder should apply to the Applied Mathematics - Professional Master of Science (MSAM) (p. 1025) program.

Prerequisites for graduate study in applied mathematics include three semesters of calculus and a course in differential equations and linear algebra. The overall grade point average for mathematics and applied mathematics must be B or better.

Other strongly recommended courses are:

Course Requirements
The department requires a master’s degree candidate to complete an approved program of study consisting of at least 30 credits, at least 18 of which must be applied mathematics courses at the 5000 level or above. A grade of C (2.0) or higher must be attained in each course.

Generally, the following courses do not count toward the 30-credit requirement: APPM 5350, APPM 5360, APPM 5570 and APPM 5720.

Note: The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, advice
should be sought from the chair of the graduate committee on whether this would be permissible.

All master's degree students must complete two year-long, 5000-level course sequences in applied mathematics:

- APPM 5600 & APPM 5610 (required; may be waived for students who obtain a pass on the numerical analysis preliminary exam) AND
- a sequence listed in the "Graduate Courses" section of the Applied Mathematics Graduate Student Supplement (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/) (other sequences require approval from the chair of the graduate committee).

MS candidates must take a yearlong 5000-level graduate sequence outside of applied mathematics in an area where mathematics has significant application. This sequence must be approved by the chair of the graduate committee.

Upon approval by petition to the graduate committee, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

**Degree Plans**

There are two courses of action for graduate students who are looking to graduate with a master's degree.

**Plan I: Thesis Option**

A student electing to do a thesis must enroll in 4–6 hours of thesis credit, which count toward the required 30 hours, and must take an oral comprehensive exam (also referred to as a defense) on that thesis work. A student can only enroll in a total of 6 thesis hours for the course of the degree program. This exam will be administered by a committee consisting of the faculty advisor, who serves as committee chair, and two other faculty members. Each committee member must hold a current graduate faculty appointment. The chair must have a regular graduate faculty appointment, and the remaining committee members must hold either regular or special membership. At least one committee member must hold a regular (tenure or tenure-track) faculty appointment in Applied Mathematics.

**Plan II: Non-Thesis Option**

A student choosing the non-thesis option must pass ("pass" or "PhD research pass") any one of four PhD preliminary exams. Details are provided in the Applied Mathematics Graduate Student Supplement (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/).

Each MS student electing the non-thesis option must submit a completed MS degree audit form to the graduate chair upon submitting the Candidacy Application for an Advanced Degree.

A student who fails a written preliminary exam may, in a later semester, make one and only one more attempt to satisfy this requirement. In doing so, the student may switch between the thesis and the non-thesis option of the program, or between one preliminary exam area and another. Students who fail two preliminary exams are subject to dismissal from the program.

**Plan(s) of Study**

The following plan of study is an example track for students looking to study partial differential equations.

### Applied Mathematics - Professional Master of Science (MSAM)

CU Boulder’s professional master’s degree in applied mathematics is designed to give students the technical knowledge and professional skills to be highly successful in careers related to data science, statistics, applied mathematics and engineering.

Coursework culminating in a comprehensive final project offers students strong preparation in mathematics, statistics and computing at the heart of the big data revolution. In addition, students will have access to workshops and courses that help develop valuable professional skills, including communication, collaboration, presentation, organizational and networking skills. As a part of our program, students engage in a hands-on, experiential education, with opportunities for networking with campus faculty and off-campus professionals.

Our internationally recognized faculty have both academic and industrial experience. Many are fellows of professional societies, including the Society for Industrial and Applied Mathematics, the American Mathematical Society, the American Statistical Association and the American Physical Society.

### Specializations

**Statistics and Data Science Specialization**

Students in the program will have the option to specialize in Statistics and Data Science or customize their own educational plan. The Statistics and Data Science specialization enables students to develop the foundational tools needed to analyze and interpret data, including complex and high dimensional datasets. In addition, students will have the opportunity to participate in the department's Laboratory for Interdisciplinary Statistical Analysis (LISA) (https://www.colorado.edu/...
lab/lisa/). Here, students will gain valuable collaboration skills and foster relationships with faculty and industry professionals.

**Customized Specialization**

Students not wishing to specialize in statistics and data science can forge their own path with a customized educational track that capitalizes on the Applied Mathematics Department's numerous strengths, including computational mathematics, dynamical systems, nonlinear sciences, physical applied mathematics, statistics and applied probability.

For more information, see the department's Professional MS in Applied Mathematics (https://www.colorado.edu/amath/academics/professional-masters-degree/) webpage.

**Requirements**

**Prerequisites**

Prerequisites for graduate study in applied mathematics include three semesters of calculus and a course in differential equations and linear algebra. The overall grade point average for mathematics and applied mathematics must be B or better.

Other strongly recommended courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
</table>
| Strongly Recommended Prerequisites
| APPM 3310 | Matrix Methods and Applications          |            3  |
| One of the following:
| APPM 3570 | Applied Probability                       |            3  |
| MATH 4510 | Introduction to Probability Theory       |            3  |

**Course Requirements**

The department requires a master's degree candidate to complete an approved program of study consisting of at least 30 credit hours, at least 18 of which must be applied mathematics or statistics courses at the 5000 level or above. Maintain a GPA of 3.0 or better and earn at least a C grade in each course.

Generally, the following courses do not count toward the 30-credit-hour requirement: APPM 5350, APPM 5360 and APPM 5720.

Note: The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, advice should be sought from the Director of the PMD program on whether this would be permissible.

All master's degree students must complete one yearlong 5000-level course sequence in APPM or STAT.

MS candidates must take a yearlong 5000-level graduate sequence outside of applied mathematics in an area where mathematics or statistics has significant application. This sequence must be approved by the PMD Director.

Upon approval by petition to the PMD Director, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

**Culminating Experience (CE)**

There are two options for completing a CE. Each option has a written and presentation component. Students in the program will propose and discuss a CE option with the PMD Director before approval is granted.

**Option I: Project**

A CE project is intended to have goals that are different from a traditional master's thesis. In particular, students working on a project are expected to fulfill any of the following three goals: (1) master an important set of mathematical or statistical methods used in industry; (2) gain experience working with a large, high dimensional, or “messy” dataset; or (3) gain exposure to some tools (e.g., SQL and database management) that aren't typically taught in the program but that are useful for future employment.

- Students interested in statistics and data science are encouraged to complete their CE project with LISA. The most natural way to do this would be to produce a written report and presentation of a collaborative project from STAT 5680 Statistical Collaboration or STAT 5690 Advanced Statistical Collaboration.
- Students pursuing areas other than statistics and data science would propose a project to a potential advisor. If interested, the student and advisor would come to an agreement on the work required to meet goals (1)–(3) above. Such projects do not need to meet the criteria of a formal master's thesis.

**Option II: Internship or Fellowship**

Students who secure an internship or fellowship related to applied mathematics, statistics or data science while in the program can use their work as part of their CE. Students choosing this CE option should work closely with their PMD advisor to decide what components will be necessary for successful completion of the CE (e.g., a presentation or written report of the details of the internship/fellowship).

**Plan(s) of Study**

**Specialization in Statistics and Data Science**

Students will have the option to specialize in statistics and data science. This specialization is meant to give students the foundational tools for analyzing data, including complex and high dimensional datasets. There are four required courses and many electives coming from two categories:

- Probability and Statistics Theory: Courses in this category introduce the theory of probability and stochastic processes, and the foundations of statistical inference. (Courses: STAT 5520 Introduction to Mathematical Statistics or STAT 5530 Mathematical Statistics (one is required); STAT 5100 Markov Processes, Queues, and Monte Carlo Simulations; STAT 5540 Introduction to Time Series.)
- Statistical Modeling and Data Science: Courses in this category provide students with the tools to model and analyze data, perform predictive analyses, and apply theory to solve important scientific problems. (Courses: STAT 5000 Statistical Methods and Application I (required); STAT 5010 Statistical Methods and Applications II (required); STAT 5400 Advanced Statistical Modeling; STAT 5610 Statistical Learning (required); STAT 5430 Spatial Statistics; STAT 5630 Computational Bayesian Statistics)

Students interested in statistics and data science are encouraged to complete their CE project through the department's Laboratory for Interdisciplinary Statistical Analysis (https://www.colorado.edu/lab/
lisa/) (LISA). The most natural way to do this would be to produce a written report and presentation of a collaborative project from STAT 5680 Statistical Collaboration or STAT 5690 Advanced Statistical Collaboration. Students who do not take both STAT 5680 and STAT 5690 will have a deficit of 3 credit hours; such deficits can be filled in by elective coursework as determined with the faculty advisor to reach the 30 credit hours required for the degree. This option will not require a final examination with committee.

The table below gives a sample program representing one possible scenario for successfully completing the degree with a statistics and data science specialty. Other scenarios are possible.

### Customized Specialization

Students are able to build a customized specialization based on their own interests. Such specializations should be designed with the professional MS director within the first year of the program. The plan listed below gives one possibility.

### Educational Goals

#### Content Knowledge
- Provide students with foundational knowledge in areas of applied mathematics, statistics or data analysis beyond the standard undergraduate curriculum.
  - Statistics and Data Science Specialization: Provide students with foundational knowledge in (1) probability and statistical theory and (2) statistical modeling and data science.
- Provide students with the skills to write efficient, reproducible code in at least one programming language (e.g., R, Matlab, Python).
- Provide students with the skills to interpret code and output from at least one programming language.

#### Professional Skills
- Provide students with a set of industry-sought professional skills, including data analysis, communication, collaboration, presentation, organizational, and networking skills.
- Teach students to utilize their foundational knowledge in applied mathematics, statistics, or data analysis, and their professional skills, to solve real-world science, engineering, social science, or data analysis problems.
- Make available a number of opportunities for students to gain hands-on, real-world experience. Such opportunities include internships, fellowships, and professional collaborations through LISA.

### Applied Mathematics - Doctor of Philosophy (PhD)

With internationally recognized faculty and a strong commitment to its graduate program, the Department of Applied Mathematics at CU Boulder strives to provide graduate students a high-quality education and training in applied mathematics while preparing them for careers in industry, laboratories and the academic professions.

The department fosters extensive interaction between students and faculty to provide a tailored educational experience in applied mathematics. Currently, the department has both faculty (https://www.colorado.edu/amath/directory/) and affiliated faculty (https://www.colorado.edu/amath/academics/graduate-students/affiliated-faculty/) from other academic departments and colleges. A PhD student can be advised by core faculty or co-advised by an affiliate involved in applied mathematics which creates a definitively unique learning experience in many areas of physical, biological, computational or engineering sciences. With the breadth of such a diverse faculty, a student can explore their academic and research interests through the investigation of numerous ongoing faculty projects.

Many of our PhD students have had the opportunity to conduct their research at world-class institutes located right here in Boulder such as the National Center for Atmospheric Research, National Institute of Standards and Technology, and the National Oceanic and Atmospheric Administration. Our students have the opportunity to not only work directly with organizations here in Boulder but also the National Renewable Energy Lab and the Laboratory for Atmospheric and Space Physics, along with many other national research laboratories.

The Department of Applied Mathematics offers coursework and research leading to the PhD degree in applied mathematics. The aim of the department is to train graduate students to perform independent research on the methods and applications of applied mathematics. Research areas represented in the department include:

- computational mathematics
- mathematical biology
- mathematical geosciences
- applied nonlinear PDEs and dynamics
- statistics and data science
- stochastic processes and applications

For more information on the department and degree requirements, download the supplement to the catalog (http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements/) or visit the Applied Mathematics (http://www.colorado.edu/amath/) website.

### PhD with Certificate in Interdisciplinary Quantitative Biology

Applied mathematicians interested in collaborations with bioscientists will need a breadth of knowledge in quantitative bioscience to be...
successful. The interdisciplinary quantitative biology (IQ biology) graduate certificate (p. 1528) program emphasizes training at the intersection of biochemistry, biology, computer science, engineering, applied mathematics and physics. The PhD in applied mathematics with a certificate in IQ biology will strengthen this training with additional foundations in numerical and mathematical analysis, probability and statistics, mathematical biology and network analysis.

Candidates interested in this program should apply directly to IQ biology and select applied mathematics as one of their graduate programs of interest. In addition to satisfying the requirements for the PhD in applied mathematics, students in this program must take 12 credit hours in three IQ biology core courses (Quantitative Biology Foundations, Statistics and Computations for Genomes and Meta-Genomes and Forces in Biology), which can serve as the out-of-department sequence for the PhD, as well as three 10-week rotations in labs associated with the IQ biology program.

For more information, visit the BioFrontiers Institute's IQ Biology PhD Program (http://iqbiology.colorado.edu/) website.

**Requirements**

**Required Courses and Credits**

A minimum of 60 credits is required for the degree, including 30 credits in courses numbered 5000 or above (APPM 5350, APPM 5360, APPM 5570 and APPM 5720 generally do not count toward this requirement) and 30 credits of applied math dissertation credit.

A grade of B- or higher must be attained in each course. PhD students must maintain a grade point average of 3.0 or better each semester.

</tbody>
</table>

At least one 3-credit course per year (third and fourth years only) in applied mathematics at the 6000 level or above. A year-long graduate sequence outside of applied mathematics in an area where mathematics has significant application. Approval of the sequence from the graduate committee chair is required.

Total Credit Hours: 62

1. A student may opt out of either one of these two sequences only if they have demonstrated proficiency in the subject by passing the corresponding preliminary exam.
2. To be taken no earlier than the second year of graduate study in the department.

**Exams**

**Preliminary Exams**

- Preliminary exams are offered in four areas: Applied Analysis and Numerical Analysis are mandatory. Students can choose either Partial Differential Equations or Probability & Statistics.
- Exams are offered in January and in August.
- Possible "grades" on a prelim are "Research Pass," "Pass" and "Fail." Students need to pass all three exams, and need a research pass in either Applied Analysis or Numerical Analysis.
- Students may take any one exam no more than two times.
- To be considered to make good progress towards the degree (for purposes of getting TAs renewed, etc.), students should normally have at least one pass before their third semester, and one pass and one research pass before their fourth semester.

**Comprehensive Exams**

The purpose of the comprehensive exam is to ensure that the student has a sufficient grasp of the fundamentals of the chosen thesis area to begin research, the ability to exchange ideas and information with the members of the examining board (thesis committee), and a broad base of knowledge in applied mathematics.

Before the comprehensive exam, the PhD student must submit a 5–10 page thesis proposal, complete with motivation for the topic and references to key papers, to each member of the thesis committee. This proposal should be written in consultation with the chair of the thesis committee.

The exam will consist of a presentation by the student on his/her research proposal for a maximum of one hour in length, followed by a questioning period of up to one additional hour. The presentation portion is open to all faculty and students in the program.

Students will need to be registered in classes for the semester they are going to complete their examination for it to count toward that semester. This includes the summer semester.

- Select committee (see rules on Exam Report) and inform the Graduate Coordinator.
- Schedule comprehensive date and location with Graduate Coordinator.
- Complete Doctoral Exam Report for committee approval (select comprehensive; at least 3 weeks prior to Comp Date).
  - Get Graduate Chair signature/approval.
  - Submit original to Graduate School.
- Submit title and abstract to Graduate Coordinator to post in department (at least 2 weeks prior to Comp Date) See example
Plan of Study

The track below is a sample curriculum for students who are interested in focusing on partial differential equations.

Art and Art History

The Department of Art and Art History offers three graduate degrees—the MFA in art practices, the MA in art history and the PhD in the Arts of the Americas—as well as the MFA/MBA and MA/MBA dual degrees in collaboration with the Leeds School of Business.

The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares
students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools. During the two-and-a-half-year program, students focus on one of several fields, including: ceramics, IMAP (photography, digital media, video, integrated arts), painting and drawing, printmaking, sculpture and post-studio practice, and film (in collaboration with the Department of Cinema Studies and Moving Images Arts).

The MFA/MBA and MA/MBA program requires candidates to submit separate applications to the Department of Art and Art History as well as the Leeds School of Business. In addition to the required coursework, MFA and MA students gain additional insights about their respective fields through the Visiting Artist Program and Visiting Scholars Program, both of which invite distinguished artists and scholars to CU for talks, seminars and individual meetings with students.

The PhD in arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings Art History into dialogue with Anthropology, History, Ethnic Studies, Women’s and Gender Studies, Religious Studies, and other disciplines in the humanities, social sciences, and natural sciences. Our accelerated PhD program is ideal for students who already have a MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

The faculty are highly active in their respective fields, from publishing important articles and books on historical and contemporary art to exhibiting in galleries and museums to establishing nontraditional artist venues and opportunities. The faculty are also committed teachers and mentors who work closely with graduate students, helping them to realize their individual visions as artists and historians.

Students who are accepted to the MA, MFA, MFA/MBA, MA/MBA and PhD programs join the CU Boulder Graduate School, which serves the community of graduate students, faculty and staff, one of the nation’s premier comprehensive research universities. The Graduate School offers guidance on a wide array of academic, social and financial issues, and can assist in navigating the often complex world of graduate education.

Serving as an umbrella organization since 1892, the Graduate School currently oversees 100 graduate and professional programs. The Graduate School works to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation and the world.

Click here to visit the Department of Art and Art History’s Website (http://cuart.colorado.edu/degrees/graduate/).

Course codes for these programs are ARTF, ARTH and ARTS.

Special Programs
The CU Art Museum

The CU Art Museum is a cultural gateway to CU Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The 25,000-square-foot CU Art Museum contains five galleries, including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

The CU Art Museum’s Permanent Collection

The Permanent Collection of the CU Art Museum contains over 8,800 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Persian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese ukiyo-e prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, sculpture, works on paper, paintings, photography, video and new media art.

Visiting Scholar Program

This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers.

Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes: 1) a departmental image collection and support for other important image resources; 2) resources, training and support in digital imaging and image presentation software; and 3) equipment for use in creative work, documentation and classrooms within the department. The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department’s Visiting Artist Program. Visit the department’s Visual Resources Center (https://www.colorado.edu/artandarthistory/vrc/) webpage for more information.
For a full list of departmental resources, visit the department’s Resources (https://www.colorado.edu/artandarthistory/resources/) webpage.

**Master’s Degrees**
- Art History - Master of Arts (MA) (p. 1039)
- Art Practices - Master of Fine Arts (MFA) (p. 1041)

**Doctoral Degree**
- Arts of the Americas - Doctor of Philosophy (PhD) (p. 1042)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

Art Film Studies

ARTF 5000 (3) Advanced Digital Postproduction
Explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio and optical effects treatments.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4000
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5003 (3) Film and Literature
Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4003
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5004 (3) Topics in Film Theory
Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4004 and HUMN 4004
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of CINE 3051 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5010 (1-3) Topics in Film Production
Prepares students for advanced cinema production courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4010
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5013 (3) Film, Photography and Modernism
Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4013
Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).
Recommended: Prerequisite FILM 3051.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5021 (3) Directing/Acting for the Camera
Focuses on directing and acting before a camera and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4021
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5023 (3) Topics in International Cinema
Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4023
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to graduate students only.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5024 (3) Advanced Research Seminar
Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4024
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses
ARTF 5040 (3) Advanced Analog Alchemy
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4040
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Art Practices (ARTF) students only.

ARTF 5043 (1-3) Topics in Cinema Critical Studies
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4043
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5105 (3) Advanced Screenwriting
Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4105
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5200 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ATLS 5151
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5400 (3) Digital Post-Production
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4400
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5453 (3) History of Avant-Garde Film
Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4453
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5500 (3) Cinema Production 2
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4500
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5604 (3) Colloquium in Film Aesthetics
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4604
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5610 (3) Image-makers Graduate Seminar
Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5717 (1-3) Graduate Studio Critique
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5846 (1-3) Graduate Independent Study-Video
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5857 (1-3) Graduate Independent Study
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 6959 (1-6) Master's Thesis
Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTF 5004 (minimum grade D). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5004 (3) Advanced Analog Alchemy
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4040
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Art Practices (ARTF) students only.

ARTF 5043 (1-3) Topics in Cinema Critical Studies
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4043
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5105 (3) Advanced Screenwriting
Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4105
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5200 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ATLS 5151
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5400 (3) Digital Post-Production
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4400
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5453 (3) History of Avant-Garde Film
Traces the history and aesthetics of avant-garde experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4453
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5500 (3) Cinema Production 2
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4500
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5604 (3) Colloquium in Film Aesthetics
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4604
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5610 (3) Image-makers Graduate Seminar
Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5717 (1-3) Graduate Studio Critique
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5846 (1-3) Graduate Independent Study-Video
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5857 (1-3) Graduate Independent Study
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 6959 (1-6) Master's Thesis
Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.
 Repeatable: Repeatable for up to 6.00 total credit hours.
 Requisites: Requires prerequisite course of ARTF 5004 (minimum grade D). Restricted to graduate students only.
 Additional Information: Departmental Category: Graduate Film Courses

2021–22 University Catalog 1033
Art History

ARTH 5029 (1) Art History Research Methods
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and LIBR 4029
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5099 (3) Ancient Greek Sculpture
Understanding the Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptures and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4099, CLAS 4099, and CLAS 5099
Grading Basis: Letter Grade

ARTH 5109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109
Additional Information: Departmental Category: Art History

ARTH 5119 (3) Roman Sculpture
Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4119 and CLAS 4119 and CLAS 5119
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4139 and CLAS 4139 and CLAS 5139
Additional Information: Departmental Category: Art History

ARTH 5159 (3) Hellenistic Art and Archaeology
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5159
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4169 and CLAS 4169 and CLAS 5169
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 5179 (3) City of Athens
Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5179
Additional Information: Departmental Category: Art History

ARTH 5189 (3) City of Rome
Explores in detail the architecture, sculptures, coins, frescos and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5189
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and CLAS 4229 and CLAS 5229
Additional Information: Departmental Category: Art History

ARTH 5269 (3) Art and Archaeology of the Ancient Near East
Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first ‘world empire’, Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4269 and CLAS 4269 and CLAS 5269
Additional Information: Departmental Category: Art History

ARTH 5909 (1-3) Graduate Independent Study—Art History
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History
Requisites: Populations. Previously offered as a special topics course.

Hybridity, extinction, conquest, conversion, materiality, literacy, and global colonial setting. Focus on historiography, visual culture, artists, patrons, museology in various disciplines, both past and present.

Requisites: Strategies and objectives of visual culture in an ethnically/racially diverse field work. Critically examines different approaches to museums and curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4939
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 5939 (3-6) Art Museum Internship
Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4939
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 5949 (3) Visiting Scholars Seminar
Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar’s work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5959 (3) Introduction to Critical Theory for Visual Studies
Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly agendas. Required for all MA art history students, open to others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5999 (3-6) Art Museum Internship
Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4939
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 6150 (3) Critical and Theoretical Issues in Museums
Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and HIST 6150 and ANTH 6150
Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6559 (3) Power & Visuality After the Conquest
Examines how artistic production was informed by, and participated in, Latin America’s colonial experience (16th to 19th centuries). With a critical eye and decolonial approach, students examine the complex strategies and objectives of visual culture in an ethnically/racially diverse colonial setting. Focus on historiography, visual culture, artists, patrons, hybridity, extinction, conquest, conversion, materiality, literacy, and global networks. Emphasis on colonial Mexico and Peru and their Indigenous populations. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

ARTH 6929 (3) Seminar: Theories of Art History
Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 6939 (3) Graduate Seminar: Open Topics in Art History
Subjects and topics vary.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 6949 (1) Master's Candidate for Degree
Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Art History

ARTH 6959 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6969 (1-6) Master's Project (Art History)
Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Art History

ARTH 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 60.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students in the AAAH-PH.D program, and who have completed a minimum of 30 credit hours.

Art Studio and Non-Studio

ARTS 5017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4017
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics
ARTS 5024 (3) Public Art
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4024
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Sculpture
ARTS 5075 (3) Graduate Ceramics
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics
ARTS 5087 (3) Selected Topics in Contemporary Art
Selectively studies significant areas of visual art of the last decade including major critical opinions.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4087
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics
ARTS 5095 (3) Special Topics in Ceramics
Designed for students majoring in ceramics.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4095
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics
ARTS 5097 (1-3) Special Topics-Non-Studio
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4097
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics
ARTS 5104 (3) Performance/Installation
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4104
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture
ARTS 5107 (1-3) Special Topics
Repeatable: Repeatable for up to 7.00 total credit hours.
Additional Information: Departmental Category: Ceramics
ARTS 5117 (3) Graduate Art Seminar
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics
ARTS 5118 (3) Visiting Artist Program
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4118
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Visiting Artist Program
ARTS 5126 (3) Digital Art 2
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4126
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts
ARTS 5130 (3) Integrated Media
Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assembly, correspondence art, artist's books, site-specific, performance, audio and video art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4130
Additional Information: Departmental Category: Integrated Arts
ARTS 5140 (3) Integrated Arts Studio
Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Integrated Arts
ARTS 5150 (3) Graduate Integrated Arts
Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. A curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.
Repeatable: Repeatable for up to 18.00 total credit hours.
Additional Information: Departmental Category: Integrated Arts
ARTS 5154 (3) Metalsmithing 1
Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students’ technical and problem-solving skills.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4154
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture
ARTS 5161 (3) Graduate Photography
Repeatable: Repeatable for up to 18.00 total credit hours.
Additional Information: Departmental Category: Photography
ARTS 5171 (3) New Directions in Photography
Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4171
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Photography

ARTS 5176 (3) New Directions in Digital Art
Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4176
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5196 (3) Advanced Photo-Imaging
Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output and individual growth and development.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4196
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Media Arts

ARTS 5202 (3) Graduate Painting
Investigates the concept of montage (editing) and strategies to develop a video project. Expands the theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4202
Repeatable: Repeatable for up to 18.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Painting/Drawing

ARTS 5217 (3) Art and Race/Ethnicity
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4217
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5226 (3) Advanced Computer Imaging
Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4226
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTS 5126 (minimum grade D-).
Additional Information: Departmental Category: Media Arts

ARTS 5236 (3) Electronic Arts Survey II
Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4236
Additional Information: Departmental Category: Media Arts

ARTS 5246 (3) Graduate Beginning Video Production
Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5303 (3-18) Graduate Relief
Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.
Repeatable: Repeatable for up to 18.00 total credit hours.
Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Printmaking

ARTS 5316 (3) History and Theory of Digital Art
Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4316
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5327 (3) Biennial Art
Covers art represented in the most current international biennials (Documenta, Venice Bienale, Sao Paulo Biennial, Havana Biennial, Gwanju Biennial and the Istanbul Biennial). Art will be analyzed by applying postmodern theory, postcolonial theory and international theoretical perspectives that have not yet been integrated into Western thought.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4327
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5346 (3) Graduate Intermediate Video Production
Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Further theoretical understanding of video as an art form.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and FILM 4340
Requisites: Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts
ARTS 5403 (3) Graduate Intaglio
Continuation of the study of expressive and formal aesthetics of Intaglio processes. Studio practice and investigation of artistic attitudes as exemplified through historical perspectives, traditional, and contemporary usages. Building a body of work in this course is the goal. Taught with ARTS 3403 and ARTS 4403.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to Studio Arts or Art History (AASA or AAHH) graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5413 (3) Graduate Lithography
Taught with ARTS 3413 and ARTS 4413.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5423 (3) Graduate Screen Printing
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5433 (3) Alternative Printmaking 2
Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4433
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5444 (6) Art and Rural Environments Field School
Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4444
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5446 (3) Graduate Advanced Video Production
Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4446 and FILM 4440
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5453 (3) Monotype 2
Continued research into developing techniques of using a varied grouping of matrices will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4453
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Printmaking

ARTS 5457 (3) Sound Art Seminar
Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4457
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5500 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities.
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
Grading Basis: Letter Grade

ARTS 5504 (3) Graduate Sculpture
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5540 (3) Generative Art
Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Integrated Arts

ARTS 5607 (3) Art and Social Change
Examines how art is used as an agent for social change. Among topics addressed by artists interested in social change are: immigration, HIV/AIDS, illness/disease, ecology/the environment, feminism, gay and lesbian issues, war, violence, racial and ethnic minorities, etc.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4607
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics
ARTS 5641 (3) String Instrument Building
As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4641
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Sculpture

ARTS 5717 (1-3) Graduate Studio Critique
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5857 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5901 (1-3) Graduate Independent Study—Photography
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Photography

ARTS 5934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4934
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
Grading Basis: Letter Grade

ARTS 6957 (1-6) Master of Fine Arts Creative Thesis
Additional Information: Departmental Category: Seminars/Special Topics

Art History - Master of Arts (MA)
The art history program at CU Boulder gives students an interdisciplinary foundation in the history of art to prepare them for careers as scholars, museum professionals and related creative professions in the history of art. Its main objective—through graduate seminars, teaching opportunities, museum internships and scholarly fieldwork—is to foster critical thinking about contemporary and historical forms of art as well as visual and material culture.

Students develop their specialized interests from a combination of individual mentoring and collaborative approaches to intellectual inquiry. The program offers a supportive environment committed to debate and experimentation applicable to a variety of career choices. Graduates typically regard their two years in the art history master's program as a formative period of intellectual growth and professional experience.

Our diverse faculty offers a constantly changing curriculum of seminar topics geared to highlight current research, and a strong foundation in critical historiography and contemporary critical theory. Students in our interdisciplinary program also take advantage of exciting course offerings in cultural anthropology, classics, history, a wide range of literature programs, ethnic studies, gender and women's studies, art practices, and new media.

Our intimate atmosphere offers exceptional opportunities to work with permanent faculty and distinguished art historians from other institutions through our Visiting Scholars program. This longstanding feature of our graduate curriculum brings four to six leading scholars to campus every year to present their current work in a graduate seminar, public lecture and informal events.

Areas of specialization include: medieval art, early modern art, Pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, modern art and architecture, contemporary art and critical theory/museology. When available, ancient art may constitute an area.

For more information please see the department's Art History area (https://www.colorado.edu/artandarthistory/areas-study/art-history/) page and the MA Art History degree page (https://www.colorado.edu/artandarthistory/degrees/ma-art-history/).

Requirements
Required Courses and Credits
A minimum of 30 credits must be completed, of which 21 must be completed in residence on the Boulder campus. No more than 9 credits of independent study credit may be applied toward the MA degree. A limit of 9 credits of transfer credits may be applied toward the MA degree.

Electives
At least one 3-credit, 5000- or 6000-level course in four of the following areas of art history: medieval art, early modern art, Pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, modern art and architecture, contemporary art and critical theory/museology. When available, ancient art may constitute an area.

At least one 3-credit, 3000-level or above course in a department outside the Department of Art and Art History that supplements the major or minor areas of specialization.

Additional courses to meet the 30-credit minimum. 3-5

Total Credit Hours 30

Foreign Language Proficiency
The candidate for the MA degree in art history is required to demonstrate an adequate reading knowledge of a foreign language relevant to the field of study during their first year of the program. The language requirement may be met by either having taken three consecutive foreign language classes at the undergraduate level (passing with a B or above), or by taking a language exam with a faculty member during the first year.
First-Year Review
During the last two weeks of April, students are evaluated during the first-year review. It focuses on a review of student coursework and performance, on selecting the major and minor areas of study in preparation for the comprehensive exam (see below) and on the selection of a thesis topic, if applicable.

Comprehensive Exam
This exam is given in October of the second year to measure the graduate student's knowledge of art history at the MA level. It consists of essay questions pertinent to the student's major and minor areas of study. The comprehensive exam consists of two essays: a two-hour essay in the major area and a 90-minute essay in the minor area. Students must pass the comprehensive exam in order to be eligible to register for thesis credit hours.

Thesis Abstract ("Pre-Thesis Review")
By the end of the semester preceding the student's thesis semester, the student will prepare an abstract of approximately 1–2 typewritten pages, with attached bibliography, outlining the thesis topic and method of inquiry. The thesis abstract must be approved by the student's pre-thesis review committee in order for the student to register for thesis hours.

Thesis
This should demonstrate scholarly research and writing in art history, should be based on independent study and analysis and should represent the equivalent of 4–6 credits. In most cases, the master's thesis is the equivalent of a 30–50 page paper, exclusive of end notes, bibliography and illustrations.

Thesis Defense
In consultation with the thesis advisor, the student will select a thesis committee that consists of not less than three members of the art history graduate faculty, including the thesis advisor. The student will then schedule the thesis defense and prepare all necessary paperwork. The thesis must be submitted to all members of the thesis committee at least one week before the thesis defense. Graduate School guidelines ("specifications") must be used to prepare the MA thesis. Upon successful defense, the thesis is submitted to the Graduate School in the electronic form specified by the Graduate School, in accordance with the Graduate School's deadlines. A hard copy of the signature page, complete with the thesis committee members' signatures, is submitted to, and remains in, the Graduate School.

Time Limit
It is expected that the MA program be completed within two years.

Credit Hours 6

Total Credit Hours 30

No more than 9 credits of independent study credit may be applied toward the MA degree. A limit of 9 credits of transfer credits may be applied toward the MA degree.

Dual Degree
MA/MBA in Art History
To support the university's mission of advancing knowledge across disciplines, and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business and Department of Art and Art History endorse a dual degree program in which both a Master of Business Administration and a Master of Fine Arts (or Master of Arts in art history) is awarded to those students who satisfy the requirements outlined below. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially.

Students must apply to and meet the application requirements for each program separately. Admitted students spend their first year in one of the two programs, the second year in the other program and the third year is a combination of the two. MFA students are required to complete 43 credits of MBA coursework and 45 credits of AAH coursework. MA (art history) students are required to complete 43 credits of MBA coursework and 30 credits of art history coursework. Both degrees must be awarded simultaneously.
Art Practices - Master of Fine Arts (MFA)

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals as well as teachers in colleges, universities and art schools. MFA students in the Department of Art and Art History are given private studio spaces and access to many of the department's facilities in the Visual Arts Complex and are eligible for a variety of awards, assistantships and teaching opportunities.

During the two-and-a-half-year program, students focus on one of several areas, including:

- ceramics
- IMAP (digital, integrated arts, photography, video)
- painting and drawing
- printmaking
- sculpture and post-studio practice
- filmm (in collaboration with the Department of Cinema Studies & Moving Image Arts (https://www.colorado.edu/cinemastudies/)).

For more information about the MFA program, visit the department's MFA in Art Practices (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/) web page.

Requirements

Advising

Upon admission, students are assigned a tenured or tenure-track faculty member to serve as an academic advisor in the student’s home area.

Required Courses and Credits

A minimum of 54 credit hours (of which 36 credit hours must be taken in residence on the Boulder campus) of acceptable graduate work must be completed beyond the bachelor's degree.

Procedures for transferring credit from other graduate programs are governed by the regulations of the Graduate School. Transfer credit, not to exceed 18 credit hours for studio arts or 9 credit hours for art history, must first be approved by the student’s academic advisor, associate chair and the Graduate School.

Students who wish to change their area of concentration after admission must petition the art practices curriculum committee.

</tbody>
</table>

Degree Requirements

First-Semester and First-Year Reviews

In consultation with the advisor, the student will establish the membership of his or her committee, consisting of a minimum of three faculty members and one second-year graduate student, and schedule the first-semester review; its purpose is to give feedback to the student with regard to progress toward the degree. At the end of the first year, the committee is convened for a first year review; its purpose is to evaluate the student’s progress in the program and to determine if she or he will continue in the program.

Pre-Thesis Review

At the end of the semester preceding the graduating semester, the pre-thesis review takes place. Its purpose is for the graduate student to present the focus of his or her written thesis and exhibition, to review and evaluate the student's progress in the program, and to determine if the student is ready to register for thesis hours.

Thesis/Exhibition/Defense

The MFA thesis defense must be conducted while the student's work is on view during the MFA Exhibition. The MFA thesis must be submitted in its final draft form to all the thesis committee members two weeks prior to the scheduled thesis defense. After the defense, two copies of the thesis, with the required signatures on the signature sheet, must be turned into the graduate program coordinator. One of these is cataloged in the Norlin Library, and a digital copy is submitted to CU Scholar, Norlin Library's digital repository.

Time Limit

It is expected that the MFA program be completed within two-and-a-half years. Under certain circumstances and in consultation with the
candidate's primary area and advisor, a candidate may petition for an additional semester of study.

Graduation
Before registering for thesis hours, ARTS 6957, students must have a pre-thesis review with their faculty advisor and thesis committee. Art practices thesis work must take the form of original creative work of acceptable professional standards. The oral defense exam must be done in conjunction with the thesis exhibition, and the candidate must provide a critical written statement (creative thesis) concerning the work. The candidate's written creative thesis becomes part of Norlin Library's digital repository (https://scholar.colorado.edu/art_mfa/), and digital documentation of thesis work is housed within the department's Visual Resources Center (https://www.colorado.edu/artandarthistory/vrc/) digital image collection.

For further information see MFA guidelines (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193) on the department's website.

Learning Outcomes

- To encourage depth and refinement of students’ artistic practices.
- To expose students to varied modes of contemporary art practice and thinking through coursework and individual study.
- To prepare students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools.

Dual Degree Program

MBA/MFA in Art Practices

To support the university’s mission of advancing knowledge across disciplines and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business (http://leeds.colorado.edu/) and the Department of Art and Art History endorse a dual degree program in which both MBA and MFA degrees are awarded. This opportunity will appeal to students with career aspirations in gallery or museum management, or in starting entrepreneurial ventures combining their business and artistic talents. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequential.

Students must apply to and meet the application requirements for each program separately. Please see the MFA degree requirements page (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193) and MFA application page (https://www.colorado.edu/artandarthistory/apply/mfa-art-practices-application/) for more information on satisfying the MFA application and degree requirements. Admitted students spend their first year in one of the two programs, the second year in the other program, and the third year is a combination of the two. Both degrees must be awarded simultaneously. To learn more, visit the department’s MBA/MFA (https://www.colorado.edu/artandarthistory/apply/mamba-or-mfamba/) webpage.

Arts of the Americas - Doctor of Philosophy (PhD)

The PhD in Arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings art history into dialogue with anthropology, history, ethnic studies, women and gender studies, religious studies, and other disciplines in the humanities, social sciences and natural sciences. Our accelerated PhD
program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

CU Boulder is uniquely situated as a center for studies in the arts of the Americas due to resources on campus, as well as those in the Boulder–Denver region. On campus, the Center for Native American and Indigenous Studies (CNAIS), the Latin American Studies Center (LASC), and the Center of the American West provide resources, support and a network of scholars and students who are dedicated to interdisciplinary and cultural studies of the Americas. The CU Art Museum and CU Museum of Natural History have rich material resources of the highest caliber to support the new degree program. In addition, a number of academic units on CU Boulder’s campus currently provide relevant courses for students in our proposed PhD program, including anthropology, film studies, French and Italian, history, music, sociology, Spanish and Portuguese, ethnic studies, and the program in museum studies. Locally, the Denver Art Museum is a leading, internationally recognized research institution and a major resource for the study and exhibition of the arts of the Americas. Other important regional resources include the Clyfford Still Museum, the Denver Public Library, History Colorado, the Kirkland Museum and the Museo de las Americas.

Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above.

Furthermore, distribution requirements (of 12 credit hours) must be met during MA or PhD work as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Distribution Requirements</strong></td>
<td></td>
<td></td>

<tr>
<td>ARTH 6929</td>
<td>Seminar: Theories of Art History</td>
<td>3</td>
</tr>
<tr>
<td>Course with significant pre-1900 content (choose at least one)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Two courses in student’s interdisciplinary field of concentration (described below)</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>

The remaining 18 credit hours of coursework are elective graduate courses in AAH. Courses taken toward degree requirements may not be taken pass/fail. The department may require students with gaps in their academic preparation to take additional courses. Lastly, all students must complete 30 hours of dissertation credits.

Interdisciplinary Concentration

All PhD students will develop an interdisciplinary area of concentration, which will consist of at least 6 credits that provide a coherent complement to their primary field of study and which will be designed by students in close consultation with their advisors and approved by the director of graduate studies for art history. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, philosophy, comparative culture studies, gender studies, film studies, history, anthropology, geography, religious studies and environmental studies.

Foreign Language Requirement

In addition to demonstrating a high level of proficiency in their primary research area, students earning the PhD must demonstrate moderate proficiency in an additional foreign language by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- Completing a fourth-semester (second-semester sophomore) college language course with a grade of B or better.
- Completing a proficiency exam administered at CU.
- Presenting other evidence of moderate proficiency to the director of graduate studies for art history.

Students should consult with the director of graduate studies for art history at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before the student can advance to candidacy.

Graduate Program Guidelines

Qualifying Exam

The qualifying exam equips students to demonstrate critical historiographical knowledge of major, minor and interdisciplinary fields, and to situate their research interests within these fields. Qualifying examinations should be taken no later than the first semester after the completion of all coursework requirements and any grades of Incomplete must be completed before scheduling the Qualifying Exam. One year before the qualifying exams are taken, the student meets with the major and minor advisors as well as the Director of Graduate Studies. With their guidance, the student will then form an Examination Committee, which will be composed of the major and minor advisors as well as an advisor from the student’s interdisciplinary field of concentration (usually a faculty member from another department at CU).

Reading lists: Students will compose reading lists for the major, minor and interdisciplinary fields to be reviewed and approved by each advisor. The reading lists should include the “staple” readings in each field, other important sources that navigate through the major issues in the field, as well as a body of scholarship that pertains to the student’s focus of study. Reading lists should include roughly 50 titles (books and articles) for the major field, 30 for the minor field, 30 for the interdisciplinary field and one paragraph (up to 300 words) providing a rationale for the selection of this content. The PhD Reading List and Prospectus Approval Form must be submitted to the Graduate Program Coordinator at least one month before the exam.

Prospectus: For the written portion of the exam, students will write a double-spaced, 20-25 page prospectus (not including the necessary notes, illustrations and bibliography) outlining the major themes and issues of the proposed dissertation. The Prospectus should consist of three parts: 1) the topic, argument, methodology and statement of scholarly contribution; 2) a description of method and of existing relevant scholarship; and 3) a brief chapter-by-chapter summary. The bibliography should contain full citations of all works referenced in the Prospectus and all of these titles should appear on one of the student's Reading Lists.

Students must submit a final draft of their Prospectus to all committee members two weeks prior to the date of the Oral Exam.

Oral Exam: If the examination committee finds the reading lists and prospectus acceptable, then the student will proceed to take a one-hour oral examination with all of the examination committee members present. The oral exam will consist of a one-hour question-and-answer period on the student’s prospectus and reading lists, their knowledge of the major, minor and interdisciplinary fields, and their close-reading abilities. All committee members must be present in person or via
teleconference for the oral exam. A positive vote from at least two of the committee members is required to pass.

At least two weeks before the date of the oral exam a Doctoral Examination Report Form must be submitted by the Graduate Program Coordinator to the Graduate School for approval. Please see the Graduate Program Coordinator for assistance with this process.

**Advancement to Candidacy**

Upon passing the oral exam and pending approval by the Graduate School, the student will advance to PhD Candidacy (D Status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful qualifying exam may be retaken only once and must be retaken within six months. “Retaken” means that the second exam covers the same material and includes the same committee members as the first.

Following the successful completion of the Qualifying Exam, a Candidacy Application for an Advanced Degree must be endorsed by the Director of Graduate Studies and sent to the Graduate School for approval. The Graduate Program Coordinator will submit this application to the Graduate School on the student’s behalf; please consult the Graduate Program Coordinator for more information.

**Forming a Dissertation Committee**

The dissertation, which should be a work of viable scholarship, typically takes the form of a monograph. The dissertation is written in close consultation with the Dissertation Committee and Director of Graduate Studies.

The Dissertation Committee consists of three to five members: at least two Art History faculty members as well as a faculty member from another department of the student’s choice. This committee is often but not always drawn from members of the student’s Comprehensive Examination Committee. The dissertation should be between 250 and 350 pages long, the length of a scholarly monograph.

**Grant Opportunities**

The student is encouraged to apply for grants as soon as s/he advances to candidacy. General fellowship information is available on the Graduate School (https://www.colorado.edu/graduateschool/funding/) website. The Latin American Studies Center (https://www.colorado.edu/lasc/funding/) also provides a small amount of grants for graduate students.

Grants vary in the documents that they require. These may include transcripts, curricula vitae, proposals, budgets, itineraries, autobiographies, statements of progress and letters of reference. No application will ask for all of these, but the list is a fair representation of what the student may be called upon to provide.

The following list identifies grants and fellowships relevant to art history. This will be extremely helpful, but student should not expect it to include every grant for which they should consider applying. Additional resources are available on the websites of other departments and centers, the College Art Association (http://www.collegeart.org/) and more.

**External Funding: Fall**

- American Association of University Women Dissertation Fellowship (ABD, DW)
- American Association of University Women International Fellowship (INTL, MULTI)
- Smithsonian Institution Fellowship (ABD, INTL)
- CASVA Predoctoral Fellowship (ABD, INTL, ABROAD, SOME MULTI)
- CLIR/Mellon Fellowship for Dissertation Research in Original Sources (ABD, ABROAD, INTL)
- DADD Year-Long Research Grants in Germany (ABROAD, INTL)
- Dedalus Foundation Dissertation Fellowship (ABD, INTL, N)
- Dolores Zohrab Liebmann Fellowship (MULTI, N)
- Ford Foundation Predoctoral Fellowship (MULTI)
- Ford Foundation Dissertation Fellowship (ABD, DW)
- Fulbright US student Fellowship (ABROAD)
- Getty Foundation Predoctoral Fellowship (DW, ABD, INTL)
- Graham Foundation Carter Manny Award (ABD, ABROAD, INTL, N)
- Kress History of Art Institutional Fellowships (ABD, ABROAD, INTL, N)
- Mellon/ACLS Dissertation Completion Fellowship (ABD, DW, INTL)
- Metropolitan Museum of Art Junior Fellowships (ABD, INTL)
- Smithsonian Fellowship at the Archives of American Art (ABD, INTL)
- SSRC International Dissertation Research Fellowship (ABD, ABROAD, INTL)

**External Funding: Spring**

- Joan and Stanford Alexander Award (ABD, INTL)
- Mellon-CES Dissertation Completion Fellowships in European Studies (ABD, INTL)
- Fulbright-Hays Doctoral Dissertation Research Abroad (ABD, ABROAD)
- Kress Fellowship for Language Study in European Art History (INTL, LANG)
- Schiff Foundation Fellowship (INTL, N)

**Other Resources**

- CU Boulder Graduate Student Funding (https://www.colorado.edu/graduateschool/funding/) webpage

Please note the following:

- ABD: required by start of grant
- DW: dissertation write-up
- INTL: open to international students
- LANG: language training
- MULTI: multi-year or renewable
- N: must be nominated to apply
- ABROAD: international research

**Dissertation Defense**

The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule the dissertation defense (an oral examination and discussion lasting about 90 minutes). The student should deliver copies of the dissertation to their committee members at least one month prior to their defense date. The student must also file a Doctoral Examination Report and a Doctoral Defense Leaflet with the Graduate School at least two weeks prior to their defense. Consult the Graduate Program Coordinator for assistance with this process.
All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School's Graduation Requirements (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) webpage. A satisfactory vote from at least three committee members is required to pass the defense. If unsuccessful, the defense may be retaken only once after completion of changes or additions determined by the committee and must be retaken within six months. “Retaken” means that the second exam covers the same material and includes the same committee members as the first.

**Doctoral Checklist for Graduation**
The Doctoral Checklist for Graduation includes the Graduate School’s requirements for the doctoral degree. The major department should be consulted about specific additional requirements.

**Learning Outcomes**
Graduates from this PhD program will be professionally equipped to make lasting contributions to the emerging dynamic that builds understanding among different sectors of society. One of the unique aspects of the program is its commitment to public education, and the other is its in-depth training in the arts of the Americas conceived as a scholarly field of study culturally, historically and intellectually encompassing the western hemisphere.

**Asian Languages and Civilizations**
The Department of Asian Languages and Civilizations offers the Bachelor's-Accelerated Master's (BAM), MA, Dual MA and PhD graduate degrees with specializations in Chinese or Japanese. Celebrating a history of over 30 years, the department offers small class sizes that allow ALC graduate students the opportunity to work closely with faculty who are noted scholars in their fields.

For more information about the Department of Asian Languages and Civilizations, please visit the department website (https://www.colorado.edu/alc/).

Course codes for these programs are CHIN and JPNS.

**Master's Degree**
- Asian Languages and Civilizations - Master of Arts (MA) (p. 1051)

**Doctoral Degree**
- Asian Languages and Civilizations - Doctor of Philosophy (PhD) (p. 1052)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alexander, Katherine Laura Bos (https://experts.colorado.edu/display/fisid_157674/)
Assistant Professor; PhD, University of Chicago
Courses

CHIN 5010 (3) Sinological Methods
Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as lei shu, cong shu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory
Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5070 (1) Graduate Academic Writing
Considers the act of academic writing both in terms of mechanics and in terms of habits of effective writers themselves, so that students, building upon a base knowledge of the expectations of the academy, develop approaches to help themselves gain the confidence to excel at the writing required of them in graduate school and beyond.

Requisites: Restricted to graduate students only.

CHIN 5120 (3) History of Literature through the Ninth Century
Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century
Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content
CHIN 5210 (3) Ancient Prose
Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainianzi, Shiji, Hanshu, and Lunheng. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5220 (3) Ancient Poetry
Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shijing and the Chu ci, as well as the fu and shi of Han writers. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5230 (3) History of Early Chinese Thought
Introduces early Chinese philosophy, mostly "Masters' Literature" of the 5th–1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5280 (3) Topics in Ancient Literature
Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5410 (3) Medieval Prose
Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5420 (3) Medieval Poetry
Studies works of early medieval (ca. 200-600 AD) poetry. Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5430 (3) Medieval Thought and Religion
Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5480 (3) Topics in Medieval Literature
Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5610 (3) Early Modern Prose
Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5620 (3) Early Modern Poetry
Studies Song, Yuan, Ming, and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content
CHIN 5630 (3) Early Modern Fiction
Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, and Ling Mengchu. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5680 (3) Topics in Early Modern Literature
Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5750 (3) Daoism
Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4750 and RLST 4750 and RLST 5750
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5810 (3) Modern Literature
Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5820 (3) Contemporary Literature
Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5830 (3) History of Chinese Film
Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5880 (3) Topics in 20th Century Literature
Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5890 (3) Topics in Chinese Film
Examines a specific problem or issue in Chinese film, e.g., 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5980 (1-3) Independent Study
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy
Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4980
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6900 (1-6) Independent Study
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6940 (1) Master's Candidate for Degree
Requisites: Restricted to graduate students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content
CHIN 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

JPNS 5010 (3) Bibliography and Research Methods
Introduces research materials on Japan in Japanese and Western languages, including bibliographic tools, style sheets, and library resources. Overview of secondary sources and publication outlets/methods of disseminating research.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5020 (3) Methods of Teaching Japanese
Surveys pedagogical theory and methods for the teaching of Japanese as a second language, including issues of presentation, interaction, and evaluation.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5050 (3) Japanese Sociolinguistics: Japanese Language and Society
Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5070 (3) Second Language Acquisition of Japanese
Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 4070
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5080 (3) Kanji in Japanese Orthography
Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 4080
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5150 (3) Japanese Literary Translation
Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5170 (3) Japanese for Sinologists
An accelerated course in modern scholarly Japanese for students with a basic foundation in Japanese and an advanced knowledge of Chinese. Focus is on materials in Japanese that relate to Chinese civilization and includes an introduction to kanban.
Requisites: Restricted to graduate students only.
Recommended: one year of modern Japanese (minimum grade C), graduate-level command of Chinese, or instructor consent.
Additional Information: Departmental Category: Japanese

JPNS 5210 (3) Classical Prose Literature
Examines selected prose works and authors from the Classical, or Heian, period (784-1185). Texts may include selections from diaries, tale literature, and zuihitsu such as Izumi Shikibu Nikki, Genji Monogatari, and Makura no Soshi. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese

JPNS 5220 (3) Waka, Renga, and Haiku
Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (hachidaiishu), famous renga sequences (Minase Sangin Hyakuin, for example), and the haiku of Basho. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese

JPNS 5280 (3) Topics in Classical Japanese Literature
Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5310 (3) Advanced Classical Japanese 1
Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Knowledge of Classical Japanese at the level of JPNS 4310 is required.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content
JPNS 5320 (3) Advanced Classical Japanese 2
Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras, including kanbun and hentaigana; translation and explication of texts.
**Requisites:** Requires prerequisite course of JPNS 5310 (minimum grade C). Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5410 (3) Medieval Prose Literature
Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185-1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (otogi-zoshi), Noh plays, and Buddhist literature such as Heike Monogatari, Towazugatari, Izayoi Nikki, Tsurezuregusa, and Shasekishu. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5420 (3) Japanese Buddhism and Literature
Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the Nihon Ryoiki, Buddhist poetry (Shakkyo-Ka) from the imperial poetry anthologies, Heike Monogatari, Hojoki, the poetry of Saigyo and Basho, and selected Noh plays. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5480 (3) Topics in Medieval Literature
Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5610 (3) Japanese Dramatic Literature
Examines major writers and texts of the no, kyogen, kabuki, and bunraku theaters, including the plays and critical writings of such authors as Kannami Kiyotsugu, Zeami Motokiyo, Konparu Zenchiku, and Chikamatsu Monzaemon. Texts and secondary readings vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5620 (3) Early Modern Japanese Literature and Culture
Examines the literature, arts, drama and culture of Japan’s early modern period in the original language, as well as secondary scholarship and methodologies for pursuing work on early modern materials. Genres covered include kana-zoshi, ukyo-zoshi, dangibon, yomihon, sharebon, kibyoshi, ninjobon, kokkelbon, gokan, halkai, senryo, kyoka, joruri, kabuki, and literary thought.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5810 (3) Modern Japanese Literature
Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan’s response to Western cultural forms. The unique cultural politics of each of the periods (Meiji, Taisho, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5820 (3) Contemporary Japanese Literature
Covers developments in Japanese prose fiction and/or other literary genres from the end of the Pacific War in 1945 to the present.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5830 (3) Readings in Modern and Contemporary Japanese Thought and Culture
Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5900 (1-6) Independent Study
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5920 (3) Topics in Modern Literature and Culture
Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Japanese Departmental Category: Asia Content
JPNS 5980 (1) Practical Issues in Japanese Language Pedagogy
Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Knowledge of Modern Japanese at the level of JPNS 4120 is required.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 4980
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content
JPNS 6900 (1-6) Japanese Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content
JPNS 6940 (1) Master's Candidate for Degree
Requisites: Restricted to graduate students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content
JPNS 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content
JPNS 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

Asian Languages and Civilizations - Master of Arts (MA)
The MA program specialization in Chinese is designed to offer students maximum general exposure to the long sweep of Chinese literary and cultural history, as well as the opportunity to delve into the study of a particular period, field, topic or genre. With six professors covering literature and culture from early China through the medieval era to the early modern period and contemporary China, the program is truly comprehensive in scope. The program focuses especially on preparing students for PhD study and careers in sinology. Since 1991, more than seventy graduates of the Chinese MA program have gone on to doctoral study here or at other first-rank institutions in the U.S.

The MA program specialization in Japanese offers students the opportunity to engage in advanced-level study of Japanese literature and culture, with the aim of preparing students for doctoral study in Japanese literature as well as providing firm foundational knowledge for those seeking Japan-related professional careers. The program is composed of four professors with specializations in the literatures of classical, medieval, early modern, and modern Japan. In recent years graduates of the Japanese MA program have gone on to PhD programs in Japanese literature and Japanese studies at this and numerous other first-rank institutions in the U.S.

For more information, please visit the department website (https://www.colorado.edu/alc/).

Bachelor’s–Accelerated Master's Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s):
- Chinese - Bachelor of Arts (BA) (p. 145)
- Japanese - Bachelor of Arts (BA) (p. 148)

Requirements
The MA in Asian Languages and Civilizations offers specializations in Chinese or Japanese.

All entering students in the Chinese program must take CHIN 5010 at the earliest opportunity. Students employed as teaching assistants also must take CHIN 5980 or JPNS 5980. Selection of courses beyond these is made in consultation with the director of graduate studies in Chinese or Japanese.

Prospective graduates will be required to present at least 30 hours of approved coursework or, in exceptional cases, 24 hours of coursework plus a thesis. The 24 hours must be completed at the 5000-level or above. Up to six credits from other departments may be completed at the 3000- or 4000-level at the discretion of the department.

Specific requirements for the MA specializations in Chinese and in Japanese, as well as a full list and description of graduate courses (https://www.colorado.edu/alc/courses/) offered, are available on the department website.

Specialization in Chinese
Typical course sequence for this specialization consists of CHIN 5010, CHIN 5980 and one seminar in the first semester, followed by two seminars each over five subsequent semesters.

Dual Degree Programs
Dual MA in Asian Languages and Civilizations and History or Religious Studies
The Department of Asian Languages and Civilizations participates in a dual master’s program with the Departments of History (http://www.colorado.edu/history/graduate-students/ma-programs/dual-ma-programs/) and Religious Studies (http://www.colorado.edu/rilst/graduate/dual-ma/). Students admitted to the MA programs in these departments may apply to complete a second MA in one of the other programs. Such degrees serve the needs of students who seek a truly interdisciplinary experience among intellectually affiliated departments. Students interested in exploring this option should contact the director of graduate studies in Chinese or Japanese (https://www.colorado.edu/alc/graduate/advising/) for specific requirements.

Asian Languages and Civilizations - Doctor of Philosophy (PhD)
The PhD in Asian Languages and Civilizations offers extensive training in the modern and premodern literatures of China and Japan for students seeking to pursue research and teaching careers at the collegiate level. For more information, please visit the department website (https://www.colorado.edu/alc/).

Requirements
The PhD in Asian Languages and Civilizations offers specializations in Chinese or Japanese with concentrations in literary and/or cultural studies of either the premodern or modern periods.

The PhD requires a minimum of 45 credits in graduate courses numbered 5000 or above in Chinese or Japanese, and 30 credits of dissertation work beyond the required coursework. Selection of courses should be made in consultation with the Director of Graduate Studies in Chinese or Japanese (see the department’s Graduate Advising webpage). Academic preparation is expected in both classical and modern language.

Some graduate or advanced undergraduate coursework from related fields may also be included, in accordance with Graduate School rules. Additionally, some coursework completed for the MA degree at CU or other similarly rigorous institutions may count toward the 45 credits required. PhD students may transfer to the department up to 21 hours of acceptable graduate-level credit.
Visit the department’s PhD specialization in Chinese and PhD specialization in Japanese webpages for specific requirements, as well as a full list and description of graduate courses (https://www.colorado.edu/alc/courses/) offered.

**Asian Studies**

The Center for Asian Studies was established in 1999 to advance knowledge of Asia through undergraduate and graduate education, faculty research and outreach programs for the broader community. The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. In addition, a number of departments and schools provide graduate coursework in Asia-related topics.

The center is committed to managing and expanding study of Asia by providing graduate student fellowships, scholarships and study opportunities such as the Edward G. Seidensticker Japan Summer Research Grant and the Japanese Studies Scholarship Fund administered through ALC and History; investing in faculty research and professional development; providing support for building Asia-related resources on the CU Boulder campus; developing academic exchanges with Asia-based colleagues and students; and engaging the local community with Asia-related programs and events.

Finally, the center serves as a link and community-building resource for faculty and students across the university.

**Certificate**

- Asian Studies - Graduate Certificate (p. 1053)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

- Oakes, Tim (https://experts.colorado.edu/display/fisid_109269/)
  Faculty Director; PhD, University of Washington

- Yapp, Lauren (https://experts.colorado.edu/display/fisid_167236/)
  Director, Instructor; PhD, Stanford University

**Asian Studies - Graduate Certificate**

The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. It enables students with intellectual or professional interest in Asia who are not focused primarily on Asia within their own
degree program to acquire an official credential indicating that they have expertise in some aspect of Asian knowledge or practice.

For more information, visit the Center for Asian Studies’ Asian Studies Graduate Certificate (http://www.colorado.edu/cas/academics/asian-studies-graduate-certificate/) webpage.

Requirements

Admission Requirements
The certificate is available to all graduate students and post-BA students in the professional schools currently enrolled at CU Boulder, and to non-degree-seeking ACCESS students with a bachelor’s degree.

How to Apply
• Write to the Certificate Director (lauren.yapp@colorado.edu)
• Upon acceptance, meet with the Certificate Director to approve a plan for coursework and meeting the language requirement
• Upon completion, submit transcript to the Center for Asian Studies for review by the Certificate Director

Course Requirements
Students must complete 12 credit hours of approved graduate courses with a grade of B or higher, 3 credits of which may be in an approved undergraduate course, and 9 credits of which must be at or above the 5000 level.

• Specialization allowed in East Asia, South Asia, Central Asia, Southeast Asia or West Asia/Middle East.
• 2 courses in a single discipline or department.
• 2 courses from outside of that discipline or department.
• Thematic courses that have at least 50% Asia content may also be counted, dependent on approval by the Certificate Director.
• Up to 3 credits may be taken as independent study on an Asia-related topic at the 5000 level or higher with approval from the Certificate Director.
• 9 credits must be at or above the 5000 level.
• Two years’ college-level proficiency in an Asian language relevant to specialization (does not count toward the certificate credit hours).

Note: Students may take 3 credits of independent study on an Asia-related topic at the 5000 level or higher with a CAS Faculty Affiliate from outside of their home department; students may not take both a theory class and an independent study for the certificate.

Approved Undergraduate Courses
These courses must be outside the student's home department and can be chosen from the upper-division courses (at 3000 or 4000 level) listed as requirements on the Asian Studies - Bachelor of Arts (BA) (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/asian-studies/asian-studies-bachelor-arts-ba/#requirementstext) page under Modern Asian Civilizations and Electives.

Graduate Courses with a Theory Focus
If a student takes one of these courses, they may not also take an Independent Study course for the certificate; the course must be taught by a CAS Faculty Affiliate and the student must complete written assignments/projects on an Asia-related topic.

Astrophysical and Planetary Sciences

The curriculum and research in the department emphasizes three major areas: astrophysics, planetary sciences, and solar and space physics.

Those wishing to pursue graduate work in APS leading to candidacy for an advanced degree should carefully read the Master’s Degree Requirements (p. 989) and the Doctoral Degree Requirements (p. 991).

Course code for this program is ASTR.

Doctoral Degree

• Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD) (p. 1059)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Malaspina, David M. (https://experts.colorado.edu/display/fisid_148393/) Assistant Professor; PhD, University of Colorado Boulder

Malville, J. McKim Professor Emeritus
Courses

ASTR 5110 (3) Atomic and Molecular Processes
Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.
Requisites: Restricted to graduate students only.

ASTR 5120 (3) Radiative and Dynamical Processes
An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.
Requisites: Restricted to graduate students only.

ASTR 5140 (3) Astrophysical and Space Plasmas
Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5141
Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

ASTR 5150 (3) Introductory Plasma Physics
Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5150
Requisites: Restricted to graduate students only.

ASTR 5300 (3) Introduction to Magnetospheres
Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.
Requisites: Restricted to graduate students only.

ASTR 5330 (3) Cosmochemistry
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 4330 and GEOL 4330 and GEOL 5330
Requisites: Restricted to graduate students only.

ASTR 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and PHYS 5400
Requisites: Restricted to graduate students only.

ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence
Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.
Requisites: Restricted to graduate students only.

ASTR 5540 (3) Mathematical Methods
Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5540
Requisites: Restricted to graduate students only.

ASTR 5550 (3) Observations, Data Analysis and Statistics
Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
Requisites: Restricted to graduate students only.
ASTR 5560 (3) Radiative Processes in Planetary Atmospheres
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth’s atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5560
Requisites: Restricted to graduate students only.

ASTR 5700 (3) Stellar Astrophysics
Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.
Recommended: Prerequisite ASTR 5120.
Requisites: Restricted to graduate students only.

ASTR 5710 (3) High-Energy Astrophysics
Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5720 (3) Galaxies
Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble’s Law, the cosmic distance scale, and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer
Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5740 (3) Interstellar Astrophysics
Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.
Requisites: Restricted to graduate students only.

ASTR 5760 (3) Astrophysical Instrumentation
Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5770 (3) Cosmology
Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
Requisites: Restricted to graduate students only.

ASTR 5780 (3) Mission Design and Development for Space Sciences
Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) Develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5440
Grading Basis: Letter Grade

ASTR 5800 (3) Planetary Surfaces and Interiors
Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5800
Requisites: Restricted to graduate students only.

ASTR 5810 (3) Planetary Atmospheres
Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and GEOL 5810
Requisites: Restricted to graduate students only.

ASTR 5820 (3) Origin and Evolution of Planetary Systems
Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5820 and GEOL 5820
Requisites: Restricted to graduate students only.
ASTR 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and GEOL 5830
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5835 (1) Seminar in Planetary Science
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and GEOL 5835
Repeatability: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences
Instructor consent required.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 6000 (1) Seminar in Astrophysics
Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements.
Repeatability: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 6050 (3) Space Instrumentation
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 6050 and GEOL 6050
Grading Basis: Letter Grade

ASTR 6610 (3) Earth and Planetary Physics 1
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and PHYS 6610
Requisites: Restricted to graduate students only.

ASTR 6620 (3) Earth and Planetary Physics 2
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and PHYS 6620
Requisites: Restricted to graduate students only.

ASTR 6630 (3) Earth and Planetary Physics 3
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and PHYS 6630
Requisites: Restricted to graduate students only.

ASTR 6650 (1-3) Seminar in Geophysics
Advanced seminar studies in geophysical subjects for graduate students.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and PHYS 6650
Requisites: Restricted to graduate students only.

ASTR 6940 (1) Master's Candidate for Degree
Grading Basis: Pass/Fail

ASTR 6950 (1-6) Master's Thesis

ASTR 7160 (3) Intermediate Plasma Physics
Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 7160
Recommended: Prerequisite PHYS 5150.

ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences
Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences
Instructor consent required.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ASTR 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatability: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)

Students pursuing a PhD from the Department of Astrophysical and Planetary Sciences generally specialize in the areas of astrophysics or planetary science.

The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree as they progress toward their PhD.

The program successfully integrates astrophysics, planetary science, Solar physics, and space instrumentation with strong observational
and theoretical components. These assets facilitate interaction and collaboration between the disciplines and enable students to explore a wide variety of research areas.

The Sommers–Bausch Observatory, conveniently located on campus, provides excellent hands–on experience with telescopes and observing, while the world–class Fiske Planetarium, supported by our department, offers a unique opportunity for public outreach. These campus resources are complemented by other affiliated research organizations in Boulder.

For more information, visit the department’s Prospective Students (http://www.colorado.edu/aps/prospective-students/) webpage.

Requirements
A minimum of 37 credit hours of coursework (including 4 credit hours of graduate seminars) in courses numbered 5000 or above is required; however, the overall emphasis is on independent study and research. A minimum of 30 credit hours of PhD dissertation credit hours are required.

Students in the PhD program are required to remove any deficiencies identified at the preliminary interview; to pass a comprehensive examination composed of writing a research paper based on a semi-independent research project, then an oral exam on that paper and related topics within the field; and to satisfactorily defend the PhD thesis before a faculty committee.

During the first year of graduate study, students generally obtain a broad background in courses regarded as basic to all three areas in addition to more specialized studies. Many students take graduate-level courses in other departments (e.g., Departments of Physics, Atmospheric and Oceanic Sciences, Geological Sciences, Applied Mathematics, or Aerospace Engineering), depending upon their particular interests or participation in interdisciplinary programs (see below).

Research Opportunities

Observational and Theoretical Astrophysics
Research in this field is conducted in the following areas:

• Stellar atmospheres, radiative transfer, stellar winds of hot/cool stars
• Formation of stars and planetary systems
• Solar physics
• Interstellar and intergalactic medium
• Cosmology and large-scale structure of the universe; galaxy formation
• Stellar interiors, black holes and neutron stars
• Gravitational physics
• Cosmic X-ray sources, supernovae and their remnants and accretion phenomena, jets and clusters of galaxies
• Galactic evolution, quasars and active galaxies
• Radio and sub-millimeter astronomy, microwave background
• Plasma astrophysics and MHD
• Astrophysical fluid dynamics
• UV, optical, IR, submillimeter, radio and X-ray instrumentation
• Instrument and detector development
• Sounding rocket and balloon astronomy

Research is carried out with the ARC 3.5m Apache Point telescope, the Sloan Digital Sky Survey-V and these national telescopes and laboratories and international collaborators: High Altitude Observatory (HAO) in
Boulder (Solar physics); National Optical Astronomical Observatories in Tucson and Chile (optical astronomy); National Radio Astronomy Observatory (NRAO); the Very Large Array (VLA); the Green Bank Telescope (GBT); the Hubble Space Telescope (HST); the Chandra, SWIFT, and XMM X-ray telescopes; the Fermi Gamma-Ray Space Telescope; and the Daniel K. Inouye Solar Telescope (DKIST) through collaboration with National Solar Observatory (NSO). CU Boulder also is involved with the Messenger (Mercury), MAVEN (Mars), JUNO (Jupiter), Cassini (Saturn), and New Horizons (Pluto) missions, as well as the HST Cosmic Origins Spectrograph.

Locally, APS operates a 24-inch Cassegrain-Coude and two 20-inch Cassegrain telescopes through Sommers-Bausch Observatory. These are available for photographic, photometric, and spectrographic observations, as well as for instrument and detector development. Opportunities for graduate research also are found with the university’s Laboratory for Atmospheric and Space Physics (LASP), the Center for Astrophysics and Space Astronomy (CASA), and JILA.

**Theoretical, Observational and Laboratory Atmospheric and Planetary Science**

Research in this field is conducted in the following areas:

- Planetary disks, Kuiper Belt objects, extra-solar planets
- Dynamics and chemistry of planetary atmospheres, planetary clouds and planetary climates; evolution of planetary atmospheres; comparison of planetary and terrestrial atmospheres
- Planetary aeronomy, airglow and aurora, UV and IR spectroscopy, noctilucent clouds, structure and composition of planetary atmospheres (Venus, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto), planetary magnetospheres, and cometary physics
- Satellite monitoring of the Earth’s atmosphere and environment, including remote sensing of mesospheric ozone, stratospheric trace species, convection, outgoing radiation and magnetospheric dynamics
- Planetary geology, planetary interiors and surfaces, and planetary geophysics

Graduate research opportunities exist with individual faculty members, as well as jointly with academic and research units, such as the Departments of Geological Sciences, Physics, and Aerospace Engineering, as well as the Department of Atmospheric and Oceanic Sciences (ATOC), the National Center for Atmospheric Research (NCAR), the National Oceanic and Atmospheric Administration (NOAA), and the Laboratory for Atmospheric and Space Physics (LASP). The latter is involved in space investigations of the Earth, Sun and planets. Financial support is available in connection with all of the above research activities.

**Atmospheric and Oceanic Sciences**

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Graduate students admitted to ATOC are eligible to receive an advanced degree in atmospheric and oceanic sciences. Graduate students outside of ATOC can pursue the graduate certificate in atmospheric and oceanic sciences while earning a graduate degree from another department at CU Boulder, or while taking coursework as a non-degree-seeking student through Continuing Education’s ACCESS Program provided they have already earned a bachelor’s degree and meet the course prerequisites. In addition, students inside and outside the department may pursue a graduate certificate in oceanography. For more information on graduate certificate programs, see the Graduate School/Interdisciplinary Programs section.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/) website.

**Course code for this program is ATOC.**

**Master’s Degree**

- Atmospheric and Oceanic Sciences - Master of Science (MS) (p. 1065)

**Doctoral Degree**

- Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD) (p. 1066)

**Certificates**

- Atmospheric and Oceanic Sciences - Graduate Certificate (p. 1067)
- Oceanography - Graduate Certificate (p. 1067)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Brown, Derek Philip (https://experts.colorado.edu/display/fisid_150027/)
Instructor; PhD, University of Colorado Boulder

Cassano, John J. (https://experts.colorado.edu/display/fisid_121781/)
Associate Professor; PhD, University of Wyoming

Dinezio, Pedro
Associate Professor; PhD, University of Miami

Friedrich, Katja (https://experts.colorado.edu/display/fisid_133607/)
Associate Chair, Associate Professor; PhD, Ludwig-Maximilians-Universität München (Germany)

Giglio, Donata
Assistant Professor; PhD, University of California, San Diego

Han, Weiqing (https://experts.colorado.edu/display/fisid_115493/)
Professor; PhD, Nova University

Hart, John E.
Professor Emeritus

Jahn Hall, Alexandra (https://experts.colorado.edu/display/fisid_155094/)
Assistant Professor; PhD, McGill University

Karnauskas, Kristopher Benson (https://experts.colorado.edu/display/fisid_150027/)
Associate Professor; PhD, University of Maryland, College Park
Kay, Jennifer E. (https://experts.colorado.edu/display/fisid_153815/)  
Assistant Professor; PhD, University of Washington

Keen, Richard A.  
Instructor Emeritus

Lemone, Margaret Anne (https://experts.colorado.edu/display/fisid_115199/)  
Professor Adjoint

Lenaerts, Jan (https://experts.colorado.edu/display/fisid_158530/)  
Assistant Professor; PhD, Utrecht University

Lovenduski, Nicole Suzanne (https://experts.colorado.edu/display/fisid_147557/)  
Associate Professor; PhD, University of California, Los Angeles

Lundquist, Julie Kay (https://experts.colorado.edu/display/fisid_147838/)  
Associate Professor; PhD, University of Colorado Boulder

Moriarty, Julia (https://experts.colorado.edu/display/fisid_165830/)  
Assistant Professor; PhD, William & Mary/Virginia Institute of Marine Science

Pilewskie, Peter Andrew (https://experts.colorado.edu/display/fisid_134466/)  
Professor; PhD, University of Arizona

Randall, Cora Einterz (https://experts.colorado.edu/display/fisid_102010/)  
Professor; PhD, University of California, Santa Cruz

Rudolph, James  
Instructor; PhD, University of Colorado Boulder

Schmidt, Sebastian (https://experts.colorado.edu/display/fisid_140121/)  
Associate Professor; PhD, Leipzig University (Germany)

Subramanian, Aneesh  
Assistant Professor; PhD, University of California, San Diego

Toohey, Darin W. (https://experts.colorado.edu/display/fisid_110652/)  
Professor; PhD, Harvard University

Toon, Owen Brian (https://experts.colorado.edu/display/fisid_110521/)  
Professor; PhD, Cornell University

Wang, Zhihe (https://experts.colorado.edu/display/fisid_164340/)  
Professor; PhD, University of Utah

Weiss, Jeffrey B. (https://experts.colorado.edu/display/fisid_102145/)  
Chair, Professor; PhD, University of California, Berkeley

Winters, Andrew (https://experts.colorado.edu/display/fisid_165835/)  
Assistant Professor; PhD, University of Wisconsin–Madison

Courses

ATOC 5000 (3) Critical Issues in Climate and the Environment  
Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.  
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ENVS 5830  
Requisites: Restricted to graduate students only.

ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics  
Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisite one year of calculus-based physics and math through differential equations.

ATOC 5051 (3) Introduction to Physical Oceanography  
Provides fundamental knowledge of observations, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisite one year of calculus-based physics and math up through differential equations.

ATOC 5060 (3) Dynamics of the Atmosphere and Oceans  
Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

ATOC 5061 (3) Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms  
Explores the existing theories of the El Niño and Southern Oscillation (ENSO) ocean-atmosphere coupled mechanisms, theory of the thermocline in a quasi-geostrophic system, and dynamics of the Atlantic Meridional Overturning Circulation (AMOC). Covers physical mechanisms, associated mathematical equations, and numerical model simulations. Discusses their direct research applications in understanding the past, present and future climate variability and change. Offered once per year.  
Repeatable: Repeatable for up to 9.00 total credit hours.  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisites ATOC 5400, ATOC 5051 or ATOC 5060 and one year of calculus-based physics and math including differential equations.

ATOC 5151 (3) Atmospheric Chemistry  
Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.  
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5151  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisite one semester of college-level chemistry.

ATOC 5152 (3) Advanced Atmospheric Chemistry  
Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.  
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5152  
Recommended: Prerequisite CHEM 5151 or ATOC 5151.  
Grading Basis: Letter Grade
ATOC 5200 (3) Biogeochemical Oceanography
Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4200
Requisites: Restricted to graduate students only.

ATOC 5215 (3) Descriptive Physical Oceanography
Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.
Requisites: Restricted to graduate students only.

ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing
Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering, polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5235
Requisites: Restricted to graduate students only.

ATOC 5300 (3) The Global Carbon Cycle
Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.
Requisites: Restricted to graduate students only.

ATOC 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5560 and PHYS 5400
Requisites: Restricted to graduate students only.

ATOC 5500 (1-3) Special Topics in Atmospheric and Oceanic Sciences
Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Formerly ATOC 7500.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 5540 (3) Mathematical Methods
Applied mathematics course; provides necessary analytical background for courses in plasma physics, fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5540
Requisites: Restricted to graduate students only.

ATOC 5550 (3) Mountain Meteorology
Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4550
Requisites: Restricted to graduate students only.

ATOC 5560 (3) Radiative Processes in Planetary Atmospheres
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5560
Requisites: Restricted to graduate students only.

ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols
Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.

ATOC 5730 (3) Physical Oceanography and Climate
Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4730
Requisites: Restricted to graduate students only.

ATOC 5750 (3) Desert Meteorology and Climate
Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4750
Requisites: Restricted to graduate students only.
ATOC 5770 (3) Wind Energy Meteorology
Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4770
Requisites: Restricted to graduate students only.

ATOC 5780 (3) Ice Sheets and Climate
Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4780
Requisites: Restricted to graduate students only.
Recommended: Prerequisites Basic knowledge of calculus, algebra and programming experience (python, Matlab, or equivalent).

ATOC 5810 (3) Planetary Atmospheres
Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5810 and GEOL 5810
Requisites: Restricted to graduate students only.

ATOC 5815 (3) Scientific Programming, Data Analysis and Visualization Laboratory
Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4815
Requisites: Restricted to graduate students only.

ATOC 5820 (3) Origin and Evolution of Planetary Systems
Reviews protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets and asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the orbital evolution of solar system bodies.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and GEOL 5820
Requisites: Restricted to graduate students only.

ATOC 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5830 and ASTR 5830
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.

ATOC 5835 (1) Seminar in Planetary Science
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5835 and GEOL 5835
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

ATOC 5850 (3) Numerical Methods Laboratory
Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4850
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of interest in atmospheric, oceanic, climatic, or cryospheric physics.

ATOC 5860 (3) Objective Analysis Data Laboratory
Teaches the extraction of information from data using statistical methods via a computer program. The goals of this course are: 1) to learn and apply tools to objectively analyze atmospheric and oceanic data. 2) to critically evaluate research using these tools. The course covers hypothesis testing, compositing, regression, principal component analysis, time series analysis, filtering, and data assimilation. This learning-by-doing course is aimed at advanced graduate students conducting ATOC-related research.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 4810 or 5810, and familiarity with linear algebra, basic calculus, github and jupyter.

ATOC 5870 (3) Climate Modeling Laboratory
Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4870
Requisites: Restricted to graduate students only.

ATOC 5875 (3) Weather Modeling Laboratory
In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4875
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Experience with computer science and data visualization and some experience with Unix/Linux is recommended.
ATOC 5880 (3) Mesoscale Meteorology
This course provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4880
Requisites: Restricted to graduate students only.
Recommended: Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one fundamental ATOC course.

ATOC 5890 (3) Synoptic Dynamic Meteorology
Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4890
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

ATOC 5900 (1-6) Independent Study
Students may register for more than one section of this course in the same semester.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 5930 (1-3) Internship
This course is designed to offer ATOC graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Minimum of 3.00 cumulative GPA.

ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences
Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 6100 (3) Modeling Weather and Climate
Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050 or calculus.

ATOC 6700 (1) Weather Forecasting and Discussion
Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050.

ATOC 6800 (3) Scientific Writing
Writing is the core of how we communicate our scientific findings. Successful science writing tells a compelling story and makes it easy for the reader to understand our results and their implications. In this hand-on class, student use their own research results to work on developing scientific writing skills that will increase the impact of their papers as well as make writing more enjoyable by learning how to approach the writing and editing process. Department enforced requisite: Students need to have their own research results first and at least one main conclusion from it in order to take this class.
Requisites: Restricted to graduate students only.

ATOC 6940 (1) Master's Candidate for Degree
Master's Candidate for Degree
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Pass/Fail

ATOC 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

ATOC 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Requisites: Restricted to graduate students only.

Atmospheric and Oceanic Sciences - Master of Science (MS)
The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Students can earn a master's degree with either a thesis or an exam. Students considering master's study in atmospheric and oceanic sciences should carefully read the Master's Degree Requirements (p. 989) section of this catalog, as well as the department's Prospective Graduate Students (http://www.colorado.edu/atoc/academics/prospective-graduate-students/) and Current Graduate Students (http://www.colorado.edu/atoc/academics/current-graduate-students/) webpages.
Requirements

Course Requirements

Students must complete at least 30 credit hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including the four ATOC core courses.

- Up to 6 credit hours of approved 3000- and 4000-level coursework from engineering, math, physics, chemistry or biology may be applied toward the MS degree. No credit will be given toward the MS degree for ATOC coursework below the 5000 level.
- A minimum of 15 credit hours from regular ATOC courses (independent study courses cannot be used to satisfy this requirement).
- All MS students are required to take the following four ATOC core courses or their equivalent.

<table>
<thead>

</tbody>
</table>

Total Credit Hours 12

- Up to 3 credit hours of Independent Study (ATOC 5900), Weather Forecasting and Discussion (ATOC 6700) and/or Seminar in Atmospheric and Oceanic Sciences (ATOC 6020) may be used toward the 30 hours of regular coursework in the degree requirements.
- Up to 9 credit hours may be transferred from another accredited institution and applied toward an MS degree. Transfer credit for ATOC core coursework must be approved by the graduate advisor.
- A student is required to maintain at least a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the MS, a course mark below C is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

Degree Plans

The master’s degree will be a Master of Science in atmospheric and oceanic sciences. The master’s thesis is not constrained by choice of track.

Plan I: Thesis Option

Students must complete a minimum of 4 (but no more than 6) thesis hours, which can be counted toward the total 30 hours of coursework and the 15 hours of ATOC coursework requirements. Students must successfully complete an MS thesis and oral final examination based on the thesis.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not a requirement for advancement to the PhD program.

Thesis Guidelines

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the research advisor. The thesis topic must be related to the major field, and:

- Represent the equivalent of 4 to 6 credit hours of coursework.
- Receive the approval of the major department at least 30 days before commencement at which the degree is to be conferred.
- Be completed at the time the final examination is held.
- Comply with the University of Colorado Graduate School Thesis and Dissertation Specifications.
- Be filed with the Graduate School by posted deadlines for the semester for which the degree is to be conferred.

Thesis Exam Committee

The examination committee for the MS thesis final exam will consist of three graduate faculty members, at least two of whom must be ATOC core faculty members. The examination consists of a 30-minute oral presentation given by the candidate on the thesis subject, followed by a period of questions for the candidate by the committee. The oral presentation is open to anyone who wishes to attend. The full examination typically does not exceed two hours in duration.

Any student with a research advisor outside of ATOC (e.g., an advisor who is from another department or is a full-time employee at NCAR, NOAA, etc.), must also have an academic advisor who is an ATOC core faculty member. The academic advisor should be identified by the student in collaboration with their research advisor as soon as possible, and no later than one month after research begins. Once an ATOC faculty member agrees to act as academic advisor, it is their responsibility to communicate ATOC policies and requirements to the research advisor, and to ensure that the student is meeting all ATOC requirements and making good academic progress toward the degree.

Plan II: Non-Thesis/Final Exam Option

The requirements for an MS degree non-thesis/final exam option include the following:

- 30 semester hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including four of the core ATOC courses.
- Successful completion of a written final examination based on ATOC regular coursework. The ATOC Comprehensive Exam I is typically used to satisfy this requirement.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not a requirement for advancement to the PhD program.

Time Limit

Students are expected to complete all degree requirements within four years of the date of commencing coursework, but normally in two years. Students may petition the Graduate School for extension(s).

Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC attracts many of the most outstanding graduate students in the field. Our students receive a significant number of fellowships and nationally recognized awards each year, provide excellent instruction to
CU Boulder’s undergraduates as teaching assistants, and make scientific advances while conducting innovative research. Our graduates go on to successful careers in academia, national research institutes and private industry.

Graduate students, research staff and faculty work together on a wide range of research themes:

- atmospheric & oceanic dynamics
- atmospheric chemistry & physics
- chemical & physical oceanography
- clouds & aerosols
- planetary atmospheres
- radiative transfer & remote sensing
- regional, boundary layer & wind energy meteorology

For more information about programs and application procedures, contact the ATOC office.

**Requirements**

**Academic Standards**

A student is required to maintain a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the PhD, a course grade of C+ or below is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

**Academic Preparation**

An undergraduate degree in mathematics, physics, engineering, chemistry or another natural science is recommended. The general prerequisites expected of incoming graduate students include undergraduate courses in calculus, linear algebra, differential equations and computer programming, as well as one-year sequences of undergraduate calculus-based physics and chemistry. Upper-division undergraduate courses in physics, chemistry, engineering and mathematics are strongly recommended. Undergraduate courses in atmospheric and oceanic sciences are useful, but not expected, as part of the undergraduate background.

**Course Requirements**

A total of 36 credit hours of coursework are required, including 18 credit hours in ATOC core courses, as well as a graduate-level course in applied or computational mathematics. In addition, 30 dissertation hours are required. Other specific course requirements are covered in the ATOC Graduate Handbook.

For more information about programs and application procedures, call the ATOC office at 303-492-6633 or visit the department’s Certificate in Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/academics/graduate-certificate-programs/certificate-atmospheric-and-oceanic-sciences/) webpage.

**Requirements**

**Prerequisites**

Students must meet course prerequisites prior to enrollment. Most of the ATOC Graduate Certificate courses require at least one year of calculus and one year of calculus-based physics.

**Program Requirements**

Students who wish to obtain the graduate certificate in atmospheric and oceanic sciences (ATOC) must satisfactorily complete 12 credit hours: four ATOC graduate-level courses (those above the 5000 level) or their cross-listed equivalents (e.g., ATOC 5151 or CHEM 5151), provided the cross-listed equivalents are not offered through the student’s home department(s). To satisfactorily complete a course, students must earn a grade of B or better.

**Examinations**

Students must pass a two-part comprehensive examination before admission into candidacy. Part I of the comprehensive examination is a written exam based on course material and is normally taken just prior to the second year. Part II of the comprehensive examination is normally taken in the third year and is an oral examination based on an original research paper prepared by the student. After a preliminary copy of the dissertation has been accepted for defense by the student’s committee, a final examination on the dissertation and related topics is conducted.

**Oceanography - Graduate Certificate**

Graduate students can pursue the a graduate certificate while earning a normal graduate degree (MS or PhD) at CU Boulder or while taking coursework as a nondegree seeking student through Continuing...
Education’s ACCESS Program, provided they have already earned a bachelor’s degree and meet the course prerequisites. Graduate certificates are noted on the official CU Boulder transcript.

Requirements

Students who wish to obtain the graduate certificate in oceanography must complete at least three oceanography core courses (see below) passed with a letter grade of B or better. In addition, students may take an independent study course to replace one of the core courses.

Behavioral Genetics - Graduate Certificate

The Institute for Behavioral Genetics (IBG) offers a training program in behavioral genetics. The goal of the program is to train scientists in the study of genetic contributions to individual differences in behavior. This is accomplished by requiring students to obtain strong training in a primary academic discipline, by providing training in the interdisciplinary field of behavioral genetics, and by providing an atmosphere in which close interactions among scholars with different perspectives may be established.

Requirements

Admission Requirements

To train at IBG, students must be admitted to a PhD program at the University of Colorado (Boulder or Denver). To be considered for admission, the Graduate School requires an undergraduate GPA of at least 2.75. Additionally, the most competitive applicants should have verbal and math GREs >85th percentile. Subject GRE scores are not required but will be considered if they have been completed. We carefully consider all components of the application including undergraduate grades, letters of recommendation, previous research experience and GRE scores.

Required Courses and Credits

Deviations from the IBG certificate requirements may be requested by petition to the student’s advisory committee. Specific requests for course substitution, resolution of an ambiguity, etc., should be made by written petition. A petition may be approved by a majority vote of both the advisory committee and the IBG Training Committee. Disapproval of a petition may be changed to approval by a majority vote of the IBG faculty. Students with sufficient backgrounds may also test out of required courses 1–2 (i.e., pass the final exam for the course).

IPHY 6010 Seminar (Aging and Neurodevelopmental Disorders)
IPHY 6010 Seminar (Geroscience and Anti-Aging Medicine)
PSYC 5541 Special Topics in Psychology (Statistical Programming in R)
PSYC 5541 Special Topics in Psychology (Methods in Genetics of Complex Traits)
NRSC 5545 Neurobiology of Addiction
PSYC 5453 Developmental Psychopathology
PSYC 5761 Structural Equation Modeling
PSYC 6761 Topics in Advanced Structural Equations Modeling
PSYC 7102 Seminar: Behavioral Genetics (Genetics of Substance Use Disorders)
PSYC 7102 Seminar: Behavioral Genetics (Genetics of Psychopathology; this course is required for NIMH trainees)
PSYC 7102 Seminar: Behavioral Genetics (Benchmark Papers in Behavioral Genetics)
PSYC 7102 Seminar: Behavioral Genetics (Population Genetics in the Modern Genomics Era)
Other approved seminar courses on topics relevant to behavioral genetics

Total Credit Hours 22

1 Or other graduate-level course in statistics (of at least one semester) approved by the student's advisory committee.

NOTE: As some courses can only be taught every other year, it is each student's responsibility to take relevant courses when offered. Some equivalent courses may be offered at the Health Sciences Center or other venues. Course substitutions may be requested.

Teaching Requirements
Each of the students in the IBG Training Program must TA for at least one semester in a course judged by their advisory committee to be relevant to their professional specialty. (As part of their general responsibilities for the development of the student, advisory committees may sometimes require additional teaching.)

General Requirements
IBG students are required to conduct their doctoral dissertation research on topics of direct relevance to animal or human behavioral genetics, under the supervision of an IBG faculty member. A training file for each student is maintained in the IBG office for tracking progress toward completion of program requirements. Each student is to assist in updating this file at least once per year.

Specific departmental and Graduate School requirements in addition to those listed here are the responsibility of each student, in consultation with his/her advisory committee.

Examinations
Each student in the training program must complete the comprehensive/ qualifying and dissertation exam requirements of their academic department (e.g. IPHY, PSYC, MCDB). Depending upon the academic program in which the student is enrolled, they may also have additional exam requirements including a dissertation proposal. Students are advised to check their academic department for specific requirements.

Annual Presentations at IBG Orientation
All continuing students are required to present a poster describing their research activity of the past year at the annual IBG Orientation—held each year in August (the last Friday before the beginning of the fall semester). Students are also expected to present their research at the annual IBG mini-conference held each spring.

Exit Colloquium
All students are expected to do an exit colloquium at the conclusion of their training program. This presentation should be modeled as a "job talk," not a repeat of the final defense.

Biochemistry
The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational Biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, Chemistry, and Physics, and with research institutes and agencies such as the BioFrontiers Institute, Joint Institutes of Laboratory Astrophysics (JILA), the Renewable and Sustainable Energy Institute.

Course code for this program is BCHM.

Master's Degree
- Biochemistry - Master of Science (MS) (p. 1073)
Doctoral Degree
• Biochemistry - Doctor of Philosophy (PhD) (p. 1073)

Certificate
• Molecular Biophysics - Graduate Certificate (p. 1075)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahn, Natalie (https://experts.colorado.edu/display/fisid_106044/)
Distinguished Professor; PhD, University of California, Berkeley

Aydin, Halil (https://experts.colorado.edu/display/fisid_167398/)
Assistant Professor; PhD, University of Toronto

Batey, Robert T. (https://experts.colorado.edu/display/fisid_122668/)
Professor; PhD, Massachusetts Institute of Technology

Caruthers, Marvin H. (https://experts.colorado.edu/display/fisid_103328/)
Distinguished Professor; PhD, Northwestern University

Cech, Thomas R. (https://experts.colorado.edu/display/fisid_103252/)
Distinguished Professor; PhD, University of California, Berkeley

Cameron, Jeffrey C. (https://experts.colorado.edu/display/fisid_156473/)
Assistant Professor; PhD, Washington University

Falke, Joseph J. (https://experts.colorado.edu/display/fisid_101970/)
Professor; PhD, California Institute of Technology

Goodrich, James (https://experts.colorado.edu/display/fisid_109239/)
Professor; PhD, Carnegie Mellon University

Kasinath, Vignesh
Assistant Professor; PhD, University of Pennsylvania

Khanal, Akhil
Instructor; PhD, University of Delaware

Kuchta, Robert (https://experts.colorado.edu/display/fisid_100844/)
Professor; PhD, Brandeis University

Kugel, Jennifer F. (https://experts.colorado.edu/display/fisid_109472/)
Research Professor; PhD, University of Colorado Boulder

Liu, Xuedong (https://experts.colorado.edu/display/fisid_118458/)
Professor; PhD, University of Wisconsin–Madison

Mchenry, Charles
Professor Emeritus; PhD, University of California, Santa Barbara

Palmer, Amy E. (https://experts.colorado.edu/display/fisid_141901/)
Professor; PhD, Stanford University

Pardi, Arthur
Professor Emeritus; PhD, University of California, Berkeley

Parker, Roy Robert (https://experts.colorado.edu/display/fisid_151440/)
Distinguished Professor; PhD, University of California, San Francisco

Rinn, John (https://experts.colorado.edu/display/fisid_159338/)
Professor; PhD, Yale University

Schnizer-Luger, Karoline (https://experts.colorado.edu/display/fisid_156579/)
Endowed Chair, Professor; PhD, Univ of Basel (Switzerland)

Sousa, Marcelo Carlos (https://experts.colorado.edu/display/fisid_122806/)
Professor; PhD, Univ of Buenos Aires (Argentina)

Spencer, Sabrina Leigh (https://experts.colorado.edu/display/fisid_145994/)
Senior Instructor; PhD, University of Colorado Boulder

Assistant Professor; PhD, University of California, San Francisco

Wuttke, Deborah S. (https://experts.colorado.edu/display/fisid_108412/)
Professor, Associate Chair; PhD, California Institute of Technology

Courses
BCHM 5312 (3-4) Quantitative Optical Imaging
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5312, MCDB 4312 and BCHM 4312

Grading Basis: Letter Grade

BCHM 5341 (3) Chemical Biology and Drug Design
Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry. Formerly CHEM 5341.

Requisites: Restricted to graduate students only.

BCHM 5400 (4) Core Concepts in Physical Chemistry for Biochemists
Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibriums, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5400.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4400 and CHEM 4511

Requisites: Restricted to graduate students only.
BCHM 5491 (3) Modern Biophysical Methods
Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies.
Department enforced prerequisites: undergraduate chemistry (general, organic, physical), biochemistry, physics, calculus.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4491
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5511 (3) Principles of Biochemistry
One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4611

BCHM 5621 (3) Genome Databases: Mining and Management
Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5621, BCHM 5621
Requisites: Restricted to graduate students only.

BCHM 5631 (3) Statistical and Computational Analysis of the Human Genome
This lab course covers fundamental statistical and computational approaches to large scale data. Students will learn the unix command line to: access public human genome data, learn what statistics apply to which types of data and apply them to study specific regions of the human genome involved in development and disease. This lab course will cover fundamental aspects of Virtual computing, Container analysis pipelines (e.g. NextFlow, GitHub) in an intuitive and practical learning framework.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4631

BCHM 5661 (3) Advances in Molecular Biophysics
Discuss recent literature concerning biophysical studies of macromolecular structure and mechanism, including DNA, RNA, proteins, and their interactions.
Recommended: Prerequisites one year of physical chemistry or quantum mechanics, one year of biology, graduate standing, or instructor consent.

BCHM 5720 (4) Metabolic Pathways and Human Disease
Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 5720.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4720
Requisites: Restricted to graduate students only.

BCHM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation
Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 5740.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4740
Requisites: Restricted to graduate students only.

BCHM 5751 (3) Current Topics in Biochemical Research
Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required. Formerly CHEM 5751.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4751
Requisites: Restricted to graduate students only.

BCHM 5770 (3) Fundamentals of Biochemistry I
Analysis of topics in biochemistry including DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, and protein structure and dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with BCHM 5771 covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5770.

BCHM 5771 (5) Advanced General Biochemistry 1
Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Formerly CHEM 5771.

BCHM 5776 (1) Scientific Ethics and Responsible Conduct in Research
Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5776
Requisites: Requires prerequisite course of BCHM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

BCHM 5780 (3) Fundamentals of Biochemistry II
Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5780.
Requisites: Requires prerequisite course of BCHM 5770 (minimum grade B-). Restricted to graduate students only.

BCHM 5781 (5) Advanced General Biochemistry 2
Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis). Formerly CHEM 5781.
Requisites: Requires prerequisite course of BCHM 5771 (minimum grade B-). Restricted to graduate students only.
BCHM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation
Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Formerly CHEM 5801.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCD 5210.

BCHM 5811 (3) Advanced Methods in Protein Sequencing and Analysis
Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required. Formerly CHEM 5811.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCD 5210.

BCHM 5821 (1) Special Topics in Signaling and Cell Regulation
Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required. Formerly CHEM 5821.
Repeatable: Repeatable for up to 5.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6601 (1) Biochemistry Seminar
Restricted to and required for all currently funded NIH/CU Biophysics trainees and current NIH/CU Biophysics affiliates. Credit is deferred until presentation of satisfactory seminar. Formerly CHEM 6601.
Requisites: Restricted to graduate students only.

BCHM 6711 (3-6) Advanced Topics in Biochemistry
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6711.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6731 (3-6) Advanced Topics in Biochemistry
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6731.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6901 (1-6) Research in Biochemistry
Repeatable: Repeatable for up to 15.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6941 (1) Master's Candidate for Degree
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
Requisites: Restricted to graduate students only.
Grading Basis: Pass/Fail

BCHM 6951 (1-6) Master's Thesis
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
Requisites: Restricted to graduate students only.

BCHM 7601 (2) Seminar: Nucleic Acid Chemistry
Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution
Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required. Formerly CHEM 7611.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction
Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Formerly CHEM 7621.
Requisites: Restricted to graduate students only.

BCHM 7651 (2) Seminar: Environmental Biochemistry
Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7651.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7661 (1) Seminar: Environmental Biochemistry
Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7661.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.
Requisites: Restricted to graduate students only.

BCHM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins
Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required. Formerly CHEM 7691.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
BCHM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics
Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7701.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7711 (1) RNA Mediated Inorganic and Organic Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7711.
Requisites: Restricted to graduate students only.

BCHM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation
Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7741.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7751 (1) Seminar: Protein Structure and Folding
Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required. Formerly CHEM 7751.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation
Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required. Formerly CHEM 7761.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7781 (1) Seminar: Topics in Structural Biology
Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Formerly CHEM 7781.
Requisites: Restricted to graduate students only.

BCHM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies
Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Formerly CHEM 7791.
Requisites: Restricted to graduate students only.

BCHM 8991 (1-10) Doctoral Dissertation
All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Biochemistry - Master of Science (MS)

Students are not admitted for the master’s degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

Requirements

Language Requirement
The department does not require foreign language proficiency for the master’s degree.

Examinations
Administration of preliminary examinations varies, depending on the student’s entering field. Candidates opting for MS Plan I must pass a master’s thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

Course Requirements
There are two methods of obtaining a master’s degree from the Department of Biochemistry. Both plans are available only with departmental approval.

Plan I: Thesis
This plan requires 30 credit hours, including 15 credit hours of formal coursework, 15 credit hours in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

Plan II: Research Report
This plan requires 30 credit hours including 21 credit hours of formal coursework plus 9 credit hours of research/seminar and presentation of a research report, but no thesis.

Biochemistry - Doctor of Philosophy (PhD)

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, Chemistry, and Physics, and with research institutes such as the BioFrontiers Institute, Joint Institutes of Laboratory Physics (JILA), the Renewable and Sustainable Energy Institute (RASEI).
Requirements

Course Requirements
Sixty credit hours of coursework is required, consisting of 30 hours of research in BCHM 8991, at least 15 hours in formal courses and the remainder in other courses, such as lecture and seminar courses, group meeting courses and research in BCHM 6901. All students are required to take a 1-credit course in Scientific Ethics and Responsible Conduct in Research BCHM 5776.

A minimum grade of B- is required in all courses counting for the PhD degree; students must maintain a cumulative GPA of 3.0 in all formal courses and an overall grade point average of 3.0 or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Students on probation will not have a high priority for financial support.

Plan of Study
The plan of study varies by student. See the Plan(s) of Study (p. 1074) section for a sample course plan.

Research Requirements

During the course of the PhD thesis work, students will arrange annual meetings with a thesis advisory committee composed of their research advisor and two to four other biochemistry faculty. The purpose of these advisory meetings is to ensure the student is making adequate progress on a suitable PhD thesis project. The final annual meeting should be scheduled about one year from the end of the thesis work. For this meeting, the advisory committee will be expanded to five faculty members: the thesis advisor, three biochemistry faculty and one faculty member from another department. This committee will become the examination committee that evaluates the results of a completed research program submitted as a thesis for the final examination as described above.

Examination Requirements

Each PhD student is required to satisfy a preliminary examination and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

Preliminary Examinations
The Biochemistry preliminary examination will be conducted at the beginning of the student’s third semester. The record of each student, including undergraduate preparation, performance in graduate coursework, TA performance and performance in laboratory rotations will be reviewed, and a recommendation will be made on the qualification of the student to continue in the PhD program. Outcomes may include recommendation for additional coursework, delay in joining a research lab or a recommendation to leave the program. Students who are considering interdivisional work should consult the Biochemistry Graduate Committee for advice on the preliminary examination requirement.

Comprehensive Examinations
The Comprehensive Examinations are made up of three parts: a Written Examination, an Oral Examination and the evaluation of an original research proposal. The oral examination and the research proposition evaluation shall be conducted by a five member examining board, according to the rules of the Graduate School. The Comprehensive Examinations are considered passed, and the student can advance to Candidacy when the requirements of all parts have been met.

Final Examination
A doctoral student must write a dissertation based upon original investigation, demonstrating mature scholarship and critical judgment, as well as familiarity with tools and methods of research, conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

Time Limit
All degree requirements must be completed within six years of the date of commencing coursework.

Plan(s) of Study
Below is a sample course plan for first and second year students. In their third through sixth years, students typically complete dissertation research (BCHM 8991, repeatable for up to 30 credit hours) and finish elective coursework.

Molecular Biophysics - Graduate Certificate

This program introduces graduate students to the field of biophysics, its methodologies and the state-of-the-art biophysical research efforts being carried out in diverse laboratories and departments on the CU Boulder campus. It creates interdepartmental connections that provide the breadth of training needed to develop biophysical scholars.

Students must be admitted through the regular admissions process to a PhD program in one of the following departments:

- Biochemistry
- Chemical and Biological Engineering
- Chemistry
- Molecular, Cellular and Developmental Biology
- Physics

They must satisfy all of their home department's requirements to receive a PhD as well as the additional requirements of the certificate program. For more information, visit the program's Molecular Biophysics Training Program: Certificate Option (http://www.colorado.edu/biophysics/certificate/) webpage.

Requirements

- Participation in one to three laboratory rotations outside the thesis lab, which provide experience with a range of biophysical methods. Subsequently the student joins one of the member laboratories of the training program for thesis work.
- Completion of two courses chosen from the list of approved courses below.
- Annual meeting with a faculty advisory committee that provides helpful feedback on the thesis research.
- Students are expected to take part in a seminar series, which presents internationally renowned speakers and their research. They also are required to participate in supergroup meetings and symposia, which provide forums for them to present their own research in front of their colleagues and advisory committee.

Chemistry

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, and Physics, and with research institutes and agencies such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

Course code for this program is CHEM.

Master's Degree

- Chemistry - Master of Science (MS) (p. 1081)

Doctoral Degrees

- Chemistry - Doctor of Philosophy (PhD) (p. 1083)
- Chemical Physics - Doctor of Philosophy (PhD) (p. 1081)
Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Asirvatham, Margaret
Senior Instructor Emerita; PhD, Kansas State University

Bierbaum, Veronica
Professor Emerita; PhD, University of Pittsburgh

Brown, Steven S. (https://experts.colorado.edu/display/fisid_119987/)
Professor Adjoint; PhD, University of Wisconsin–Madison

Browne, Eleanor Carol (https://experts.colorado.edu/display/fisid_156464/)
Assistant Professor; PhD, University of California, Berkeley

Cuk, Tanja (https://experts.colorado.edu/display/fisid_159751/)
Associate Professor, PhD, Stanford University

Damrauer, Niels Harley (https://experts.colorado.edu/display/fisid_129797/)
Professor; PhD, University of California, Berkeley

de Gouw, Joost (https://experts.colorado.edu/display/fisid_105125/)
Professor; PhD, University of Utrecht (Netherlands)

Dukovic, Gordana (https://experts.colorado.edu/display/fisid_147414/)
Associate Professor; PhD, Columbia University

Eaves, Joel David (https://experts.colorado.edu/display/fisid_147419/)
Associate Professor; PhD, Massachusetts Institute of Technology

Ellison, G. Barney
Professor Emeritus; PhD, Yale University

George, Steven (https://experts.colorado.edu/display/fisid_103289/)
Professor; PhD, University of California, Berkeley

Gough, Raina V. (https://experts.colorado.edu/display/fisid_149207/)
Instructor; PhD, University of Colorado

Hendrickson, Susan Marie (https://experts.colorado.edu/display/fisid_145101/)
Teaching Professor; PhD, Colorado State University

Hynes, James T.
Distinguished Professor Emeritus; PhD, Princeton University

Jimenez, Ralph
Associate Professor Adjoint; PhD, University of Chicago

Jimenez-Palacios, Jose Luis (https://experts.colorado.edu/display/fisid_125580/)
Professor; PhD, Massachusetts Institute of Technology

Jonas, David (https://experts.colorado.edu/display/fisid_107145/)
Professor; PhD, Massachusetts Institute of Technology

Koch, Tad H.
Professor Emeritus; PhD, Iowa State University

Koval, Carl A.
Professor Emeritus; PhD, California Institute of Technology

Lineberger, William Carl (https://experts.colorado.edu/display/fisid_101695/)
Distinguished Professor; PhD, Georgia Institute of Technology

Luca, Oana (https://experts.colorado.edu/display/fisid_157952/)
Assistant Professor; PhD, Yale University

Marshall, Michael Pesek (https://experts.colorado.edu/display/fisid_156422/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Michl, Josef (https://experts.colorado.edu/display/fisid_102977/)
Professor; PhD, Czech Academy of Sciences (Czech Republic)

Nesbitt, David J. (https://experts.colorado.edu/display/fisid_100333/)
Professor Adjoint; PhD, University of Colorado

Nozik, Arthur (https://experts.colorado.edu/display/fisid_113395/)
Research Professor; PhD, Yale University

Peters, Kevin
Professor Emeritus

Pierpont, Cortlandt G.
Professor Emeritus; PhD, Brown University

Rumbles, Garry (https://experts.colorado.edu/display/fisid_147479/)
Professor Adjoint; PhD, University of London (England)

Sammakia, Tarek (https://experts.colorado.edu/display/fisid_101597/)
Professor; PhD, Yale University

Sharma, Sandeep (https://experts.colorado.edu/display/fisid_158286/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Sievers, Robert E. (https://experts.colorado.edu/display/fisid_102866/)
Professor; PhD, University of Illinois at Urbana–Champaign

Skodje, Rex T. (https://experts.colorado.edu/display/fisid_103448/)
Professor; PhD, University of Minnesota Twin Cities

Tolbert, Bert Mills
Professor Emeritus

Tolbert, Margaret A. (https://experts.colorado.edu/display/fisid_104976/)
Distinguished Professor; PhD, California Institute of Technology

Vaida, Veronica (https://experts.colorado.edu/display/fisid_100313/)
Professor; PhD, Yale University

Volkamer, Rainer (https://experts.colorado.edu/display/fisid_144988/)
Professor; PhD, University of Heidelberg (Germany)

Walba, David M. (https://experts.colorado.edu/display/fisid_105830/)
Professor; PhD, California Institute of Technology

Walczak, Maciej Andrzej (https://experts.colorado.edu/display/fisid_153323/)
Assistant Professor; PhD, University of Pittsburgh
Courses

**CHEM 5011 (3) Advanced Inorganic Chemistry 1**
Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.

*Equivalent - Duplicate Degree Credit Not Granted:* CHEM 4011
*Requisites:* Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

**CHEM 5061 (3) Advanced Inorganic Chemistry 2**
Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.

*Requisites:* Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

**CHEM 5131 (3) Computer Programming and Data Analysis for Chemists**
Provides an introduction to computer programming and data analysis skills that are a fundamental part of graduate research. The programming section of the course introduces the coding skills necessary for simulating, analyzing and visualizing data using IGOR Pro and for acquiring data and analyzing data using LabVIEW. Basic concepts in statistics and error analysis are also covered.

*Requisites:* Restricted to graduate students only.
*Recommended:* Prerequisites CHEM 4511 or CHEM 4171.
*Grading Basis:* Letter Grade

**CHEM 5141 (3) Environmental Water and Soil Chemistry**
Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

*Equivalent - Duplicate Degree Credit Not Granted:* CHEM 4141
*Requisites:* Restricted to graduate students only.

**CHEM 5151 (3) Atmospheric Chemistry**
Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.

*Equivalent - Duplicate Degree Credit Not Granted:* ATOC 5151
*Requisites:* Restricted to graduate students only.
*Recommended:* Prerequisite one semester of college-level chemistry.

**CHEM 5152 (3) Advanced Atmospheric Chemistry**
Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

*Equivalent - Duplicate Degree Credit Not Granted:* ATOC 5152
*Recommended:* Prerequisite CHEM 5151 or ATOC 5151.

**CHEM 5161 (3) Analytical Atmospheric Spectroscopy**
Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.

*Requisites:* Restricted to graduate students only.

**CHEM 5171 (3) Electroanalytical Chemistry**
Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth.

*Department enforced prerequisite: undergraduate physical chemistry or instructor consent.*

*Requisites:* Restricted to graduate students only.

**CHEM 5181 (3) Mass Spectrometry, Chromatography, and Computer Programming**
Covers mass spectrometry, including instrumentation, ionization techniques, and interpretation of spectra. Analytical separation methods such as gas and liquid chromatography, ion mobility, and capillary electrophoresis. Introduction to atmospheric chemistry applications.

*Computer programming (Igor and LabVIEW) and simulation of instrumentation and processes. Department prerequisite: basic computer programming (or willingness to work hard on it), and undergraduate physics, statistics, and physical chemistry.*

*Requisites:* Restricted to graduate students only.

**CHEM 5251 (3) Materials Chemistry and Properties**
Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

*Equivalent - Duplicate Degree Credit Not Granted:* CHEM 4251
*Requisites:* Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.
CHEM 5261 (3) Organic Materials: Structures and Functions
Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4261
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5271 (3) Chemistry of Solar Energy
Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4271
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5281 (3) Semiconductor Processing and Device Fabrication
Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CHEM 5311 (3) Advanced Synthetic Organic Chemistry
Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Department enforced prerequisite: one year of organic chemistry or graduate standing.

CHEM 5321 (3) Advanced Physical Organic Chemistry
Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry
Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5501 (3) Advanced Topics in Physical Chemistry
Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5531 (3) Statistical Mechanics
Requisites: Restricted to graduate students only.

CHEM 5541 (3) Chemical Dynamics
Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.
Requisites: Restricted to graduate students only.

CHEM 5555 (4) Theoretical and Computational Chemistry
Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4555
Requisites: Restricted to graduate students only.

CHEM 5571 (3) Surface Science
Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.

CHEM 5581 (3) Introductory Quantum Chemistry
Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.

CHEM 5591 (3) Advanced Molecular Spectroscopy
Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.

CHEM 5601 (1) Seminar: Inorganic Chemistry
Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
Requisites: Restricted to graduate students only.

CHEM 6021 (1-3) Special Topics in Inorganic Chemistry
Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 6031 (3) Special Topics in Nanoscience
Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy.
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.
CHEM 6101 (1) Seminar: Analytical Chemistry
Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
Requisites: Restricted to graduate students only.
CHEM 6111 (1-3) Special Topics in Analytical Chemistry
Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 6301 (1-3) Seminar in Organic Chemistry
Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.
Requisites: Restricted to graduate students only.
CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry
Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.
Requisites: Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.
CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry
Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.
Requisites: Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.
CHEM 6401 (1-3) Seminar: Physical Chemistry
Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.
Requisites: Restricted to graduate students only.
CHEM 6411 (1-3) Advanced Topics in Physical Chemistry
Lect.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 6801 (0) Departmental Research Seminar
Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.
Requisites: Restricted to graduate students only.
CHEM 6901 (1-6) Research in Chemistry
Repeatable: Repeatable for up to 15.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 6941 (1) Master's Candidate for Degree
Requisites: Restricted to graduate students only.
Grading Basis: Pass/Fail
CHEM 6951 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
CHEM 7021 (2) Seminar: Structural Inorganic Chemistry
Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7101 (2) Seminar: Chromatography and Trace Analysis
Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7111 (2) Seminar: Electrochemistry
Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry
Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5151 and CHEM 5181.
CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry
Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7201 (2) Seminar: Synthetic Methodology and Natural Product Synthesis
Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.
Requisites: Restricted to graduate students only.
CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry
Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7231 (1) Seminar: Reactive Intermediates
Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7241 (1) Seminar: Synthetic Organic Chemistry
Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 7251 (1) Selected Topics in Chemical Genetics
Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions
Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7281 (1) Seminar: Molecular Self-Assembly
Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications. 
Repeatability: Repeatably for up to 2.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7291 (1) Seminar: Physical Organic Chemistry
Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry
Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7311 (1) Selected Topics in Organic Materials
Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7341 (1) Seminar: Topics in Theoretical Chemical Physics
Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7441 (2) Research Seminar: Theoretical Chemistry
Studies theoretical description of molecular dynamics related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry
Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins
Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy. 
Repeatability: Repeatably for up to 2.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry
Discusses laboratory studies of degradation mechanisms. Applies current research and recently published literature. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics
Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals’ clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics
Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases
Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry
Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.

CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth
Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required. 
Repeatability: Repeatably for up to 6.00 total credit hours. 
Requisites: Restricted to graduate students only.
The chemical physics program allows students to strike a balance between core courses and courses that are better suited to address the student’s specific research goals and interests. Students must consult with the chemical physics graduate advisors in their parent departments, either chemistry or physics, to plan their formal coursework.

This program is administered by an interdepartmental committee. For more information, contact the graduate program manager in either the Department of Chemistry (chemgrad@colorado.edu) or the Department of Physics (Jeanne.nijhowne@colorado.edu).

Requirements

Program Admissions

Graduate students in good standing in either the chemistry or physics PhD program may declare their intent to work toward a PhD in chemical physics by notifying the chair of the chemical physics program. The department that originally admitted a student is referred to as their home department. Newly admitted students with an interest in the chemical physics PhD should consult with both their home departmental advisor and their chemical physics graduate advisor for advice on initial course selection. Advanced students must be in good standing in their home department and able to complete the chemical physics PhD within the time limit set by the Graduate School in order to declare their intent to work toward the chemical physics PhD. Once they have been accepted by the Graduate Advisor in chemical physics to enroll for candidacy in the PhD program in chemical physics, the graduate advisor will notify the graduate secretary in their home department to have their major code changed to CPHY.

Once a student has declared their intent to work toward a PhD in chemical physics, the preliminary examination shall be conducted by the chemical physics graduate advisor. The exam shall review all completed courses, undergraduate and graduate, related to chemical physics. The student must also earn grades of B+ or better in at least six credit hours of University of Colorado graduate courses that have been approved for the PhD in chemical physics by the graduate advisor. Students must pass the preliminary examination within two semesters of declaring their intent to work toward a PhD in chemical physics. Students are formally admitted to the chemical physics PhD program when they pass the preliminary examination.

Courses

General Requirements

Students must complete a program of formal courses (see "Selection of Formal Courses" below) approved by their PhD thesis advisor and the Committee on Chemical Physics. Students must file an approved degree plan of courses already taken, in progress and planned for future semesters with the Graduate School by the end of their fourth semester. The 30 doctoral dissertation credit hours required by the Graduate School may be completed in either CHEM 8991 or PHYS 8990.

A minimum grade of B# is required in all courses counted for the PhD degree. Students must maintain both a cumulative grade point average of 3.0 in their program of formal courses and an overall grade point average of 3.0.

Selection of Formal Courses

The chemical physics program makes the distinction between formal and graduate level courses. All students will be required to complete an approved program of formal courses that contains at minimum 6 credit hours of formal coursework. Formal courses are graded based on individual coursework. Many graduate level courses are not considered
formal courses in the context of the chemical physics PhD requirements, but may be counted toward Graduate School course requirements. Each student's degree plan for coursework must be approved by the student's PhD thesis advisor and a chemical physics graduate advisor. The formal courses shall be chosen to develop the student's competency in classical mechanics, quantum mechanics, thermodynamics and statistical mechanics, electricity and magnetism, chemical kinetics, and in their area of thesis research.

Transfer of Credit
Up to 10 credit hours of graduate level, formal coursework may be transferred from another school, subject to demonstrated proficiency in the subject(s), approval by the Chair of the Committee on Chemical Physics, and approval by the Graduate School. Forms for this purpose can be obtained from the graduate program manager.

Formal Application for Admission to Candidacy for the PhD Degree
All students must make formal application for admission to candidacy for the PhD degree by the fourth semester. The required forms can be obtained from the graduate program manager. This Graduate School requirement should be fulfilled even if the student has not completed all the courses required by their degree plan. To satisfy Graduate School requirements, the degree plan may include graduate-level courses that are not approved as formal courses in chemical physics, but the degree plan must include the student’s approved program of formal courses in chemical physics. After filling in the form, indicating graduate courses taken and to be taken, it should be approved and signed by the student’s PhD thesis advisor and then by the Chair of the Committee on Chemical Physics.

Examination Requirements
Each student is required to pass a preliminary examination before admission to the program. Each student in the program is required to pass a comprehensive examination to advance to candidacy. After completing all graduate school and course requirements, the candidate must then submit a dissertation and pass a final dissertation defense to be awarded the PhD in chemical physics.

Language Requirements
Foreign Language Requirement
The program does not require proficiency in a foreign language for the PhD degree.

English Language Proficiency
The English language proficiency required for an advanced degree by the Graduate School will be assessed for each student through written coursework and in the oral portion of the comprehensive examination.

Advancement to Candidacy
Advancement to candidacy for the PhD in chemical physics requires that the student select a PhD thesis advisor, complete a program of courses approved by the PhD thesis advisor and the Committee on Chemical Physics, write a proposal describing their proposed PhD thesis research, and pass a comprehensive examination covering chemical physics and the proposed thesis research. The oral examination should normally be completed by the end of the second year.

The comprehensive examination shall be conducted by a five member Comprehensive Exam Committee (CEC), according to the rules of the Graduate School. The CEC shall consist of graduate faculty from the Department of Chemistry and the Department of Physics; there must be at least one member from each department. One member of the CEC shall be the student’s thesis advisor. The membership of the CEC shall be selected by the student, but must be approved by the PhD thesis advisor, the graduate advisor and the Graduate School.

In order to attempt the oral examination, the student must demonstrate satisfactory progress toward completing their approved program of courses and submit an application for candidacy to the Graduate School at least two weeks in advance of the scheduled oral examination. Students are responsible for arranging the examination date, time and place with their CEC and should notify the chemical physics program chair and their departmental graduate secretary at least two weeks prior to the scheduled date. The candidate must schedule the exam so that all members of the board are available for a full two hours.

One week in advance of the oral examination, the student should submit a written proposal to their CEC that demonstrates suitability of the project for a PhD thesis, adequate background knowledge of chemical physics, the field of research and the relevant literature. The oral examination will assess the student’s competence in the core areas of chemical physics: elementary physics and chemistry, quantum mechanics, chemical kinetics, thermodynamics and statistical mechanics, electricity and magnetism, as well as the student’s research plans. The research advisor is strongly encouraged to attend the oral examination, but is recused from final discussion and voting on the outcome. Three (out of four) passing votes are needed for the CEC to approve the written proposal and the oral examination. A pass may be conditional or unconditional.

If the student does not pass the oral examination, the committee may recommend additions to the approved program of courses in chemical physics or that the student complete the MS or PhD program in their home department (note that there is no MS degree program in chemical physics). A student who does not pass has the right to attempt the examination once more after a period of time set by the CEC. Advancement to candidacy occurs when all examination requirements and conditions have been met.

Annual Progress Review
Students in chemical physics must complete the annual progress review required in the third year and beyond.

Dissertation Defense
This examination is primarily a defense of the candidate’s thesis. The examining committee consists of the student’s PhD thesis advisor as chair and four other faculty members, at least three of whom must be from the Department of Chemistry and the Department of Physics, with at least one from each department. These committee members are selected by the program chair upon request by and after consultation with the student and must be approved by the Graduate School two weeks in advance.

The student must arrange for one of these other committee members to be the “second reader” of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date, time and location for the defense, notifying their home department’s graduate program manager in time for the appropriate approvals by the Graduate School, and distributing copies of the dissertation to the committee members at least two weeks before the defense.

Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the dissertation defense. A passing
defense requires an affirmative vote from at least four out of five committee members. A student who does not pass has the right to attempt to defend the dissertation once more after a period of time set by the examining committee.

**Dissertation Requirements**
A doctoral student writes a dissertation based upon their own original investigation. The dissertation must demonstrate mature scholarship, critical judgment and a familiarity with the tools and methods of research.

- Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
- The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
- The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
- The dissertation must be submitted electronically before the posted deadline in order to graduate in a given semester. It should be submitted to http://www.etdadmin.com/colorado. (http://www.etdadmin.com/colorado/) A signature page with at least two original signatures must also be turned in to the Graduate School office by the end of the business day on or before the dissertation deadline.
- The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed. The final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School on a final grade card.

**Chemistry - Doctor of Philosophy (PhD)**
The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas, including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty; with other departments, such as Physics and Molecular, Cellular and Developmental Biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

The coursework for this program is tailored to the individual student’s research interests and needs. Although course offerings vary each year, approximately 40 graduate-level courses are offered annually, covering topics of important and contemporary interest in all areas of chemistry and biochemistry. Students are also given the chance to familiarize themselves with faculty research by attending seminars by faculty on their research and research group meetings, and by individual meetings with faculty members.

PhD program students complete a number of other requirements, including a Comprehensive Examination, which consists of a Research Proposition, an Oral Examination, and a research proposal. Most students graduate with their PhD in about five years.

**Requirements**

**Examination Requirements**
Each PhD student is required to satisfy divisional preliminary examinations and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

**Preliminary Examinations**
The Graduate School requires that the department administer preliminary examinations in order to “satisfy itself (by examination or other means) that students who signify intent to undertake the PhD degree are qualified to do so.” The format of the departmental preliminary examination of each student will be a responsibility of the division that admits them. The preliminary examination will be completed before the end of the second semester of study. Students will be required to follow the format of the preliminary examination of the division that admits them. Students who are uncertain of their division or who are considering an interdivisional major should consult the graduate advisor for advice on the preliminary examination requirement.

**Language Requirements**
The Graduate School rules state that "a student who is noticeably deficient in the written and/or oral use of the English language cannot obtain an advanced degree from CU Boulder." The department assesses the English language proficiency of each PhD student in the Oral Comprehensive Examination.

The department does not require proficiency in a foreign language for the PhD degree.

**Comprehensive Examinations**
The comprehensive examinations are made up of three parts: a thesis research proposition, an oral examination and evaluation of a research proposal. The oral examination and the research proposition evaluation shall be conducted by a five-member examining board, according to the rules of the Graduate School. One member of this board shall be the student’s research advisor, and one member shall be from outside the primary field of study of the student. The membership of this board shall be selected by the Graduate Advisor, in consultation with other faculty members as necessary. The comprehensive examinations are considered passed when the requirements of all parts have been met. Students must be registered during the semester that the comprehensive examinations are considered passed.

**Research Proposition**
At least one week before the oral examination date, students will present a short thesis research proposition (approximately five pages) of their thesis research plan to each committee member. This overview will outline clearly the direction of the student’s thesis, will provide the committee with some advance idea of the thesis research area and will describe promising research results (if any). Students might be asked at the time of the exam to describe and defend alternate experimental approaches to their research goals.
Oral Comprehensive Examination
Students must take the Oral Comprehensive Examination no later than the end of the fourth semester. Master’s degree students in this department who wish to continue for a PhD degree must take the Oral Examination no later than the end of the fifth semester even if they have not completed the master’s degree.

This examination will include questioning on (i) the student’s research, and (ii) general topics. Students are expected to demonstrate a clear understanding of their thesis research and fundamental knowledge in chemistry, and show the ability to think creatively. Students are strongly advised to spend time reviewing material from chemistry and biochemistry courses they have taken as undergraduates and graduates, since this material is often the subject of questioning during the examination.

The oral examination committee consists of three of the five faculty members appointed to the examining board selected by the Graduate Advisor. The student’s research advisor, while a member of the examining board, may not be a member of this committee. The decision of this committee shall be determined by a simple majority of the members. The committee shall determine whether the student is capable of (a) PhD degree work, (b) master’s degree work, or (c) no advanced degree work. The committee may require that the student repeat the examination, and/or may require the student to take additional courses. The committee may require that the student complete a thesis master’s degree before continuing on to the PhD; in this case the committee will decide if it is necessary for the student to repeat the Oral Comprehensive examination at some time during the completion of the master’s degree research. The committee may also require that a student complete a master’s degree (thesis or coursework MS), and then leave the graduate program. As described in the Graduate School rules, students who fail the examination have the right to request a second attempt; in this case the student should contact the Graduate Scholastic Committee. Students are responsible for arranging the examination date with their committee and should notify the graduate secretary two weeks prior to the scheduled date.

Research Proposal
Each student shall submit a research proposal to the two members of the examination board who were not members of the oral examination committee. The proposal may have been submitted as part of a graduate fellowship application, may be written as a part of any graduate course in the department where written proposals are required, or may be written as a part of a group meeting activity. The proposal must obtain the approval of both the members of the research proposition committee. In the event of a dispute between the two members, the proposal will be referred to the full examination board for a decision.

Upon satisfactory completion of all three examination requirements, the five members of the examination board shall recommend the student for advancement to candidacy for the PhD degree.

Final Examination
This examination is primarily a defense of the candidate’s thesis. The examining committee consists of the student’s thesis advisor as chair and four other faculty members, at least one of whom is rostered outside of the department. These committee members are selected by the graduate advisor upon request and after consultation with the student. The student must arrange for one of these other committee members to be the “second reader” of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date of the examination and notifying the Graduate Program Administrator at least two weeks prior to the date, and is responsible for distributing copies of the dissertation to the committee members — after it has been approved by the thesis advisor — at least two weeks before the examination. Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the examination.

Course Requirements
General Requirements
Sixty credit hours of courses are required, consisting of 30 hours of research in CHEM 8991, at least 15 hours in formal courses (see next section), and the remainder in other courses, such as summer courses, seminar courses, group meeting courses and research in CHEM 6901.

A minimum grade of B- is required in all courses counting for the PhD degree; students should also be aware that they must maintain a cumulative grade point average of 3.0 in all formal courses and an overall grade point average of 3.0, or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Probationary status must be removed within two semesters or a student will become ineligible to receive a PhD degree from the Department of Chemistry. Students on probation will not have a high priority for financial support.

A degree plan of courses taken and yet to be taken must be filed with the Graduate School by the end of the student’s third semester.

Selection of Formal Courses
All students will be required to take a minimum of 15 credit hours of formal courses. Formal courses are regularly scheduled, examined and graded; courses such as summer courses, seminar courses, group meeting courses and research in CHEM 6901 are not considered formal courses. Each student’s program plan for coursework must be approved by the student’s research advisor and the departmental graduate advisor. These formal courses must be approved prior to the end of the second semester, and students are encouraged to complete formal course requirements within their first three semesters.

Transfer of Credit
Up to 10 credit hours of graduate-level, formal coursework may be transferred from another higher education institution, subject to demonstrated proficiency in the subject(s) and written approval by the graduate advisor. Forms for this purpose can be obtained from the Graduate Program Administrator.

Formal Application of Admission for Candidacy for the PhD Degree
All students must submit a formal application for admission to candidacy for the PhD degree by the end of the third semester on forms that can be obtained from the Graduate Program Administrator. This Graduate School requirement should be fulfilled even though students have not completed all their formal coursework. After filling in the form indicating graduate courses taken and to be taken, it should be approved and signed by the student’s research advisor and then the graduate advisor.

PhD students shall have passed their Cumulative Exams and the Oral Comprehensive Examination before they may be admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.
Research Requirements
The results of a completed research program are submitted as a thesis for the final examination described above. Some students may pursue their PhD research in a laboratory outside of the department (e.g., JILA, NOAA, etc.) with the approval of the graduate advisor. In this case, the student must find a surrogate advisor in the department who agrees to monitor the activity of the student. It is recommended that meetings between the surrogate advisor, student and day-to-day advisor be frequent, perhaps in the form of a group meeting.

Time Limit
Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of coursework in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 992) section.

Classics
The Department of Classics is home to one of the most vibrant programs at the University of Colorado Boulder. Students at every level in the department are challenged to acquire a set of skills in the analysis and presentation of diverse forms of evidence that stand to serve them in their daily, civic and professional lives.

The field of Classics is multicultural; it involves the study of the civilizations of ancient Greece and Rome, but also of the many peoples with whom the Greeks and Romans interacted in central and eastern Europe, north Africa, Egypt and the Middle East.

The field of Classics is interdisciplinary because faculty and students in the department cross the boundaries of literature, philosophy, material and visual culture, history and religion to study the world of antiquity. Classics also covers area studies because of the broad sweep of the Mediterranean basin and the regions that border it that our field encompasses. The department offers courses in language and literature, ancient history, philosophy, and art and archaeology within several programs of study at the undergraduate and graduate levels.

Course codes for this program are CLAS, GREK and LATN.

Master's Degree
- Classics - Master of Arts (MA) (p. 1089)

Doctoral Degree
- Classics - Doctor of Philosophy (PhD) (p. 1091)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

**CLAS 5021 (3) Athens and Greek Democracy**
Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and HIST 4021
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

**CLAS 5031 (3) Alexander the Great and the Rise of Macedonia**
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and HIST 4031
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

**CLAS 5041 (3) Classical Greek Political Thought**
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and HIST 4041 and PHIL 4210
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

**CLAS 5051 (3) The Roman Empire**
Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and HIST 4091
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

**CLAS 5099 (3) Ancient Greek Sculpture**
Understanding the Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4099, ARTH 4099 and ARTH 5099
Grading Basis: Letter Grade

**CLAS 5101 (3) Greek and Roman Slavery**
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4101 and HIST 4101

**CLAS 5109 (3) Ancient Italian Painting**
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4109 and ARTH 4109 and ARTH 5109
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

**CLAS 5110 (3) Greek and Roman Epic**
Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and HUMN 4110
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought
CLAS 5119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4119 and ARTH 4119 and ARTH 5119
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5120 (3) Greek and Roman Tragedy
Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and HUMN 4120
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4129 and ANTH 5129 and ARTH 4129
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5130 (3) Greek and Roman Comedy
Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and HUMN 4130
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4139 and ARTH 4139 and ARTH 5139
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5140 (3) The Greek and Roman Novel
Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and HUMN 4131
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5149 (3) Greek Cities and Sanctuaries
Examine Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and ARTH 4149
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5159 (3) Hellenistic Art and Archaeology
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5159
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and ARTH 5169
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5179 (3) City of Athens
Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5179
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5189 (3) City of Rome
Explores in detail the architecture, sculptures, coins, frescoes and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Examines the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5189
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and ARTH 4199
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology
CLAS 5209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and ARTH 4209
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4229 and ARTH 4229 and ARTH 5229
Additional Information: Departmental Category: Art and Archaeology

CLAS 5269 (3) Art and Archaeology of the Ancient Near East
Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4269 and ARTH 4269 and ARTH 5269
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

Departmental Category: Asia Content

CLAS 5761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4761 and HIST 4761 and HIST 5761
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5840 (1-3) Graduate Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 6109 (3) Topics in Critical Theory and Ancient Art and Archaeology
Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 6952 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Classical Philology

CLAS 7011 (3) Seminar in Ancient History
Examines topics in ancient Greek and Roman history at an advanced seminar level.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 7012 (3) Graduate Seminar
Topic specified in online Schedule Planner.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Classical Philology

CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology
Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 7840 (1-3) Graduate Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 8992 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Additional Information: Departmental Category: Classical Philology

GREK 5013 (3) Topics in Greek Prose
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).
Equivalent - Duplicate Degree Credit Not Granted: GREK 4013
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

GREK 5023 (3) Topics in Greek Poetry
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).
Equivalent - Duplicate Degree Credit Not Granted: GREK 4023
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek
GREEK 5093 (3) Survey of Greek Literature
Greek literary history in ancient Greek from Homer to the Hellenistic age.
Equivalent - Duplicate Degree Credit Not Granted: GREEK 4093
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

GREEK 6003 (3) Graduate Reading
Author or topic specified in the online Schedule Planner.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

GREEK 6843 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

LATN 5014 (3) Topics in Latin Prose
Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).
Equivalent - Duplicate Degree Credit Not Granted: LATN 4014
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

LATN 5024 (3) Latin Prose Composition
Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.
Equivalent - Duplicate Degree Credit Not Granted: LATN 4024
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

LATN 5044 (3) Topics in Latin Poetry
Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).
Equivalent - Duplicate Degree Credit Not Granted: LATN 4044
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

LATN 5824 (3) Latin Teaching Methods: Open Topics
Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.
Equivalent - Duplicate Degree Credit Not Granted: LATN 4824
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

LATN 6004 (3) Graduate Reading
Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

LATN 6844 (1-3) Graduate Independent Study
Formerly CLAS 6844.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Classics - Master of Arts (MA)
Candidates will choose one of the following five concentrations: (1) Greek, (2) Latin, (3) Classical Art and Archaeology, (4) Classical Antiquity, or (5) Teaching of Latin.

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The MA degree alone does not satisfy the state requirements for certification.

For more information, visit the department's Graduate Degrees in Classics (http://www.colorado.edu/classics/graduate/graduate-degrees-classics/) webpage.

Bachelor's–Accelerated Master's Degree Program
Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Classics - Bachelor of Arts (BA) (p. 229).

Requirements
The degree requirements listed here are subject to change. Students wishing to pursue graduate work in classics should visit the department
website (https://www.colorado.edu/classics/graduate/) for the most up-to-date degree requirements.

Students must complete 30 credit hours of coursework (10 courses), at least 21 of which must be taken at CU Boulder. All courses must be at the 5000 level or above. Subject to approval by the Associate Chair for Graduate Studies, 6 hours of coursework may be taken in departments other than Classics. Students may earn the MA degree in classics through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (http://www.colorado.edu/graduateschool/academics/graduation-requirements/) webpage).

Students will meet with the Associate Chair for Graduate Studies at least twice a year to guarantee that they are on track to meet these requirements.

Concentrations

Students may earn an MA in classics with a concentration in one of the following options below.

**Greek or Latin**

**Plan I**

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 18 hours in Greek and/or Latin.
  - 6-9 hours of student’s choice (including classes outside of the department, in consultation with the graduate advisor).
  - 4-6 hours of thesis credit.
- **Thesis** (to be completed during 4th semester of graduate study)
- **Comprehensive Examination** (upon submission of thesis): 4 hour written examination, consisting of translation and analysis of texts in the major language. This will be followed by a one-hour oral examination based upon the thesis. The translation examination will consist of two out of three prose passages and two out of three verse passages for a total of c. 100 lines. All passages will be drawn from the relevant (Greek or Latin) MA reading list. Students may fail the exam once.

**Plan II**

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient history or classical archaeology for the 4-6 thesis hours of Plan I. The written portion of the Comprehensive Examination is the same as in Plan I (as above); the oral exam will focus on coursework and the reading lists. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

**Classical Art and Archaeology**

**Plan I**

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 6 hours of Greek and/or Latin
  - 15 credit hours of ancient, classical, and/or medieval art and archaeology.
  - 3-6 hours of student’s choice
  - 4-6 hours of thesis credit
- **Thesis** (to be completed during 4th semester of graduate study)
- **Slide Identification Exam**: A one-hour slide identification exam must be passed in advance of the Comprehensive Examination.
- **Comprehensive Examination** (upon submission of thesis): Candidates must pass written and oral examinations in the fields of Greek art and archaeology and Roman art and archaeology. The three-hour written exam will be based on candidates’ coursework and the reading lists. The oral exam will explore further aspects of candidates’ understanding of theories, methods, and material culture, based primarily on the thesis.

**Plan II**

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient, classical, and/or medieval art and archaeology or graduate-level language for the 4-6 thesis hours of Plan I. The Slide Identification Exam and the Comprehensive Examinations are the same as in Plan I (as above), except that the oral examination focuses on understanding of theories, methods, and material culture gained through coursework and the reading lists rather than a thesis.

The faculty strongly recommend that students planning to apply for PhD programs in classical archaeology attain graduate-level proficiency in both Greek and Latin. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.
Teaching of Latin Plan II only

Note: Students entering the MA in classics with a concentration in the teaching of Latin program who have not yet received teaching certification at the secondary level are encouraged to do so through the School of Education (https://www.colorado.edu/education/). Classes in the program can be taken concurrently with classes in the School of Education. Generally, it takes three years to fulfill the requirements of both qualifications, if they are embarked upon concurrently. The MA in classics alone does not satisfy the state’s requirements for certification. Many students elect to pursue certification after completing the degree. Students should contact the Office of Student Services in the School of Education for further information about teaching certification. For information about licensure through the School of Education, see the Secondary Latin Teacher Licensure Program Form (https://www.colorado.edu/classics/sites/default/files/attached-files/pba_edlt_9.27.2016.pdf).

• A minimum of 30 hours of 5000-level credit or above, to be distributed as follows:
  • 12 hours of Latin
  • 3 hours of workshop in Latin Teaching Methods.
  • 3 hours of Roman History
  • 9 hours of student's choice
  • 3 hours of Special Teaching Project covering the planning, teaching, and evaluation of a sequence of approximately 10 to 15 lessons.
• Special Teaching Project (to be completed during the 4th semester of graduate study). This may be extended if the student is pursuing teaching certification concurrently.
• Comprehensive Examination (upon submission of Special Project): A three hour written Latin translation examination, and a one-hour oral comprehensive examination on teaching methods and the special project.

Electives

The following is a comprehensive list of classics graduate courses, any of which can serve as electives depending on concentration.

Classics - Doctor of Philosophy (PhD)

The PhD in classical languages and literatures is founded on mastery of Greek and Latin, develops the student's ability to pursue independent scholarly research through seminars and advanced work on special topics, and culminates with the dissertation.
Students take courses and seminars on major ancient authors and genres, Greek and/or Latin prose composition, and such special topics as literary criticism, epigraphy, paleography and numismatics.

For more information, visit the department’s Doctor of Philosophy in Classics (http://www.colorado.edu/classics/graduate/graduate-degrees-classics/phd/) webpage.

**Requirements**

Candidates for the PhD in classics must meet the following requirements:

1. A minimum of 42 credit hours of coursework at the 5000 level or above (excluding thesis and accelerated courses). Coursework completed in the MA program at the University of Colorado, or up to 21 credit hours of graduate credit transferred from another institution, may be applied toward this requirement. Courses should be distributed as follows:
   a. Four 7000-level graduate seminars (at least one each in Greek and Latin).
   b. Two courses in ancient history and/or classical archaeology.
   c. One course in either Greek or Latin prose composition.
   d. Two courses in special fields such as epigraphy, law, linguistics, literary theory, medieval studies, palaeography, papyrology, philosophy or religion, as approved by the associate chair for graduate studies.

2. A minimum of 30 credit hours of doctoral dissertation with no more than 10 of these credit hours in any one semester. No more than 10 dissertation credit hours may be taken preceding the semester of taking the oral comprehensive examination. Up to 10 credit hours may be taken during the semester in which the student passes the comprehensive examination.

3. A reading knowledge of German and one other modern foreign language (normally Italian or French). Proficiency is tested by a one-hour written translation test using a dictionary. Students may take a foreign language exam at any time by arrangement with the associate chair for graduate studies. Students are encouraged to pass both modern language exams before the end of the second semester in the PhD program.

4. **Preliminary Examinations in Greek and Latin.** Two written examinations of four hours each, each consisting of translation and analysis of texts. The translation portion of each exam will consist of two out of three prose passages and two out of three verse passages for a total of about 100 lines. All passages will be drawn from the PhD reading list. Each written examination will be followed by a one-hour oral examination that covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history. There will be two administrations of each exam per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student’s chosen specialization, which should coincide with the student's intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.

5. **Comprehensive Examination.** Two written examinations of three hours each on two topics or authors, chosen in consultation with the graduate committee, to be chosen from the following broad areas: language and literature, ancient history, archaeology, philosophy or religion. In selecting the topics for these examinations, students are required to demonstrate balance in the fields of Greek and Roman culture, as determined by the graduate committee. The written comprehensive examinations will be administered twice per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student’s chosen specialization, which should coincide with the student’s intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.

6. **Dissertation Prospectus.** To be approved as described in the PhD requirements, preferably by the end of the fifth semester in the PhD program.

7. **Dissertation.** To be completed by the end of the tenth semester in the PhD program.

8. **Final Examination (upon submission of dissertation).** Two hours of oral defense of the dissertation.

**Classics Graduate Courses**

The following is a comprehensive list of classics graduate courses which may be used to meet the requirements for the PhD in classics.

Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education, and multimedia services.

The Institute of Cognitive Science (ICS) currently offers two graduate certificate programs: one has a general science focus, the other focuses on human language technology. The cognitive science academic certificate programs are interdisciplinary programs for graduate students in the following departments (see the undergraduate Cognitive Science (p. 231) page for certification at the undergraduate level):

- Psychology & Neuroscience
- Philosophy
- Linguistics
- Education
- Speech, Language and Hearing Sciences
- Computer Science
- Architecture, Planning and Design (Denver Campus)

For more information, visit the Institute of Cognitive Science (https://www.colorado.edu/ics/graduate-programs/) website or call Donna Caccamise at 303-735-3602.

Doctoral Degree

- Cognitive Science - Doctor of Philosophy (PhD) (p. 1094)

Certificates

- Cognitive Science - Graduate Certificate (p. 1190)
- Human Language Technology - Graduate Certificate (p. 1192)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Banich, Marie (https://experts.colorado.edu/display/fisid_120646/)
Professor; PhD, University of Chicago

Bidwell, Cinnamon (https://experts.colorado.edu/display/fisid_155117/)
Assistant Professor; PhD, University of Colorado Boulder

Carter Carston, Ronald McKell (https://experts.colorado.edu/display/fisid_154921/)
Assistant Professor; PhD, California Institute of Technology

Cordes, Dietmar
Associate Professor Adjunct

D'Mello, Sidney (https://experts.colorado.edu/display/fisid_159117/)

Assistant Research Professor; PhD, Oakland University
Cognitive Science - Doctor of Philosophy (PhD)

The Institute of Cognitive Science Academic Program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. These programs are administered by CU Boulder’s Institute of Cognitive Science (ICS).

Graduate students in cognitive science are admitted to graduate programs in participating departments that have ICS faculty, and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of academic programs of ICS. To be admitted, they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty fellow. Students who enter the Graduate School without a master’s degree may be admitted to the program upon completion of their first year of study; students with a master’s degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary coursework and courses outside their home department. The courses must be offered by the following departments: Computer Science; Education; Integrative Physiology; Linguistics; Philosophy; Information Science; Psychology and Neuroscience; Speech, Language, Hearing Sciences; Architecture and Planning; or a department in which there is an ICS faculty fellow.

Details about requirements for the degree and certificate programs can be obtained through the director of academic programs for ICS or by contacting the ICS main office.

Requirements

Combined PhD Requirements

Students must complete 30 credit hours of cognitive science courses, including 9 credit hours of required core courses and 21 credit hours of elective courses.

For more program information, visit the institute’s Cognitive Science Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/) webpage.

For a list of available elective courses, visit the institute’s Course Catalog (http://www.colorado.edu/ics/graduate-programs/course-catalog/) webpage.

Interdisciplinary Thesis

The original contributions of the dissertation research should exploit state-of-the-art methods from the perspective of at least two disciplines. Students are encouraged to have their doctoral research co-supervised by two ICS fellows representing different disciplines.

Dissertation

Students must complete 30 hours of dissertation research.

Triple PhD Requirements
