

Seeking Study Participants

We are recruiting participants for a research study who are fluent English speakers, are over the age of 18, and who are students, staff, or faculty at the University of Colorado Boulder.

These studies take place at the Center for Innovation and Technology, room #184G. In this type of study we investigate collaborative problem solving in science, technology, engineering, and mathematics domains. In the study you will be working with other participants on a series of group problem solving tasks.

During the study we'll be using cameras and microphones to record the interactions you and your group have with one another and with the tasks at hand. We'll also use eyetracking to measure your gaze patterns during the experiment. Collecting video and audio data of you and your group's interactions is mandatory for this study. If you do not want to be recorded with video and microphone, you may decide not to participate in this study at any time.

These studies last 2.5 hours each and the pay is \$25 per hour (\$62.50 total). You cannot earn course credit through this study.
