Webinar #2
Webinar Series: COVID Research Solutions for Campus
Epidemiology, Monitoring and Awareness

Panelists
Daniel Larremore—Assistant Professor, Computer Science (BioFrontiers Institute)
Matthew McQueen—Associate Professor, Integrative Physiology (Institute of Behavioral Genetics)
Austin Jamar “JB” Banks—Associate Vice Chancellor, Student Affairs; Dean of Students
Katherine Erwin—Chief Human Resources Officer, Strategic Resources and Support
Jon Leslie—Senior Associate Vice Chancellor of Strategic Communications

Moderator—Terri Fiez—Vice Chancellor for Research and Innovation
Mobility Matters

Transmission is **spatial**. We carry our viruses wherever we go.

**Facebook Data for Good** gives our research team access to data on mobility & population density.

This **heat map** shows the areas where people were following the stay-at-home orders in March and April.

This information can go into **spatial models of disease spread** to help the Department of Health know where we risk outbreaks and clusters.

Note: all data are aggregated and anonymized.
Protect Our Herd

Be safe. Be you. Protect our herd.
We each play a role.

How to Protect Yourself and Others

Buff's, we each have a role in keeping our community safe and preventing the spread of COVID-19. All Buffs—students, faculty and staff—are expected to fully honor the policies, protocols and guidelines outlined here. Those requirements are for you, for our community and for our herd at large.
Webinar #3
COVID Research Solutions for Campus

Wednesday, Aug. 12 Health Assessment, Surveillance and Testing (12-1:15 p.m.)

https://www.colorado.edu/rio
