Community Outreach:

- As Senior Executive for Global STEM Initiatives in the Provost’s Office, I have worked extensively with the North Minneapolis Community to, among other things, bring the University to the people in what we termed “Neighborhood U,” and to develop the concept of a North Minneapolis Gateway and Oasis (NM-GO). I also became a member of the MN STEM Compass Advisory Board; guided students from the College of Biological Sciences to stage a STEM outreach event; and built a partnership with BestPrep.
- As Dean of the College of Science and Engineering at the University of Minnesota, I partnered with student organizations – including the Society of Women Engineers (SWE) the National Society of Black Engineers (NSBE) – to start a hands-on STEM outreach program in K-12 public schools in the Minneapolis-St Paul area. I have also recruited some Fortune 500 companies (Boston Scientific, 3M and Medtronic) to underwrite these outreach efforts and provide logistics for getting college students to the K-12 schools.
- As Dean of the College of Engineering and Physical Sciences at the University of New Hampshire, I challenged and then facilitated the Society of Women Engineers (SWE) to start a hands-on STEM outreach program in 13 K-12 public schools in southern New Hampshire (Fall 2012); this program is now part of the College’s DNA. In Spring 2014, I expanded the outreach activities to another group of schools in partnership with the UNH chapter of the National Society of Black Engineers (NSBE), particularly the urban area of Manchester. We created an annual event called *STEMfest* to bring the University to K-12 students in remote regions of the state in partnership with student volunteers we named “STEMmbassadors.”
- Speaker for “*Café Scientifique*” on the Universe and Solar System at Bishop Cipriano High School, Kampala, Uganda (September 2010)
- Speaker at the Climate Change Student Summit – Videoconference with middle school students in Ann Arbor, Anchorage and Chicago (April 2010)
- Talk about records of climate change in Antarctic ice at the Science at the Poles Museum Theme Semester; Exhibit Museum, University of Michigan (April 2008)
