

Speech, Language, and Hearing Clinic

UNIVERSITY OF COLORADO **BOULDER**

VOICE ASSESSMENTS AND TREATMENT

Do you experience difficulty with voice pitch, loudness, rate, inflection or quality?

Voice problems can occur due to a variety of medical and non-medical causes. You may benefit from an assessment and/or treatment by a speech-language pathologist (SLP) at the Speech, Language, and Hearing Clinic at CU Boulder. SLPs will listen using instrumental measurements and provide recommendations and treatment options.

We provide a variety of voice services including Lee Silverman Voice Treatment (LSVT) for people with Parkinson's Disease, and voice training for people who are transgender.

To inquire about services and cost, please feel free to contact us!
