

Design your own rocket!

Stickers are amazing! You see them all around CU, on water bottles, computers, and skateboards. Even NASA has stickers on everything they build and launch! The Space Minor would love to see how you would design your rocket with custom stickers.

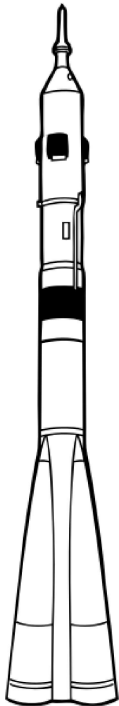

Instructions: Choose either one of the rockets below or one of your choosing and trick it out with all kinds of stickers that describe who YOU are!

We want to see your designs! Post them on social and tag [@cuspacebuff!](#)

You may get to win some cool prizes!!!

Below are a few examples of rockets your fellow classmates have already designed. You can put anything you want on your rocket, as long as it represents you!

Choose Any kind of Rocket you'd like to design, here are a few examples:

Here are some examples from our Space Minor Ambassadors!
